2025–2029 TIP

Transportation Planning Organization (TPO) for the Miami Urbanized Areas

DRAFT

This document was prepared by the Transportation Planning Organization for the Miami Urbanized Area in collaboration with the Florida Department of Transportation; Expressway Authority; Florida's Turnpike Enterprise; South Florida Regional Transportation Authority; Miami-Dade County Office of Strategic Business Management; Miami-Dade Department of Transportation and Public Works, Miami-Dade County Aviation Department; Miami-Dade Seaport Department; Miami-Dade League of Cities; Miami-Dade County Department of Regulatory and Economic Resources; and the Miami-Dade County Developmental Impact Committee.

The Miami-Dade TPO complies with the provisions of Title VI of the Civil Rights Act of 1964, which states: No person in the United States shall, on grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving federal financial assistance. It is also the policy of the Miami-Dade TPO to comply with all the requirements of the Americans with Disabilities Act. For materials in accessible format please call (305) 375-4507.

The preparation of this report has been financed in part from the U.S. Department of Transportation (USDOT) through the Federal Highway Administration (FHWA) and/or the Federal Transit Administration (FTA), the State Planning and Research Program (Section 505 of Title 23, U.S. Code) and Miami-Dade County, Florida. The contents of this report do not necessarily reflect the official views or policy of the U.S. Department of Transportation.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

EXECUTIVE SUMMARY

DRAFT

Miami-Dade Transportation Planning Organization

TIP • FISCAL YEARS 2024/2025 TO 2028/2029

EXECUTIVE SUMMARY

The Transportation Improvement Program (TIP), a major federally required document of the Transportation Planning Organization (TPO) for the Miami Urbanized Area, specifies proposed transportation improvements to be implemented in Miami-Dade County over the coming five years. The primary emphasis of the TIP is on the first three years of the program. As required by federal regulations, projects receiving federal funds during the October 1, 2024 to September 30, 2029 time period are to be drawn from those listed in this document. In addition, projects not using federal funds, but which are part of the area's program of improvements, are shown in the TIP. Projects shown for FY 2026 and beyond, regardless of their funding source, are included as proposed. While it is anticipated that most of these projects will be implemented as programmed, they will be periodically evaluated by the TPO as the TIP is updated or amended as necessary. The projects in the TIP are also shown for a five-year time period. While the emphasis is on the first three years, presenting a five-year span allows for a more systematic forecast of funding needs during a five-year planning cycle and provides a more comprehensive view of the program for public information purposes. Included in the TIP are Intermodal, Highway, Transit, Aviation, Seaport and Non-Motorized improvements costing $12.563 million.

DRAFT

Included are the following categories:

Funding Summary - Fiscal Years 2025 - 2029: ($s in millions rounded)

Highways - State Roads:				
Primary (FDOT)	$	5,054	--	40.2%
Turnpike	$	471	--	3.7%
GMX	$	313	--	2.5%
	$	5,837		46.5%
County Roads:				
Secondary	$	70	--	0.6%
Mobility Impact Fee	$	557	--	4.4%
People's Transportation Plan	$	22	--	0.2%
Private Sector		TBD	--	N/A
	$	649		5.2%
Local Option Gas Tax	$	-	--	0.0%
Transit	$	2,495	--	19.9%
Aviation	$	957	--	7.6%
Seaport	$	2,516	--	20.0%
SFRTA	$	-	--	0.0%
Other	$	109	--	0.9%
	$	6,077		48.4%
TOTAL	**$**	**12,563**		**100.0%**

The South Florida Regional Transportation Authority (SFRTA) 5-year funding for rail projects is allocated through FDOT District 4 (rail projects which are geographically located in Miami-Dade County are also included in this funding allocation).

The Secondary, Mobility Impact Fee, and the People's Transportation Plan (PTP) Programs contain a number of key projects in the County Highway / Transit System costing $649 million. Aviation improvements involve Miami International, Opa-Locka and Tamiami airports. Transit improvements involve a broad range of public transportation services and facilities. Seaport improvements consist of numerous new port facilities and major renovations and improvements to existing facilities. Funding for the implementation of several intermodal projects is also shown, as well as projects in the "non-motorized" category which includes improvements associated with pedestrian and bicycle facilities.

On June xx, 2024, the TPO Governing Board approved the Fiscal Years 2025-2029 TIP by Resolution #xx-2024. The TPO concurrently produced the annual List of Priority Projects (LOPP) for TPO Governing Board approval in June 2024. The LOPP is compiled and submitted to FDOT early in order to maximize review and approval of funding in the tentative Work Program and inclusion in the future years' TIP. The TPO, will continue to assess critical transportation needs and prioritize essential projects for the mobility of people and goods in Miami-Dade County. Projects included in the 2025-2029 Transportation Improvement Program are selected in a cooperative manner with transportation partners as per requirements of C.F.R. 450.332(b).

DRAFT

EXECUTIVE SUMMARY

On December 4, 2015, President Obama signed into law the Fixing America's Surface Transportation Act, or "FAST Act". Overall, the FAST Act largely maintains MAP-21 program structures and funding shares between highways and transit. The FAST Act builds upon the performance requirements enacted under MAP-21 by establishing timelines for State Departments of Transportation (DOTs) and MPOs to comply with the performance requirements. In compliance, the Miami-Dade TPO developed the Performance Management Report (Pages: PM-1 – PM-88), as a stand-alone document. This report is also summarized in this FY 2025-2029 TIP Executive Summary (Pages E-4 – E-8).

The projects and priorities in this TIP are consistent with those in the adopted 2045 Transportation Plan. Because the 2045 Plan was found to conform to federal regulations and the Florida State Transportation Improvement Plan (STIP), the TPO has found this TIP to also conform to all relevant laws, regulations and plans. Selected projects are from the prioritized projects found in the 2045 Miami-Dade Long Range Transportation (LRTP). The LRTP recommends phasing for surface transportation improvements classified into four categories:

Priority Period I - -Priority improvements to be constructed and opened to traffic by the year 2025. Funds for most of these improvements are already programmed in this Transportation Improvement Program.

Priority Period II - -Improvements where project development and funding efforts would take place between 2026 and 2030.

Priority Period III - -Improvements to be made between the year 2031 and 2035. In many cases, project development activities would need to commence in the 2026 and 2030 period, due to the amount of lead-time required to plan and implement a project.

Priority Period IV - -Improvements to be made in the latter part of the 25-year plan period (2036 to 2045). Includes projects responding to long-range mobility needs and roadway improvements constructed through the county and the Sub-division process, which may be earlier than the 25-year period of the 2045 LRTP Plan.

Note: All $ values represented in this document are in Year of Expenditure (YOE) dollars, as required by 23 CFR 450.324(h). "Project costs reported in the TIP are in Year of Expenditure (YOE) dollars, which takes into account the inflation rate over the five years covered by the TIP."

DRAFT

PUBLIC INVOLVEMENT

Public involvement for the development of the TIP is received through regularly scheduled meetings of the TPO Governing Board and its advisory committees. A typical TIP Development cycle, in Miami-Dade County, follows the following timeline:

- The TIP process begins at the start of each federal fiscal year on October 1st. FDOT District 6 and Florida's Turnpike Enterprise presents to advisory committees a very Tentative Five-Year Work Program document.
- During the month of November, the Citizen's Transportation Advisory Committee (CTAC) and the TIP Development Committee endorse the Tentative Five Year Work Program. November public hearings are also scheduled for review and input to the FDOT District 6 Tentative Work Program in Miami-Dade and Monroe Counties.
- In December, the Transportation Planning Council (TPC) and the TPO Governing Board endorse the Tentative Five-Year Work Program.
- By mid- December, the Interactive TIP web tool opens to county transportation stakeholder agencies.
- During the months of January through March of each year, the TIP Development Committee meets weekly to advance, review and approve a Draft TIP. These meetings are open to the public.
- By Mid-March to early April of each year, a printed Draft TIP Program document is available for Public review and input at the TPO Office. The Draft TIP is posted prominently on the TPO website at: http://www.interactip.com/ under TIP 2024 Documentation.
- By the end of April, a Citizen's TIP document is sent to CTAC and the TPC and a Draft TIP is posted to the TPO website for review and comment by the public. The Citizens' TIP is a citizen user-friendly color booklet that condenses the big picture projects of that year's TIP, provide pictures, renderings and maps and educates user as to what is the TIP and what projects are underway and which ones have been completed from the previous year's TIP. The current 2024 Citizen's TIP is prominently posted on the TPO website at: 2024 TIP Citizen's Version.
- Parallel to these efforts, the TPO has regularly scheduled meetings with the community where the Draft TIP is distributed. Favorable verbal comments have been received and citizens have expressed their excitement in having a Citizens' Version of the program.
- The Draft TIP is typically included as an information item on or around the May meeting agendas of the CTAC. This meeting is open to public for comments and input.
- CTAC initial review of the Draft FY 2025-2029 TIP took place this year at their April 3, 2024 meeting. TPC initially reviewed at their April 8, 2024 Meeting.
- The TIP is advertised for public hearing.
- The Final Draft TIP is presented for approval on the May agendas of the CTAC and TPC committees, respectively. These meetings are open to the public.
- TPC approved the FY 2025-2029 TIP at their June 17, 2024 meeting
- CTAC approved the FY 2025-2029 TIP at their June 20, 2024 meeting

DRAFT

- The TIP is regularly approved by the TPO Governing Board at either their May or June meeting. In Miami-Dade County, the TPO Governing Board approves the Program Priorities concurrently with the TIP. This early approval allows FDOT for an early review of TPO Program Priorities in the development of their Tentative Work Program cycle.
- TPO Governing Board approved the FY 2025-2029 TIP at their June 22, 2023 meeting.
- The Miami-Dade TIP was sent in June to funding agencies for their review and input.

PERFORMANCE MANAGEMENT

Performance management is a strategic approach to connect investment and policy decisions to help achieve performance goals. Performance measures are quantitative criteria used to evaluate progress. Performance measure targets are the benchmarks against which collected data is gauged. The Moving Ahead for Progress in the 21st Century Act (MAP-21) requires State DOTs and MPOs to conduct performance-based planning by choosing critical performance measures, setting quantitative targets, and programming projects to help achieve those targets. Performance-based planning ensures the most efficient investment of federal transportation funds by increasing accountability, transparency, and providing for better investment decisions that focus on seven areas: Safety, Pavement Condition, Bridge Condition, Highway Performance, Freight Movement, Traffic Congestion, and On-road Mobile Sources. The Traffic Congestion and On-road Mobile Sources measures do not apply to Florida. The Fixing America's Surface Transportation (FAST) Act supplemented the MAP-21 legislation by establishing timelines for State DOTs and MPOs to comply with the requirements of MAP-21. State DOTs establish statewide targets and MPOs have the option to support the statewide targets or adopt their own.

SAFETY PERFORMANCE MEASURES

The Highway Safety Improvement Program and Safety Performance Management Measures Rule (Safety PM Rule) was published in the Federal Register on March 15, 2016.

The rule requires that states establish targets for the following performance measures:

- Number of Fatalities;
- Number of Serious Injuries;
- Number of Nonmotorized Fatalities and Serious Injuries;
- Rate of Fatalities per 100M Vehicle Miles Traveled (VMT); and
- Rate of Serious Injuries per 100M VMT.

FDOT has adopted the "Vision Zero" target of zero for all the safety performance measures. The TPO approved Resolution #08-19 establishing the FDOT "Vision Zero" targets for calendar year 2020 on January 30, 2020.

DRAFT

The 2024 TIP has been developed to help move towards the safety target in the following ways:

1. The 2024 TIP is a subset of the 2045 Long Range Transportation Plan and is guided by the LRTP goals and objectives. LRTP Goal #2 is to "Increase the Safety of the Transportation System for All Users" and is supported by the following objectives:
   - Improve the safety of the transportation system,
   - Promote projects in high crash locations, and
   - Improve safety of the transportation system of the elderly and disabled, and
   - Provide educational opportunities to older adults to learn about TNCs.

2. The TPO's 2024 TIP Development Committee included representatives from the major transportation agencies and coordinated the preparation of the document. During the development cycle presentations were made to educate the committee members about performance management, the new federal requirements and the TPO's approach to incorporating performance management into the transportation planning process. The transportation agencies were asked to highlight the safety efforts that are included in their 2024-2028 programs.

In total, the 2024 TIP includes $95M programmed within FY 2024-2028 on 82 projects that improve safety and to support the achievement of the established safety targets. A list of the projects is included in the TPO's "Transportation Performance Management System Performance Report."

DRAFT

PAVEMENT CONDITION AND BRIDGE CONDITION

The final rule for the pavement condition and bridge condition performance measures was published on January 18, 2017. By Resolution #44-18 (approved Oct. 25, 2018) the TPO took action to support FDOT's pavement and bridge condition performance measure targets:

PAVEMENT CONDITION PERFORMANCE MEASURES	TARGET	
	2 YEAR	4 YEAR
Percent of Interstate Pavement in Good Condition	n/a	≥ 60%
Percent of Interstate Pavement in Poor Condition	n/a	≤ 5%
% Non-Interstate NHS Pavement in Good Condition	≥ 40%	≥ 40%
% Non-Interstate NHS Pavement in Poor Condition	≤ 5%	≤ 5%

BRIDGE CONDITION PERFORMANCE MEASURES	TARGET	
	2 YEAR	4 YEAR
Percent in Good Condition by Deck Area	≥ 50%	≥ 50%
Percent in Poor Condition by Deck Area	≤ 10%	≤ 10%

The 2024 TIP includes $375M programmed within FY 2024-2028 on 31 bridge improvement projects and $286M on 116 pavement improvement projects to support the achievement of the established targets. A list of the projects is included in the TPO's "Transportation Performance Management System Performance Report."

DRAFT

SYSTEM PERFORMANCE AND FREIGHT MOVEMENT PERFORMANCE MEASURES

The final rule for the National Highway System and Freight Movement performance measures was published on January 18, 2017. By Resolution #44-18 (approved Oct. 25, 2018) the TPO established these FDOT system performance and freight mobility performance measure targets:

NHS AND FREIGHT MOBILITY PERFORMANCE MANAGEMENT MEASURES	TARGET	
	2 YEAR	4 YEAR
Percent of person-miles traveled on the Interstate that are reliable	≥ 75%	≥ 70%
% of person-miles traveled on the non-Interstate NHS that are reliable	n/a	≥ 50%
Truck travel time reliability ratio (TTR) on the Interstate	≤ 1.75	≤ 2.00

The 2024 TIP includes $1.9B programmed within FY 2024-2028 on 128 projects that will improve mobility on the system to support the achievement of the established targets for mobility improvement performance. Included in the list of NHS performance projects is $193M programmed within FY 2024-2028 for 27 projects to improve mobility on the Interstate System.

The TPO's "Transportation Performance Management System Performance Report" includes the list of all projects.

DRAFT

COORDINATION WITH STATE AND FEDERAL DOCUMENTS

As part of the continuing coordination process to implement the new performance management requirements, the following documents are referenced in the development of the 2023 TIP:

RESOLUTION APPROVING FINAL TIP

DRAFT

DRAFT

DRAFT

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

INTRODUCTION

DRAFT

INTRODUCTION

PURPOSE

This document is prepared every year to fulfill Federal statutory requirements which provide that, as a condition to receive Federal funding, each urbanized area will have a continuing planning process that results in plans and programs consistent with the comprehensive development plan of the urbanized area. The purpose of this document is to provide a prioritization of projects covering a five-year period that is consistent with the LRTP, contains all transportation projects MPA funded with FHWA and FTA funds and regionally significant projects regardless of funding source. The priorities established by this document express the policy decision of the Transportation Planning Organization (TPO) as to the order in which transportation improvements will be advanced during the program period. This document also fulfills Federal requirements in that the included projects are derived from the area's 2045 Long-Range Transportation Plan (LRTP) for inclusion in the program and addresses program requirements relating to the federal transportation law passed in July, 2012 titled "Moving Ahead for Progress in the 21st Century Act (MAP-21)". On December 4, 2015, President Obama signed into law the Fixing America's Surface Transportation Act, or "FAST Act". Overall, the FAST Act largely maintained MAP-21 program structures and funding shares between highways and transit. It is a down-payment for building a 21st century transportation system. On November 15, 2021 President Biden signed the Infrastructure Investment and Jobs Act (IIJA) into law, creating a historic transportation investment that will be implemented during this 5-year TIP window. Access to a majority of the legacy infrastructure funding in place was authorized via Continuing Resolution for 2022.

The joint annual FDOT/TPO certification was completed in April 2023. The TIP and TIP process are also reviewed during the FHWA/FTA TPO quadrennial certification. The Miami-Dade TPO's quadrennial certification took place in April 2023. The next quadrennial certification is anticipated to take place in 2027. In addition to this TIP document, the TPO produces the TIP Citizens' Version, a user-friendly summary of projects in the TIP. The Citizens' Guide is available at: DRAFT Citizen's 2024 TIP. Transportation Performance Management is fully integrated into the TPO planning process. As the Performance Management process advances, the effectiveness of progress towards achieving the targets will be evaluated. The 2023 federal obligations for FDOT District Six projects are found listed in FDOT's Office of Work Program Annual Obligations Report at: FDOT - OFFICE OF WORK PROGRAM - ANNUAL OBLIGATIONS REPORT

DRAFT

TRANSPORTATION PLAN

The Transportation Planning Organization Board adopted under TPO Resolution #48-19, on September 26, 2019, the 2045 Miami-Dade LRTP. Projects from the area's adopted TPO 2045 LRTP have been included for advancement during this program period. The next major update of the LRTP to the year 2050 is underway and scheduled for adoption by September 2024. Major activities included are: support facilities for Metrorail, express bus service, interstate highway projects, congestion management and non-motorized projects; express transit on managed lanes; arterial street improvements, aviation and seaport facilities, and additional bus transit and paratransit improvements, the construction of major intermodal facilities and the deployment of Intelligent Transportation System applications. The recommended improvement priorities of the adopted Long Range Transportation Plan provide the basis for preparing this document. The Plan presents the logical and systematically phased development of the area's transportation network and services to the year 2045. Transportation System Management (TSM) projects are proposed to be continued or expanded during Fiscal Years 2024/2025 through 2028/2029. The Miami-Dade Secondary Road Program and Road Impact Fee Program contain projects that are supportive of the areawide TSM effort. These included traffic flow improvements, provisions for preferential treatments of high occupancy vehicles where appropriate, improvements to intersection geometrics, lighting safety projects, and other related projects which provide for greater safety and better management of traffic flow and are supportive of on-going transportation demand management activities. TSM projects are consistently included in the preparation of project-adopted proposals in keeping with the TPO's commitment to fully develop TSM as a policy and investment strategy to continually enhance the mobility of the urban population. The Year 2045 Transportation Plan stresses the achievement of long-standing and fundamental planning objectives. In addition to land-use considerations, the Plan addresses related issues involving the quality of the environment and the conservation of limited natural resources. These concerns are particularly important as revisions to the Adopted Components of the Comprehensive Development Master Plan (CDMP) for Miami-Dade County are periodically considered. An extensive public participation process is conducted during all major stages of Plan preparation and adoption and during periods when Plan revisions are formally considered.

Citizens review activities are coordinated by the Citizens Transportation Advisory Committee (CTAC), a body appointed by the TPO Board to provide formal input in all pertinent transportation issues.

COMPREHENSIVE DEVELOPMENT MASTER PLAN

The Transportation Improvement Program (TIP), as set forth in this document, is generally consistent with the Adopted Components of the Comprehensive Development Master Plan (CDMP) for Miami-Dade County, Florida, as amended through November 16, 2023. The CDMP contains twelve Plan elements. The Transportation Element specifically provides for an integrated multimodal transportation system for the circulation of motorized and non-motorized traffic in Miami-Dade County. The goal of the Transportation Element is to develop and maintain an integrated multimodal transportation system to move people of all ages and abilities and goods in a manner consistent with overall Countywide land use and environmental protection goals, and integration of climate change considerations in the fiscal decision-making process, objectives and policies, and to provide a comprehensive approach to the transportation system needs of the County by addressing all modes of transportation – pedestrian and

DRAFT

bicycles facilities, traffic circulation, mass transit, aviation and ports. The Transportation Element is divided into five subelements: Traffic Circulation, Mass Transit, Aviation, Port of Miami River, and PortMiami Sub elements. The Traffic Circulation Subelement addresses the needs of automobile traffic, bicyclists and pedestrians; the Mass Transit Subelement addresses the need to promote and expand the public mass transit system and to increase its role as a major component in the County's overall transportation system; the Aviation Subelement addresses the need for the expansion, development and redevelopment of the County's aviation facilities; and the Port of Miami River and PortMiami Subelements promote maritime business and traditional maritime related shoreline uses along the Miami River and PortMiami and their expansion needs. A key feature of the Traffic Circulation and Mass Transit Subelements is the establishment of level-of-service standards to ensure that adequate capacity will be available in all modes to service new development and redevelopment in Miami-Dade County. The ability to maintain the level-of-service standards has become a primary determinant for addressing relative priority among the various transportation improvement needs.

The County is striving to provide roadway, transit, sidewalks, and bicycle lane improvements along congested corridors in order to develop a multimodal transportation network designed to include bus turnout bays, bus shelters, managed lanes, pedestrian and bicycles facilities, and mass transit services.

One of the most significant and far reaching provisions of Florida's "Community Planning Act (2011)" is the requirement that all local comprehensive plans contain a Capital Improvement Element (CIE). The intent of this requirement is to make the comprehensive plan fiscally feasible and to provide a schedule of capital improvements which includes any publicly funded federal, state, or local government projects, and may also include privately funded projects for which the local government has no fiscal responsibility. Projects which are necessary to ensure that any adopted level-of-service standards are achieved and maintained (sec. 163.3180(1)(b), F.S.) for the 5-year period must be identified as either funded or unfunded and given a level of priority for funding (sec. 163.3177(3)(a), F.S.). For this reason, the highway capacity-type of improvements on the County highway system, and the transit, aviation and seaport projects, which are programmed in the TIP, are also included in the County's CDMP Capital Improvements Element's (CIE) 6-year capital improvements schedule. Additionally, CDMP Policy TE-1H requires transportation plans to take into consideration climate change adaptation and mitigation strategies through project review, design, and funding for all transportation projects.

Every seven years, the Comprehensive Development Master Plan (CDMP) is reviewed and updated as required per Chapter 163 of the Florida Statutes, a process known as an Evaluation and Appraisal Report (EAR). The EAR includes an evaluation of the progress the County has made in implementing the goals, objectives, policies, maps and text of the CDMP and also recommends changes. The Department of Regulatory and Economic Resources (RER), Planning Division completed the EAR process in 2018 after an extensive public participation plan involving social media, advertising, a survey, and over six workshops held in June 2017. RER received over 420 public comments and over 1,100 survey responses. Information about the EAR process, presentations made, and public comments received, are posted on the Department's website at: https://www.miamidade.gov/planning/ear-2018.asp. Based on the EAR review recommendations, multiple CDMP amendments have already been processed and adopted in the CDMP.

DRAFT

PUBLIC INVOLVEMENT/PUBLIC HEARING

Reasonable opportunity for public comment was provided in accordance with the requirements of 450.316(b)(1) and, in maintenance TMAs, an opportunity for at least one formal public meeting during the TIP development process. This public meeting may be combined with the public meeting required under 450.322 (c). The TIP process begins at the start of each fiscal year. Correspondence is sent to all municipalities, involved agencies and private parties informing them that the process is to begin, providing them with the tentative scheduling and soliciting their input. The Citizens Transportation Advisory Committee (CTAC) provides a forum for citizens to evaluate the recommendations developed through the TPO's transportation planning and programming process. One of the main responsibilities of the CTAC is to ensure that proposed transportation projects are responsive to the community's perceived needs and goals. The TPO provides adequate public notices for public hearings so as to allow community citizens the opportunity to approve documents such as the TIP. The proposed TIP is published and made readily available for review and comment. Similarly, the approved TIP is published and made readily available for information purposes. The functional responsibilities of participating agencies are needed to insure the continuing development and operation of urban transportation system facilities. The 45-day public review period began on March 18, 2024, and concluded on May 2, 2024. All comments received during this period were collected, archived, and included in the final adoption agenda materials for the TPO Governing Board's review prior to approval.

PROGRAM FUNDING

The TIP categorizes all transportation improvements and identifies priorities, which establish multi-year fiscal programming. The biennial elements represent the list of projects, which are proposed for implementation during the first program phase and are viewed as the "Capital Improvements" budget for transportation facilities. This TIP document identifies all sources of funding which are known or are anticipated to be available during the program period. Program costs are consistent with current estimates of available revenue. Priorities in the program are identified by relative staging of projects for implementation during a particular year, consistent with funding availability and production constraints. Most Highway funding comes from gasoline taxes, motor vehicle fees, and other automobile-related "user fees". Major sources of existing and potential highway funding sources include: Federal Gas Tax, State Motor Fuel Tax, Local Option Gas Tax, Voter Gas Tax, Motor Vehicle Fees, Impact Fees and Tolls. Transit funding is derived from a host of Federal, State and local programs, including the ½ cent sales tax increase approved by voters in November 2002. For rail and bus projects, funding is mostly sought through Federal and State grants. Transit operating costs are supported largely through local revenue sources.

SUMMARY OF TIP PROJECTS

The projects in the FY 2025-2029 TIP have been grouped into major categories, with order of priority established within each category insofar as possible or applicable. The groupings are established primarily by virtue of funding source and implementing responsibility. The thrust of Miami-Dade County's effort to enhance the mobility of the urban population, achieve a balanced transportation system, to meet resiliency goals, to improve air quality, as well as to preserve or enhance the physical and social environment of the community, is evident when it is noted that around 19.5% of the

DRAFT

FY 2025-2029 program budget is devoted to public transit projects. It should be noted that Primary, Interstate and Turnpike categories combined constitute about 50% of the approximate $11.65B in the FY 2025-2029 program budget.

PLAN PERIODS

The 2045 Miami-Dade Transportation Plan - Long Range Element, recommended phasing for highway capacity improvements is classified into four Plan Periods:

Plan Period I

Priority improvements to be constructed and opened to traffic by the year 2025. Includes those projects needed to respond to existing traffic problems. Funds for most of these improvements are already programmed in this Transportation Improvement Program.

Plan Period II

Improvements where project development and funding efforts would take place between 2026 and 2030.

Plan Period III

Improvements to be made between the year 2031 and 2035. In many cases, project development activities would need to commence in the 2031 and 2025 period, due to the amount of lead-time required to plan and implement a project.

Plan Period IV

Improvements to be made in the latter part of the 25-year plan period (2036 to 2045). Includes projects responding to long-range mobility needs and roadway improvements constructed through the county and the Sub-division process, which may be earlier than the 25-year period of the 2045 LRTP Plan.

Because of the uncertainties of funding availability and the time required to develop a detailed project, the specific time periods and dates indicated in the above priority listing should be considered only as guidelines for project implementation.

The LRTP Update to the Year 2045 was approved by TPO Governing Board at its September 26, 2019, meeting.

AMENDMENTS

The TIP may be amended at any time during the program year through the same procedures required for developing and adopting this original program. The amendment(s) may be for the purpose of deleting projects, adding projects, revising the funding of a project, or modifying the scope or

DRAFT

limits of a project. Detailed information of the amendment process is available from the Citizen's TIP, on pages 17 and 18 of the TPO Prospectus prospectus-for-transportation-improvements-2022.pdf (miamidadetpo.org) or from the TPO upon request.

WHAT IS A TIP AMENDMENT

An amendment is a revision to a TIP or STIP that involves a major change to a project in a TIP or STIP, including addition or deletion of a project, a major change in project cost, project phase initiation dates, or a major change in design concept or design scope (i.e., changing project termini or the number of through traffic lanes). [23 C.F.R. 450.104] An amendment requires public review and comment, demonstration of financial constraint, or a conformity determination, if applicable. Additionally, amendments to the TIP are available for public review at least fourteen (14) days prior to the scheduled public hearing. This information is also available to the public in the TPO Prospectus for Transportation Improvements at: prospectus-for-transportation-improvements-2022.pdf (miamidadetpo.org)

WHAT IS A TIP ADMINISTRATIVE MODIFICATION

An administrative modification is a minor revision to a TIP or STIP that includes minor changes to project/project phase costs, minor changes to funding sources of previously included projects, and minor changes to project/project phase initiation dates. An administrative modification does not require public review and comment, re-demonstration of fiscal constraint, or a conformity determination, if applicable. [23 C.F.R. 450.104]

ADMINISTRATIVE TIP AMENDMENT BETWEEN THE START OF THE STATE AND FEDERAL FISCAL YEARS

An administrative TIP Amendment is an amendment that does not have to go to the full TPO Board for approval. FHWA and FTA will allow an administrative TIP Amendment during the three-month gap between the start of the new State fiscal year and the end of the old Federal fiscal year (July 1 to September 30) for new projects that were added during the Tentative Work Program development cycle.

In these instances, the TIP must be amended to include the project, but FHWA and FTA have agreed to allow the TPO Executive Director to process an Administrative TIP Amendment for these types of projects rather than having to go before the full Board. FHWA and FTA will allow this only under the following conditions:

- The amendment takes place between July 1 and September 30;
- The project must appear in the amendment exactly as it appears in the newly adopted TIP; and
- The TPO Executive Director has been authorized by the Board to approve administrative TIP Amendments.

TIP • FISCAL YEARS 2024/2025 TO 2028/2029

BICYCLE ACCOMMODATIONS LEGEND

CODE	NAME
Bike Lane	A bike lane is a portion of a roadway that is designated by signs and markings for preferential use by bicyclists.
Paved Shoulder	A paved shoulder is a portion of a roadway that has been delineated by edge line striping and may include bicycle lane pavement markings or signing.
Wide Curb Lane	A wide curb lane is a through lane that provides a minimum of 14 feet in width which allows most motor vehicles to pass cyclists safely within the travel lane.
Other Shared Use Path/ Paved Trails	A paved path that is physically separated from the road and is designed to accommodate two-way bicycle and pedestrian traffic. Sidewalks do not meet the width and operational criteria for multi-use paths.
Sharrow	An optional pavement marking used to indicate a shared environment for bicycles and motor vehicles. Sharrows are used where it is not practical to provide a bicycle facility. Note that a sharrow is not a bicycle facility.

TIP • FISCAL YEARS 2023/2024 TO 2027/2028

TRANSPORTATION PERFORMANCE MANAGEMENT SYSTEM PERFORMANCE REPORT

DRAFT

This report documents the Miami-Dade TPO efforts to address federal and state requirements for Highway and Transit Performance Measurement and Concurrence with FAST Act.

INTRODUCTION

The Miami-Dade Transportation Planning Organization (TPO), formerly called the Metropolitan Planning Organization for the Miami Urbanized Area, guides the transportation planning process in Miami-Dade County. The TPO was created on March 2, 1977 as required under Section 163.01, Florida Statutes, and is established by an Interlocal Agreement between Miami-Dade County and the Florida Department of Transportation (FDOT).

A major role of the TPO is to ensure conformance with federal regulations requiring that highways, mass transit, and other transportation facilities and services are properly developed and deployed in relation to the overall plan of urban development and to approve plans for regional and state transportation network accessibility. In addition, federal guidelines require that the use of Federal Aid for transportation projects be consistent with TPO adopted plans and programs. Federal, state and local transportation planning funds are utilized on an ongoing basis to ensure the effectiveness of the TPO planning process.

The TPO's Long Range Transportation Plan (LRTP) is the plan for implementing transportation system improvements within Miami-Dade County.

The LRTP is focused on providing safe mobility options, and is guided by a comprehensive vision to:

"Provide mobility options for Miami-Dade County residents and visitors and promote economic competitiveness by investing in the County's transportation infrastructure while protecting the environment and maximizing the efficiency of the existing transportation system."

WHAT IS PERFORMANCE MANAGEMENT?

Transportation Performance Management is a strategic approach that uses system information to make investment and policy decisions to achieve performance goals at the national, state, and local levels. In short, Transportation Performance Management:

- Is systematically applied on an ongoing basis;
- Provides key information to help decision makers understand the consequences of investment decisions across transportation assets or modes;
- Improves communication between decision makers, stakeholders, and the traveling public; and
- Ensures measures and targets are developed in a cooperative fashion and are based on objective data.

WHY IS PERFORMANCE MANAGEMENT REQUIRED?

The "Moving Ahead for Progress in the 21st Century" Act (MAP-21), signed into law on July 6, 2012 (Pub. L. No. 112-141) established requirements for States and MPOs to conduct performance-based planning by tracking performance measures and setting data-driven targets to measure performance. Performance-based planning ensures the most efficient investment of transportation funds by increasing accountability, transparency, and providing for better investment decisions that focus on key outcomes related to the seven Federal Highway Program performance goals (National Goals) established under MAP-21:

- **Safety** - To achieve a significant reduction in traffic fatalities and serious injuries on all public roads;
- **Infrastructure Condition** - To maintain the highway infrastructure asset system in a state of good repair;
- **Congestion Reduction** - To achieve a significant reduction in congestion on the National Highway System;
- **System Reliability** - To improve the efficiency of the surface transportation system;
- **Freight Movement and Economic Vitality** - To improve the national freight network, strengthen the ability of rural communities to access national and international trade markets, and support regional economic development;
- **Environmental Sustainability** - To enhance the performance of the transportation system while protecting and enhancing the natural environment; and
- **Reduced Project Delivery Delays** - To reduce project costs, promote jobs and the economy, and expedite the movement of people and goods by accelerating project completion through eliminating delays in the project development and delivery process, including reducing regulatory burdens and improving agencies' work practices.
- [23 USC 150(b)]

Performance Management has been integrated into the transportation planning framework of the Federal Planning Factors, MAP-21 National Goals, and Federal Planning Emphasis Areas (see Figure 1: Federal and State Planning Requirements and Expectations). The "Fixing America's Surface

DRAFT

Transportation" Act (FAST Act), signed December 4, 2015 (Pub. L. No. 114-94) builds upon the performance requirements enacted under MAP-21 by establishing timelines for State Departments of Transportation (DOTs) and MPOs to comply with the performance requirements.

WHAT ARE THE NATIONAL PERFORMANCE MANAGEMENT MEASURES?

Performance measures are indicators of progress toward attaining a goal, objective, or target (a desired level of future performance). A series of Federal rulemakings have been issued by FHWA and FTA to establish National Performance Management Measures to address the performance requirements established in MAP-21 and the FAST Act. The National Performance Management Measures are:

- Highway Safety Improvement Program,
- Assessing Pavement Condition for the National Highway Performance Program and Bridge Condition for the National Highway Performance Program, and
- Assessing Performance of the National Highway System, Freight Movement on the Interstate System, and Congestion Mitigation and Air Quality Improvement Program.

For each category above, there are specific National Performance Management Measures that will be used to assess progress. Progress will be judged by how States and MPOs perform based on self-imposed targets, relative to baseline conditions. Performance measure targets are the benchmarks against which collected data is gauged. State DOTs will establish targets for the state, while MPOs will adopt targets that are appropriate for their urbanized areas. MPOs may adopt the state's targets or establish their own.

HOW ARE PERFORMANCE MEASURES USED?

Because Florida's transportation system improvement needs exceed available funding, resources are invested in the most strategic, effective and efficient ways possible. Performance measures provide useful "feedback" and are integrated into FDOT's business practices on three levels:

AT THE STRATEGIC LEVEL

Performance measures help to establish and inform goals, objectives, and strategies as well as to monitor FDOT Mission attainment. Performance measures also communicate progress toward achieving goals in transportation plans and programs such as the Florida Transportation Plan, the Strategic Highway Safety Plan, and the Freight Mobility and Trade Plan.

DRAFT

AT THE DECISION-MAKING LEVEL

Performance measures are used to inform and assess the financial policies for allocating funds among programs such as highway preservation, system expansion, and public transportation. These programs are defined in the Program and Resource Plan. Decision makers also consider various trends impacting transportation system performance.

AT THE PROJECT DELIVERY LEVEL

After projects are selected, performance measures help to monitor the efficiency and effectiveness of projects and services in the Five-Year Work Program and in relation to FDOT's Transportation Asset Management Plan. The measures also support organizational and operational improvements.

As shown in the **Performance-Based Planning and Programming Process** graphic below, performance management is at the heart of FDOT's planning and programming process.

WHY DO WE USE THEM?

FDOT uses performance measures to:

- Assess how well Florida's multimodal transportation system is functioning—including feedback from and collaboration with key stakeholder organizations
- Provide information to support and inform decision-making
- Assess how effectively and efficiently transportation programs, projects and services are being delivered
- Determine customer satisfaction levels
- Demonstrate transparency and accountability to Florida's citizens and to foster collaboration with FDOT's transportation system stakeholders

DRAFT

WHAT IS MEASURED?

Each performance report is listed below along with some of the associated performance measures:

SAFETY

Fatal and serious injuries related to impaired driving, speeding and aggressive driving, distracted driving, at-risk drivers, vulnerable road users

PRESERVATION

Percent of pavement and bridges meeting condition standards, percent of maintenance activities that meet department standards, roadway clearance times due to incidents and crashes

MOBILITY

Vehicle miles traveled, transit ridership, freight tonnage, freight and port access, hours of delay, travel time reliability, travel that is heavily congested

ECONOMY

Return On Investment of FDOT programs, capacity funds for the SIS, Florida share of U.S. trade, Florida value of freight, construction projects completed on-time and within budget

ENVIRONMENT

Air quality, water quality, impacts to the physical, natural and cultural environment, vibrant and healthy communities, and customer satisfaction.

HOW IS TRANSPORTATION PERFORMANCE MANAGEMENT BEING IMPLEMENTED?

The Moving Ahead for Progress in the 21st Century Act (MAP-21) included several provisions that collectively are transforming the Federal surface transportation program to be focused on the achievement of performance outcomes.

The performance outcomes provisions, administered by different agencies within the U.S. Department of Transportation (USDOT), were implemented by rulemakings, including several under FHWA's purview. The provisions are organized by six performance management elements.

The Fixing America's Surface Transportation (FAST) Act, signed in 2015, built on the MAP-21 changes and provided long-term funding certainty for surface transportation infrastructure planning and investment.

DRAFT

TPM performance management outcomes are grouped into six elements to more effectively communicate the efforts under way to implement the statutory requirements.

1. **National Goals:** Congressionally established goals or program purpose to focus the Federal-aid highway program into specific areas of performance.
2. **Measures:** FHWA-established measures to assess performance/condition in carrying out performance-based Federal-aid highway programs.
3. **Targets:** Targets established by Federal-aid highway funding recipients for the measures to document future performance expectations
4. **Plans:** Development of strategic and/or tactical plans by Federal funding recipients to identify strategies and investments that address performance needs.
5. **Reports:** Development of reports by Federal funding recipients that document progress toward target achievement, including the effectiveness of Federal-aid highway investments.
6. **Accountability and Transparency:** FHWA-developed requirements for Federal funding recipients to use to achieve or make significant progress toward targets.

WHAT ARE THE FEDERAL PLANNING REQUIREMENTS?

Per 23 CFR §450.306 Scopes of the metropolitan transportation planning process, the metropolitan transportation planning process shall be continuous, cooperative, and comprehensive; consider the Federal Planning Factors (See Figure 1: Federal Planning Requirements and Expectations), and provide a performance-based approach to decision making. Performance-based planning requires MPOs to establish performance targets that address the performance measures or standards of the National Performance Management Measures, Public Transportation Safety Program, and Transit Asset Management.

Per 23 CFR §450.324 Development and content of the metropolitan transportation plan, the MPO Long Range Transportation Plan (LRTP) shall include the following for the National Performance Management Measures:

- **A description of the National Performance Management Measures and established performance targets** used in assessing the performance of the transportation system
- **A System Performance Report** evaluating the condition and performance of the transportation system, including progress achieved by the MPO in meeting performance targets.
- MPOs that voluntarily elect to conduct scenario planning shall describe how the preferred scenario has "improved" performance of the transportation system. 23 CFR §450.324

Additionally, per 23 CFR §450.326 Development and content of the transportation improvement program (TIP), the Transportation Improvement Program (TIP) shall make progress toward achieving performance targets and include a **description of the anticipated effect of the TIP toward achieving the performance targets** identified by the MPO in the LRTP, linking investment priorities in the TIP to those performance targets.

DRAFT

Figure 1: Federal Planning Requirements and Expectations

United States Code

MAP-21/FAST Act

Federal Planning Factors

- Support the economic vitality of the metropolitan area, especially by enabling global competitiveness, productivity, and efficiency;
- Increase the safety of the transportation system for motorized and nonmotorized users;
- Increase the security of the transportation system for motorized and nonmotorized users;
- Increase the accessibility and mobility of people and for freight;
- Protect and enhance the environment, promote energy conservation, improve the quality of life, and promote consistency between transportation improvements and State and local planned growth and economic development patterns;
- Enhance the integration and connectivity of the transportation system, across and between modes, for people and freight;
- Promote efficient system management and operation;
- Emphasize the preservation of the existing transportation system;
- Improve the resiliency and reliability of the transportation system and reduce or mitigate stormwater impacts of surface transportation; and **
- Enhance travel and tourism. **

** New Planning Factors established under the FAST Act.
[23 USC 134(h)(1)]

MAP-21 National Goals

- **Safety** - To achieve a significant reduction in traffic fatalities and serious injuries on all public roads.
- **Infrastructure Condition** - To maintain the highway infrastructure asset system in a state of good repair
- **Congestion Reduction** - To achieve a significant reduction in congestion on the National Highway System
- **System Reliability** - To improve the efficiency of the surface transportation system
- **Freight Movement and Economic Vitality** - To improve the national freight network, strengthen the ability of rural communities to access national and international trade markets, and support regional economic development
- **Environmental Sustainability** - To enhance the performance of the transportation system while protecting and enhancing the natural environment.
- **Reduced Project Delivery Delays** - To reduce project costs, promote jobs and the economy, and expedite the movement of people and goods by accelerating project completion through eliminating delays in the project development and delivery process, including reducing regulatory burdens and improving agencies' work practices

FHWA Expectations Letter
Requirements and Emerging Issues
A new Expectations Letter was released on January 10, 2018.

FHWA/FTA- Federal Planning Emphasis Areas 2015

1. **MAP-21 Implementation:** Transition to Performance-based Planning and Programming
2. **Regional Models of Cooperation:** Ensure a Regional Approach to Transportation Planning by Promoting Cooperation and Coordination across Transit Agency, MPO and State Boundaries
3. **Ladders of Opportunity:** Access to Essential Services

DRAFT

On January 19, 2024, the FDOT Office of Policy Planning issued a simplified Transportation Performance Measures timeline with the key dates for the Calendar Years 2024 and 2025, which are illustrated below:

Figure 2: FDOT 2024-2025 Transportation Performance Measures Timeline

Office of Policy Planning

Florida Department of Transportation
605 Suwannee St, Tallahassee, FL

2024 TPM Deadlines – PM1, PM2, PM3, Transit Asset Management, Transit Safety/PTASP

2024 Date	PM Area	Item
February 27	PM1	**MPOs** establish CY2024 PM1 targets, not later than 180 days after FDOT established and reported CY2024 PM1 targets in the HSIP annual report on August 31, 2023.
March 15	PM2	**FDOT** reports 2023 National Bridge Inventory (NBI) condition data to FHWA.
~March	PM1	**FHWA** will notify FDOT whether the State met or made significant progress toward its 2022 safety targets.
April 15	PM2	**FDOT** reports 2023 Interstate pavement condition data to HPMS.
June 15	PM2	**FDOT** reports 2023 non-Interstate NHS pavement condition data to HPMS.
June 15	PM3	**FDOT** reports metric data to HPMS for travel-time measures (Travel Time reliability and Freight reliability).
July 1	NHSTA Safety	**Florida** reports 12 NHTSA highway safety targets for CY2025 to NHTSA.
August 31	PM1	**FDOT** reports PM1 safety targets for CY2025 in the HSIP annual report.
September 30	PM2	**FHWA** will notify FDOT of its annual determination of minimum Interstate pavement condition level. The percentage of lane-miles of the Interstate System in poor condition must not exceed 5%.
October 1	PM2	**FHWA** will notify FDOT of its annual determination of minimum NHS bridge condition level. The percentage of the deck area of NHS bridges classified as structurally deficient must not exceed 10%.
October 1	PM3	**FDOT** must submit a request to FHWA if it intends to use an alternative travel time data set than the NPMRDS for the following calendar year.
October 1	PM2 & PM3	**FDOT** reports current performance and progress toward 2023 targets in its Mid Performance Period Report to FHWA for the current performance period (January 1, 2022 through December 31, 2025). **FDOT** has the option of adjusting any of its 2025 targets. If FDOT adjust any targets, MPOs must take action on the adjusted targets within 180 days (by March 30, 2025).

DRAFT

2024 Date	PM Area	Item
Annual activity; Date will vary for each provider	Transit Safety (PTASP)	**Transit providers** subject to the Public Transportation Agency Safety Plan (PTASP) requirements must update and certify their PTASP and establish 2025 transit safety targets. MPOs set new targets as part of their LRTP updates. MPOs should reference the most recent transit provider targets with each annual TIP update.
Annual activity; Date will vary for each provider	Transit Assets (TAM)	**Transit providers (and FDOT for the Group TAM Plan)** report transit asset data to FTA and establish 2025 transit asset targets. MPOs set new targets with every LRTP update. MPOs should reflect MPO targets and public transportation provider current TAM targets in each annual TIP update.

DRAFT

2025 TPM Deadlines – PM1, PM2, PM3, Transit Asset Management, Transit Safety/PTASP

2025 Date	PM Area	Item
February 27	PM1	**MPOs** establish CY2025 PM1 targets, not later than 180 days after FDOT established and reported CY2025 PM1 targets in the HSIP annual report on August 31, 2024.
March 15	PM2	**FDOT** reports 2024 National Bridge Inventory (NBI) condition data to FHWA.
~March	PM1	**FHWA** will notify FDOT whether the State met or made significant progress toward its 2023 safety targets.
March 30	PM2 & PM3	If FDOT adjusted any 2025 targets on October 1, 2024, **MPOs** must take action on adjusted targets.
April 15	PM2	**FDOT** reports 2024 Interstate pavement condition data to HPMS.
June 15	PM2	**FDOT** reports 2024 non-Interstate NHS pavement condition data to HPMS.
June 15	PM3	**FDOT** reports metric data to HPMS for travel-time measures (Travel Time reliability and Freight reliability).
July 1	NHSTA Safety	**Florida** reports 12 NHTSA highway safety targets for CY2026 to NHTSA.
August 31	PM1	**FDOT** reports PM1 safety targets for CY2026 in the HSIP annual report.
September 30	PM2	**FHWA** will notify FDOT of its annual determination of minimum Interstate pavement condition level. The percentage of lane-miles of the Interstate System in poor condition must not exceed 5%.
October 1	PM2	**FHWA** will notify FDOT of its annual determination of minimum NHS bridge condition level. The percentage of the deck area of NHS bridges classified as structurally deficient must not exceed 10%.
October 1	PM3	**FDOT** must submit a request to FHWA if it intends to use an alternative travel time data set than the NPMRDS for the following calendar year
Annual activity; Date will vary for each provider	Transit Safety (PTASP)	**Transit providers** subject to the Public Transportation Agency Safety Plan (PTASP) requirements must update and certify their PTASP and establish 2026 transit safety targets. MPOs set new targets as part of their LRTP updates. MPOs should reference the most recent transit provider targets with each annual TIP update.
Annual activity; Date will vary for each provider	Transit Assets (TAM)	**Transit providers (and FDOT for the Group TAM Plan)** report transit asset data to FTA and establish 2026 transit asset targets. MPOs set new targets with every LRTP update. MPOs should reflect MPO targets and public transportation provider current TAM targets in each annual TIP update.

DRAFT

LONG RANGE TRANSPORTATION PLAN (LRTP) AND TRANSPORTATION IMPROVEMENT PROGRAM (TIP) COMPLIANCE

The FDOT Highway Safety Plan, Highway Safety Improvement Program, Freight Mobility Plan, and Asset Management Plan have been incorporated, by reference, into the 2045 LRTP and 2020 TIP as part of LRTP and TIP amendments through Resolution #33-19 (June 20, 2019).

The Miami-Dade 2045 Long Range Transportation Plan was adopted on September 26, 2019 and the Miami-Dade 2023/2024 – 2027/2028 TIP was adopted on June 22, 2023. Per the Planning Rule, the System Performance Report for the Miami-Dade TPO is included for the required Highway Safety (PM1), Bridge and Pavement (PM2), System Performance (PM3), Transit Asset Management (TAM) and Public Transit Agency Safety Plan (PTASP).

TRANSPORTATION PERFORMANCE MEASURES CONSENSUS PLANNING DOCUMENT

The TPM Consensus Document has been cooperatively developed by the FDOT and Florida's 27 Metropolitan Planning Organizations through the Florida Metropolitan Planning Organization Advisory Council (MPOAC), and, by representation on the MPO and TPO boards and committees, and the providers of public transportation in the MPO and TPO planning areas. The purpose of the document is to outline the minimum roles of FDOT, the MPO/TPOs, and the providers of public transportation in the MPO/TPO planning area to ensure consistency to the maximum extent practicable in satisfying the transportation performance management requirements promulgated by the United States Department of Transportation.

The current Federal legislation requires state DOTs, MPO/TPOs, and transit agencies to conduct performance-based planning by setting data-driven performance targets for several transportation performance measures, and programming transportation investments that are expected to result in achievement of defined targets. The document describes the general processes through with FDOT, the MPO/TPOs, and the providers of public transportation in MPO/TPO planning areas will cooperatively develop and share information related to transportation performance management.

Based on a recent directive of the Federal Highway Administration and FDOT Office of Policy Planning, it was suggested to all TPO/MPO's in Florida to separately adopt this document to avoid the need to include it with each TIP on an annual basis. Once adopted as a stand-alone resource, the TPO does not need to continuously include the Consensus Planning Document in the TIP.

By Resolution 12-2022 on March 3, 2022 (illustrated on the below in **Figure 3: TPO Resolution – Consensus Planning Document**), the TPO Governing Board adopted the Transportation Performance Measures Consensus Planning Document.

DRAFT

Figure 3: TPO Resolution – Consensus Planning Document

Agenda Item 6.A.7

TPO RESOLUTION #12-2022

RESOLUTION ADOPTING THE TRANSPORTATION PERFORMANCE MEASURES CONSENSUS PLANNING DOCUMENT

WHEREAS, the Interlocal Agreement creating and establishing the Metropolitan Planning Organization (MPO) for the Miami Urbanized Area requires that the Miami-Dade Transportation Planning Organization (TPO), in its role as the MPO, provide a structure to evaluate the adequacy of the transportation planning and programming process; and

WHEREAS, the TPO Governing Board is charged with making transportation planning decisions in the Miami Urbanized Area; and

WHEREAS, the Transportation Planning Council (TPC) has been established and charged with the responsibility and duty of fulfilling the aforementioned functions; and

WHEREAS, the Transportation Performance Measures Consensus Planning Document has been cooperatively developed by the Florida Department of Transportation (FDOT) and Florida's twenty-seven (27) Metropolitan Planning Organizations (MPOs) through the Florida Metropolitan Planning Organization Advisory Council; and

WHEREAS, this document describes the general processes through which FDOT, the MPOs, and the providers of public transportation in MPO planning areas will cooperatively develop and share information related to transportation performance management; and

WHEREAS, based on a recent directive from the Federal Highway Administration and the FDOT Office of Policy Planning, it was requested that all MPOs in Florida separately adopt this document to reduce redundancy with the annual publication of said document in the Transportation Improvement Program (TIP); and

WHEREAS, the TPC has reviewed the Transportation Performance Measures Consensus Planning Document, made a part hereof, and finds it consistent with the goals and objectives of the Transportation Plan for the Miami Urbanized Area,

NOW, THEREFORE, BE IT RESOLVED BY THE GOVERNING BOARD OF THE TRANSPORTATION PLANNING ORGANIZATION IN ITS ROLE AS THE MPO FOR THE MIAMI URBANIZED AREA, that this Board hereby adopts the attached Transportation Performance Measures Consensus Planning Document.

The adoption of the foregoing resolution was moved by Board Member Rebeca Sosa. The motion was seconded by Board Member Eileen Higgins, and upon being put to a vote, the vote was as follows:

Chairman Oliver G. Gilbert III - Aye
Vice Chairman Juan Carlos Bermudez - Absent

Board Member Philippe Bien-Aime	-Aye	Board Member Steven D. Losner	-Aye
Board Member Esteban Bovo, Jr.	-Aye	Board Member Roberto Martell	-Aye
Board Member Danielle Cohen Higgins	-Aye	Board Member Joe A. Martinez	-Absent
Board Member Jose "Pepe" Diaz	-Absent	Board Member Kionne L. McGhee	-Aye
Board Member Rene Garcia	-Absent	Board Member Jean Monestime	-Aye
Board Member Perla T. Hantman	-Absent	Board Member Raquel A. Regalado	-Aye
Board Member Keon Hardemon	-Absent	Board Member David Richardson	-Aye
Board Member Rodney Harris	-Absent	Board Member Rebeca Sosa	-Aye
Board Member Sally A. Heyman	-Aye	Board Member Javier D. Souto	-Absent
Board Member Eileen Higgins	-Aye	Board Member Francis Suarez	-Absent
Board Member Vince Lago	-Absent		

The Chairperson thereupon declared the resolution duly passed and approved this day of 3rd day of March 2022.

TRANSPORTATION PLANNING ORGANIZATION

TRANSPORTATION PLANNING ORGANIZATION IN ITS ROLE AS MIAMI DADE MPO FLORIDA TPO

DRAFT

Transportation Performance Measures
Consensus Planning Document

Purpose and Authority

This document has been cooperatively developed by the Florida Department of Transportation (FDOT) and Florida's 27 Metropolitan Planning Organizations (MPOs) through the Florida Metropolitan Planning Organization Advisory Council (MPOAC), and, by representation on the MPO boards and committees, the providers of public transportation in the MPO planning areas.

The purpose of the document is to outline the minimum roles of FDOT, the MPOs, and the providers of public transportation in the MPO planning areas to ensure consistency to the maximum extent practicable in satisfying the transportation performance management requirements promulgated by the United States Department of Transportation in Title 23 Parts 450, 490, 625, and 673 of the *Code of Federal Regulations* (23 CFR). Specifically:

- 23 CFR 450.314(h)(1) requires that "The MPO(s), State(s), and providers of public transportation shall jointly agree upon and develop specific written procedures for cooperatively developing and sharing information related to transportation performance data, the selection of performance targets, the reporting of performance targets, the reporting of performance to be used in tracking progress toward achievement of critical outcomes for the region of the MPO, and the collection of data for the State asset management plan for the National Highway System (NHS)."
- 23 CFR 450.314(h)(2) allows for these provisions to be "Documented in some other means outside the metropolitan planning agreements as determined cooperatively by the MPO(s), State(s), and providers of public transportation."

Section 339.175(11), Florida Statutes creates the MPOAC to "Assist MPOs in carrying out the urbanized area transportation planning process by serving as the principal forum for collective policy discussion pursuant to law" and to "Serve as a clearinghouse for review and comment by MPOs on the Florida Transportation Plan and on other issues required to comply with federal or state law in carrying out the urbanized transportation planning processes." The MPOAC Governing Board membership includes one representative of each MPO in Florida.

This document was developed, adopted, and subsequently updated by joint agreement of the FDOT Secretary and the MPOAC Governing Board. Each MPO will adopt this document by incorporation in its annual Transportation Improvement Program (TIP) or by separate board action as documented in a resolution or meeting minutes, which will serve as documentation of agreement by the MPO and the provider(s) of public transportation in the MPO planning area to carry out their roles and responsibilities as described in this general document.

Roles and Responsibilities

This document describes the general processes through which FDOT, the MPOs, and the providers of public transportation in MPO planning areas will cooperatively develop and share information related to transportation performance management.

Email communications will be considered written notice for all portions of this document. Communication with FDOT related to transportation performance management generally will occur through the Administrator for Metropolitan Planning in the Office of Policy Planning. Communications with the MPOAC related to transportation performance management generally will occur through the Executive Director of the MPOAC.

1. Transportation performance data:

   a) FDOT will collect and maintain data, perform calculations of performance metrics and measures, and provide to each MPO the results of the calculations used to develop statewide targets for all applicable federally required performance measures. FDOT also will provide to each MPO the results of calculations for each applicable performance measure for the MPO planning area, and the county or counties included in the MPO planning area.[1][2] FDOT and the MPOAC agree to use the National Performance Management Research Data Set as the source of travel time data and the defined reporting segments of the Interstate System and non-Interstate National Highway System for the purposes of calculating the travel time-based measures specified in 23 CFR 490.507, 490.607, and 490.707, as applicable.

   b) Each MPO will share with FDOT any locally generated data that pertains to the federally required performance measures, if applicable, such as any supplemental data the MPO uses to develop its own targets for any measure.

   c) Each provider of public transportation is responsible for collecting performance data in the MPO planning area for the transit asset management measures as specified in 49 CFR 625.43 and the public transportation safety measures as specified in the National Public Transportation Safety Plan. The providers of public transportation will provide to FDOT and the appropriate MPO(s) the transit performance data used to support these measures.

2. Selection of performance targets:

   FDOT, the MPOs, and providers of public transportation will select their respective performance targets in coordination with one another. Selecting targets generally refers to the processes used to identify, evaluate, and make decisions about potential targets prior to action to formally establish the targets. Coordination will include as many of the following opportunities as deemed appropriate for each measure: in-person meetings, webinars, conferences calls, and email/written communication. Coordination will include timely

[1] When an MPO planning area covers portions of more than one state, as in the case of the Florida-Alabama TPO, FDOT will collect and provide data for the Florida portion of the planning area.
[2] If any Florida urbanized area becomes nonattainment for the National Ambient Air Quality Standards, FDOT also will provide appropriate data at the urbanized area level for the specific urbanized area that is designated.

DRAFT

sharing of information on proposed targets and opportunities to provide comment prior to establishing final comments for each measure.

The primary forum for coordination between FDOT and the MPOs on selecting performance targets and related policy issues is the regular meetings of the MPOAC. The primary forum for coordination between MPOs and providers of public transportation on selecting transit performance targets is the TIP development process.

Once targets are selected, each agency will take action to formally establish the targets in its area of responsibility.

a) FDOT will select and establish a statewide target for each applicable federally required performance measure.

   i. To the maximum extent practicable, FDOT will share proposed statewide targets at the MPOAC meeting scheduled in the calendar quarter prior to the dates required for establishing the target under federal rule. FDOT will work through the MPOAC to provide email communication on the proposed targets to the MPOs not in attendance at this meeting. The MPOAC as a whole, and individual MPOs as appropriate, will provide comments to FDOT on the proposed statewide targets within sixty (60) days of the MPOAC meeting. FDOT will provide an update to the MPOAC at its subsequent meeting on the final proposed targets, how the comments received from the MPOAC and any individual MPOs were considered, and the anticipated date when FDOT will establish final targets.

   ii. FDOT will provide written notice to the MPOAC and individual MPOs within two (2) business days of when FDOT establishes final targets. This notice will provide the relevant targets and the date FDOT established the targets, which will begin the 180-day time-period during which each MPO must establish the corresponding performance targets for its planning area.

b) Each MPO will select and establish a target for each applicable federally required performance measure. To the extent practicable, MPOs will propose, seek comment on, and establish their targets through existing processes such as the annual TIP update. For each performance measure, an MPO will have the option of either[3]:

   i. Choosing to support the statewide target established by FDOT, and providing documentation (typically in the form of meeting minutes, a letter, a resolution, or incorporation in a document such as the TIP) to FDOT that the MPO agrees to plan and program projects so that they contribute toward the accomplishments of FDOT's statewide targets for that performance measure.

   ii. Choosing to establish its own target, using a quantifiable methodology for its MPO planning area. If the MPO chooses to establish its own target, the MPO will coordinate with FDOT and, as applicable, providers of public transportation regarding the approach used to develop the target and the proposed target prior to

[3] When an MPO planning area covers portions of more than one state, as in the case of the Florida-Alabama TPO, that MPO will be responsible for coordinating with each state DOT in setting and reporting targets and associated data.

establishment of a final target. The MPO will provide FDOT and, as applicable, providers of public transportation, documentation (typically in the form of meeting minutes, a letter, a resolution, or incorporation in a document such as the TIP) that includes the final targets and the date when the targets were established .

c) The providers of public transportation in MPO planning areas will select and establish performance targets annually to meet the federal performance management requirements for transit asset management and transit safety under 49 U.S.C. 5326(c) and 49 U.S.C. 5329(d).

   i. The Tier I providers of public transportation will establish performance targets to meet the federal performance management requirements for transit asset management. Each Tier I provider will provide written notice to the appropriate MPO and FDOT when it establishes targets. This notice will provide the final targets and the date when the targets were established, which will begin the 180-day period within which the MPO must establish its transit-related performance targets. MPOs may choose to update their targets when the Tier I provider(s) updates theirs, or when the MPO amends its long-range transportation plan by extending the horizon year in accordance with 23 CFR 450.324(c).

   ii. FDOT is the sponsor of a Group Transit Asset Management plan for subrecipients of Section 5311 and 5310 grant funds. The Tier II providers of public transportation may choose to participate in FDOT's group plan or to establish their own targets. FDOT will notify MPOs and those participating Tier II providers following of establishment of transit-related targets. Each Tier II provider will provide written notice to the appropriate MPO and FDOT when it establishes targets. This notice will provide the final targets and the date the final targets were established, which will begin the 180-day period within which the MPO must establish its transit-related performance targets. MPOs may choose to update their targets when the Tier II provider(s) updates theirs, or when the MPO amends its long-range transportation plan by extending the horizon year in accordance with 23 CFR 450.324(c).

   iii. FDOT will draft and certify a Public Transportation Agency Safety Plan for any small public transportation providers (defined as those who are recipients or subrecipients of federal financial assistance under 49 U.S.C. 5307, have one hundred (100) or fewer vehicles in peak revenue service, and do not operate a rail fixed guideway public transportation system). FDOT will coordinate with small public transportation providers on selecting statewide public transportation safety performance targets, with the exception of any small operator that notifies FDOT that it will draft its own plan.

   iv. All other public transportation service providers that receive funding under 49 U.S. Code Chapter 53 (excluding sole recipients of sections 5310 and/or 5311 funds) will provide written notice to the appropriate MPO and FDOT when they establish public transportation safety performance targets. This notice will provide the final targets and the date the final targets were established, which will begin the 180-day period within which the MPO must establish its transit safety

DRAFT

performance targets. MPOs may choose to update their targets when the provider(s) updates theirs, or when the MPO amends its long-range transportation plan by extending the horizon year in accordance with 23 CFR 450.324(c).

v. If the MPO chooses to support the asset management and safety targets established by the provider of public transportation, the MPO will provide to FDOT and the provider of public transportation documentation that the MPO agrees to plan and program MPO projects so that they contribute toward achievement of the statewide or public transportation provider targets. If the MPO chooses to establish its own targets, the MPO will develop the target in coordination with FDOT and the providers of public transportation. The MPO will provide FDOT and the providers of public transportation documentation (typically in the form of meeting minutes, a letter, a resolution, or incorporation in a document such as the TIP) that includes the final targets and the date the final targets were established. In cases where two or more providers operate in an MPO planning area and establish different targets for a given measure, the MPO has the options of coordinating with the providers to establish a single target for the MPO planning area, or establishing a set of targets for the MPO planning area.

3. Reporting performance targets:

a) Reporting targets generally refers to the process used to report targets, progress achieved in meeting targets, and the linkage between targets and decision making processes FDOT will report its final statewide performance targets to the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) as mandated by the federal requirements.

i. FDOT will include in future updates or amendments of the statewide long-range transportation plan a description of all applicable performance measures and targets and a system performance report, including progress achieved in meeting the performance targets, in accordance with 23 CFR 450.216(f).

ii. FDOT will include in future updates or amendments of the statewide transportation improvement program a discussion of the anticipated effect of the program toward achieving the state's performance targets, linking investment priorities to those performance targets, in accordance with 23 CFR 450.218 (q).

iii. FDOT will report targets and performance data for each applicable highway performance measure to FHWA, in accordance with the reporting timelines and requirements established by 23 CFR 490; and for each applicable public transit measure to FTA, in accordance with the reporting timelines and requirements established by 49 CFR 625 and 40 CFR 673.

b) Each MPO will report its final performance targets as mandated by federal requirements to FDOT. To the extent practicable, MPOs will report final targets through the TIP update or other existing documents.

i. Each MPO will include in future updates or amendments of its metropolitan long-range transportation plan a description of all applicable performance measures

and targets and a system performance report, including progress achieved by the MPO in meeting the performance targets, in accordance with 23 CFR 450.324(f)(3-4).

ii. Each MPO will include in future updates or amendments of its TIP a discussion of the anticipated effect of the TIP toward achieving the applicable performance targets, linking investment priorities to those performance targets, in accordance with 23 CFR 450.326(d).

iii. Each MPO will report target-related status information to FDOT upon request to support FDOT's reporting requirements to FHWA.

c) Providers of public transportation in MPO planning areas will report all established transit asset management targets to the FTA National Transit Database (NTD) consistent with FTA's deadlines based upon the provider's fiscal year and in accordance with 49 CFR Parts 625 and 630, and 49 CFR Part 673.

4. Reporting performance to be used in tracking progress toward attainment of performance targets for the MPO planning area:

a) FDOT will report to FHWA or FTA as designated, and share with each MPO and provider of public transportation, transportation performance for the state showing the progress being made towards attainment of each target established by FDOT, in a format to be mutually agreed upon by FDOT and the MPOAC.

b) If an MPO establishes its own targets, the MPO will report to FDOT on an annual basis transportation performance for the MPO area showing the progress being made towards attainment of each target established by the MPO, in a format to be mutually agreed upon by FDOT and the MPOAC. To the extent practicable, MPOs will report progress through existing processes including, but not limited to, the annual TIP update.

c) Each provider of public transportation will report transit performance annually to the MPO(s) covering the provider's service area, showing the progress made toward attainment of each target established by the provider.

5. Collection of data for the State asset management plans for the National Highway System (NHS):

a) FDOT will be responsible for collecting bridge and pavement condition data for the State asset management plan for the NHS. This includes NHS roads that are not on the State highway system but instead are under the ownership of local jurisdictions, if such roads exist.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

TRANSPORTATION PERFORMANCE MANAGEMENT
SYSTEM PERFORMANCE REPORT
SAFETY

DRAFT

SAFETY PERFORMANCE MANAGEMENT MEASURES

Safety is the first national goal identified in MAP-21 and maintained in the FAST Act. In March of 2016, the Highway Safety Improvement Program (HSIP) Final Rule and National Performance Management Measures: Highway Safety Improvement Program Final Rule (known as the Safety Performance Management Measures (Safety PM) Final Rule) were published in the Federal Register [23 CFR 924, 23 CFR 490] with an effective date of April 14, 2016. The HSIP Final Rule was established to clarify requirements under the HSIP and address MAP-21 and the FAST Act for consistency. The objective of the HSIP is to "significantly reduce fatalities and serious injuries resulting from crashes on all public roads," [23 CFR 924].

PERFORMANCE MANAGEMENT MEASURES

The Safety PM Final Rule was developed to support the HSIP and requires State DOTs and MPOs to set targets for the following Safety Performance Management Measures (which apply to all public roads) and to report on progress toward achieving those targets to the State DOT.

- Number of Fatalities
- Fatality Rate per 100 million Vehicle Miles Traveled (VMT)
- Number of Serious Injuries
- Serious Injury Rate per 100 million VMT
- Number of Combined Non-Motorized Fatalities and Serious Injuries

PERFORMANCE TARGETS

In 2012, Florida adopted "Driving Down Fatalities," their version of the national traffic safety vision "Toward Zero Deaths." Understanding that zero fatalities cannot be reached within the 2018 Highway Safety Plan (HSP), Florida developed data models to forecast the number of fatalities and serious injuries that are statistically expected to occur to drive down fatalities and serious injuries with an ultimate vision of zero. [Source: SHSP, HSP] (2017 Florida Highway Safety Improvement Program). FDOT firmly believes that every life counts and established a 2018 target of zero for each of the Safety Performance Management Measures in the 2017 Highway Safety Improvement Plan (HSIP).

The TPO, along with FDOT and other traffic safety partners, shares a high concern about the upward trending of traffic crashes, both statewide and nationally. As such, the Miami-Dade TPO supports FDOT's statewide 2024 safety targets. The safety initiatives within this TIP are intended to contribute toward achieving these targets.

Annually in August, FDOT establishes and reports statewide safety performance targets in the HSIP Annual Report to FHWA. By February of the following year, the TPO will adopt FDOT's targets or establish their own.

FDOT has continuously supported a target of zero for the Safety Performance Management Measures. The 2023 HSIP Annual Report continued to establish a target of zero for each of the five federal Safety Performance Management Measures for Calendar Year 2024. By adopting these targets

DRAFT

(per Resolution #07-2024) on January 25, 2024 as illustrated below in **Figure 4: TPO Resolution – 2024 Safety Targets**, the Miami-Dade TPO will support achievement of the safety performance management targets by planning and programing projects in the TIP and LRTP that once implemented, are anticipated to make progress toward achieving accomplishment of the FDOT safety target of zero. The targets for the five Safety Performance Management Measures adopted by the TPO for 2024, shown in **Table 1: 2024 Safety Performance Management Measure Targets**, indicates the TPO is expressly supporting the statewide targets developed by FDOT.

Figure 4: TPO Resolution – 2024 Safety Targets

Agenda Item 6.B.6

TPO RESOLUTION #07-2024

RESOLUTION ESTABLISHING THE FLORIDA DEPARTMENT OF TRANSPORTATION'S "VISION ZERO" SAFETY PERFORMANCE MEASURE TARGETS FOR TRAFFIC FATALITIES AND INJURIES FOR CALENDAR YEAR 2024

WHEREAS, the Interlocal Agreement creating and establishing the Metropolitan Planning Organization (MPO) for the Miami Urbanized Area requires that the Miami-Dade Transportation Planning Organization (TPO), in its role as the MPO, provides a structure to evaluate the adequacy of the transportation planning and programming process; and

WHEREAS, the Moving Ahead for Progress in the 21st Century Act (MAP-21) required the United States Department of Transportation (USDOT) to establish mobility performance measures for fatalities and serious injuries, both number and rate per vehicle mile traveled, on all public roads; and

WHEREAS, federal rules developed to implement MAP-21 require that state DOTs establish statewide targets each year for the traffic safety performance measures: number of fatalities, rate of fatalities, number of serious injuries, rate of serious injuries and number of non-motorized fatalities and non-motorized serious injuries; and

WHEREAS, MPOs have the option to support the statewide performance measure targets or establish their own; and

WHEREAS, the 2023 Florida Highway Safety Improvement Program includes "Vision Zero" targets for federal safety performance measures for 2024; and

WHEREAS, the TPO has coordinated the establishment of "Vision Zero" performance measure targets with the Florida Department of Transportation (FDOT) through the statewide Metropolitan Planning Organization Advisory Council; and

WHEREAS, the attached FDOT's 2024 "Vision Zero" Performance Measure Targets for Traffic Fatalities and Injuries, are consistent with the goals and objectives of the Transportation Plan for the Miami Urbanized Area,

NOW, THEREFORE, BE IT RESOLVED BY THE GOVERNING BOARD OF THE TRANSPORTATION PLANNING ORGANIZATION IN ITS ROLE AS THE MPO FOR THE MIAMI URBANIZED AREA, that this Board hereby establishes the attached Florida Department of Transportation's "Vision Zero" Safety Performance Measure Targets for traffic fatalities and injuries for calendar year 2024.

The adoption of the foregoing resolution was moved by Vice Chairman Oliver G. Gilbert III. The motion was seconded by Board Member Marleine Bastien, and upon being put to a vote, the vote was as follows:

Chairman Esteban Bovo, Jr. - Aye
Vice Chairman Oliver G. Gilbert III - Aye

Board Member Roberto J. Alonso	- Absent	Board Member Keon Hardemon	- Aye
Board Member Marleine Bastien	- Aye	Board Member Rodney Harris	- Absent
Board Member Juan Carlos Bermudez	- Aye	Board Member Eileen Higgins	- Aye
Board Member Kevin Marino Cabrera	- Absent	Board Member Steven D. Losner	- Aye
Board Member Danielle Cohen Higgins	- Absent	Board Member Kionne L. McGhee	- Absent
Board Member Alix Desulme	- Aye	Board Member Raquel A. Regalado	- Absent
Board Member Eric Diaz-Padron	- Aye	Board Member Anthony Rodriguez	- Aye
Board Member Christi Fraga	- Aye	Board Member Micky Steinberg	- Absent
Board Member René Garcia	- Absent	Board Member Francis Suarez	- Absent
Board Member Roberto Gonzalez	- Absent		

The Chairperson thereupon declared the resolution duly passed and approved this 25th day of January 2024.

SAFETY PERFORMANCE MEASURE TARGETS

FDOT's **2023** Highway Safety Improvement Program (HSIP) includes Vision Zero targets for each of the federal performance measures. The TPO has coordinated with FDOT through the MPOAC and is supporting the same targets. The five federal safety performance measures and FDOT targets for **2024** are:

Safety Performance Measure	2024 Target
Number of fatalities	0
Rate of fatalities (per 100 million VMT)	0
Number of serious injuries	0
Rate of serious injuries (per 100 million VMT)	0
Number of non-motorized fatalities and serious injuries	0

The safety performance measures are evaluated with a rolling five-year average of traffic crash data and daily vehicle miles travelled. The most recent safety statistics **(2018-2022)** for Florida and Miami-Dade County are:

Performance Measure	Florida	Miami-Dade
Fatalities (annual average)	3,387	317
Fatality Rate per 100M VMT	1.54	1.60
Serious Injuries (annual average)	17,146	1,377
Serious Injury Rate per 100M VMT	7.79	6.90
Ped/Bike Fatalities & Serious Injuries (annual average)	3,154	391

DATA SOURCES: Current year (2022) and current 5-year average (2018-22) fatality and serious injury counts from Signal Four Analytics (S4) database as of November 15, 2023: any figures that include the 2023 data are preliminary at this time and may change with future updates; Prior year and prior 5-year average fatality and serious injury counts from Florida Dept. of Transportation (FDOT) State Safety Office's historic Crash Analysis Reporting (CAR) database; Traffic volumes as published by the FDOT office of Transportation Data and Analytics

DRAFT

On August 31, 2023, FDOT established statewide performance targets for the safety measures for calendar year 2024. On January 25, 2024, the Miami-Dade TPO agreed to support FDOT's statewide safety performance targets, thus agreeing to plan and program projects in the TIP that once implemented, are anticipated to make progress toward achieving the statewide targets:

TABLE 1: 2024 Safety Performance Management Measure Targets

SAFETY PERFORMANCE MEASURE	MIAMI-DADE TPO SAFETY TARGETS	2024 FDOT STATEWIDE SAFETY TARGETS
Number of Fatalities	0	0
Fatality Rate per 100 Million Vehicle Miles Traveled (VMT)	0	0
Number of Serious Injuries	0	0
Serious Injury Rate per 100M VMT	0	0
Number of Combined Non-Motorized Fatalities and Serious Injuries	0	0

BASELINE CONDITIONS

Safety Performance Management Measures are evaluated using a 5-year rolling average of traffic crash data and vehicle miles traveled. Baseline safety performance conditions are established based on the 5-year rolling average ending in the calendar year prior to the establishment of the State's target. FDOT established its target for Safety Performance Management Measures for 2024 in 2023. Therefore, the baseline year for Florida MPOs for Calendar Year 2024 is the rolling 5-year average for 2018-2022. The baseline performance for Florida and Miami-Dade County for CY 2023 is shown in **Table 2: Baseline Safety Performance Management Measures.**

TABLE 2: FDOT Baseline Safety Performance Measures (Data from 5-Year Rolling Average from 2018-2022)

PERFORMANCE MEASURE	FLORIDA	MIAMI-DADE
Number of Fatalities (Annual Average)	3,387	317.0
Fatality Rate per 100M VMT	1.54	1.60
Number of Serious Injuries (Annual Average)	17,146	1,377

DRAFT

PERFORMANCE MEASURE	FLORIDA	MIAMI-DADE
Serious Injury Rate per 100M VMT	7.79	6.90
Number of Combined Non-Motorized Fatalities and Serious Injuries (Annual Average)	3,154	391.0

Single-county MPO/TPOs that encompass the entire limits of the county are calculated using the total county fatalities, serious injuries and traffic volumes as published. Multiple-county MPO/TPOs that encompass the entire limits of each of their included counties are calculated using the fatalities, serious injuries and traffic volumes summed for all of the included counties and are combined totals and rates calculated based on combined totals and combined traffic volumes. MPO/TPOs that do not encompass whole counties are not calculated at the MPO/TPO level but the county calculations for each included county are presented in the lower table.

DATA SOURCES: Fatality and serious injury counts from Florida Dept. of Transportation (FDOT) State Safety Office's Crash Analysis Reporting (CAR) database as of November 15, 2023: any figures that include 2023 data are preliminary at this time and may change with future updates; traffic volumes as published by the FDOT office of Transportation Data and Analytics at https://www.fdot.gov/statistics/mileage-rpts.

TRENDS FOR MIAMI-DADE – STATISTICS

The TIP development process, consistent with the process used to develop the MPO's Long-Range Transportation Plan, includes analysis of safety data trends, including the location and factors associated with crashes with emphasis on fatalities and serious injuries. These data are used to help identify regional safety issues and potential safety strategies for the LRTP and TIP.

The TPO uses crash data tracking fatalities and serious injuries in Miami-Dade County to analyze past trends and identify regional safety issues. Tracking these measures will help to estimate the effectiveness of future TPO transportation investment, as reflected in the TIP. The changes in Safety Performance Measures for the Miami-Dade TPO from 2017 through 2021 are shown in **Table 3: Miami-Dade Safety Performance Management Measure Data.** The measures shown in Table 3 were calculated by following the same methodology as that used to calculate the baseline conditions.

TABLE 3: Miami-Dade County Safety Performance Management Measure Data (FDOT Rolling 5-Year Average)

PERFORMANCE MEASURE	2014-2018	2015-2019	2016-2020	2017-2021	2018-2022
Number of Fatalities (Annual Average)	298.8	302.6	298.4	310.4	317.4
Fatality Rate per 100M VMT	1.502	1.507	1.507	1.570	1.597
Number of Serious Injuries (Annual Average)	1,747.6	1,664.4	1,518.0	1,442.6	1,377.0
Serious Injury Rate per 100 Million VMT	8.793	8.291	7.617	7.250	6.895

DRAFT

PERFORMANCE MEASURE	2014-2018	2015-2019	2016-2020	2017-2021	2018-2022
Number of Combined Non-Motorized Fatalities and Serious Injuries	435.6	426.8	398.4	393.0	391.0
VMT (100M VMT)	203.007	203.915	183.185	198.382	207.751

DATA SOURCES: Fatality and serious injury counts from Florida Dept. of Transportation (FDOT) State Safety Office's Crash Analysis Reporting (CAR) database as of November 15, 2023; traffic volumes as published by the FDOT office of Transportation Data and Analytics at https://www.fdot.gov/statistics/mileage-rpts.

ASSESSMENT OF SIGNIFICANT STATE PROGRESS

Florida's performance on meeting the Safety Performance Management Measures will be assessed by FHWA by determining if the state's target has been met or if significant progress toward meeting the target was made. "A State DOT is determined to have met or made significant progress toward meeting its targets when the targets for at least 4 out of the 5 safety performance targets are met or the outcome for a performance measure is better than its baseline." (http://safety.fhwa.dot.gov; Let's Talk Performance Webinar FAQs, Safety Performance Management Measures; page 5).

The first assessment of significant progress was conducted by FHWA in December 2019 to see if Florida met its 2014-2018 HSIP targets.. Subsequent assessments will be conducted in December of each year for the next rolling 5-year period for targets and baseline data (i.e.: the assessment in December 2021 will determine if the targets for 2016-2020 will be met or if significant progress is made toward the 2013-2017 baseline conditions).

COORDINATION WITH STATEWIDE SAFETY PLANS AND PROCESSES

The TPO recognizes the importance of linking goals, objectives, and investment priorities to established performance objectives, and that this link is critical to the achievement of national transportation goals and statewide and regional performance targets. As such, the Miami-Dade 2045 LRTP reflects the goals, objectives, performance measures, and targets as they are available and described in other state and public transportation plans and processes; specifically, the Florida Strategic Highway Safety Plan (SHSP), the Florida Highway Safety Improvement Program (HSIP), and the Florida Transportation Plan (FTP).

- The 2021-2025 Florida Strategic Highway Safety Plan (SHSP), issued in March 2021, is the statewide plan focusing on how to accomplish the vision of eliminating fatalities and reducing serious injuries on all public roads. The SHSP was developed in coordination with Florida's 27 metropolitan planning organizations (MPOs) through Florida's Metropolitan Planning Organization Advisory Council (MPOAC). The SHSP guides FDOT, MPOs, and other safety partners in addressing safety and defines a framework for implementation activities to be carried out throughout the State.

DRAFT

- The FDOT HSIP process provides for a continuous and systematic process that identifies and reviews traffic safety issues around the state to identify locations with potential for improvement. The ultimate goal of the HSIP process is to reduce the number of crashes, injuries and fatalities by eliminating certain predominant types of crashes through the implementation of engineering solutions.
- Transportation projects are identified and prioritized with the MPOs and non-metropolitan local governments. Data are analyzed for each potential project, using traffic safety data and traffic demand modeling, among other data. The FDOT Project Development and Environment Manual requires the consideration of safety when preparing a proposed project's purpose and need, and defines several factors related to safety, including crash modification factor and safety performance factor, as part of the analysis of alternatives. MPOs and local governments consider safety data analysis when determining project priorities.

CONTRIBUTIONS TO ACHIEVING SAFETY PERFORMANCE TARGETS

The TPO and the Florida Department of Transportation (FDOT) are committed to making roadways safer in Miami-Dade County as a means to improve Florida's overall level of safety. The TPO has many programs, initiatives, and projects identified in the TIP and the LRTP to make transportation safer in Miami-Dade County. FDOT's key plan is its Work Program. The TPO and FDOT coordinate their plans and programs in order to improve the safety of the Miami-Dade transportation system, according to C.F.R. 450.332(b).

The TIP includes specific investment priorities that support all of the TPO's goals including safety, using a prioritization and project selection process established in the LRTP. The TPO has developed a TIP project selection process that identifies and prioritizes projects aimed at improving transportation safety. The ranking criteria are updated annually and are included in the appendices of the TIP. The current ranking criteria give the most point value to projects with the greatest anticipated fatality reduction. Going forward, the project evaluation and prioritization processes used in the LRTP and the TIP will continue to use a data-driven strategy that considers stakeholder input to evaluate projects that have an anticipated effect of reducing both fatal and injury crashes.

The program of projects identified through this process are anticipated to contribute toward achievement of the safety targets. The safety infrastructure investments are targeted at specific opportunities to improve safety. In addition to the specific safety programs included in the TIP, other programs also consider safety as a key factor. Safety impacts are considered in the evaluation of proposed preservation, capacity, and operations projects, including projects on Florida's Strategic Intermodal System as well as regionally significant facilities identified in the LRTP. All projects in this TIP inherently support progress towards achieving the safety performance targets, through their adherence to the TPOs policies, programs, and standards related to safety.

DRAFT

MIAMI-DADE TPO

TRANSPORTATION IMPROVEMENT PLAN — In total, the 2025-2029 TIP includes $108M programmed on 102 projects that improve safety and to support the achievement of the established safety targets. The 2025-2029 TIP is located on the internet at: http://www.interactip.com/.

This includes Safe Routes to School projects, pedestrian safety projects, intersection safety projects and safety pushbutton projects. The Safety Performance Management Measures are incorporated into the 2025-2029 TIP to continue to advance transportation safety and link our investments to achieve our safety targets.

DRAFT

LONG RANGE TRANSPORTATION PLAN

The Miami-Dade 2045 LRTP increases the safety of the transportation system for motorized and non-motorized users as required. The LRTP aligns with the Florida SHSP and the FDOT HSIP with specific strategies to improve safety performance focused on prioritized safety projects, pedestrian and/or bicycle safety enhancements, and traffic operation improvements to address the goal to reduce fatalities and serious injuries. The TPO's commitment to safety is emphasized through the 2045 LRTP Goal to Increase the Safety of the Transportation System for All Users, which includes the following objectives:

- Improve the safety of the transportation system,
- Promote projects in high crash locations, and
- Improve safety of the transportation system of the elderly and disabled.

There are over 100 projects listed in the 2045 LRTP that will help improve safety of the Miami-Dade transportation system, including: capacity and operational improvements, redesigns of roadway segments, transportation systems management and operation (TSM&O), roadway and access improvements, adding truck lanes, and reconstruction projects. For a complete list of projects, please see Chapter 7 of the Miami-Dade 2045 LRTP; https://miamidade2045lrtp.com/.

The 2045 Miami-Dade Bicycle Pedestrian Master Plan serves as the non-motorized transportation element of the 2045 LRTP. The vision of the 2045 Miami-Dade Bicycle Pedestrian Master Plan is to enhance the accessibility, safety, public health, social equity, environment, and overall quality of life within Miami-Dade County by creating interconnected bicycle and pedestrian friendly communities throughout the county—with safety being a key component of the plan. A snapshot of the number of projects by Priority, improvement type, and funding allocation by priority and phase from the 2045 LRTP are summarized in **Figure 5: Bicycle/Pedestrian Projects by Improvement Type and Priority** and **Figure 6: Allocation of Bicycle/Pedestrian Funding by Priority and Phase (Thousands YOE $)** on the next page. The 2045 Bicycle Pedestrian Master Plan can be located at: http://miamidadetpo.org/library/plans/miami-dade-2045-bicycle-pedestrian-master-plan-2019-09.pdf.

For additional information on the Miami-Dade 2045 LRTP, please see the Miami-Dade 2045 Long Range Transportation Section of this report starting on page PM-71.

DRAFT

UNIFIED PLANNING WORK PROGRAM (UPWP)

The Miami-Dade TPO Unified Planning Work Program (UPWP) for Transportation Planning Activities, Fiscal Years 2024/2025, outlines the planning projects the TPO will undertake to improve Miami-Dade County's multimodal transportation system. The UPWP identifies the planning projects budgets and activities that support the comprehensive and multimodal transportation improvement program approved for the metropolitan area in the 2045 LRTP. The planning efforts in the UPWP must implement the transportation priorities in the County Comprehensive Plan, which are based on the goals from the 2045 LRTP—inclusive of improving the safety of the transportation system for all users. Safety is addressed specifically in the Aging Road Users Strategic Safety Plan, Municipal Grant Program - South Miami Pedestrian Safety and Mobility Infrastructure Improvement Plan, and several Safe Routes to School tasks. Safety is also woven into many tasks that address safety improvements for trucking and goods movement and improving bicycle and pedestrian safety.

SMART MOVES PROGRAM: CONNECTING SMART IDEAS

The SMART Moves Program will be used by the TPO to prioritize and program planning studies in Miami-Dade that will support the delivery of projects including complete streets, first/last mile connections, connected and autonomous vehicles, and other priority projects that enhance connectivity, accessibility, and integration of the entire transportation system.

The SMART Moves Program can potentially utilize federal funding that is the responsibility of the TPO (such as Metropolitan Planning Funds (PL), Federal Transit Administration Section 5305(d) Funds, Congestion Mitigation for Air Quality (CMAQ), Surface Transportation Block Grant Program, etc.). This process will involve a once-a-year call for all local roadway, transit, freight, bicycle and pedestrian projects, and will result in an annual portfolio of projects in the UPWP.

The SMART Moves Program has two components:

1. Call for SMART Ideas: Connecting SMART Ideas to collect the public's input.
2. Application from Municipalities, which provides a mechanism to partner with local agencies for the implementation of projects.

PROGRAM OBJECTIVES

- Provide a mechanism for the TPO to partner with local agencies in the implementation of projects that will support complete streets, first/last mile connections, connected and autonomous vehicles and the SMART Plan.
- Develop a holistic approach for identifying and prioritizing highly effective transportation projects.
- Assist local agencies with delivery of multimodal projects that support transportation priorities in Miami-Dade County.
- Create a tracking system to monitor project status and expenditure of programmed funds.

DRAFT

VISION ZERO

The TPO's Vision Zero Plan was completed in June 2018 and is currently being implemented by DTPW. Vision Zero is a systematic approach to implementing safety countermeasures and policies to reduce, and ultimately eliminate fatalities and serious injuries related to mobility in Miami-Dade County. This Plan is based on a significant Data Collection effort to determine high-crash locations. Among the data collected are: Miami-Dade crashes; traffic fatality data from the Florida Department of Health (DOH); and current vehicular volumes, bicycle and pedestrian counts, and transit ridership data. Crash data provide details on: location, crash type and contributing causes; vehicle information, such as mode, vehicle type and speed; and occupant information, such as numbers of fatalities and injuries, ages and impairment. Based on the data analyses, safety countermeasures were identified. The recommendations include short- and long-term, location-specific actions that address both crash prevention and injury reduction. A sub-set of priority projects has been identified for rapid implementation. Links to Vision Zero documents can be found here:

Miami-Dade TPO 2018 Vision Zero Report: http://www.miamidadetpo.org/library/studies/miami-dade-county-vision-zero-plan-2018-06.pdf

2024 Miami-Dade County Vision Zero Action Plan: https://www.miamidade.gov/transit/library/2024-vision-zero-action-plan.pdf

FDOT

BICYCLE/PEDESTRIAN CORRIDOR IMPROVEMENTS

The bicycle/pedestrian network is a component of the overall transportation system. FDOT evaluates bicycle and pedestrian improvements in conjunction with capacity and resurfacing projects. Bicycle and pedestrian projects are also implemented by local agencies, who oversee construction and management. In addition, some projects are funded through the federally funded Transportation Alternatives Program (TAP) or the state funded Shared Use Non-motorized (SUN) Trail Program. FDOT is also in the process of developing a Bicycle Network Connectivity Assessment that is aimed to assess and inventory the Existing and Planned Bicycle Network and incorporate new potential corridors within a plan to improve the connectivity, accessibility, and safety of cyclists within Miami-Dade County. This assessment is placing a significant focus on the greenways and trails which will act as the centerpiece for which all other connections (existing, upcoming, previously planned, and new proposed projects determined through this process) will be viewed. The result of this assessment will be a detailed action plan containing proposed projects that will improve the safety and comfort of cycling throughout the County.

SAFE ROUTES TO SCHOOL

Florida's Safe Routes to School (SRTS) program is designed to help communities address school transportation safety needs and to encourage students to walk or ride their bicycle to school. The program encourages children to walk and bike to school by making walking and biking safe and appealing. The SRTS program integrates safety, traffic relief, health, environmental

DRAFT

awareness and physical activity and fitness within a single program that is aimed at increasing walking and bicycling to school safely. The TPO annually works with Miami-Dade County Public Schools, Miami-Dade County Department of Transportation and Public Works and other agencies to submit applications to FDOT to obtain SRTS funding in future years. From 2005 to the 2022/23 cycle, the TPO and its partners have submitted applications for 153 schools with $19.9 million in funding been awarded for infrastructure improvements. FDOT's commits $7 million statewide annually to the SRTS program. FDOT has currently placed a pause on the SRTS program for the 2023/24 cycle.

COMPLETE STREETS PROJECTS

FDOT's Complete Streets Policy, adopted in September 2014, promotes safety, quality of life, and economic development. FDOT developed the Complete Streets Implementation Plan in partnership with the national not-for-profit organization Smart Growth America to guide FDOT's efforts to implement its Complete Streets Policy. The Plan recommended a five-part implementation framework for integrating a Complete Streets approach into FDOT's practices to ensure that future transportation decisions and investments address the needs of all users of the transportation system and is responsive to community goals and context. The Plan also proposed a two-year schedule for Complete Streets Implementation, including: (1) revising guidance, standards, manuals, policies, and other documents; (2) updating decision-making processes; (3) modifying approaches for measuring performance; (4) managing internal and external communication and collaboration during implementation; and (5) providing ongoing education and training.

TRANSPORTATION PERFORMANCE MANAGEMENT
SYSTEM PERFORMANCE REPORT
INFRASTRUCTURE: PAVEMENT AND BRIDGE

DRAFT

INFRASTRUCTURE (PAVEMENT & BRIDGE) PERFORMANCE MANAGEMENT MEASURES

Infrastructure Condition is the second national goal identified in MAP-21 and maintained in the FAST Act. In January 2017, the Federal Highway Administration published a Final Rule in the Federal Register entitled "National Performance Management Measures: Assessing Pavement Condition for the National Highway Performance Program and Bridge Condition for the National Highway Performance Program," that included National Performance Management Measures to evaluate the pavement and bridge conditions on the National Highway System (NHS) [23 CFR § 490]. The Infrastructure Rule became effective on February 17, 2017.

PERFORMANCE MANAGEMENT MEASURES

The Infrastructure Rule requires State DOTs and MPOs to set targets for the following Infrastructure Performance Management Measures for the Interstate System and Non-Interstate NHS, and to report on progress toward achieving those targets. State DOTs report progress to FHWA, while MPOs report progress to their State DOT. FDOT's 2017 Initial Transportation Asset Management Plan (TAMP) was released on April 30, 2018 and is the basis for setting the Transportation Performance Measure targets for pavement and bridge condition required by the performance management regulations in 23 CFR 490. The TAMP was later updated on June 28, 2019. https://fdotwww.blob.core.windows.net/sitefinity/docs/default-source/planning/performance/fdot-transportation-asset-management-plan_(june-28-2019).pdf?sfvrsn=36c94a6b_2

In determining its approach to establishing performance targets for the federal pavement and bridge condition performance measures, FDOT considered many factors. To begin with, FDOT is mandated by Florida Statute 334.046 to preserve the state's pavement and bridges to specific standards. To adhere to the statutory guidelines, FDOT prioritizes funding allocations to ensure the current transportation system is adequately preserved and maintained before funding is allocated for capacity improvements. These statutory guidelines envelope the statewide federal targets that have been established for pavements and bridges.

In addition, MAP-21 requires FDOT to develop a Transportation Asset Management Plan (TAMP) for all NHS pavements and bridges within the state. The TAMP must include investment strategies leading to a program of projects that would make progress toward achievement of the state DOT targets for asset condition and performance of the NHS. FDOT's TAMP was updated to reflect MAP-21 requirements in 2018.

Further, the federal pavement condition measures require a new methodology that is a departure from the methods currently used by FDOT and uses different ratings and pavement segment lengths. For bridge condition, the performance is measured in deck area under the federal measure, while the FDOT programs its bridge repair or replacement work on a bridge by bridge basis. As such, the federal measures are not directly comparable to the methods that are most familiar to FDOT.

DRAFT

In consideration of these differences, as well as other unknowns and unfamiliarity associated with the new required processes, FDOT took a conservative approach when establishing its initial pavement and bridge condition targets. It is the intent of FDOT to meet or exceed the established performance targets.

For the First Performance Period (January 1, 2018 to December 31, 2021) FDOT established the 2-year (end of calendar year 2019) and 4-year (end of calendar year 2021) performance targets for bridge and, pavement conditions on May 18, 2018.

PERFORMANCE TARGETS

By Resolution 44-18 on October 25, 2018 (illustrated in **Figure 7 – TPO Resolution System Performance Measures Targets**), the TPO Governing Board agreed to support FDOT's statewide pavement and bridge performance targets. By adopting these targets, the TPO will support achievement of the pavement and bridge targets by planning and programing projects in the TIP and LRTP that once implemented, are anticipated to make progress toward achieving the statewide targets.

Figure 7: TPO Resolution System Performance Measures Targets

Agenda Item 5.B.2

TPO RESOLUTION #44-18

RESOLUTION ESTABLISHING THE FLORIDA DEPARTMENT OF TRANSPORTATION'S PERFORMANCE MEASURE TARGETS FOR PAVEMENT CONDITION, BRIDGE CONDITION, NATIONAL HIGHWAY SYSTEM PERFORMANCE AND FREIGHT MOVEMENT

WHEREAS, the Interlocal Agreement creating and establishing the Miami-Dade Metropolitan Planning Organization (MPO), for the Miami Urbanized Area, now known as the Transportation Planning Organization (TPO), requires that the TPO provide a structure to evaluate the adequacy of the transportation planning and programming process; and

WHEREAS, the Transportation Planning Council (TPC) has been established and charged with the responsibility and duty of fulfilling the aforementioned functions; and

WHEREAS, the TPC has reviewed the Florida Department of Transportation's performance measure targets, made a part hereof, and finds it consistent with the goals and objectives of the Transportation Plan for the Miami Urbanized Area,

NOW, THEREFORE, BE IT RESOLVED BY THE GOVERNING BOARD OF THE TRANSPORTATION PLANNING ORGANIZATION IN ITS ROLE AS THE MPO FOR THE MIAMI URBANIZED AREA, that the attached Florida Department of Transportation's performance measure targets for pavement condition, bridge condition, national highway system performance and freight movement, are hereby established.

The adoption of the foregoing resolution was moved by Board Member Jose "Pepe" Diaz. The motion was seconded by Board Member Rebeca Sosa, and upon being put to a vote, the vote was as follows:

Chairman Esteban L. Bovo, Jr.-Aye
Vice Chairman Francis Suarez-Absent

Board Member Juan Carlos Bermudez	-Aye	Board Member Vince Lago	-Absent
Board Member Jose "Pepe" Diaz	-Aye	Board Member Daniella Levine Cava	-Absent

Federal Performance Measures
FDOT Initial Targets for Pavement, Bridge and System Performance
May 18, 2018

Pavement Condition - National Highway System Performance Measure	2yr Target	4yr Target
% of Interstate pavements in Good condition	n/a	≥ 60%
% of Interstate pavements in Poor condition	n/a	≤ 5%
% of non-Interstate NHS pavements in Good condition	≥ 40%	≥ 40%
% of non-Interstate NHS pavements in Poor condition	≤ 5%	≤ 5%

Bridge Condition - National Highway System Performance Measure	2yr Target	4yr Target
% of NHS bridges classified as in Good condition by deck area	≥ 50%	≥ 50%
% of NHS bridges classified as in Poor condition by deck area	≤ 10%	≤ 10%

National Highway System and Freight Reliability Performance Measure	2yr Target	4yr Target
% of person-miles traveled on the Interstate that are reliable	75%	70%
% of person-miles traveled on the non-Interstate NHS that are reliable	n/a	50%
Truck travel time reliability ratio (TTR) on the Interstate	1.75	2

DRAFT

For the Second Performance Period (January 1, 2022 to December 31, 2025) FDOT established 2023 and 2025 targets for NHS bridge and pavement on December 16, 2022 (FHWA changed the due date from October 1, 2022 due to a technical issue with the reporting system). These targets are identical to those set for 2019 and 2021 respectively. Florida's performance through 2021 exceeds the targets.

National Performance Management Measures to Assess Pavement Condition (23 CFR 490.307)

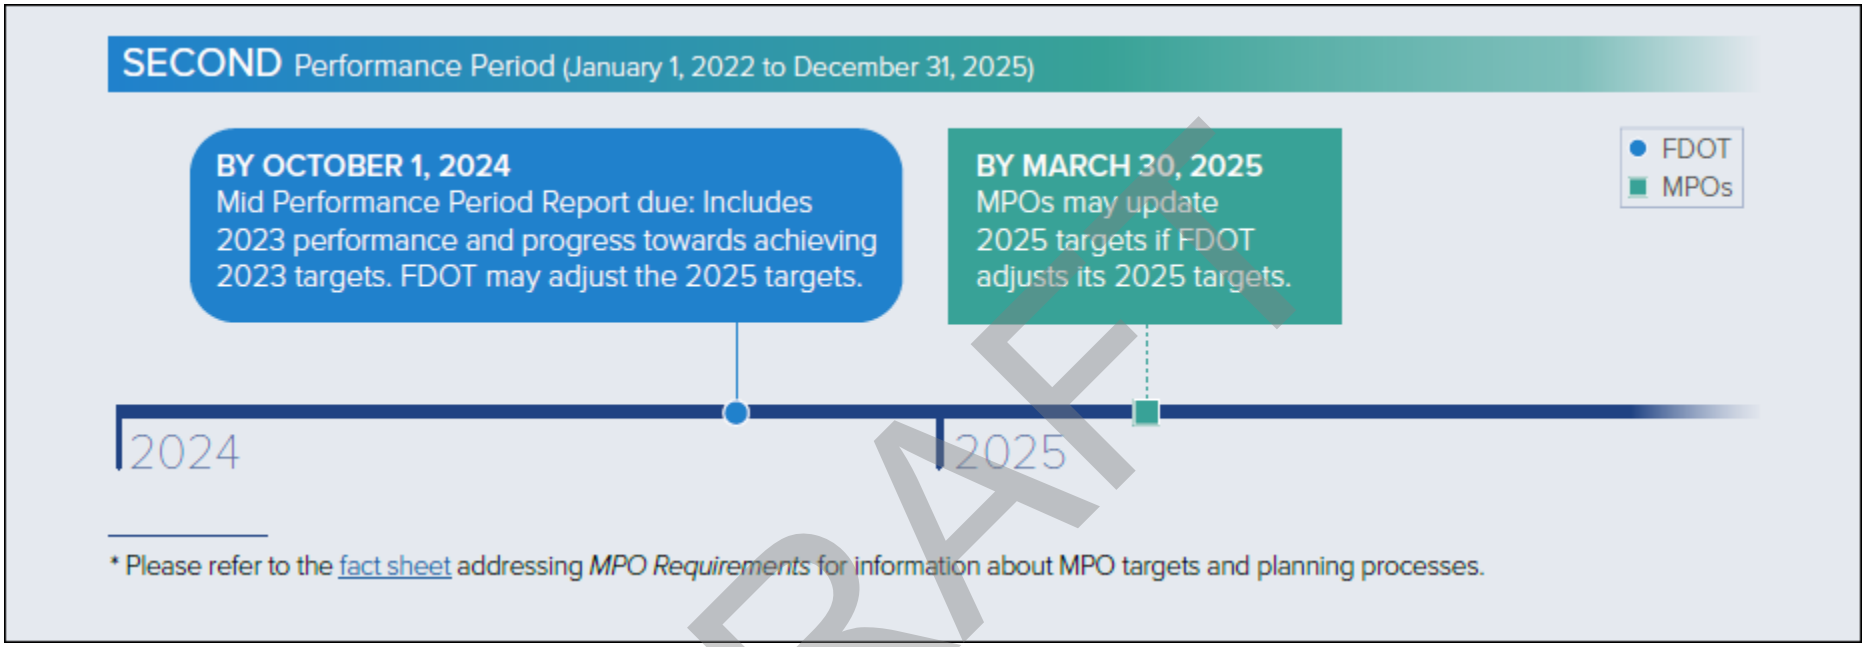
PERFORMANCE MEASURE	2023 TARGET	2025 TARGET
% of Interstate Pavements in Good Condition	≥ 60%	≥ 60%
% of Interstate Pavements in Poor Condition	≤ 5%	≤ 5%
% of Non-Interstate NHS Pavements in Good Condition	≥ 40%	≥ 40%
% of Non-Interstate NHS Pavements in Poor Condition	≥ 5%	≥ 5%

National Performance Management Measures to Assess Bridge Condition (23 CFR 490.407)

PERFORMANCE MEASURE	2023 TARGET	2025 TARGET
% of NHS Bridges Classified As in Good Condition by Deck Area	≥ 50%	≥ 50%
% of NHS Bridges Classified As in Poor Condition by Deck Area	≤ 10%	≤ 10%

DRAFT

The timeline for the Second Performance Period is illustrated below (source FDOT):



MPOs were to set 2025 targets by June 14, 2023 (within 180 days after FDOT set the statewide targets)and have the option of supporting the statewide targets or establishing their own targets for the MPO planning area.

The TIP must include the most recent reported performance and targets as well as a description of how the investments contribute to achieving the targets. The LRTP must include a System Performance Report that discusses performance and the progress achieved in meeting targets.

PERFORMANCE TARGETS

By Resolution #20-2023 on April 20, 2023 (**illustrated in Figure 8: TPO Resolution – System Performance Measures Targets**), the TPO Governing Board agreed to continue to support FDOT's statewide pavement and bridge performance targets. By adopting these targets, the TPO will support achievement of the pavement and bridge targets by planning and programing projects in the TIP and LRTP that once implemented, are anticipated to make progress toward achieving the statewide targets.

DRAFT

Figure 8: TPO Resolution – System Performance Measures Targets

Agenda Item 5.B.6

TPO RESOLUTION #20-2023

RESOLUTION ESTABLISHING OF THE FLORIDA DEPARTMENT OF TRANSPORTATION'S 2023 AND 2025 BRIDGE/PAVEMENT AND SYSTEM PERFORMANCE MEASURES TARGETS

WHEREAS, the Interlocal Agreement creating and establishing the Metropolitan Planning Organization (MPO) for the Miami Urbanized Area requires that the Miami-Dade Transportation Planning Organization (TPO), in its role as the MPO, provides a structure to evaluate the adequacy of the transportation planning and programming process; and

WHEREAS, the Transportation Planning Council (TPC) has been established and charged with the responsibility and duty of fulfilling the aforementioned functions; and

WHEREAS, the TPC has reviewed the Florida Department of Transportation's performance measure targets, made a part hereof, and finds it consistent with the goals and objectives of the Transportation Plan for the Miami Urbanized Area,

NOW, THEREFORE, BE IT RESOLVED BY THE GOVERNING BOARD OF THE TRANSPORTATION PLANNING ORGANIZATION (TPO) IN ITS ROLE AS THE MPO FOR THE MIAMI URBANIZED AREA, that this Board hereby establishes the attached Florida Department of Transportation's 2023 and 2025 bridge/pavement and system performance measures targets.

The adoption of the foregoing resolution was moved by Vice Chairman Oliver G. Gilbert III. The motion was seconded by Board Member Marleine Bastien, and upon being put to a vote, the vote was as follows:

Chairman Esteban Bovo, Jr. - Aye
Vice Chairman Oliver G. Gilbert III - Aye

Board Member Marleine Bastien	- Aye	Board Member Eileen Higgins	- Aye
Board Member Juan Carlos Bermudez	- Aye	Board Member Steven D. Losner	- Aye

DRAFT

ASSESSING PAVEMENT CONDITION FOR THE NATIONAL HIGHWAY PERFORMANCE PROGRAM

State DOTs are required to collect performance measure data on the Interstate and Non-Interstate NHS and report it to the Highway Performance Monitoring System (HPMS). The Final Rule required State DOTs to submit a Data Quality Management Program plan to FHWA for approval by May 20, 2018. The Data Quality Management Program plan must include the State's methods for identifying (i) how data collection equipment is calibrated and certified; (ii) how persons performing the data collection are certified; (iii) how quality control measures are implemented before, during and after the data is collected; (iv) how sampling, review and checking of the data is conducted; and (v) what procedures are used to resolve errors, along with criteria used to accept data [23 CFR § 490.319]. Once the State's Data Quality Management Program has been approved by FHWA, State DOTs shall use the program to collect and report performance measure data to assess the State's overall pavement condition.

For each pavement metric, a threshold is used to establish good, fair, or poor condition. Pavement condition is assessed for each 0.1-mile section of the through travel lanes of mainline highways on the Interstate or the non-Interstate NHS using these metrics and thresholds. A pavement section is rated as good if all three metric ratings are good, and poor if two or more metric ratings are poor. Sections that are not good or poor are considered fair.

The good/poor measures are expressed as a percentage and are determined by summing the total lane-miles of good or poor highway segments and dividing by the total lane-miles of all highway segments on the applicable system. Pavement in good condition suggests that no major investment is needed and should be considered for preservation treatment. Pavement in poor condition suggests major reconstruction investment is needed due to either ride quality or a structural deficiency.

Figure 9: Pavement Condition Metric Thresholds

Rating	Good	Fair	Poor
IRI *(inches/mile)*	<95	***95-170***	***>170***
PSR* *(0.0-5.0 value)*	≥4.0	2.0-4.0	≤2.0
Cracking Percent *(%)*	<5	***CRCP: 5-10 Jointed: 5-15 Asphalt: 5-20***	***>10 >15 >20***
Rutting *(inches)*	<0.20	0.20-0.40	>0.40
Faulting *(inches)*	***<0.10***	0.10-0.15	>0.15

*PSR may be used only on routes with posted speed limit < 40mph.

Source: FHWA

The Pavement Condition Metrics used for the evaluation include:

- International Roughness Index (IRI) - an indicator of roughness; applicable to all asphalt and concrete pavements;
- Cracking percent - percentage of the pavement surface exhibiting cracking; applicable to all asphalt and concrete pavements;
- Rutting - extent of surface depressions; applicable to asphalt pavements;
- Faulting - vertical misalignment of pavement joints; applicable to certain types of concrete pavements; and
- Present Serviceability Rating (PSR) – a quality rating applicable only to certain lower speed roads (may be use on roadways with a posted speed limit of less than 40 Miles per Hour (MPH).

DRAFT

"These metrics collectively provide a way to quantify pavement condition in terms of roughness and cracking for all pavement types, rutting for asphalt pavement surfaces, and faulting (misalignment between concrete slabs) for jointed concrete pavement surfaces," [23 CFR § 490]. The Pavement Condition Metric Thresholds can be seen in **Figure 9: Pavement Condition Metric Thresholds.**

Pavement condition is assessed for each 0.1-mile section of the through travel lanes of mainline highways on the Interstate or the non-Interstate NHS using these metrics and thresholds. A pavement section is rated as good if all three metric ratings are good, and poor if two or more metric ratings are poor. Sections that are not good or poor are considered fair.

The good/poor measures are expressed as a percentage and are determined by summing the total lane-miles of good or poor highway segments and dividing by the total lane-miles of all highway segments on the applicable system. Pavement in good condition suggests that no major investment is needed and should be considered for preservation treatment. Pavement in poor condition suggests major reconstruction investment is needed due to either ride quality or a structural deficiency.

ASSESSING BRIDGE CONDITION FOR THE NATIONAL HIGHWAY PERFORMANCE PROGRAM

State DOTs, Federal agencies, and Tribal Governments are required to annually submit bridge inventory data to FHWA using the National Bridge Inspection Standards (NBIS). The data is reported in the National Bridge Inventory (NBI) Database, and includes data on bridge Deck, Superstructure, Substructure, and Culverts. State DOTs are required to submit their most recent NBI data by March 15th of each year. Under the Infrastructure National Performance Management Measures Final Rule, these metrics will be used to assess overall bridge condition. The Final Rule applies to all bridges on the NHS, including bridge on-ramps and off-ramps that are connected to the NHS. The condition metric thresholds used to evaluate bridges can be seen in **Figure 10: Bridge Condition Metric Thresholds**.

If any of the metrics are less than or equal to 4 on the NBI rating scale, the bridge is considered structurally deficient. A bridge in good condition suggest that no major investment is needed. A bridge in poor condition is safe to drive on however, it is nearing a point where substantial reconstruction or replacement is needed. "FHWA shall calculate a ratio of the total deck area of all bridges classified as Structurally Deficient to the total deck area of all applicable bridges for each state," [23 CFR § 490]. If 10 percent or less of the total deck area of bridges in the state are classified as structurally deficient, then the state has met the minimum condition level. If the state does not meet the minimum condition level for a period of 3 consecutive years, they must dedicate NHPP funds to eligible NHS bridge projects.

DRAFT

BASELINE CONDITIONS — For the First Performance Period (January 1, 2018, to December 31, 2021) FDOT established the 2-year (end of calendar year 2019) and 4-year (end of calendar year 2021) performance targets for bridge and, pavement conditions on May 18, 2018.

For the Second Performance Period (January 1, 2022, to December 31, 2025) FDOT established 2023 and 2025 targets for NHS bridge and pavement on December 16, 2022 (FHWA changed the due date from October 1, 2022, due to a technical issue with the reporting system). These targets are identical to those set for 2019 and 2021 respectively. Florida's performance through 2021 exceeds the targets.

The baseline conditions for pavement condition for Florida and for Miami-Dade County are shown in **Table 4 Baseline Pavement Condition Performance Management Measures 2017 (Baseline), and 2020 thru 2022**. The baseline conditions for bridge condition are shown in **Table 5: Baseline Bridge Condition Performance Management Measures 2018, and 2020 thru 2022.**

Figure 10: Bridge Condition Metric Thresholds

Table 5: Baseline Bridge Condition Performance Management Measures 2018, and 2020 thru 2022

BRIDGE CONDITIONS								
BRIDGE CONDITION	2018 (Baseline)		2020		2021		2022	
	Florida	Miami-Dade	Florida	Miami-Dade	Florida	Miami-Dade	Florida	Miami-Dade
% of NHS Bridges (by deck area) classified in GOOD condition	66.6%	84.0%	74.2%	83.9%	72.7%	81.6%	71.0%	80.3%
% of NHS Bridges (by deck area) classified in POOR condition	1.2%	0.4%	0.5%	0.2%	0.7%	0.1%	0.9%	0.1%

Source: FDOT

For the First Performance Period (January 1, 2018, to December 31, 2021) FDOT established the 2-year (end of calendar year 2019) and 4-year (end of calendar year 2021) performance targets for bridge and, pavement conditions on May 18, 2018.

For the Second Performance Period (January 1, 2022, to December 31, 2025) FDOT established 2023 and 2025 targets for NHS bridge and pavement on December 16, 2022 (FHWA changed the due date from October 1, 2022 due to a technical issue with the reporting system). These targets are identical to those set for 2019 and 2021 respectively. Florida's performance through 2021 exceeds the targets.

ASSESSMENT OF SIGNIFICANT STATE PROGRESS — FHWA will determine if FDOT has made significant progress toward the achievement of each 2-year or 4-year statewide target if either:

- The actual condition/performance level is better than the baseline performance; or
- The actual performance level is equal to or better than the established target.

FHWA's determination of significant progress toward the 2021 bridge and pavement targets is anticipated in March 2023.. FHWA will not assess MPO target achievement. However, FHWA and FTA will review MPO adherence to performance management requirements as part of periodic transportation planning process reviews.

MINIMUM CONDITIONS — Every year, FHWA will assess if FDOT is meeting federal minimum condition standards for NHS bridges and Interstate pavements. If it is not, FDOT must obligate a specified percentage of available funds for maintenance of these facilities.

FDOT is on track to meet Minimum Condition Standards.

- Bridge: No more than 10 percent of total deck area of NHS bridges classified as Structurally Deficient (Poor condition) for three consecutive years.
- Pavement: No more than 5 percent of the Interstate System in Poor condition for most recent year.

DRAFT

COORDINATION WITH STATEWIDE PLANS AND PROCESSES

The TPO recognizes the importance of linking goals, objectives, and investment priorities to established performance objectives, and that this link is critical to the achievement of national transportation goals and statewide and regional performance targets. As such, the Miami-Dade 2045 LRTP reflects the goals, objectives, performance measures, and targets as they are described in other state and public transportation plans and processes, including the Florida Transportation Plan (FTP) and the Florida Transportation Asset Management Plan.

- The FTP is the single overarching statewide plan guiding Florida's transportation future. It defines the state's long-range transportation vision, goals, and objectives and establishes the policy framework for the expenditure of state and federal funds flowing through FDOT's work program. One of the seven goals defined in the FTP is Agile, Resilient, and Quality infrastructure.
- The Florida Transportation Asset Management Plan (TAMP) explains the processes and policies affecting pavement and bridge condition and performance in the state. It presents a strategic and systematic process of operating, maintaining, and improving these assets effectively throughout their life cycle.

CONTRIBUTIONS TO ACHIEVING PAVEMENT & BRIDGE PERFORMANCE TARGETS

The TPO and FDOT are committed to ensuring the pavement and bridge condition in Miami-Dade County achieves the identified targets. The TPO has many programs, initiatives, and projects identified in the TIP and the LRTP to address pavement and bridge condition in Miami-Dade County. FDOT's key plan is its Work Program. The TPO and FDOT coordinate their plans and programs to maintain an acceptable pavement and bridge condition of the Miami-Dade transportation system.

"The TIP shall reflect the investment priorities established in the current metropolitan transportation plan . . ." (23 CFR 450.326). The transportation plan (LRTP) "shall include both long-range strategies/actions that provide for the development of an integrated multimodal system..." (23 CFR 450.24). The TIP considers potential projects that fall into specific investment priorities established by the TPO in the LRTP including the goal to Improve and Preserve the Existing Transportation System. This process evaluates projects that have an anticipated effect on improving pavement and bridge conditions.

MIAMI-DADE TPO

TRANSPORTATION IMPROVEMENT PLAN — A preliminary review of the FY 2024/2025 to FY 2028/2029 TIP includes 29 projects totaling$110M in Pavement and 24 projects totaling $169M in Bridge Improvement Projects. The FY 2024/2025 to FY 2028/2029 TIP is located on the internet at: http://www.interactip.com/

DRAFT

This includes Safe Routes to School projects, pedestrian safety projects, intersection safety projects and safety pushbutton projects. The Pavement and Bridge Performance Management Measures are incorporated into the 2024/2025 to 2028/2029 TIP to continue to assess and preserve infrastructure investments to achieve our pavement and bridge targets. The projects identified as contributing to the achievement of Miami-Dade County's pavement and bridge performance targets are listed in the table below:

NHS Pavement Projects

Non-Interstate NHS Projects

DRAFT

LONG RANGE TRANSPORTATION PLAN — The Miami-Dade 2045 LRTP seeks to address system preservation, identifies infrastructure needs within the metropolitan planning area, and provides funding for targeted improvements. The TPOs commitment to Pavement and Bridge Performance is emphasized through the 2045 LRTP Goal to Improve and Preserve the Existing Transportation System, which includes the following objectives:

- Improve the resiliency/reliability of the transportation system,
- Reduce the vulnerability and increase the resilience of critical infrastructure to the impacts and events.
- Preserve infrastructure (sustainability and resilience), and
- Site and design new transportation infrastructure to minimize exposure to sea level rise within the infrastructure life span, based on the Southeast

Florida Regional Climate Change Compact's 2015 Unified Seal Level Rise Projection.

Projects listed in the 2045 LRTP that contribute to pavement and bridge improvements are incorporated with capacity improvement projects. For a complete list of projects, please see Chapter 7 of the Miami-Dade 2045 LRTP; https://miamidade2045lrtp.com/.

For additional information on the Miami-Dade 2045 LRTP, please see the Miami-Dade 2045 Long Range Transportation Section of this report starting on page G-71.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

TRANSPORTATION PERFORMANCE MANAGEMENT
SYSTEM PERFORMANCE REPORT
SYSTEM & FREIGHT

DRAFT

SYSTEM & FREIGHT PERFORMANCE MANAGEMENT MEASURES

Congestion Reduction, System Reliability, and Freight Movement and Economic Vitality are three of the seven national goals identified in MAP-21 and maintained in the FAST Act. In January 2017, FHWA issued a Final Rule for system performance/freight/Congestion Mitigation Air Quality (CMAQ), entitled "National Performance Management Measures; Assessing Performance of the National Highway System, Freight Movement on the Interstate System, and Congestion Mitigation and Air Quality Improvement Program," [23 CFR § 490]. The Rule went into effect on May 20, 2017, except for certain components of the greenhouse gas (GHG) measure, which went into effect as of September 28, 2017. Subsequently, FHWA repealed this performance management measure that assessed the percent change in tailpipe carbon dioxide (CO2) (Greenhouse Gas) emissions on the NHS Compared to the Calendar Year 2017, effective July 2, 2018.

PERFORMANCE MANAGEMENT MEASURES

The Final Rule addresses the three areas as its name implies: performance, freight movement, and congestion/air quality. The Performance Management Measures under this rule will "assess the performance of the Interstate and non-Interstate National Highway System (NHS) for the purpose of carrying out the National Highway Performance Program (NHPP);" "freight movement on the Interstate System;" and "traffic congestion and on-road mobile source emissions for the purpose of carrying out the Congestion Mitigation and Air Quality (CMAQ) Program [23 CFR § 490]. State DOTs and MPOs are required to set targets for the Interstate System and Non-Interstate NHS, and to report on progress toward achieving those targets. State DOTs report progress to FHWA, while MPOs report progress to their State DOT. The CMAQ measures are limited to urbanized areas that are a part of a nonattainment or maintenance area for ozone, carbon monoxide, or particulate matter. Since Miami-Dade County and all of Florida is attainment for these three pollutants, the CMAQ Performance Management Measures do not apply.

For the First Performance Period (January 1, 2018, to December 31, 2021) FDOT established the 2-year (end of calendar year 2019) and 4-year (end of calendar year 2021) performance targets for, National Highway System performance and freight mobility on May 18, 2018.

For the Second Performance Period (January 1, 2022, to December 31, 2025) FDOT established 2023 and 2025 targets for NHS bridge and pavement on December 16, 2022 (FHWA changed the due date from October 1, 2022, due to a technical issue with the reporting system). These targets are identical to those set for 2019 and 2021 respectively. Florida's performance through 2021 exceeds the targets.

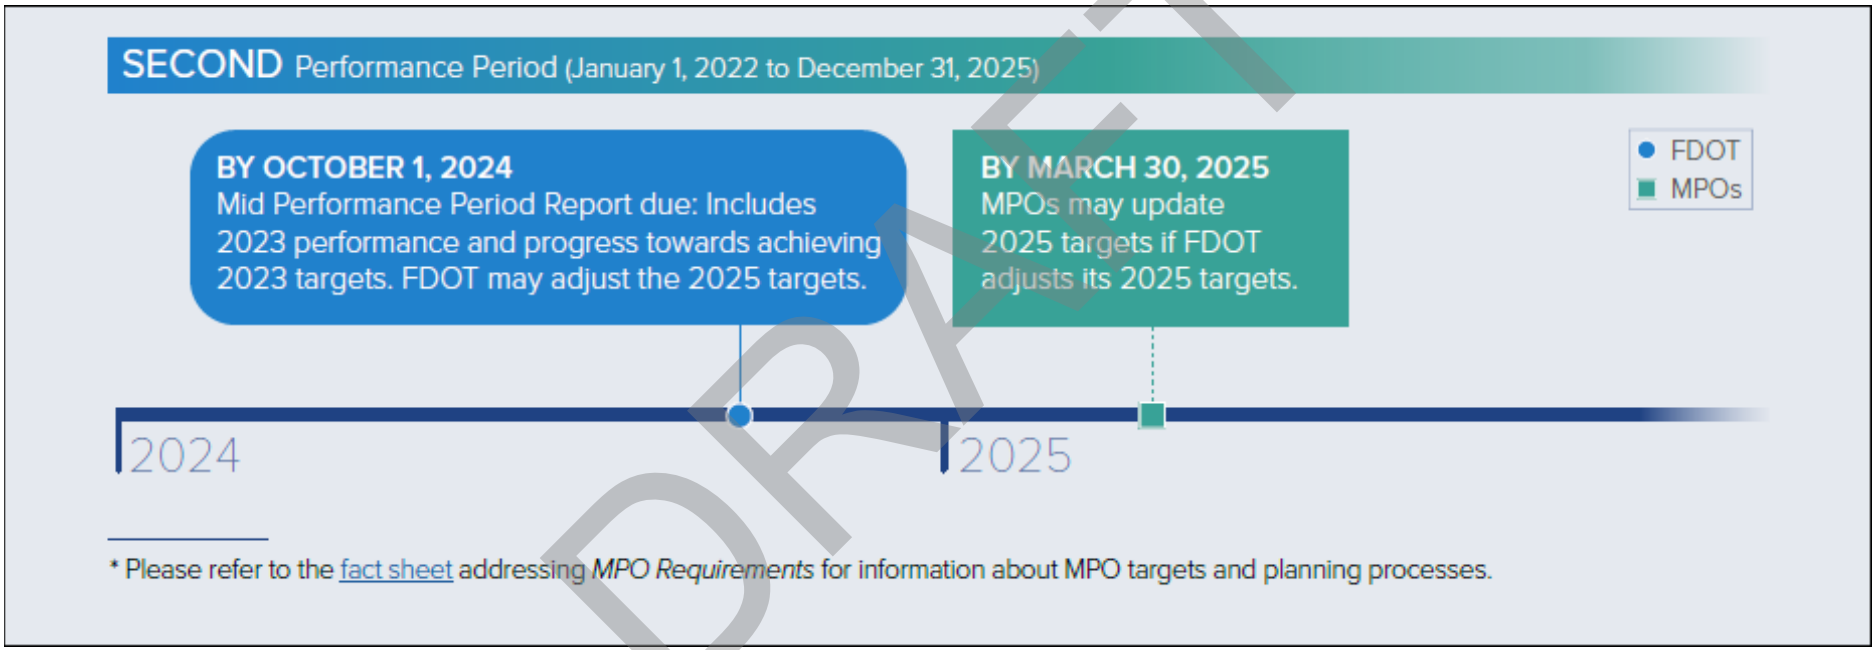
National Performance Management Measures to Assess Performance of the NHS and Freight (23 CFR 490.507and 490.607)

PERFORMANCE MEASURE	2023 TARGET	2025 TARGET
% of Person-Miles Traveled on the Interstate That Are Reliable	75%	70%

DRAFT

PERFORMANCE MEASURE	2023 TARGET	2025 TARGET
% of Person-Miles Traveled on the Non-Interstate That Are Reliable	n/a	50%
Truck Travel Time Reliability Ratio (TTR) on the Interstate	1.75	2.0

The timeline for the Second Performance Period is illustrated below (source FDOT):



DRAFT

MPOs were to set 2025 targets by June 14, 2023 (within 180 days after FDOT set the statewide targets)and have the option of supporting the statewide targets or establishing their own targets for the MPO planning area.

The TIP must include the most recent reported performance and targets as well as a description of how the investments contribute to achieving the targets. The LRTP must include a System Performance Report that discusses performance and the progress achieved in meeting targets.

PERFORMANCE TARGETS

By Resolution #20-2023 on April 20, 2023 (**illustrated in Figure 11: TPO Resolution – System Performance Measures Targets**), the TPO Governing Board agreed to continue to support FDOT's statewide pavement and bridge performance targets. By adopting these targets, the TPO will support achievement of the pavement and bridge targets by planning and programing projects in the TIP and LRTP that once implemented, are anticipated to make progress toward achieving the statewide targets.

Agenda Item 5.B.2

TPO RESOLUTION #44-18

RESOLUTION ESTABLISHING THE FLORIDA DEPARTMENT OF TRANSPORTATION'S PERFORMANCE MEASURE TARGETS FOR PAVEMENT CONDITION, BRIDGE CONDITION, NATIONAL HIGHWAY SYSTEM PERFORMANCE AND FREIGHT MOVEMENT

WHEREAS, the Interlocal Agreement creating and establishing the Miami-Dade Metropolitan Planning Organization (MPO), for the Miami Urbanized Area, now known as the Transportation Planning Organization (TPO), requires that the TPO provide a structure to evaluate the adequacy of the transportation planning and programming process; and

WHEREAS, the Transportation Planning Council (TPC) has been established and charged with the responsibility and duty of fulfilling the aforementioned functions; and

WHEREAS, the TPC has reviewed the Florida Department of Transportation's performance measure targets, made a part hereof, and finds it consistent with the goals and objectives of the Transportation Plan for the Miami Urbanized Area,

NOW, THEREFORE, BE IT RESOLVED BY THE GOVERNING BOARD OF THE TRANSPORTATION PLANNING ORGANIZATION IN ITS ROLE AS THE MPO FOR THE MIAMI URBANIZED AREA, that the attached Florida Department of Transportation's performance measure targets for pavement condition, bridge condition, national highway system performance and freight movement, are hereby established.

The adoption of the foregoing resolution was moved by Board Member Jose "Pepe" Diaz. The motion was seconded by Board Member Rebeca Sosa, and upon being put to a vote, the vote was as follows:

Chairman Esteban L. Bovo, Jr.-Aye
Vice Chairman Francis Suarez-Absent

Board Member Juan Carlos Bermudez	-Aye	Board Member Vince Lago	-Absent
Board Member Jose "Pepe" Diaz	-Aye	Board Member Daniella Levine Cava	-Absent
Board Member Audrey M. Edmonson	-Aye	Board Member Roberto Martell	-Aye
Board Member Dan Gelber	-Absent	Board Member Joe A. Martinez	-Aye
Board Member Oliver G. Gilbert, III	-Aye	Board Member Jean Monestime	-Absent
Board Member Perla T. Hantman	-Absent	Board Member Dennis C. Moss	-Aye

DRAFT

ASSESSING PERFORMANCE OF THE NATIONAL HIGHWAY SYSTEM

Travel Time Reliability is used to report the percent of person-miles traveled that are reliable on the Interstate and Non-Interstate NHS. "Data to reflect the users can include bus, auto, and truck occupancy levels."ii The Level of Travel Time Reliability (LOTTR) is defined as:

$$\frac{\text{Longer Travel Time (80th)}}{\text{Normal Travel Time (50th)}} = \frac{\text{\# seconds}}{\text{\# seconds}} = \text{Level of Travel Time Reliability Ratio}$$

Data for the LOTT metric is collected in 15-minute increments during four time periods for each reporting segment: [iii]

- Monday - Friday
  - 6:00 AM – 10:00 AM
  - 10:00 AM – 4:00 PM
  - 4:00 PM – 8:00 PM
- 6:00 AM Saturday – 8:00 PM Sunday

States and MPOs in coordination will define the reporting segments, and they must be continuous on the mainline highway. Starting in 2018, State DOTs are required to report the "LOTTR metrics and the corresponding 80th and 50th percentile times for each time period and directional AADT for each reporting segment by June 15th of each year, for the previous year's measures," [iii] to the Highway Performance Monitoring System (HPMS). The LOTTR ratio for each segment must be below a 1.50 during all four time periods, otherwise the segment is not considered reliable. [iii]

The Interstate Travel Time Reliability and Non-Interstate NHS Travel Time Reliability are reported to the nearest tenth of a percent. The formula for calculating Travel Time Reliability is:

$$100 \times \frac{\sum_{i=1}^{R} SL_i \times AV_i \times OF_j}{\sum_{i=1}^{T} SL_i \times AV_i \times OF_j}$$

Where:
R = total number of Interstate (Non-Interstate NHS) System reporting segments that are exhibiting an LOTTR below 1.50 during all of the time periods identified in § 490.511(b)(1)(i) through (iv);
I = Interstate (Non-Interstate NHS) System reporting segment "i";
SLi = length, to the nearest thousandth of a mile, of Interstate (Non-Interstate NHS) System reporting segment "i";
AVi = total annual traffic volume to the nearest single vehicle, of the Interstate (Non-Interstate) System reporting segment "i";
J = geographic area in which the reporting segment "i" is located where a unique occupancy factor has been determined;
OFi = occupancy factor for vehicles on the NHS within a specified geographic area within the State/Metropolitan planning area; and
T = total number of Interstate (Non-Interstate NHS) System reporting segments.

DRAFT

ASSESSING FREIGHT MOVEMENT ON THE INTERSTATE SYSTEM

Freight movement on the Interstate is assessed using the Truck Travel Time Reliability (TTTR) Index also known as the Freight Reliability Measure. The TTTR Index metric is defined as:

$$\frac{\text{Longer Truck Travel Time (95th)}}{\text{Normal Truck Travel Time (50th)}} = \frac{\text{\# seconds}}{\text{\# seconds}} = \text{Truck Travel Time Reliability (TTTR) Ratio}$$

Data for the Truck Travel Time Reliability (TTTR) metric is collected during five time periods for each reporting section:

- Monday - Friday
  - Morning peak (6:00 AM -10:00 AM)
  - Æ Midday (10:00 AM – 4:00 PM)
  - Afternoon peak (4:00 PM – 8:00 PM)
- Weekends (6:00 AM – 8:00 PM)
- Overnights for all days (8:00 PM – 6:00 AM)

Starting in 2018, State DOTs are required to report the "TTTR metrics and the corresponding 95th and 50th percentile times for each time period and each reporting segment by June 15th of each year, for the previous year's measures," [iii] to the HPMS. The Truck Travel Time Reliability is reported to the nearest hundredth. The formula for calculating Truck Travel Time Reliability is:

$$\frac{\sum_{i=1}^{T}(SL_i \times \max TTTR_i)}{\sum_{i=1}^{T}(SL_i)}$$

Where:
i = An Interstate System reporting segment;
maxTTTRi = The maximum TTTR of the five time periods in paragraphs (a)(1)(i) through (v) of § 490.611, to the nearest hundredth, of Interstate System reporting segment "i"; SLi = Segment length, to the nearest thousandth of a mile, of Interstate System reporting segment "i"; and
T= A total number of Interstate System reporting segments.

BASELINE CONDITIONS

On January 1, 2018, the first 4-year performance period for the System & Freight National Performance Management Measures began.

For the Second Performance Period (January 1, 2022 to December 31, 2025) FDOT established the 2023 and 2025 targets on December 16, 2022. These targets are identical to those set for 2019 and 2021, respectively. Florida's performance through 2021 exceeds the targets.

DRAFT

MPOs were to set 2025 targets by June 14, 2023 (within 180 days after FDOT set the statewide targets)and have the option of supporting the statewide targets or establishing their own targets for the MPO planning area. The TIP must include the most recent reported performance and targets as well as a description of how the investments contribute to achieving the targets. The LRTP must include a System Performance Report that discusses performance and the progress achieved in meeting targets.

The baseline conditions for NHS and freight mobility for Florida and Miami-Dade County are shown in Table 6: Baseline NHS and Freight Mobility

Performance Management Measures 2017and 2020 thru 2022.

Table 6: Baseline NHS and Freight Mobility Performance Management Measures 2017 and 2020 thru 2022

NHS AND FREIGHT MOBILITY PERFORMANCE MANAGEMENT MEASURES								
PERFORMANCE MEASURES	2017 (Baseline)		2020		2021		2022	
	Florida	Miami-Dade	Florida	Miami-Dade	Florida	Miami-Dade	Florida	Miami-Dade
% of person-miles traveled on the Interstate that are reliable	82.0%	57.0%	92.3%	64.5%	87.5%	68.3%	85.7%	62.8%
% of person-miles traveled on the non-Interstate that are reliable	84.0%	59.0%	93.5%	81.7%	92.9%	76.7%	92.1%	72.8%
Truck travel time reliability ratio (TTR) on the Interstate	1.43	2.98	1.34	2.87	1.38	2.46	1.46	2.75

Source: FDOT

DRAFT

ASSESSMENT OF SIGNIFICANT STATE PROGRESS

FHWA will determine if FDOT has made significant progress toward the achievement of each 2-year or 4-year statewide target if either:

- The actual condition/performance level is better than the baseline performance; or
- The actual performance level is equal to or better than the established target.

FHWA's determination of significant progress toward the 2021 interstate reliability and truck reliability targets is anticipated in March 2023. If FDOT does not make significant progress toward achieving a reliability target, it must document the actions it will take to achieve the target. For the truck reliability measure, it must provide additional freight congestion analysis and documentation.

FHWA will not assess MPO target achievement. However, FHWA and FTA will review MPO adherence to performance management requirements as part of periodic transportation planning process reviews.

COORDINATION WITH STATEWIDE PLANS AND PROCESSES

The TPO recognizes the importance of linking goals, objectives, and investment priorities to established performance objectives, and that this link is critical to the achievement of national transportation goals and statewide and regional performance targets. As such, the Miami-Dade 2045 LRTP reflects the goals, objectives, performance measures, and targets as they are described in other state and public transportation plans and processes, including the Florida Transportation Plan (FTP) and the Florida Freight Mobility and Trade Plan.

- The FTP is the single overarching statewide plan guiding Florida's transportation future. It defines the state's long-range transportation vision, goals, and objectives and establishes the policy framework for the expenditure of state and federal funds flowing through FDOT's work program. One of the seven goals of the FTP is Efficient and Reliable Mobility for People and Freight.
- The Florida Freight Mobility and Trade Plan presents a comprehensive overview of the conditions of the freight system in the state, identifies key challenges and goals, provides project needs, and identifies funding sources. Truck reliability is specifically called forth in this plan, both as a need as well as a goal.

CONTRIBUTIONS TO ACHIEVING SYSTEM & FREIGHT PERFORMANCE TARGETS

The TPO and FDOT are committed to ensuring the System and Freight performance in Miami-Dade County achieves the identified targets. The TPO has many programs, initiatives, and projects identified in the TIP and the LRTP to address system and freight performance in Miami-Dade County. FDOT's key plan is its Work Program. The TPO and FDOT coordinate their plans and programs to improve the reliability of the Miami-Dade transportation system, according to C.F.R. 450.332(b).

"The TIP shall reflect the investment priorities established in the current metropolitan transportation plan . . ." (23 CFR 450.326). The transportation plan (LRTP) "shall include both long-range strategies/actions that provide for the development of an integrated multimodal system..." (23 CFR 450.24). The TIP considers potential projects that fall into specific investment priorities established by the TPO in the LRTP. The TIP includes specific investment priorities that support the TPOs goals including improving system and travel, using a prioritization and project selection process established in the LRTP. This process evaluates projects that have an anticipated effect on improving the reliability of the NHS, Non-Interstate NHS, and truck travel time in Miami-Dade County.

MIAMI-DADE TPO

TRANSPORTATION IMPROVEMENT PLAN — A preliminary review of the FY 2023/2024 to FY 2027/2028 TIP includes 25 projects totaling $488M in projects that improve travel reliability. The FY 2023/2024 to FY 2027/2028 TIP is located on the internet at: http://www.interactip. com/. This includes capacity improvement and operational projects. The Pavement and Bridge Performance Management Measures are incorporated into the 2023/2024 to 2027/2028 TIP to continue to assess and preserve infrastructure investments to achieve our pavement and bridge targets.The projects identified as contributing to the achievement of Miami-Dade County's system and freight performance targets are listed in the table below:

DRAFT

LONG RANGE TRANSPORTATION PLAN — The Miami-Dade 2045 LRTP seeks to address system reliability and congestion mitigation through various means, including capacity expansion and operational improvements. The TPO's commitment to System and Freight Performance is emphasized through the 2045 LRTP Goal to Maximize Mobility Choices Systemwide, which includes the following objectives:

- Provide a comprehensive transportation network for dependable and reliable transportation options,
- Reduce congestion,
- Promote system reliability, and
- Increase mobility choices throughout the county.

There are over 60 projects listed in the 2045 LRTP that will help improve the system reliability of the Miami-Dade transportation system, including: implementation of the SMART Plan, other transit projects, and roadway capacity projects (widening and extensions) projects. For a complete list of projects, please see Chapter 7 of the Miami-Dade 2045 LRTP; https://miamidade2045lrtp.com/.

For additional information on the Miami-Dade 2045 LRTP, please see the Miami-Dade 2045 Long Range Transportation Section of this report starting on page G-71.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

TRANSPORTATION PERFORMANCE MANAGEMENT
SYSTEM PERFORMANCE REPORT
TRANSIT ASSET MANAGEMENT

DRAFT

TRANSIT ASSET MANAGEMENT

In July of 2016, FTA published the "Transit Asset Management; National Transit Database" Final Rule. The Transit Asset Management (TAM) Final Rule requires grant recipients of FTA funds to develop asset management plans to inventory their public transportation assets. These assets include equipment, rolling stock, infrastructure, and facilities. The Final Rule also establishes performance measures and annual reporting requirements, and defines "state of good repair" (SGR).i The Rule went into effect as of October 1, 2016. [49 CFR § 625, 630].

SGR PERFORMANCE MEASURES

The TAM Final Rule required "transit providers and group TAM plan sponsors" to set initial SGR performance targets of the following measures by January 1, 2017. The transit providers and group TAM plan sponsors must coordinate with the State DOTs and MPOs to establish regional TAM performance targets. The transit providers and group TAM plan sponsors were required to provide the TAM targets to the MPO by June 30, 2017.[ii]

ASSETS (ONLY THOSE FOR WHICH THE AGENCY HAS CAPITAL RESPONSIBILITY)	SGR PERFORMANCE MEASURE
Equipment: Non-revenue support -service and maintenance vehicles	Percentage of non-revenue vehicles met or exceeded Useful Life Benchmark
Rolling Stock: Revenue vehicles by mode	Percentage of revenue vehicles met or exceeded Useful Life Benchmark
Infrastructure: Only rail fixed-guideway, track, signals, and systems	Percentage of track segments with performance restrictions
Facilities: Maintenance and administrative facilities; and passenger stations (buildings) and parking facilities	Percentage of assets with condition rating below 3.0 on FTA TERM Scale

For equipment and rolling stock classes, useful life benchmark (ULB) is defined as the expected lifecycle of a capital asset, or the acceptable period of use in service, for a particular transit provider's operating environment. ULB considers a provider's unique operating environment such as geography and service frequency and is not the same as an asset's useful life.

The TAM rule defines two tiers of public transportation providers based on size parameters. Tier I providers are those that operate rail service or more than 100 vehicles in all fixed route modes, or more than 100 vehicles or more in one non-fixed route mode. Tier II providers are those that are a subrecipient of FTA 5311 funds, or an American Indian Tribe, or have 100 or less vehicles across all fixed route modes or have 100 vehicles or less in one non-fixed route mode. A Tier I provider must establish its own transit asset management targets, as well as report performance and other data

DRAFT

to FTA. A Tier II provider has the option to establish its own targets or to participate in a group plan with other Tier II providers whereby targets are established by a plan sponsor, typically a state DOT, for the entire group.

There are two Tier I transit agencies that serve Miami-Dade County and include:

- Miami-Dade Department of Transportation and Public Works (DTPW) – Transit
- South Florida Reginal Transportation Authority (SFRTA)

MIAMI-DADE DEPARTMENT OF TRANSPORTATION AND PUBLIC WORKS (DTPW) - TRANSIT

PERFORMANCE TARGETS

Public transportation agencies are required to establish and report transit asset management targets annually for the following fiscal year. Each public transit provider or its sponsors must share its targets, TAM, and asset condition information with each MPO in which the transit provider's projects and services are programmed in the MPO's TIP.

MPOs are required to establish initial transit asset management targets within 180 days of the date that public transportation providers establish initial targets. However, MPOs are not required to establish transit asset management targets annually each time the transit provider establishes targets. Instead, subsequent MPO targets must be established when the MPO updates the TIP or LRTP.

The Miami-Dade DTPW 2018 Transit Asset Management Plan was presented to the TPO Governing Board on July 19, 2018. The Miami-Dade TPO originally adopted the Miami-Dade Department of Transportation and Public Works SGR targets for Calendar Year 2018 per Resolution 06-18 on January 25, 2018, which established the relationship between performance, plans, and programs, and provides the basis and foundation for this performance framework. Beginning in 2022, the TPO began to adopt the DTPW SGR targets annually as part of its TIP and will no longer utilize a separate resolution.

DRAFT

The Miami-Dade DTPW has established the following SGR performance targets for Fiscal Year 2023/2024:

Asset Category: Revenue Service Vehicles

ASSET CATEGORY	ASSET CLASS / ASSET TYPE	FLEET SIZE	FLEET AGE	USEFUL LIFE (ULB)	FY 24* TARGET
REVENUE VEHICLES	Minibus (MB)	3	11.32	10	100%
	Over-The-Road (BU)	1	17.43	14	0%
	40 Foot Bus (BU)	825	6.46	14	8.8%
	Articulated Bus (BU)	89	8.55	14	28.1%
	Metrorail (HR)	186	13.44	31	0%
	Metromover (AG)	30	13.41	20	0%

*FY24 Target is the total percentage of revenue vehicles that will ***exceed*** the Useful Life Benchmark (ULB) by the close of the fiscal year per FTA definition.

.

Forecasted Changes

a) **Minibus / Cutaway (Small Buses)** – No projected change in the fleet will result in the same performance metrics target and forecasted target.

b) **Large Bus Fleet** – The sale of many of the vehicles and anticipation receipt of fifteen (15) 60ft vehicles; the performance metrics is projected to decrease. In addition, it is important to note that there are additional commuter vehicles used for passenger service which are owned and operated by 3rd party contractors.

c) **Metrorail (Heavy Railcars)** –The anticipated sale of fifty (50) legacy vehicles; the anticipated performance target is expected to be zero.

d) **Metromover (Automated Guideway)** – Useful Life Benchmark (ULB) adjustment from 30yrs to 20yrs per vendor signed contract. One (1) legacy vehicle is pending financial maturity prior to being removed from the report.

e) **Paratransit and Contingency** vehicles are not calculated in the performance targets based on SGR Reporting requirements. See TAM/NTD Crosswalk table for clarification.

DRAFT

Source: DTPW

Asset Category: Non-Revenue Vehicles (Equipment)

ASSET CATEGORY	ASSET CLASS / ASSET TYPE	FLEET SIZE	FLEET AGE	USEFUL LIFE (ULB)	FY 24* TARGET
Equipment	Automobile	81	9.13	8	71.1%
	Steel Wheel Vehicles	11	27.58	25	64.0%
	Trucks & Other Rubber Tire Vehicles	240	8.31	14	27.5%

*FY24 Target is the total percentage of non-revenue equipment that will ***exceed*** the Useful Life Benchmark (ULB) by the close of the fiscal year per FTA definition.

Forecasted Changes

a) **Automobiles** – The limited anticipated vehicle replacements projected for the next fiscal year will have a negative impact on the target. The target is expected to increase significantly. Note: Many vehicles are put in service after the initial model year.

b) **Steel Wheel Vehicles** – The projected sale of four (4) vehicles and the increase in vehicles that have exceeded useful life has resulted in a projected target increase.

c) **Trucks & Other Rubber Tire Vehicles** – The limited anticipated vehicle replacements are projected for the next fiscal year will have a negative impact on the target. The target is expected to increase significantly. Note: Many vehicles are put in service after the initial model year.

Asset Category: Facilities

ASSET CATEGORY	ASSET CLASS	ASSET CLASS / ASSET TYPE	NUMBER OF REPORTABLE FACILITIES	TOTAL FACILITIES ASSESSED	FY 24* TARGET
Facilities	Maintenance & Administrative	Service & Inspection	3	1	Scheduled 2025
		Heavy Maintenance & Overhaul	1	1	
		Administrative / Sales Offices	7	4	
		Vehicle Washing	4**	0	
		Revenue Collection	4	2	
		Combined Administrative & Maintenance	2	0	
		Vehicle Testing	1	0	
		Vehicle Blow-Down	3**	0	
		Vehicle Fueling	4	1	
		General Purpose Maintenance Facility/Depot	4	1	
		Other***	39**	8	

DRAFT

ASSET CATEGORY	ASSET CLASS	ASSET CLASS / ASSET TYPE	NUMBER OF REPORTABLE FACILITIES	TOTAL FACILITIES ASSESSED	FY 24* TARGET
Facilities	**Passenger Stations & Parking	Bus Transfer Center	21**	3	Scheduled 2025
		Fixed Guideway Station	44	21	4.4%
		Parking Structure	9**	1	11.0%
		Surface Parking Lot	9**	3	11.0%
		Other***	40**	10	0%

* FY24 Target is the total percentage of structures that will ***fall below the 3.0 threshold*** on the TERM Lite Scale as recommended by the FTA.

** The total number of structures have been modified to reflect all structures in Transit

***Other multipurpose structures include Overpasses, Bus Shelters, Emergency Overpasses, Substations, and other structures

Performance Metric Variance / Forecasted Changes

a) **Passenger Facilities** – Twenty-one (21) Metromover stations and twenty (20) support structures (substations) were included within this phase and three (3) Bus Transfer Centers with one (1) facility under renovation. The projected target for 2024 will include Metrorail Passenger Stations, Metrorail Infrastructure Buildings, Overpasses, and Kiss-n-Rides. Approximately 4.4% of the Passenger Facilities are projected to fall below the 3.0 threshold. Construction is currently on-going at Metrorail stations.

b) **Parking** – During this phase, one (1) Parking Structure and three (3) Surface Parking Lots were assessed. It is estimated that around 11% of the parking structure will fall below the 3.0 threshold in the subsequent phase. Demolition/Renovation of current parking locations are in progress.

c) **Maintenance** – Facilities or compounds in which maintenance activities are performed. This could include dispatch, fueling, vehicle wash, warehouses, and other buildings. Additional maintenance compound pending construction.

d) **Administrative** – Executive and /or support offices where administrative functions are performed. This could include but is not limited to accounting, engineering, quality, safety and security, scheduling and planning, and other offices that are not at passenger stations.

e) **Other** – Eight (8) miscellaneous structures at Central Metrobus Facility and five (5) bi-directional Transitway Shelters were included in this phase. Next fiscal year, twenty-nine (29) Traction Power Substations, six (6) overpasses, and an air-conditioned shelter will be assessed.

DRAFT

Source: DTPW

Asset Category: Performance Restrictions

ASSET CATEGORY	ASSET CLASS	SYSTEM (TRACK FEET)	TOTAL PERFORMANCE RESTRICTIONS	FY 24* TARGET
Infrastructure	Rail Fixed Guideway	298,957	342	6.0%
	Mover Automated Guideway	46,464	0	0%

*Infrastructure performance restrictions are reported at the highest level as defined by FTA/NTD guidelines.

Guideway Performance Restrictions Requirements

a) A performance restriction is defined to exist on a segment of rail fixed guideway when the maximum permissible speed of transit vehicles is set to a value that is below the guideway's full-service speed. This does not include the operationally modified design speed.
b) The length of track miles under restrictions each month and must be calculated separately for each combination of rail fixed guideway modes and service types (Metrorail and Metromover).
c) All restrictions are documented to the specific segment of track (except system-wide restrictions due to inclement weather, for example) are required to be included in the calculation, regardless of cause or duration, including temporary speed restrictions placed due to maintenance activity.

An annual value for the length of track miles under performance restrictions to FTA by averaging the values calculated each month over the course of the year (DTPW reports on a fiscal year October to September).

MIAMI-DADE 2024/25 – 2028/29 TIP CONTRIBUTIONS TO ACHIEVING TAM PERFORMANCE TARGETS

Projects in the 2024/25 -2028/29 TIP that contribute to achieving the TAM performance targets include:

TPO PROJECT NO	FACILITY/PROJECT NAME	PROJECT DESCRIPTION
TA000106	MDT-Bus Purchase	Purchase of Vehicles/Equipment
TA11	FTA Section 5337 Federal Formula Funding	FTA Sec 5337 State of Good Repair Metromover/Metrorail
TA18	MDT Additional Elevators @ Dadeland North	Construction of additional elevators at Dadeland North Metrorail Station
TA0000022	Rail Vehicle Replacement	Rail vehicle replacement of 136 car fleet
TA0000034	Metrorail and Metromover Fixed Guideway	Capital maintenance of existing guideway
TA0000006	Capitalization of Preventative Maintenance	Bus systems including security and emergency facilities and equipment
TA7	Bus Replacement	Replacement of buses to maintain the bus fleet replacement plan
TA0000076	Metromover Brickell Extension Guideway Painting	Painting and restoration of 1.1 miles of the existing rusted steel girders of the Metromover's Brickell extension
TA0000078	Metrorail Escalators Replacement and Elevators Refurbishment	Replace escalators and elevators at 22 Metrorail stations, and may also include bus garages and maintenance facilities
TA0000093	Track & Guideway Rehabilitation	Rehabilitate existing track and guideway equipment and fixtures
TA0000097	MDT Infrastructure Renewal Program	Replace and upgrade physical assets according to normal replacement cycles; program focuses on bus overhauls, rehabilitation of bus and rail facilities and system equipment
TAMDT290	Metromover Escalator Replacement and	Replace escalators and elevators at the 21 Metromover stations, and may also include

DRAFT

SOUTH FLORIDA REGIONAL TRANSPORTATION AUTHORITY (SFRTA)

PERFORMANCE TARGETS

The South Florida Regional Transportation Authority (SFRTA) 2018 Transit Asset Management Plan was submitted to the TPO on September 28, 2018, which established the relationship between performance, plans, and programs, and provides the basis and foundation for this performance framework. Beginning in 2022, the TPO began to adopt the SFRTA targets annually as part of its TIP, and will no longer utilize a separate resolution.

The South Florida Regional Transit Authority (SFRTA) has established the following SGR performance targets for Calendar Year 2024:

Endnotes:

Miami, FL 33130

RE: South Florida Regional Transportation Authority (SFRTA)
2024 Transit Asset Management (TAM) Targets

Dear Ms. Boucle:

Attached, please find SFRTA's 2024 TAM Targets. Per the Federal Transit Administration (FTA) TAM Final Rule published on July 26, 2016, SFRTA is required to provide each Metropolitan Planning Organization (MPO) with an update on the condition of its transit assets on an annual basis. SFRTA's TAM Targets are established based on current transit asset conditions, capital improvement projects and SFRTA's State of Good Repair (SGR) Policy.

We look forward to continued collaboration with the Miami-Dade TPO on its Transportation Improvement Program, Long Range Transportation Plan and other regional transportation initiatives.

Sincerely,

Loraine Cargill, AICP
Director of Strategic Planning/EEO Officer

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

TRANSPORTATION PERFORMANCE MANAGEMENT
SYSTEM PERFORMANCE REPORT
TRANSIT SAFETY PERFORMANCE

DRAFT

FTA published a final Public Transportation Agency Safety Plan (PTASP) rule and related performance measures as authorized by Section 20021 of the Moving Ahead for Progress in the 21st Century Act (MAP– 21). The PTASP rule requires operators of public transportation systems that receive federal financial assistance under 49 U.S.C. Chapter 53 to develop and implement a PTASP based on a safety management systems approach. Development and implementation of PTASPs is anticipated to help ensure that public transportation systems are safe nationwide.

The rule applies to all operators of public transportation that are a recipient or sub-recipient of FTA Urbanized Area Formula Grant Program funds under 49 U.S.C. Section 5307, or that operate a rail transit system that is subject to FTA's State Safety Oversight Program. The rule does not apply to certain modes of transit service that are subject to the safety jurisdiction of another federal agency, including passenger ferry operations that are regulated by the United States Coast Guard, and commuter rail operations that are regulated by the Federal Railroad Administration.

The PTASP rule was published on July 19, 2018 with an effective date of July 19, 2019. Transit operators subject to the rule must have a PTASP and safety targets in place by July 20, 2020. Due to the COVID-19 pandemic, this date was extended to December 31, 2020 and later extended again to July 20, 2021. MPOs must then establish transit safety targets no later than 180 days after the transit operators establishes its targets. Transit operators are required to review, update, and certify their PTASP annually.

The transit agency sets targets for the Transit Safety Performance Measures in the PTASP based on the safety performance measures established in the National Public Transportation Safety Plan (NPTSP).

The initial Miami-Dade DTPW PTASP was presented to the TPO Governing Board on March 18, 2021 and were adopted by the Miami-Dade TPO (Per Resolution #14-2021) which establishes the relationship between performance, plans, and programs, and provides the basis and foundation for this performance framework. Beginning in 2022, the TPO has adopted the DTPW PTASP targets annually as part of its TIP, and will no longer utilize a separate resolution. With the PTASP approved by Board of County Commissioners Resolution R-61-24 on January 17, 2024 in **Figure 12**, DTPW established the 2024 Safety Performance Targets as illustrated above in **Figure 13** which remain unchanged since 2021.

RESOLUTION NO. R-61-24

RESOLUTION APPROVING AND AUTHORIZING THE EXECUTION OF THE 2023 DEPARTMENT OF TRANSPORTATION AND PUBLIC WORKS' PUBLIC TRANSPORTATION AGENCY SAFETY PLAN

WHEREAS, pursuant to the Florida Department of Transportation State Safety Oversight (SSO) Rules, public transit agencies are required to develop a comprehensive Public Transit Agency Safety Plan (the "PTASP") to:

(i) identify and evaluate safety risks related to the Metrorail, Metromover and Metrobus Systems;

(ii) implement strategies mitigating such risks;

(iii) establish a process for annual reviews of the safety plan;

(iv) set safety performance targets;

(v) assign safety responsibilities;

(vi) establish a staff safety training program; and

WHEREAS, the Federal Transit Administration (FTA) requires the local governmental authority and any other operator of a public transportation system that receives federal financial assistance under 49 U.S.C. Chapter 53, must certify that it has established a comprehensive PTASP and have the plans approved by their Board(s) of Directors (or equivalent authorities); and

WHEREAS, the SSO Rules require that the PTASP, and any updates to the PTASP, be approved by the Board of County Commissioners for the Department of Transportation and Public Works; and

MDC004

Agenda Item No. 14(A)(1)
Page No. 2

WHEREAS, this Board desires to accomplish the purposes outlined in the accompanying memorandum, a copy of which is incorporated herein by reference,

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD OF COUNTY COMMISSIONERS OF MIAMI-DADE COUNTY, FLORIDA, that:

Section 1. The Board hereby approves the attached PTASP.

Section 2. The Board hereby designates the Department Director as the Accountable Executive who shall execute and deliver the PTASP on behalf of the Department.

Section 3. The Board hereby authorizes the Department Director to execute and deliver the PTASP on behalf of the Department.

The foregoing resolution was offered by Commissioner **Eileen Higgins**, who moved its adoption. The motion was seconded by Commissioner **Oliver G. Gilbert, III** and upon being put to a vote, the vote was as follows:

Oliver G. Gilbert, III, Chairman aye
Anthony Rodriguez, Vice Chairman aye

Marleine Bastien	aye	Juan Carlos Bermudez	aye
Kevin Marino Cabrera	aye	Sen. René García	aye
Roberto J. Gonzalez	aye	Keon Hardemon	aye
Danielle Cohen Higgins	aye	Eileen Higgins	aye
Kionne L. McGhee	aye	Raquel A. Regalado	aye
Micky Steinberg	aye

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

TRANSPORTATION PERFORMANCE MANAGEMENT

SYSTEM PERFORMANCE REPORT

2045 MIAMI-DADE LONG RANGE TRANSPORTATION PLAN

DRAFT

The Miami-Dade 2045 LRTP was adopted by the Miami-Dade TPO Governing Board on September 26, 2019. The 2045 LRTP guides citizens, businesses, and elected officials in fostering an innovative vision for the future of the transportation system over the next 26 years. The plan serves as a mechanism for the implementation of improvements to the transportation network through the identification and prioritization of transportation projects to address current and future needs.

The existing transportation system was analyzed with the projected increased population in 2045 to identify deficiencies in the transportation system for the 26-year period from 2020 to 2045. Over 300 improvement projects were identified to meet the desired mobility conditions.

These projects were reviewed and evaluated to develop the 2045 Cost Feasible Plan based on the projected available revenue of $19.3 billion YOE dollars for new capital and new Operating and Maintenance (O&M).

- The development of the 2045 LRTP highlights the changes in transportation over the last five years, from focus areas and policy changes, to innovative and emerging technologies including: the implementation of the SMART Plan, Bus Express Rapid Transit (BERT), and rapid transit corridors; a standardized built environment classification system to help identify criteria for roadway design elements; the use of rideshare services, scooters and mobile applications to increase mobility and connectivity; and the emergence of connected, autonomous and electric vehicles.
- Miami-Dade County's population is projected to grow from 2.7 million in 2019 to 3.5 million people in 2045, representing a growth rate of 34 percent. The employment is projected to grow from 1.3 million to 1.8 million for the same time period, representing a 38 percent growth rate.

TRANSPORTATION PERFORMANCE MANAGEMENT

The 2045 Plan was developed through a performance-driven, outcome-based approach considering all modes of transportation. The Federal Highway Administration (FHWA) issued rules establishing required performance management measures for safety, pavement, bridges, system and freight, which are illustrated in the plan. FHWA defines Transportation Performance Management as a strategic approach that uses system information to make investment and policy decisions to achieve national performance goals. Transportation Performance Management is systematically applied, provides key information to understand investment decisions, and improves communications between decision makers, stakeholders, and the traveling public.

SCENARIO PLANNING

The 2045 LRTP implemented a scenario planning process to better understand the effect proposed strategies with different sets of transportation projects will have on the transportation system. Various multimodal transportation improvement and land use combinations including the SMART Plan, highway, transit, multimodal improvements, and new technologies were evaluated. Scenario Planning is an analytical framework that informs decision makers about the implications of various investments and policies on the transportation system and performance. The results of the SMART Plan land

DRAFT

use planning process were incorporated into the scenario planning assessment. The TPO developed a tiered approach, with six scenarios, which aligned with the three scenarios used in the regional transportation plan, include the following:

Existing + Committed Network (Base Network)

The E+C Network represents the baseline conditions which consists of all existing transportation facilities plus projects that have construction funds committed through 2024.

Scenario 1 – 2040 Cost Feasible Plan

Scenario 1 consists of projects in the E+C Network and highway projects in the 2040 Cost Feasible Plan.

Scenario 2 – SMART Plan Transit

Scenario 2 consists of Scenario 1 projects plus all associated with the SMART Plan.

Scenario 3 – Highway Projects

Scenario 3 consists of Scenario 2 projects, adds additional highway projects in transportation agency master plans (FDOT, FTE, MDX, DTPW - Roadway), plus highway projects identified by stakeholders and public input to address deficiencies.

Scenario 4 – Beyond SMART Plan Transit Projects

Scenario 4 consists of Scenario 3, adds additional transit projects from past studies, plus transit projects beyond the SMART Plan identified by stakeholders and the public to address deficiencies.

Scenario 5 – Alternative Land Use

Scenario 5 consists of Scenario 4 projects with an alternate Land Use of the projected 2045 population and employment, shifting population growth along the SMART Plan rapid transit corridors; and

Scenario 6 – Technologies

Scenario 6 is the technologies scenario, which represents the implementation of future technologies identified, and their anticipated effect on the transportation system.

Projects in each scenario were listed, mapped, modeled in the travel demand model (Southeast Florida Regional Planning Model - SERPM 8). Since this is a tiered scenario approach that is additive, the scenarios were modeled in numerical order. Scenario 6 Technologies was not modeled since the effects of technologies on transportation systems are not proven at this time. SERPM 8 is also being used for the development of the Southeast Florida Regional Transportation Plan (RTP) (for Miami-Dade, Broward, and Palm Beach Counties) for adoption in June 2020. The RTP is testing three scenarios including:

DRAFT

1

2045 Cost Feasible Plan (Trend)

2

Regional Transit

3

Regional Land Use

The scenarios analyzed for the Miami-Dade LRTP were tested corresponding to the regional scenarios as identified below:

MIAMI-DADE SCENARIOS	1	2	3	4	5
REGIONAL PLAN SCENARIOS	1	2	2	2	3

SYSTEMS PERFORMANCE — System measures assess the performance of the County's transportation system as an integrated multimodal system. These measures were used to evaluate the scenarios. The scenarios, which represent a group of systemwide projects, were evaluated at the systems level to identify how each scenario compared to the baseline (E+C network) and to each previous scenario in the tiered approach. The criteria selected for evaluation came from the SERPM 8 and included:

- Transit Route Miles
- Vehicle Hours Traveled
- Vehicle Miles Traveled
- Lane Miles
- Peak Period Speed (MPH)
- Transit Boardings
- Vehicle Trips

The results of the Scenario testing are shown in the table below **Table 7**. The scenarios analyzed for the Miami-Dade 2045 LRTP were tested corresponding to the regional scenarios as identified below:

DRAFT

Table 7 Scenario Results

SCENARIO	TRANSIT ROUTE MILES	VEHICLE HOURS TRAVELED	VEHICLE MILES TRAVELED	LANE MILES	PEAK PERIOD SPEED (MPH) (CONGESTED)	PERCENT LANE MILES WITH V/C > 1.0 (AM PEAK)	WORK TRIP LENGTH (MILES) (FROM COUNTY)	TRANSIT BOARDINGS	TOTAL NUMBER VEHICLE TRIPS
Existing + Committed Network	3,429.3	3,229,753	59,910,810	6,336.5	18.5	12.3%	14.5	528,116	9,327,652
1. 2040 Cost Feasible Plan	3,416.4	2,803,522	60,089,935	6,542.1	21.4	11.0%	14.6	545,829	9,332,792
2. SMART Plan Transit	4,043.4	2,700,914	58,803,508	6,500.9	21.8	10.7%	14.7	817,691	9,140,544
3. Highway	4,028.9	2,624,261	60,140,875	6,983.9	22.9	8.1%	14.8	783,792	9,214,728
4. Beyond SMART Plan	6,207.3	2,573,450	59,277,677	6,900.7	23.0	7.8%	14.8	965,672	9,085,476
5. Alternative Land Use	6,207.3	2,562,543	58,600,863	6,900.7	22.9	7.7%	14.7	1,005,772	9,026,204

** Scenario 6 was not analyzed at the same level due to unknown requirements and influences/impacts at this time.*

The scenarios were also evaluated based on how each scenario contributes to meeting the targets of the National Performance Management Measures on the systemwide level. **Table 8** shows these results using a color scale to depict incremental anticipated improvements from the baseline (E+C network) by scenario and is based on:

- Transit projects provide additional mobility options, increases safety, and improves system reliability by eliminating vehicles on roadways,
- Roadway projects provide additional capacity, improve system reliability,
- Resurfacing, restoration, and rehabilitation projects improve pavement and bridge conditions, and
- Operational and intersection projects improve safety.

DRAFT

■ Scenario provides more improvement over the baseline
■ Scenario provides the most improvement over the baseline

DRAFT

PROJECT PRIORITIZATION — All projects identified as part of the scenario planning effort were evaluated in developing the Cost Feasible Plan.

These projects represent a comprehensive and multimodal network of transportation projects to meet forecasted system-wide travel demands of Miami-Dade County. Scenario 5 (Alternative Land Use) is being addressed through separate initiatives that support the rapid transit corridors prioritized in this 2045 LRTP. Scenario 6 (Future Technologies) were highlighted in the 2045 LRTP, under Chapter 9, as to their potential impact on the future transportation network. Projects prioritization was based on scenario planning analysis,

TPO Governing Board resolutions, agency project priorities, and the 2045 LRTP Goals and Objectives. The combined results were used to develop the Cost Feasible Plan, which is constrained by available resources, as reflected in Chapter 7 of the Miami-Dade 2045 LRTP.

Projects in the Cost Feasible Plan contributing to meeting the TPO and FDOT targets for the National Performance Management Measures are identified in the project tables by the primary performance measure addressed:

- PM1 Safety
- PM2 Pavement/Bridge
- PM 3 System/Freight

SYSTEMS PERFORMANCE

The TPO recognizes the importance of linking goals, objectives, and investment priorities to established performance objectives, and that the link is critical to the achievement of the national transportation goals and statewide and regional performance targets. As such, the Miami-Dade 2045 LRTP reflects the goals, objectives, performance measures, and targets as they are available and described in other state and public transportation plans and processes; specifically the Florida Strategic Highway Safety Plan (SHSP), the Florida Highway Safety Improvement Program (HSIP), the Florida Transportation Plan (FTP), the Florida Transportation Asset Management Plan, the Florida Freight Mobility and Trade Plan, and other public transportation plans and process.

SAFETY PERFORMANCE

The Miami-Dade 2045 LRTP increases the safety of the transportation system for motorized and non-motorized users as required. The LRTP aligns with the Florida SHSP and the FDOT HSIP with specific strategies to improve safety performance focused on prioritized safety projects, pedestrian and/or bicycle safety enhancements, and traffic operation improvements to address the goal to reduce fatalities and serious injuries.

The TPO's commitment to safety is emphasized through the 2045 LRTP Goal to Increase the Safety of the Transportation System for All Users, which includes the following objectives:

- Improve the safety of the transportation system,
- Promote projects in high crash locations, and
- Improve safety of the transportation system of the elderly and disabled.

The TPO will provide information from the FDOT HSIP annual reports to track the progress made toward the statewide safety performance targets. The TPO will document the progress on safety performance targets established by the TPO for its planning area.

The Miami-Dade 2045 LRTP identifies safety needs within the metropolitan planning area and provides funding for targeted safety improvements. There are many projects listed in the LRTP that will help improve safety of the Miami-Dade transportation system, including: capacity and operational improvements, redesigns of roadway segments, transportation systems management and operation (TSM&O), roadway and access improvements, adding truck lanes, and reconstruction projects. In addition, a financial set-aside was established for bicycle and pedestrian, congestion management,

DRAFT

and freight projects to ensure funding for these important projects that can improve safety of the Miami-Dade transportation system. For a complete list of projects, please see project listings (pages 07-06 to 07-141 of the Miami-Dade 2045 LRTP).

PERFORMANCE AND BRIDGE PERFORMANCE

The Miami-Dade 2045 LRTP seeks to address system preservation, identifies infrastructure needs within the metropolitan planning area, and provides funding for targeted improvements. The TPOs commitment to Pavement and Bridge Performance is emphasized through the 2045 LRTP Goal to Improve and Preserve the Existing Transportation System, which includes the following objectives:

- Improve the resiliency/reliability of the transportation system,
- Reduce the vulnerability and increase the resilience of critical infrastructure to the impacts and events. Preserve infrastructure (sustainability and resilience), and
- Site and design new transportation infrastructure to minimize exposure to sea level rise within the infrastructure life span, based on the Southeast Florida Regional Climate Change Compact's 2015 Unified Seal Level Rise Projection.

The cost to operate and maintain the existing and future transportation system were accounted for in the development of the Cost Feasible Plan. Operating and maintenance (O&M) cost for DTPW transit and roadways and for Districtwide SHS Existing Facilities are identified in Chapter 6. For FTE and MDX the cost to operate and maintain their existing facilities were identified in the process of developing the forecasted revenues. FTE also assumed the O&M for future projects through this process.

On or before October 1, 2020, FDOT will provide FHWA and the TPO a detailed report of pavement and bridge condition performance covering the period of January 1, 2018 to December 31, 2019. FDOT and the TPO also will have the opportunity at that time to revisit the four-year targets.

Miami-Dade County currently achieves the established targets for Pavement and Bridge.

There are many projects listed in the Miami-Dade 2045 LRTP that will improve pavement and bridge conditions as a secondary benefit to widening and reconstruction projects. For a complete list of projects, please see project listings.

TRANSIT ASSET MANAGEMENT

A total of $27,900 million is identified to support progress towards TAM performance targets, transit investment, and maintenance funding in the Miami-Dade 2045 LRTP. This includes $5,195 million for new transit capital and new O&M (27% of the available funds for new capital and new O&M ($19.318), or 12% of the total LRTP revenue ($43,745)). Also, DTPW – Transit has $22,705 million of reoccurring obligations which includes

DRAFT

$905 million (2% of the total LRTP revenue ($43,745 million)) for bus replacement and $14,754 million (34% of the total LRTP revenue ($43,745 million)) for O&M of the existing system. Improving the State of Good Repair (SGR) of capital assets is an overarching goal of this process.

SUMMARY

Projects contributing to meeting the TPO and FDOT targets for the National Performance Management Measures are identified in the project listings by the primary performance measure (PM number) addressed by the project. A summary of projects contributing to the performance management targets and are summarized by agency in **Table 9**.

Table 9: Number of Projects by Agency Contributing to PM Targets

AGENCY/MODE	PM1 SAFETY	PM2* PAVEMENT/BRIDGE	PM3* SYSTEMS/FREIGHT
Transit	1	0	11
FDOT SIS	6	0	8
FDOT Other Roads	7	0	3
FTE	4	0	5
MDX	2	0	2
DTPW - Roads	5	N/A	N/A
Bike/Ped	55	N/A	N/A
CMP	9	0	1
Freight	16	0	1

* INCLUDES INTERSTATE AND NON-INTERSTATE NHS FACILITIES

Miami-Dade Transportation Planning Organization

TIP • FISCAL YEARS 2024/2025 TO 2028/2029

PART 1: 4-YEAR FEDERALLY FUNDED PROJECTS

DRAFT

PURPOSE OF THIS SECTION

On December 4, 2015, President Obama signed into law the Fixing America's Surface Transportation Act, or "FAST Act". The FAST Act authorizes $305 billion over fiscal years 2016 through 2020 for the Department's highway, highway and motor vehicle safety, public transportation, motor carrier safety, hazardous materials safety, rail, and research, technology and statistics programs. Overall, the FAST Act largely maintains current MAP-21 program structures and funding shares between highways and transit. It is a down-payment for building a 21st century transportation system. On September 30, 2020, the Senate passed a one-year extension of the FAST Act through Continuing Resolution. This extension also added $13.6B to the Highway Trust Fund.

The intention of this section of Miami-Dade County's FY 2024/2025-2028/2029 TIP is to illustrate how the TPO's priorities are to be funded, by Federal funding category, and by fiscal year. Specifically, this section addresses the requirements for TIP development as cited in Title 23 USC Section 134 (subsections (h) 2 and (i) 4).

CONTENTS OF THIS SECTION

This section contains the project listings by major funding category. Projects are identified by Work Program Item Numbers and show the corresponding project description, type of work and funding for each of the first four (4) years of the TIP.

CONCLUDING STATEMENTS

- This section is presented in order to fulfill federal requirements as noted in Section 134 of Title 23, United States Code (ISTEA).
- Only major categories of federal funds are highlighted in this section.
- Only the first four years of the TIP (FY 2024/2025, 2025/2026, 2026/2027and 2027/2028) are included in this section.
- The projects shown in this section are consistent with the FDOT District VI Adopted Work Program.
- Federal funds can reasonably be expected to be made available for all projects included in this section.

All information contained in this section is consistent with the adopted TIP attached hereto.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

PART 2: 5-YEAR PROJECT LISTINGS
STATE TRANSPORTATION SYSTEM AND MAJOR PROJECTS

DRAFT

TIP • FISCAL YEARS 2024/2025 TO 2028/2029

STATE TRANSPORTATION SYSTEM AND MAJOR PROJECTS

Florida Department of Transportation, District 6 (FDOT, Six)

DRAFT

The Florida Department of Transportation's (FDOT) Compass helps connect the work the Department is doing to what matters most to our communities. The FDOT Compass centers on Communities, with five pillars surrounding them: Safety, Resilience, Supply Chain, Technology, and Workforce Development. These pillars establish the baseline for every project, plan, and investment. This allows the Department to build transportation infrastructure that embraces the unique character of each community across the state.

This section of the TIP focuses on the State Transportation System and Major Projects located within Miami- Dade County. The projects listed include improvements to highways, transit, aviation, rail, seaport, freight, and bicycle/pedestrian modes over the next five fiscal years.

FDOT D6 - STATE TRANSPORTATION SYSTEM AND MAJOR PROJECTS

The FDOT District Six section provides an overview of the following topics:

- The FDOT Five-Year Work Program
- The Work Program Cycle
- Programs and Funding
- Strategic Intermodal System (SIS) Projects
- Resurfacing Projects
- Other Major Projects
- Transportation Systems Management & Operations (TSM&O)
- Bicycle/Pedestrian Improvements
- Modal Development

FDOT'S FIVE-YEAR WORK PROGRAM

The FDOT District Six Work Program is a major component of the Miami-Dade TPO's TIP. The Work Program, which is updated annually, is a project specific list of transportation activities and improvements that the FDOT will undertake during the next five-years. It is developed by the District in cooperation with the Miami-Dade TPO and is consistent with the 2045 LRTP, and TPO priorities. The projects must also meet the objectives of the Florida Transportation Plan (FTP). The first three years of the Adopted Work Program represent a commitment that local governments may rely on for planning purposes, and for the development of capital improvement elements of the local government comprehensive plans.

*All renderings used in this report are subject to change as they continue through the project phase and may not denote the final product.

THE WORK PROGRAM CYCLE

In the summer of 2023, FDOT began the new cycle to develop the Tentative Work Program for Fiscal Years (FY) 2025 - 2029. The Department coordinates development of the Work Program with the TPO TIP Committee process and input is received through public hearings. The Tentative Work Program is then sent to the Governor's Office, Legislature, Florida Transportation Commission and the Department of Economic Opportunity for review and it will become effective as the Adopted Work Program on July 1, 2024.

DRAFT

PROGRAMS AND FUNDING

Program Descriptions — For budgeting purposes, the FDOT's Work Program comprises of eight budget categories. Programs are listed below:

- Safety Enhancements Initiatives
- Resurfacing
- Bridge Repair & Replacement
- State Highway System & Other Roads Construction
- Right of Way Land
- Product Support Consultants
- Operations & Maintenance Consultants/Contracts
- Modal Development

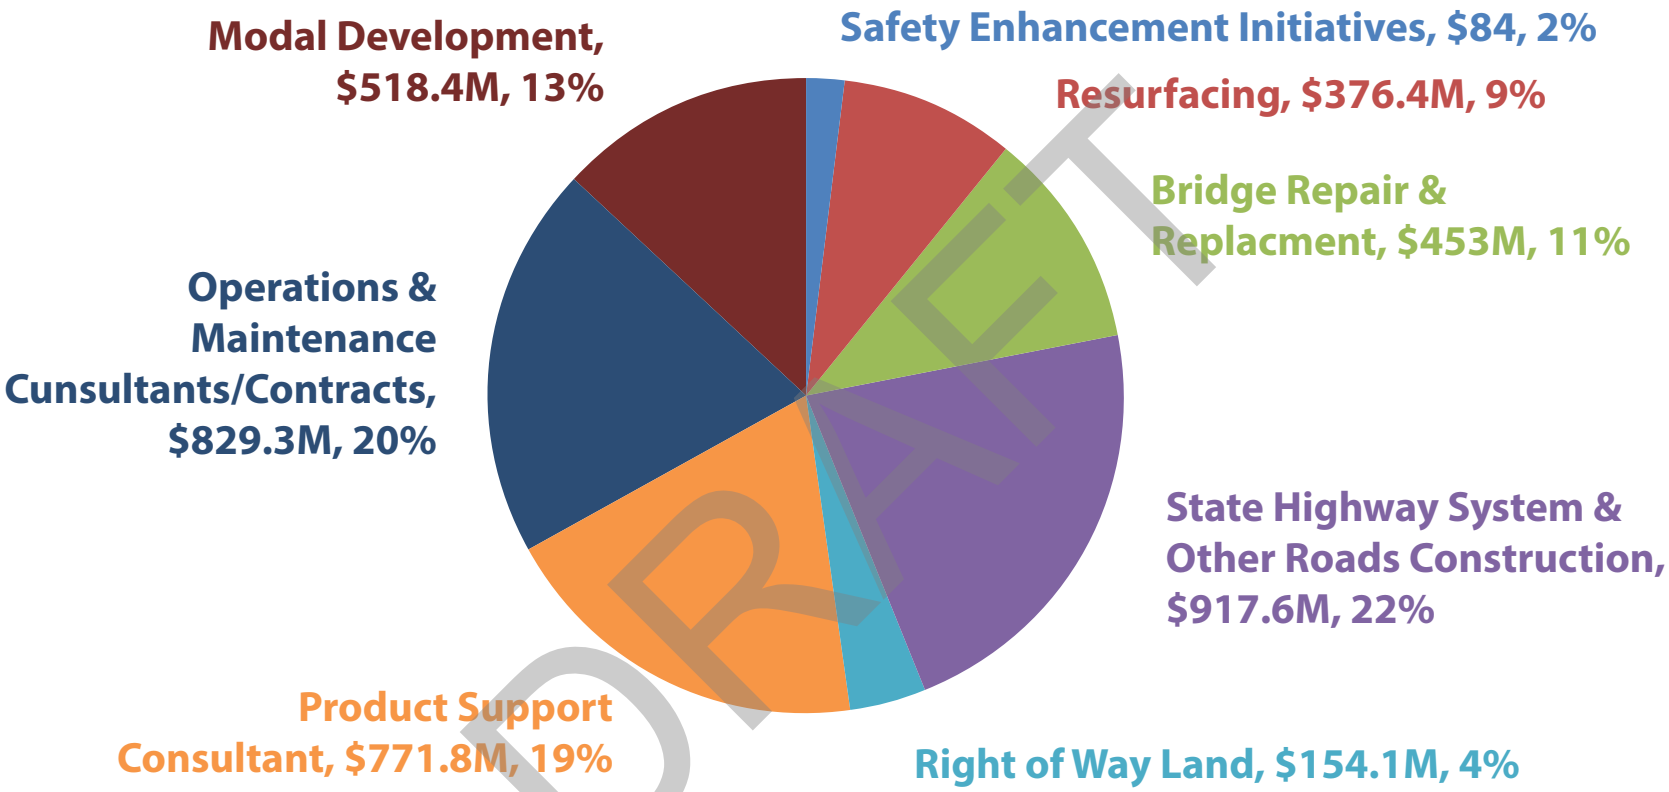
Funding Overview — The Department's funds are allocated among seven Districts statewide and the Florida Turnpike Enterprise. In Miami-Dade, the Department in consultation with the TPO, determines the best use of Miami-Dade's share of funding. The Department's resources are primarily from federal and state dedicated sources. The State Transportation Trust Fund and the Federal Highway Trust Fund receive revenue from specific tax sources for transportation purposes. Additional funding for Work Program projects comes from local and discretionary sources. By statute, the Department must develop a program that is balanced to cash and revenue forecasts.

FDOT District Six, Total Budget Breakdown, Tentative Five-Year Work Program - Fiscal Years 2025-2029 — As shown in the Total Budget Breakdown chart below, the majority of the Department's $4.1 billion budget is applied to the State Highway System and Other Roads Construction Budget as of December 2023, in the amount of $917.6 million.

DRAFT

TOTAL 5 YEAR TENTATIVE WORK PROGRAM: $4.1 B

FDOT District Six Total Work Program Breakdown for FY 2025-2029



DRAFT

STRATEGIC INTERMODAL SYSTEM (SIS) PROJECTS

The Florida Legislature established the SIS to enhance Florida's transportation mobility and economic competitiveness. The SIS consists of a network of high-priority transportation facilities which includes commercial airports, spaceports, deep water seaports, freight rail terminals, passenger rail, intercity bus terminals, rail corridors, waterways, and highways. These facilities represent the state's primary means for moving people and freight between Florida's diverse regions, between states and nations. The following are major SIS improvement projects in Miami-Dade County:

GOLDEN GLADES INTERCHANGE (GGI) RECONSTRUCTION

The FDOT District Six and Florida's Turnpike Enterprise have completed the design of several roadway projects within the GGI in Miami-Dade County. Some enhancements to the GGI Interchange include several miles of roadway and ramps. The overall project will help increase the regional connectivity to this major interchange. The following benefits are included in this project:

The project area consists of the following five major facilities: State Road (SR) 9A/I- 95, SR 826/Palmetto Expressway, SR 91/Florida's Turnpike, SR 9 and SR 7/US 441/NW 7 Avenue.

The scope of the project includes the following:

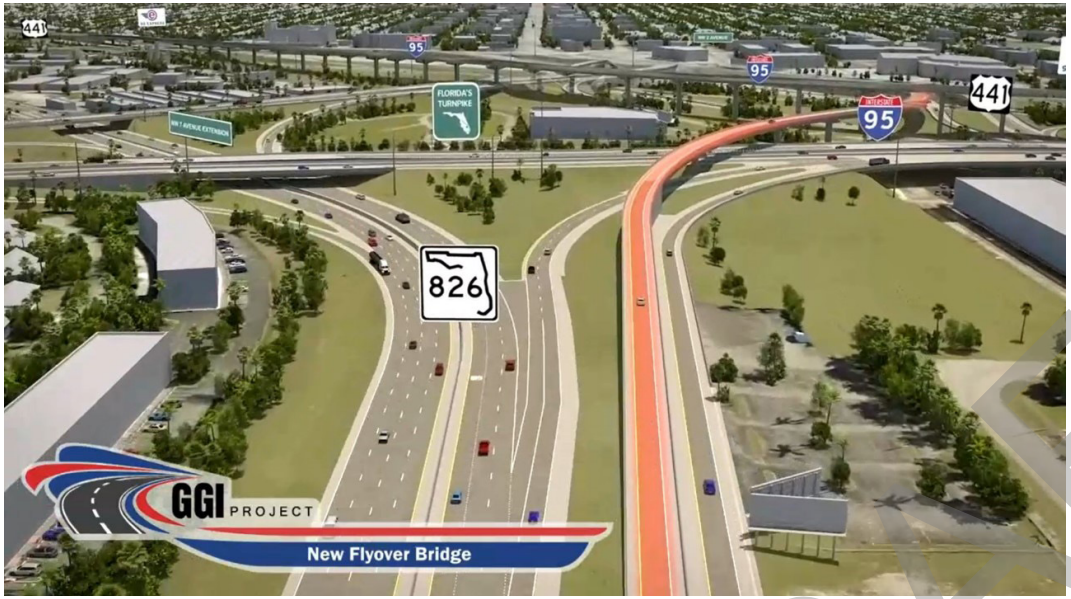
- Milling and resurfacing the Palmetto Expressway between NW 17 Avenue and the GGI,
- Providing a direct connection flyover ramp from eastbound Palmetto Expressway to northbound I-95,
- Relocating NW 12 Avenue entrance ramp to I-95,
- Rebuilding and realigning various ramps throughout the interchange to meet current standards,
- Rebuilding and widening northbound and southbound I-95 from the GGI to Miami Gardens Drive to accommodate future express lanes,
- Rebuilding Florida's Turnpike Connector at the intersection of NW 2 Avenue and NW 167 Street,
- Widening the southbound lanes of the Turnpike Connector to accommodate two lanes from Florida's Turnpike and three lanes from eastbound Palmetto Expressway to southbound I-95,
- Providing a direct express lane connection from Florida's Turnpike to the southbound I-95 Express Lanes,
- Relocating the SR 7 exit ramp from southbound I-95,
- Rebuilding the westbound Palmetto Expressway bridge and entrance ramp to enhance access from Florida's Turnpike,
- Widening southbound I-95 from Biscayne Canal to NW 135 Street to accommodate an additional lane for the southbound Turnpike Connector,
- Rebuilding the pedestrian bridge at NW 147 Street to enhance pedestrian safety for Thomas Jefferson Middle School, Biscayne Gardens Elementary and the surrounding communities,
- Rebuilding toll gantry,
- Rebuilding and widening I-95 to provide a direct connection from northbound I- 95 Express Lanes to Florida's Turnpike,
- Rebuilding ramp connections to meet current standards.

DRAFT

Golden Glades Interchange Improvements

Golden Glades Direct Connection to I-95 Express

DRAFT



Golden Glades New Flyover Bridge

Golden Glades New Pedestrian Bridge

The construction of the GGI projects will begin in March of 2024, and the design and right-of-way phases are completed. For more information on the project, please visit: https://go-ggi.com/

The project video found in the link above will provide a better visualization of this complex project. https://www.fdotmiamidade.com/design-projects/expressways/golden-glades-interchange-enhancement-projects.html

DRAFT

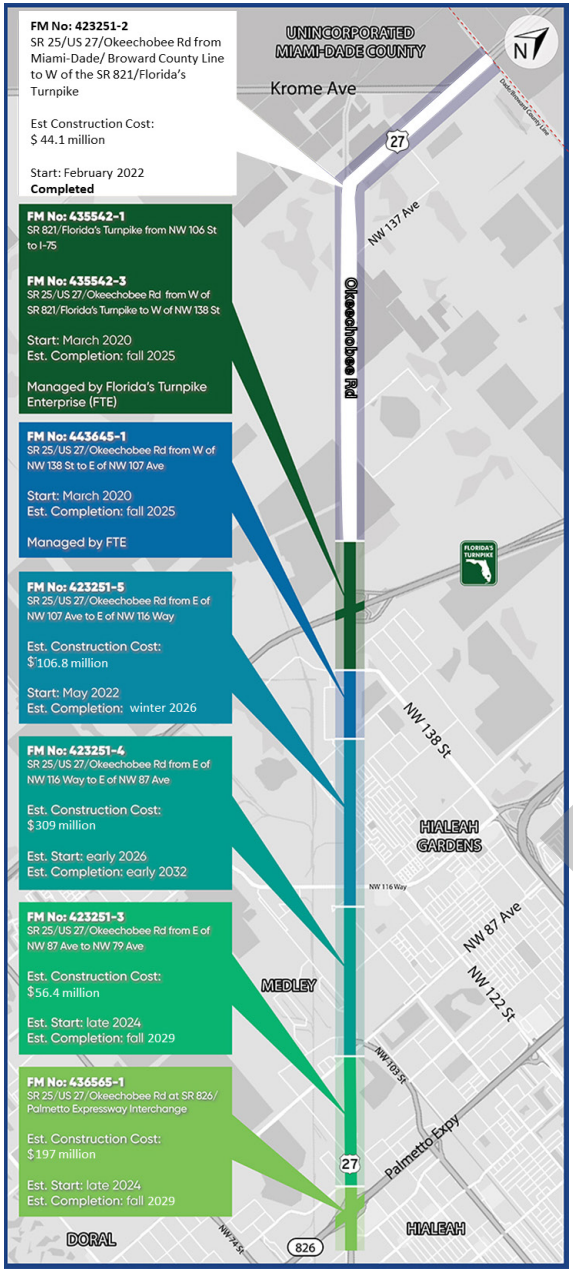
SR 25/US 27/OKEECHOBEE ROAD IMPROVEMENTS

SR 25/US 27/Okeechobee Road consists of seven segment projects along SR 25/US 27/ Okeechobee Road from SR826/Palmetto Expressway to the Broward County Line. The following benefits are included in this project:

The corridor improvements on SR 25/Okeechobee Road include the following:

SEGMENT LIMITS	IMPROVEMENTS	CONSTRUCTION YEAR
Broward County Line to East of the HEFT	Widening, capacity improvements, milling and resurfacing, as well as improving the frontage road on the north side of the said limits.	Construction Started: February 2022
West of HEFT to West of NW 138 Street	Widening, milling and resurfacing the roadway. Including reconstruction of Frontage Road, storm sewer, Miami Canal dredging, signing and pavement marking, signalization, lighting, and intelligent transportation systems updates. Project Managed by Florida's Turnpike Enterprise.	Construction Started: March 2020
West of NW 138 Street to East of NW 107 Avenue	Reconstruct and widen roadway and widen the bridge over the Miami Canal at NW 138 St and NW 107 Avenue to provide a wider turning radius for large trucks. Improve the intersection of SR 25 at NW 107 Avenue and NW 138 St by adding new turn lanes and signals. Project managed by Florida's Turnpike Enterprise.	Construction Started: March 2020
East of NW 107 Avenue to East of NW 116 Way	Full reconstruction to provide concrete and rigid pavement, replacement of bridges at NW 121 Avenue and NW 116 Way over Miami (C-6) Canal, design of two braided ramps under SR 25/Okeechobee Road to connect the mainline with the Frontage Road.	Construction Started: March 2022
East of NW 116 Way to East of NW 87 Avenue	Full reconstruction to provide rigid pavement, grade separation of bridges over 87 Avenue, design of left turn lanes flyover bridges from Southbound NW 87 Avenue to Eastbound Okeechobee Road and from Northbound NW 87 Avenue to Westbound Okeechobee Road, a construction of a new bridge at NW 106 Street over the Miami (C-6) Canal, and the realignment of NW 103 Street and the frontage road within the project limits.	Anticipated Construction Date: Early 2026
East of NW 87 Avenue to NW 79 Avenue	Road reconstruction using rigid pavement, widening Okeechobee Road, modify the intersection of NW 95 Street and Frontage Road, widen NW 79 Avenue bridge of Miami (C-6) Canal, and provide new access from Frontage Road to Westbound Okeechobee Road.	Anticipated Construction Date: Late 2024
Interchange with SR 826/Palmetto Expressway	Three new flyover ramps, the addition of turn lanes at the ramp intersections, and improvements to the Okeechobee Road and W 18 Avenue intersection.	Anticipated Construction Date: Late 2024

DRAFT



SR 25/US 27/Okeechobee Road Improvements

A PD&E study was completed for SR 25/US 27/Okeechobee Road from SR 997/Krome Avenue to NW 79th Avenue in 2016. The first of the segments; SR 25/US 27/Okeechobee Road from Broward County Line to west of SR 821/Florida's Turnpike Reconstruction Project, began construction in February 2022. A design project was completed for SR 25/Okeechobee Road. & SR 826/Palmetto Expressway Interchange in October 2023. Refer to the exhibits below for renderings of some of the segments along the corridor:

SR 25 Okeechobee Rd. from east of NW 107 Ave. to east of NW 117th Way

DRAFT

SR 25 Okeechobee Rd. from east of NW 116 Way to east of NW 87 Ave

SR 25 Okeechobee Rd. and SR 826 Palmetto Expressway Interchange

DRAFT

PROJECT DEVELOPMENT AND ENVIRONMENT (PD&E) STUDIES

SR 826 / PALMETTO EXPRESSWAY SOUTH

The project on SR 826/Palmetto Expressway from US 1/SR 5/ Dixie Highway to SR 836/Dolphin Expressway, approximately seven miles, is proposing corridor improvements that are expected to add highway and interchange capacity with the implementation of capacity and interchange improvements to meet future transportation demand, improve travel time reliability and provide long-term mobility options. The project is in the Project Development and Environment (PD&E) phase.

The project includes improvements to 10 interchanges and operational improvements to the Palmetto general purpose lanes. This project will also include a new drainage system, lighting system and ITS system. Signalized intersections will be upgraded to current standards.

The following benefits are included in this project:

For more information related to this project, visit: https://www.fdotmiamidade.com/826expresssouth.html

For more information on these Palmetto Expressway projects visit: www.palmettoexpresslanes.com

DRAFT

SR 9A/I-95 FROM SOUTH OF MIAMI GARDENS DRIVE TO NORTH OF BROWARD COUNTY LINE

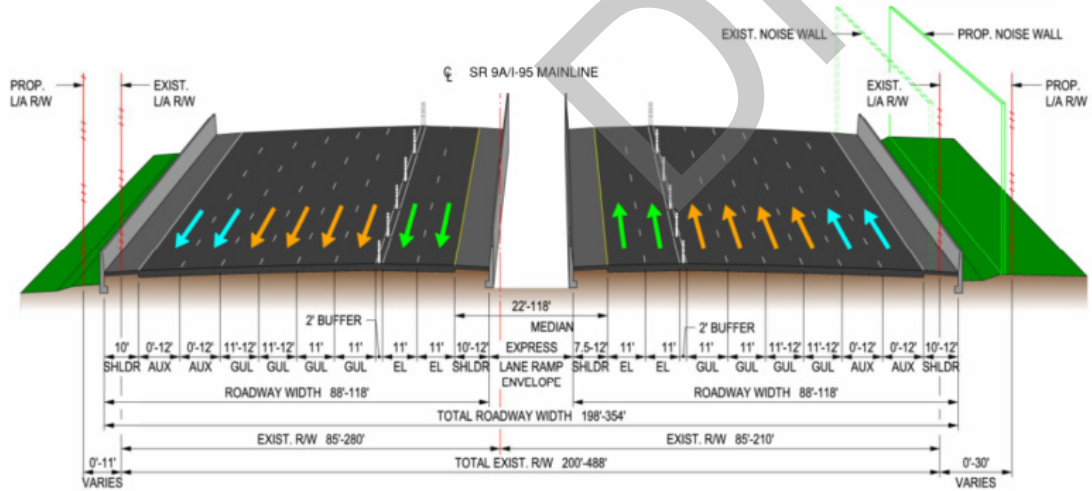
I-95/SR 9 PD&E STUDY

The PD&E study for SR 9A/I-95 from Miami Gardens Drive to the north of Broward County Line will evaluate potentially providing additional express and/or general use lanes on SR 9A/I-95 from south of SR 860/Miami Gardens Drive to the north of Broward County Line and implementing interchange improvements at SR 860/Miami Gardens Drive and CR 854/ Ives Dairy Road within Miami-Dade County. The following benefits are included in this project:

Overall, the project will offer enhanced mobility options for motorists and transit users as it will provide additional capacity along the SR 9A/I-95 corridor throughout northern Miami-Dade County. Consistent with the existing managed lanes system on SR 9A/I-95, the additional express lanes are anticipated to operate using variable toll pricing based on congestion to optimize traffic flow.

The PD&E study has the following project objectives:

- Address the deficient operational capacity and relieve existing/future congestion along the SR 9A/I-95 corridor.
- Preserve the operational integrity and regional functionality of SR 9A/I-95 (and, therefore, the regional transportation network) by complementing similar corridor improvements throughout Miami-Dade, Broward, and Palm Beach Counties.
- TeamGEnhance emergency evacuation and response times.



I-95/SR 9A I-95/SR 9A Mainline and Express Lanes Proposed Typical Section

The PD&E is estimated to be completed by December 2025.

For information related to the project, visit: https://www.fdotmiamidade.com/i95northPDE.html

DRAFT

I-195/SR 112/JULIA TUTTLE CAUSEWAY PD&E STUDY

Interstate 195 PD&E Study

The Florida Department of Transportation (FDOT), District Six is conducting a Project Development and Environment (PD&E) Study for the I-195/State Road (SR) 112/Julia Tuttle Causeway from NW 12 Avenue to SR 907/Alton Road and along the local street network surrounding the ramp terminals. The project is located within the cities of Miami and Miami Beach in Miami-Dade County, Florida.

I-195/SR 112/Julia Tuttle Causeway PD&E Study Project Limits

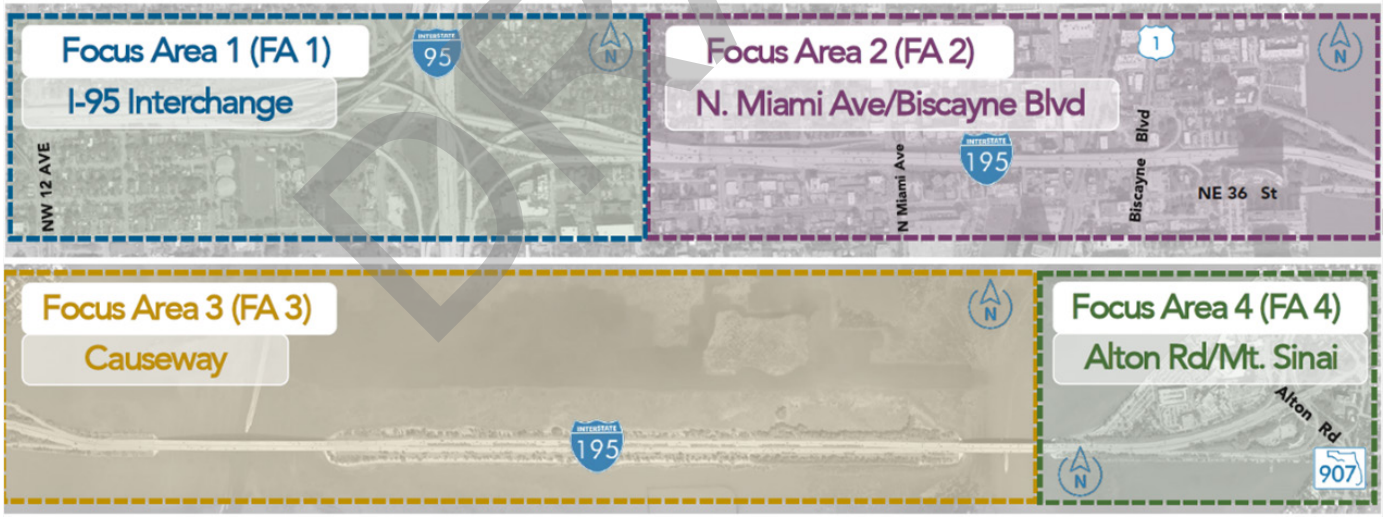
DRAFT

In 2020, a Corridor Planning Study (CPS) was completed which identified and developed, through a process of collaborative stakeholder coordination, conceptual improvements within the I-195 Study corridor in order to address the future mobility and safety needs. The findings of the CPS are now proceeding to a PD&E Study, which began in the summer 2022. The following benefits are included in this project:

The purpose of this project is to build upon the CPS efforts and evaluate alternatives that address operational deficiencies, relieve existing/future congestion, accommodate future travel demand projected as a result of area-wide population and employment growth along the I-195 corridor. Other project needs include:

- **Provide Transit, Bicycle and Pedestrian Improvements** - The project will result in improved transit, bicycle and pedestrian mobility between Miami and Miami Beach including Bus Express Rapid Transit (BERT) services, as well as a separated shared use path along the Julia Tuttle Causeway.
- **Improve Connectivity - I-195** is part of Florida's Strategic Intermodal System (SIS) and plays a significant role in facilitating the movement of commuter and freight traffic between the beaches and mainland and provides connections to I-95 and Miami International Airport (MIA) (both SIS facilities). The project aims to improve system linkage by evaluating a new direct connection to the I-95 express lane system as well as improving transit, bicycle and pedestrian connectivity.
- **Ensure Safety** - The project aims to address existing safety concerns.
- **Increase Capacity** - The population of Miami-Dade County as a whole is expected to increase by 67% in 2045 and countywide employment is expected to increase by 38%. The project is anticipated to meet the mobility needs of the area by alleviating current and future congestion on the corridor.

The Julia Tuttle Causeway PD&E focuses on four major areas:



I-195/SR 112/Julia Tuttle Causeway PD&E Study Improvements Focus Areas

DRAFT

Description of Focus Areas

Focus Area 1 (FA1)

Located at the beginning of the project limits. This section starts west of the I-95 interchange and continues east of the interchange. This section includes all movements associated with the I-95 interchange.

Focus Area 2 (FA2)

Located east of Focus Area 1. This section is comprised of I-195 west of North Miami Avenue and east of Biscayne Boulevard.

Focus Area 3 (FA3)

Located east of Focus Area 2. This section includes improvements to the Julia Tuttle Causeway.

Focus Area 4 (FA4)

This section is the final segment. It is located east of Focus Area 3 and includes the Alton Road Interchange and Mt. Sinai Medical Center Area.

This PD&E Study started in June 2022 and is expected to be completed by fall 2025. After the completion of the PD&E phase, the preferred alternative will move to the final design phase.

For more information visit: https://www.fdotmiamidade.com/i195pdestudy.html

STATE ROAD (SR) 953/NW 42 AVENUE WITH SR 948/NW 36 STREET AND SR 25/US 27/OKEECHOBEE ROAD (IRON TRIANGLE) PD&E STUDY

IRON TRIANGLE
LEJEUNE ROAD/NW 36 STREET/ OKEECHOBEE ROAD

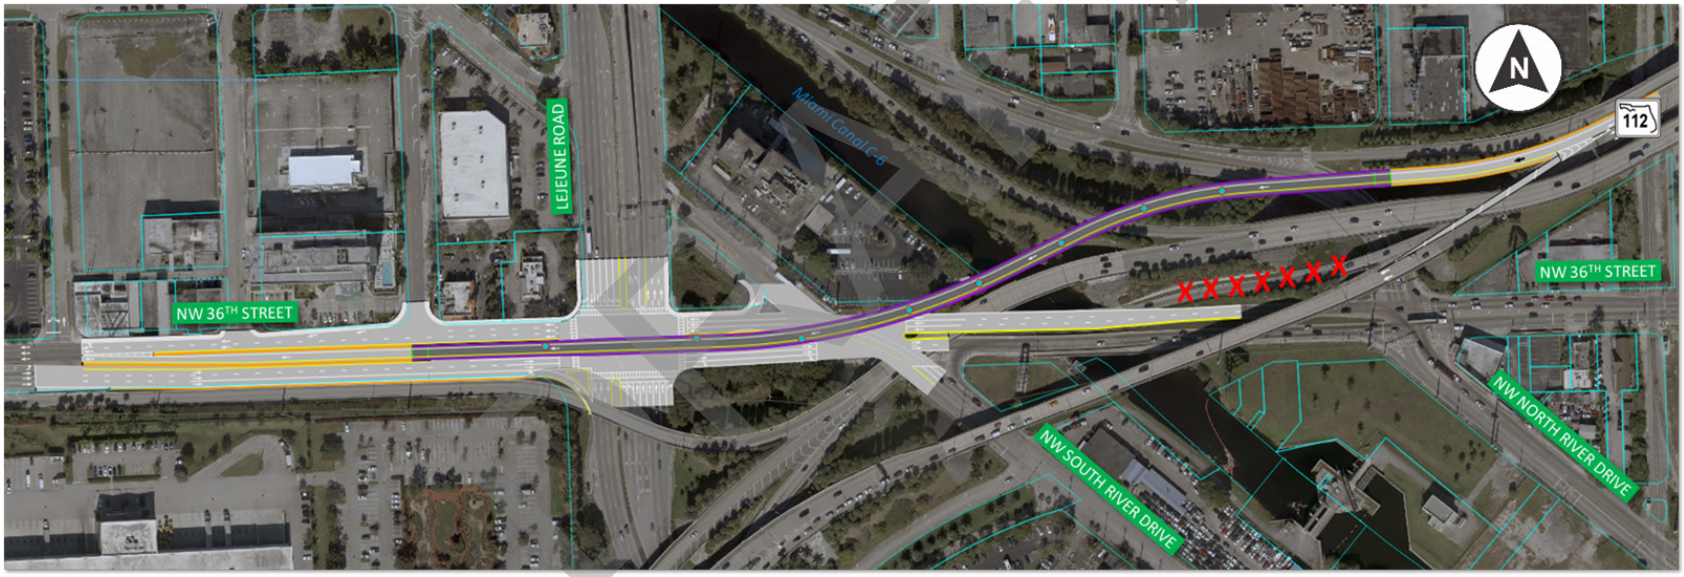
The Iron Triangle is an urban interchange primarily comprising the intersection of SR 953/NW 42nd Avenue, SR 948/NW 36th Street, and SR 25/US 27/Okeechobee Road. The interchange also features the Greater Miami Expressway Agency (GMX) SR 112/ Airport Expressway, which is one of the principal highways providing access to and from Miami International Airport (MIA) and connects to other important transportation facilities and destinations such as Interstate 95 (I-95) and Miami Beach. In addition, the ramps of the Iron Triangle interchange cross over the Miami Canal (C-6). The project traverses the City of Miami Springs, City of Hialeah, City of Miami and Unincorporated Miami-Dade County.

The purpose of this project is to address operational deficiencies and improve capacity, relieve existing congestion and accommodate projected transportation demand within the Iron Triangle interchange area, specifically as it relates to SR 953/NW 42nd Avenue, SR 948/NW 36th Street, and SR 25/US 27/Okeechobee Road. Other goals of the project include improving safety conditions and enhancing modal interrelationships. The following benefits are included in this project:

DRAFT

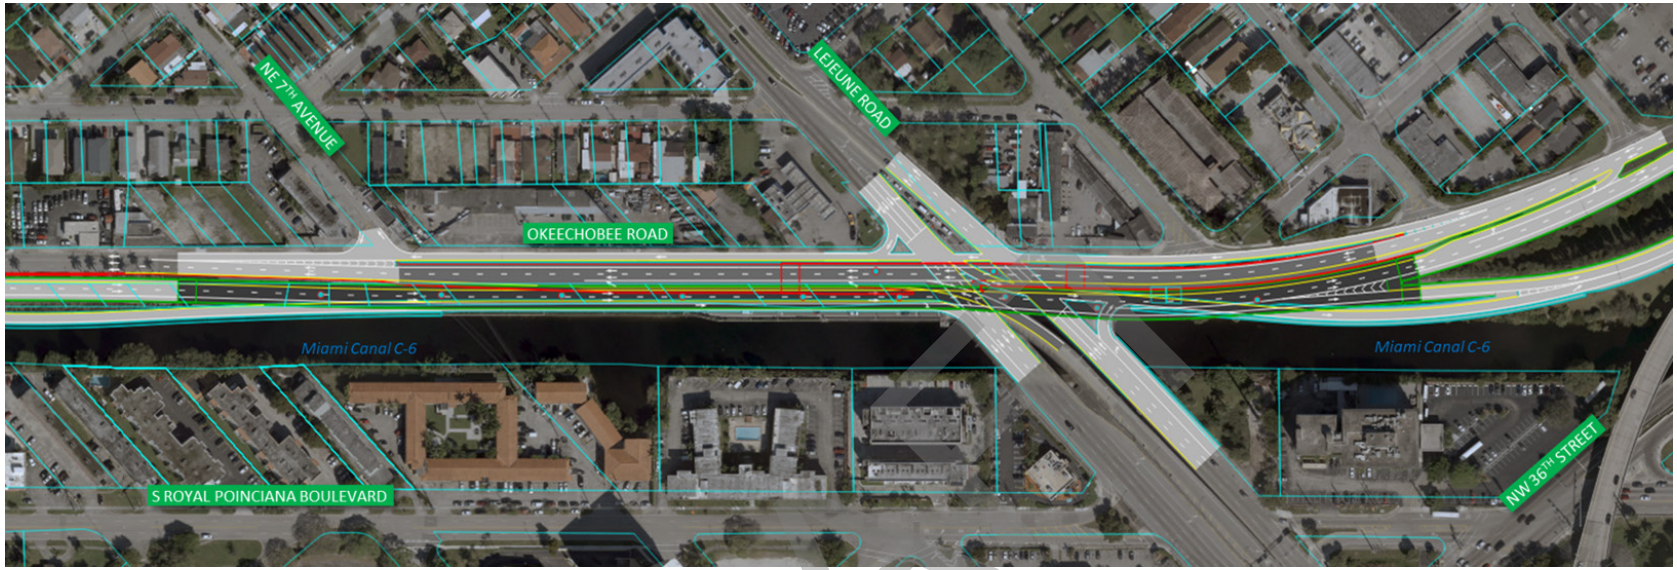
The need for this project is based on the following criteria:

- **Capacity/Transportation Demand:** Improve traffic operations/capacity, alleviate existing congestion, and accommodate projected transportation demand.
- **Safety:** Improve safety within the interchange area
- **Modal Interrelationships**: Enhance multimodal activity.
  - Miami International Airport (MIA)
  - Intercity and long-distance transit access
  - Freight movement
  - Pedestrian accommodations



Conceptual Planning Alternative for WB SR 112 to WB 36th Street Over LeJeune Road Extension

DRAFT



Conceptual Planning Alternative for Okeechobee Road Overpass at LeJeune Road

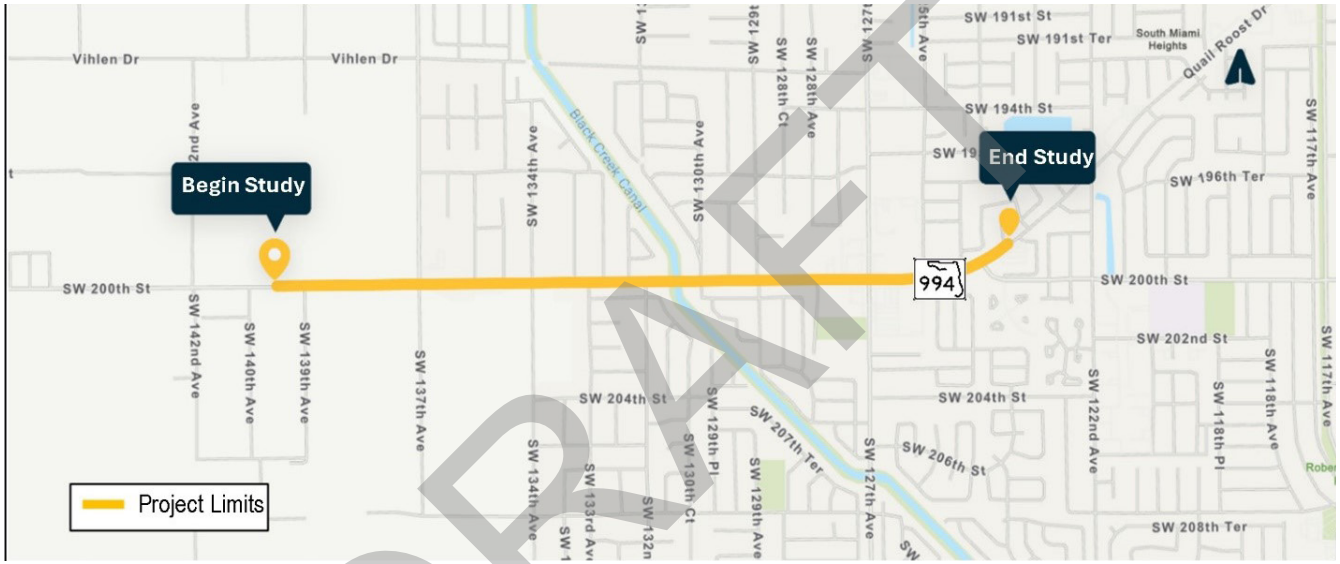
This PD&E Study started in June 2023 and is expected to be completed by 2025.

For more information visit: https://www.fdotmiamidade.com/SR953_SR948_and_SR25.html

DRAFT

SR 994/SW 200TH STREET/QUAIL ROOST DR FROM W. OF SW 137 AVE TO E. OF SW 127 AVE PD&E

A PD&E Study is being conducted by the Florida Department of Transportation (FDOT) to evaluate the potential impacts of widening State Road (SR) 994/SW 200th Street/Quail Roost Drive from west of SW 137th Avenue to east of SW 127th Avenue from two lanes to four lanes. The project corridor is approximately 1.67 miles in length.



SR 994/SW 200th Street/Quail Roost Drive PD&E Study Project Limits

The following benefits are included in this project:

DRAFT

In addition to the potential widening, the proposed roadway improvements may include operational enhancements at the existing intersections, removal and replacement of the bridge structure (#870633) over Black Creek Canal (C-1W), access management measures, and stormwater management facilities. The PD&E Study evaluates typical section alternatives based on design criteria, safety, and operational needs, and the minimization of environmental effects and right-of-way needs. The PD&E Study evaluates the provision of Americans with Disabilities Act (ADA) compliant facilities as well as new/enhanced pedestrian and bicycle infrastructure. Improvements at four intersections/cross streets are also proposed as part of this project:

- SR 994 and SW 137th Avenue
- SR 994 and SW 134th Avenue
- SR 994 and SW 132nd Avenue
- SR 994 and SW 127th Avenue

The purpose of this project is to address traffic operations and capacity constraints on SR 994 to accommodate future travel demand projected as a result of population and employment growth along the corridor. Other goals of the project are to 1) improve multimodal safety conditions along the corridor, including emergency evacuation and response times, and 2) enhance mobility options and multimodal access.

Preferred Alternative Typical Section

DRAFT

Bicycle and Pedestrian Facilities

Black Creek Trail Underpass Crossing

DRAFT

The PD&E Study started in June 2021 and is expected to be completed in February 2025. The estimated construction cost is $29.5 million. After completion of the PD&E phase, the preferred alternative will move to the final design phase.

For more information, visit https://www.fdotmiamidade.com/QuailRoostPDE.html

OTHER MAJOR CORRIDOR IMPROVEMENTS / RESURFACING PROJECTS

The following are major resurfacing projects in Miami-Dade County:

SR 953/LEJEUNE ROAD/NW 42 AVENUE/E 8 AVENUE FROM NORTH OF SR 932/NW 103 STREET/E 49 STREET TO SOUTH OF NW 135 STREET

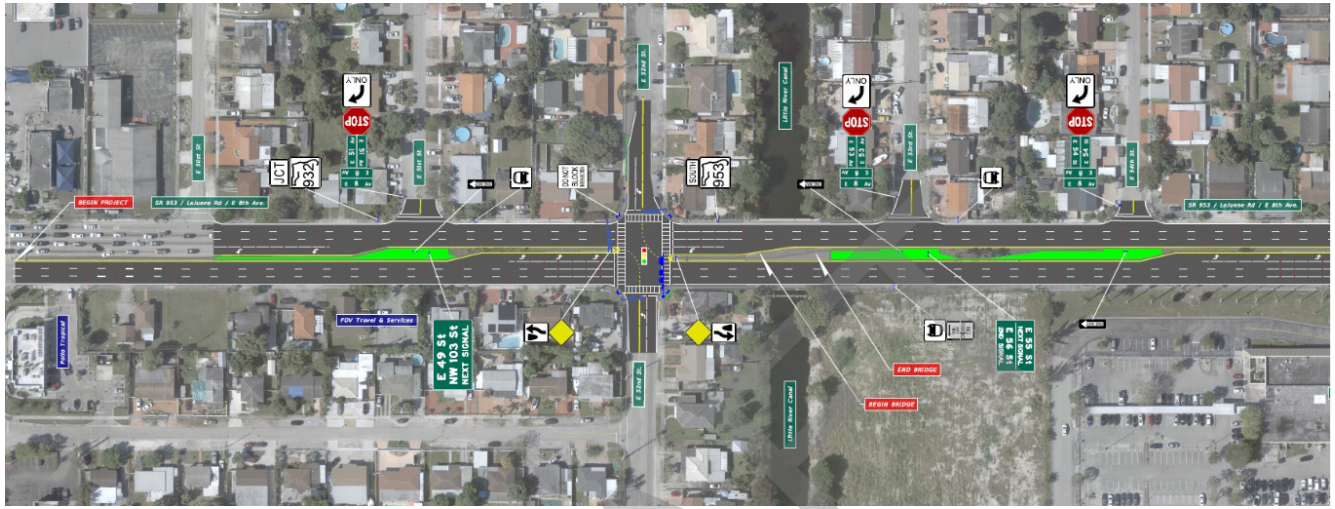
The FDOT is currently developing the design along State Road (SR) 953/LeJeune Road/NW 42 Avenue/E 8 Avenue from north of SR 932/NW 103 Street/E 49 Street to south of NW 135 Street, in Miami-Dade County.

The following benefits are included in this project:

This project design entails the following:

- Closing the full median openings at the following intersections: E 51 Street, E 53 Street and E 54 Street
- Repaving and restriping the roadway
- Updating curb ramps
- Removing abandoned driveways
- Adding a new sidewalk and curb ramps at NW 37 Avenue Connector
- Repairing stormwater drainage
- Relocating the crosswalk at the NW 37 Avenue Connector to make it more visible to oncoming traffic
- Adding a left turn green arrow to the traffic light at E 52 Street and E 55 Street, in the northbound direction
- Widening the eastbound approaches at E 52 Street and E 55 Street
- Adding a new crosswalk across LeJeune Road at NW 37 Avenue Connector
- Upgrading pedestrian and vehicular signage
- Replacing the bridge expansion joints and guardrail
- Removing or relocating landscape due to the median and side street widening
- Upgrading street lighting at intersections

DRAFT



This project is anticipated to begin construction in February 2026 and will cost approximately $7.2 million.

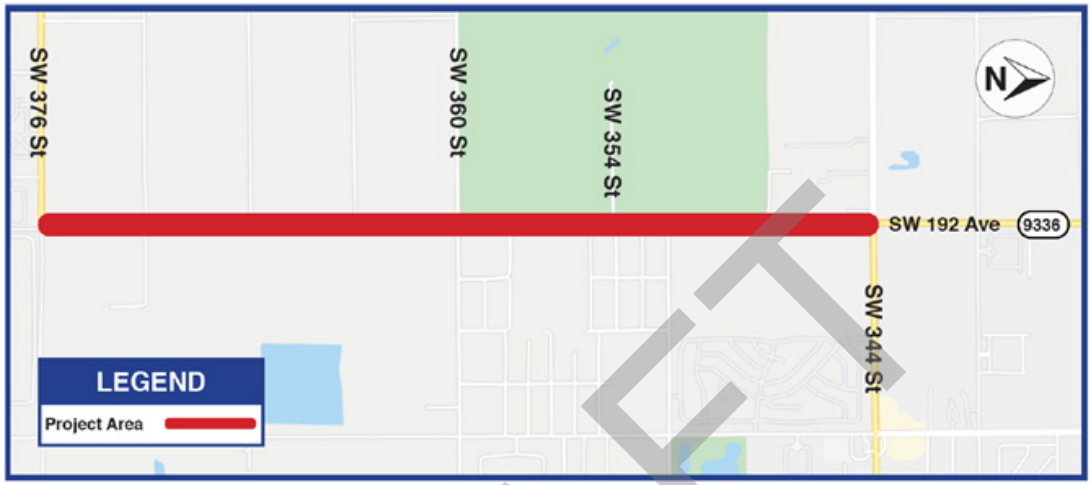
For information related to the project, visit: https://www.fdotmiamidade.com/design-projects/north-miami-dade/sr-953lejeune-rdnw-42-avee-8-ave-from-sr-932nw-103-ste-49-st-to-nw-135-st.html

SR 9336/SW 192 AVE (SW 376 ST TO SW 344 ST) AND SR 9336/SW 344 ST/PALM DR (SW 192 AVE TO SR 5/US 1)

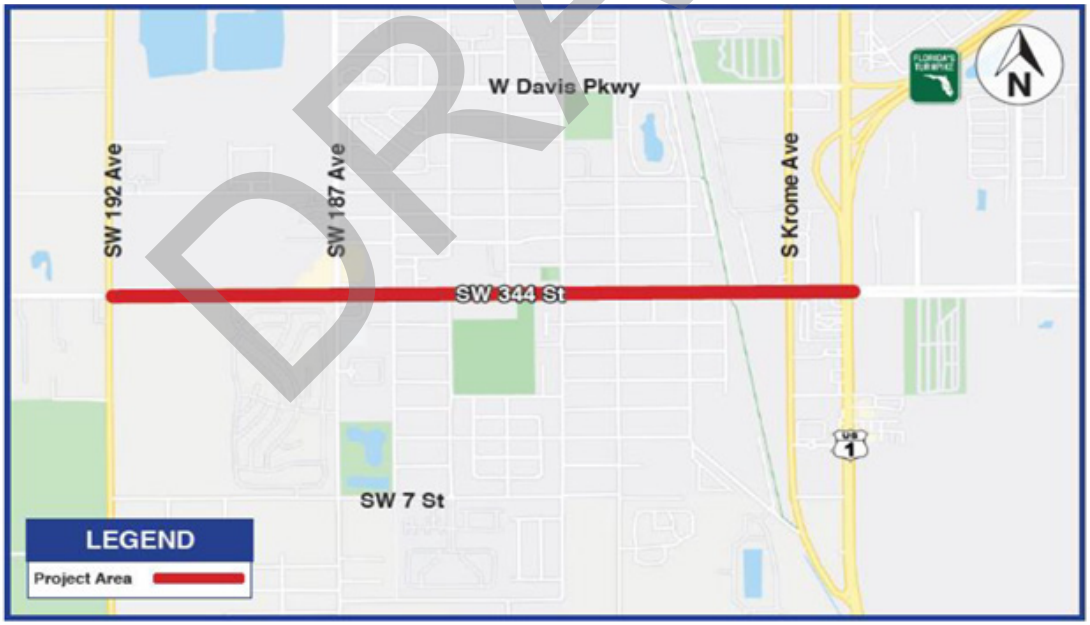
The project entails repaving and restriping the roadways of SR 9336/SW 192 Ave from SW 376 Street to SW 344 Street and SW 344 Street from SW 192 Avenue to SR 5/US 1. The design for this project is underway and divided into two segments. Specific improvements for each segment are listed below. Project construction began in Fall of 2023 and will cost approximately $15.2 million combined.

The following benefits are included in this project:

DRAFT



SR 9336/SW 192 Ave. from SW 376 Street to SW 344 Street Project Location Map



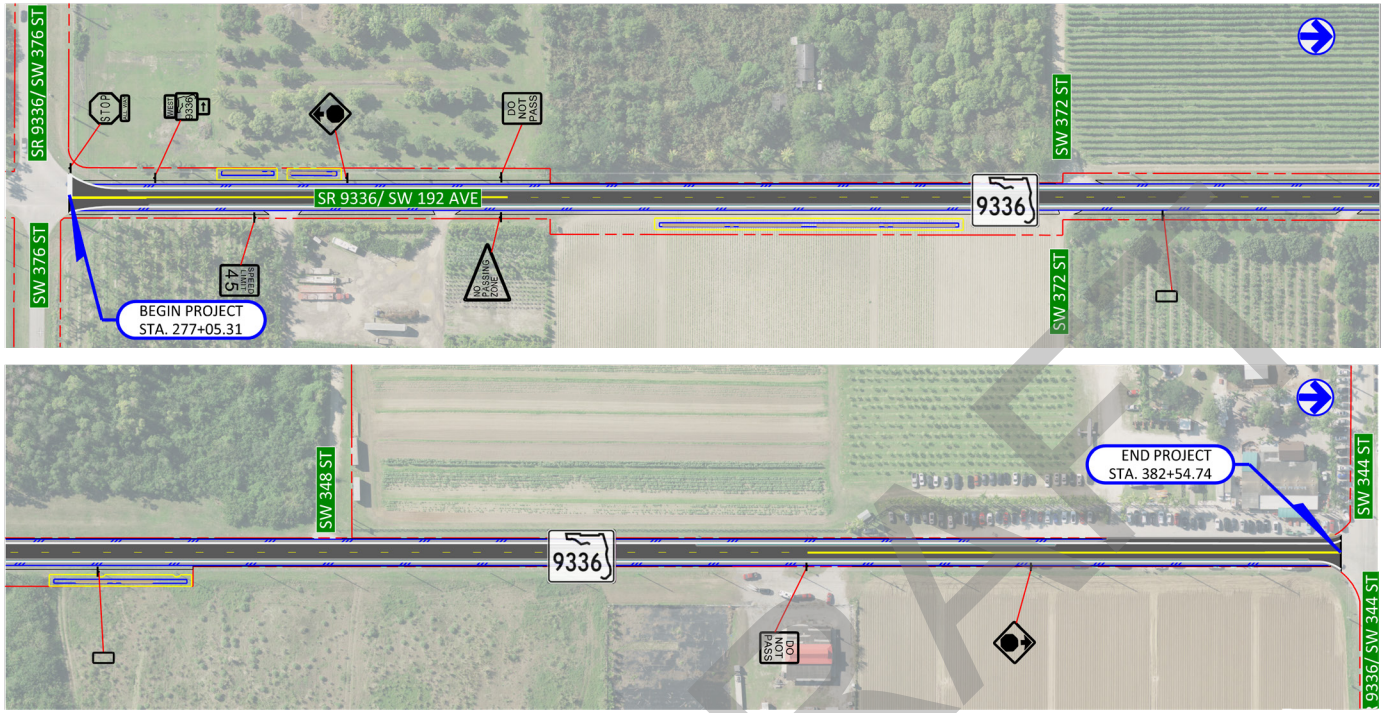
SR 9336/SW 344th Street from SW 192nd Ave to west of SR5/US-1 Project Location Map

DRAFT

For information about the construction schedule or related information, visit: https://www.fdotmiamidade.com/current-projects/south-miami-dade/sr-9336sw-392-st-from-everglades-national-park-to-sr-5us-2.html

SEGMENT LIMITS	IMPROVEMENTS
SR 9336/SW 192 Avenue from SW 376 Street to SW 344 Street	• Resurfacing to preserve and extend the service life of the roadway • Widening the road to provide 12-foot-wide travel lanes • Upgrading drainage • Providing five-foot shoulders, which will function as bicycle facilities, where feasible • Upgrading signs and pavement markings • Installing missing regulatory and warning signs • Installing audible and vibratory treatment to enhance safety • Trimming trees • Installing speed feedback signs
SR 9336/SW 344 Street/ Palm Drive from SW 192 Avenue to SR 5/US 1	• Resurfacing to preserve and extend the service life of the roadway • Providing sod at unpaved shoulders and providing 5-foot paved shoulders from SW 188 Ave to SW 187 Avenue/Redland Road. • Constructing a 12' wide shared-use path from SW 188 Avenue to NW/SW 6 Avenue • Widening N leg of the intersection of NW/SW 6 Avenue along with drainage and safety improvements • Widening the westbound shoulder at NW/SW 6 Avenue to improve right turns • Widening of sidewalk from 5'-wide to 10'-wide between NW/SW 6 Avenue and SR 5/US1 • Upgrading pedestrian signs, crosswalk signals, and wheelchair ramps • Repairing damaged sidewalks • Improving bus stops, including a wider sidewalk and new shelter pad at SW 187 Avenue/Redland Road • Installing video detection traffic signal equipment at NW/SW 6th Avenue • Upgrading lighting between NW/SW 6 Avenue and NW/SW 3 Avenue • Upgrading signs and pavement markings, including on-street parking spaces from NW/SW 6 Avenue to Krome Avenue • Installing audible and vibratory treatment from SW 192 Avenue to SW 187 Avenue/Redland Road to enhance safety • Relocating or trimming landscaping

DRAFT



R 9336/SW 192 Avenue from SW 376 Street to SW 344 Street Project Plan View

SR 9336/SW 192 Avenue from SW 376 Street to SW 344 Street Construction

OTHER MAJOR PROJECTS

The following are major projects in Miami-Dade County:

SR 90/US 41/SW 8 ST AT SW 109 AVE PEDESTRIAN BRIDGE REPLACEMENT

This project has finalized the design phase for the installation of a pedestrian bridge over SW 8 street and the C-4 Canal west of SW 109 Avenue. The following benefits are included in this project:

The project will provide pedestrian plazas with elevators and stairs on the north-end and south-end of the pedestrian bridge. The project includes the installation of decorative LED street lighting, street signage, sidewalk, hardscaping and landscaping along SW 109 Avenue between SW 7 Terrace and SW 6 Street. It also includes upgrading pedestrian signals at SW 8 Street and SW 109 Avenue intersection. Other improvements include providing a mid-block crosswalk on the north end of SW 7 Terrace and SW 109 Avenue intersection.

SW 8th Street Pedestrian Bridge Elevation View

DRAFT

The project is anticipated to begin construction in Fall 2024 and will cost approximately $38 million.

For information related to the project, visit: https://www.fdotmiamidade.com/design-projects/south-miami-dade/sr-90us-41sw-8-st-at-sw-109-ave-pedestrian-bridge-replacement.html

WRONG WAY DRIVING INITIATIVE AT VARIOUS RAMP LOCATIONS - PHASES 1, 2, 3 & 4

While Wrong Way Driving (WWD) crashes occur randomly and less frequently than other types of crashes, they often involve more than one vehicle and can result in multiple fatalities and/or serious injuries. Supported by research, FDOT's Wrong-Way Driving Initiative explores various WWD countermeasure systems to aid in warning wrong-way drivers, sending notifications to alert other motorists and notifying law enforcement.

HOW WRONG-WAY VEHICLE DETECTION SYSTEM WORKS

1. **Detects Vehicle:** Signs located on the exit ramps use system to detect vehicle traveling the wrong way.
2. **Triggers lights:** Flashing lights are turned on along sign border to alert the driver he/she is traveling in the wrong direction.
3. **Notifies officials**: Detection system sends alert immediately to operators at an FDOT Regional Transportation Management Center (RTMC) and law enforcement officials.
4. **Alerts other drivers:** RTMC system broadcasts a wrong-way driver alert on message boards along the freeway.

The WWD Initiative supports the FDOT's commitment to achieving zero fatalities and serious injuries on the State Highway System. The following benefits are included in this project:

Prior to implementation, FDOT conducted statewide studies and various research projects to help analyze WWD trends and contributing factors, determine the effectiveness of various countermeasures and test those countermeasures. Additional research conducted by FDOT focused on addressing the factors that were considered to affect the occurrence of WWD incidents including: Impaired drivers, drivers aged 65 years and older, and tourists. Findings from this study provide guidance to proactively deploy WWD countermeasures at all the off-ramps in Florida. In Miami-Dade County, FDOT District Six has been installing various

DRAFT

devices to mitigate WWD occurrences on limited access facilities exit ramps including the installation of Light Emitting Diode (LED) Wrong Way Signs connected to the Department's Traffic Management Center (TMC). These improvements are being implemented in four (4) phases as described below:

- Phase 1 of this initiative proposes improvements along 11 off-ramps. Construction will be finalized in Spring 2024.
- Phase 2 proposes improvements along 24 off-ramps. Construction began in September 2023 and is scheduled to be completed by November 2025.
- Phase 3 proposes improvements along 15 off-ramps. The design-build project is ongoing, and the concept design will be advertised in August 2024 with letting in November 2024. Construction will begin in February 2025.
- Phase 4 proposes improvements along 25 off-ramps. The design-build project begins in July 2024 and is estimated to be advertised in November 2025.

In general, project improvements at each location include the installation of signage, pavement markings and Light-Emitting Diode (LED) Highlighted signs and vehicle detection systems. These improvements include:

- DO NOT ENTER signs.
- WRONG WAY sign(s).
- NO RIGHT TURN and NO LEFT TURN signs
- 2-4 dotted guideline striping for left turns between ramp entrances/exits and cross streets.
- Retroreflective yellow paint on ramp median nose where applicable.
- Straight arrow and route shield pavement marking in left-turn lanes extending from the far-side ramp intersection through the near-side ramp intersection to prevent premature left turns.
- Straight arrow and ONLY pavement message in outside lane approaching the ramp exit.
- One pair of ground-mounted Highlighted Signs with LED border lights and WWD Vehicle Detection System Assembly per ramp.
- ITS Cabinets, power service and lateral fiber drop for new Wrong Way Driving System.

Wrong Way Driving Improvements at Flagler Street (Phase 1)

DRAFT

SR 860/MIAMI GARDENS DRIVE FROM EAST OF I-75 TO NW 79 PLACE

The SR860/Miami Gardens Drive from east of I-75 to NW 79th Place project is currently in the design phase. The primary purpose of this project is to improve safety and relieve congestion along Miami Gardens Drive from east of I-75 to NW 79 Place by providing access management modifications to various median openings and increasing vehicular capacity. The proposed design widens the roadway from a four-lane facility to a six-lane facility, provides for additional turn lanes at major intersections, and proposes a shared-use path on the north side of the corridor. Further improvements include milling and resurfacing of the existing pavement, replacing signal mast arms, lighting, upgrading pedestrian ramps and sidewalks to current standards, drainage improvements, and upgrades to the signing and pavement markings. Additional right-of-way acquisition is anticipated for this project. The following benefits are included in this project:

Miami Gardens Drive Proposed Typical Section

The project is anticipated to begin construction in Spring 2025 and end Spring 2027 and will cost approximately $23 million. For information related to this project, visit: https://www.fdotmiamidade.com/design-projects/north-miami-dade/sr-860miami-gardens-drnw-186183-st-from-sr-93i-75-to-sr-823nw-57-ave.html

DRAFT

BICYCLE/PEDESTRIAN CORRIDOR IMPROVEMENTS

The bicycle/pedestrian network is a component of the overall transportation system. The Department evaluates bicycle and pedestrian improvements in conjunction with all capacity and resurfacing projects.

Systemwide Bicycle/Pedestrian Improvements on Resurfacing Projects include the following:

- New Americans with Disabilities Act (ADA)-complaint pedestrian signal pushbuttons
- Pedestrian traffic signals at all signalized crosswalks
- Installation of missing crosswalks at signalized intersections where feasible
- Adding bicycle lanes by narrowing travel lanes where feasible
- Adding buffers/wider buffers to existing bicycle lanes where feasible

FDOT D6 BICYCLE/PEDESTRIAN IMPROVEMENTS:

LOCATION	IMPROVEMENTS
SR A1A/Collins Ave from 41st Street to 63rd Street	Reconstruct, add cycle track and shared use path. Design will begin in 2029.
Julia Tuttle Causeway /I- 195 From NW 12th Avenue to SR 907/Alton Rd.	Add separated shared use path on the Julia Tuttle Causeway (PD&E in 2025, Design not funded)
SR A1A/MACARTHR CWY from E. of SR 5 /Biscayne Blvd to W. of SR 907/Alton Rd .	Bike Path/Trail (Design to begin in 2025. Construction in 2028)
SR 9336/Palm Drive from SW 182nd Ave to SW 192nd Ave	Widening from 2-4 lanes, adding a shared use path. (PD&E in 2027)
SR 94/Kendall Drive from SR 997/Krome Ave to SW 167th Av	Bike Path/Trail (Design to begin in 2029)
William Lehman Csy from SR 5/US 1 to SR A1A/Collins Ave	Shared Use Path (PD&E to begin in 2025)
SR 9336/SW 392 Street from SW 192 Ave to Everglades National Park	Separated Shared Use Path (PD&E in 2029)
Ludlam Trail	Construct new shared use path bridges over SR 976/Bird Road SR 90/US 41/SW 8th Street and SR 968/Flagler Street (Design is on-going. Construction in 2027)

DRAFT

The following benefits are included in these projects:

Bicycle & pedestrian projects are also implemented by local agencies, who oversee construction and management. In addition, some projects are funded through the federally funded Transportation Alternatives Program (TAP), or state funded Shared Use Non-motorized (SUN) Trail Program. The Safe Routes to Schools (SRTS) program integrate safety, traffic relief, health, environmental awareness, physical activity and fitness under one program focusing on school zones.

The table below shows some of the upcoming improvements by local agencies.

LOCAL AGENCY BICYCLE/PEDESTRIAN IMPROVEMENTS:

PROJECT AGENCY/ PROGRAM	PROJECT TYPE	PROJECT AREA
City of Miami Beach	Bike Lane/Sidewalk	17 Street Bicycle Lane Project
City of Miami Gardens	Bike Path/Trail	NW 199 St/Betty Ferguson Recreation Complex
Miami-Dade County	Bike Path/Trail	GGF to Industrial Park – Bike-Ped Bridge and Kiss-Ride Terminal
City of Miami	Sidewalk	Miami River Greenway Curtis Park East
Miami-Dade County	Bike Path/Trail	Bike Boulevard Demo Project – along NW 21 Ave from NW 41 St to NW 83 St
North Bay Village	Bike Lane / Sidewalk	Harbor Island Sidewalk Improvements
City of Homestead	Bike Path/Trail	Biscayne Everglades Greenway Phase II
City of Miami Springs	Pedestrian Improvements including ADA DWS and landing pads	Citywide
Village of Pinecrest	Bike Path / Trail	Kendall Drive Shared Use Path

DRAFT

PROJECT AGENCY/ PROGRAM	PROJECT TYPE	PROJECT AREA
City of Miami Gardens	Bike Path / Trail	Shared Use Path along NW 27th Avenue with pedestrian bridge over NW 17th Avenue Canal
Town of Cutler Bay	Bike Lane / Sidewalk	Marlin Road Complete Streets
Town of Cutler Bay	Bike Lane/Sidewalk	Caribbean Boulevard
Safe Routes to School Infrastructure	Pedestrian Safety Improvements	Homestead Middle School, North Miami Beach Senior High School, Miami Jackson Senior High School, Ruben Dario Middle School, Horace Mann Middle School, Brownsville Middle School, Booker T. Washington Senior High School, Miami Southridge Senior High School, Georgia Jones-Ayers Middle, North Miami Middle School, Carol City Middle School, North Miami Senior High School
City of North Miami	Pedestrian Bridge	Between NE 2nd Avenue and Griffing Boulevard
Miami-Dade County	Bike Path/Trail	Meridian Avenue Shared Use Path from Dade Boulevard to 28th Street
City of South Miami	Pedestrian Bridge	US-1 adjacent to South Miami Metrorail
Town of Miami Lakes	Bike Lane/Sidewalk	Along Montrose Road and Balgowan Road
Village of Miami Shores	Bike Path/Trail	Flagler Trail connecting residential neighborhoods with Miami Shores Recreation Complex and Community Center

The following benefits are included in these projects:

DRAFT

FDOT D6 BICYCLE/PEDESTRIAN FEASIBILITY ASSESSMENTS:

NAME	LIMITS	STATUS
Little Havana Area to Brickell & Underline Route Options Assessment and Feasibility Analysis	From: SR 9/NW 27 Ave To: Underline	In Progress
SR 976 Bird Road Multimodal Gap Assessment	From: SR 959/SW 57 St/Red Road To: SR 5/US-1/S Dixie Highway	In Progress
SR 913/SW 26th Road Bicycle and Pedestrian Improvement Feasibility Analysis	From: Underline To: Rickenbacker Causeway	Completed
SR 9336/SW 344 St Feasibility Study	From: SW 192 Ave To: SW 182 Ave	In Progress
SR 826 Frontage Rd Separated Bicycle Facilities	From: NW 154th St To: NW 57th Ave/Red Road	Completed

The following benefits are included in these feasibility assessments:

DRAFT

TRANSPORTATION SYSTEMS MANAGEMENT AND OPERATIONS (TSM&O)

The District Six Transportation Systems Management and Operations (TSM&O) Program Office focuses on implementing active, multi-modal traffic management strategies to optimize the safety and people-moving capacity of the regional roadway system in Miami-Dade and Monroe Counties.

The Office employs a series of innovative services and technologies to deliver transportation solutions that meet current and future traffic demand. These services include incident management, traveler information, express lanes, arterial management, and others. The combination of these strategies provides a multi-pronged approach toward reducing traffic delays and improving roadway safety to benefit all users. The following benefits are included in this project:

The District Six TSM&O Program is housed at the SunGuide Transportation Management Center (STMC) which serves as the main traffic hub for southeast Florida. TSM&O staff located at the STMC uses Intelligent Transportation System (ITS) devices such as closed-circuit television cameras, dynamic message signs, roadway detectors, traffic signals, and other devices to manage traffic 24 hours per day, 7 days per week. Dedicated staff monitors the roadways to provide incident clearance, publish real-time traffic information, and promote the travel-time reliability of the regional transportation network. The goal of the TSM&O staff is to optimize current operations while expanding the program to meet the future traffic needs of southeast Florida.

The TSM&O Office is committed to achieving this goal and is working to implement key projects that will achieve this mission. These projects include the installation of Wrong Way Driving Countermeasures along highway entrance ramps, installation of ITS communications on Okeechobee Road in Miami-Dade County and will be launching its first connected and automated vehicle (CAV) project in Monroe County. For more information about the program, please visit www.sunguide.info

DRAFT

MODAL DEVELOPMENT

The FDOT Modal Development Office aims to deliver and promote a modern, sustainable and congestion free multimodal transportation system that safely and efficiently moves people and goods by rail, sea, air, aerospace, and road. This is carried out through several county initiatives and are identified below:

STRATEGIC MIAMI AREA RAPID TRANSIT (SMART) PROGRAM

The Strategic Miami Area Rapid Transit (SMART) Program is an infrastructure investment program of projects developed to improve transportation mobility and create a transit system that will support economic growth and competitiveness in the global arena.

The SMART Program is expected to expand transit options in Miami-Dade County along six critical corridors that are linked to local, regional, national, and global economic markets as highlighted below. Another critical component of the SMART Program will be a network of Express Buses, known as Bus Express Rapid Transit (BERT), which is intended to expand South Florida's Express Lanes network with the implementation of six identified BERT express lane concepts. This innovative approach effectively expands the reach of transit in Miami-Dade County and beyond.

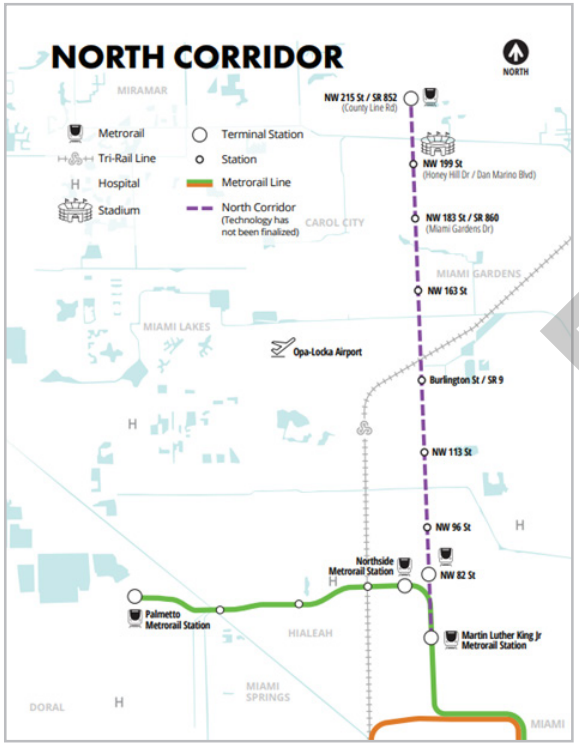
- **Beach Corridor:** Highest tourist demand in the region with major employment centers.
- **East-West Corridor:** Heaviest commuter travel for international, state, and local businesses.
- **Kendall Corridor:** One of the most congested arterial roadways with the highest demand.
- **North Corridor:** Key regional mobility linkage for access to jobs, the stadium, and educational facilities.
- **Northeast Corridor:** High transit demand and part of a critical regional corridor stretching to Palm Beach County.
- **South Corridor:** Experiencing the fastest population growth in Miami-Dade County.

North Corridor:

FDOT is conducting the Project Development and Environmental (PD&E) study for the North Corridor. The North Corridor is a 10-mile-long corridor along NW 27th Avenue, from NW 62nd Street/Dr. Martin Luther Kind, Jr. Metrorail Station to NW 215th Avenue. The Project consists of implementing a Heavy Rail Transit (Metrorail) extension along NW 27 Avenue. The following benefits are included in this project:

DRAFT

The envisioned transit corridor will include public on-street transit stations located along a dedicated running way. These stations can include public or private facilities located adjacent to the corridor where potential park-and-ride or transit terminals will be considered. In October 2019, the Miami-Dade TPO selected elevated heavy rail transit as the locally preferred alternative for the North Corridor. On April 23, 2020, the TPO Governing Board accepted a report by Miami-Dade County's Department of Transportation and Public Works (DTPW) on alternative transit technologies for NW 27 Avenue and directed DTPW to issue a request for proposals to identify whether transit technologies, other than heavy rail are viable for the corridor. FDOT placed its North Corridor PD&E study on hold after the consulting with the Federal Transit Administration (FTA) until the outcome of the DTPW Request for Proposals (RFP) process is known and a final decision on the transit technology and alignment for NW 27 Avenue is made by the TPO Governing Board. On November 15, 2022, the Board of County Commissioners (BCC) passed a motion to terminate the development of the DTPW's RFP and to accelerate the implementation of the North Corridor as an elevated fixed guideway. In May 2023, FDOT and DTPW collaborated to conduct a Value Engineering (VE) Workshop to identify the best and most cost-effective methods of implementing the project. Results of the VE Workshop were formalized in a final VE Report which was completed October 2023. Currently FDOT is in the process of restarting the North Corridor PD&E with a notice to proceed (NTP) scheduled in early 2024.



For information related to this project, visit:
https://www.fdotmiamidade.com/27thAvenueRapidTransit.html

DRAFT

FREIGHT OPERATIONS

The FDOT Freight, Logistics and Passenger Operations (FLP); commonly known as Modal Development Office, encompasses a level of modal representation and industry engagement unlike any other state DOT organization. FLP acts as a tool to better connect, develop, and implement a freight planning process that maximizes the use of existing facilities while integrating and coordinating the various modes of transportation, including the combined utilization of both government owned and privately-owned resources.

Annually, FLP allocates funds toward transportation infrastructure improvements in all the modes. Working together collaboratively, FLP leads Florida's multimodal transportation initiatives through work with federal and local government partners in planning, coordination, financing, grant management, ridership, and regional analysis. The following benefits are included as part of this initiative:

The Modal Development Office includes Aviation, Rail, Freight, Seaports, and Transit Projects.

AVIATION
MIA Central Base Pavement Rehabilitation
MIA Airport Operations and Communication Center (AOCC)
MIA Surface Management System (Aerobahn System)
MIA Terminal "E" thru "F" Connector
MIA Federal Inspection Station Refurbishment
Miami Opa Locka Executive Airport Upgrade 9L/27R Pavement Rehabilitation
Miami Opa Locka Executive Apron Rehabilitation
Miami Executive Airport Taxiway Rehabilitation
Miami Executive Airport Runway Incursion Mitigation
Dade-Collier Training and Transition Airport CCTV Camera Installation
RAIL
Passenger and Freight Rail Safety Projects
Railroad Crossing Surface Rehabilitation Projects
Grade Separation on NE 203 Street
SR 826 / Palmetto Expressway (SB) Bridge Widening over the FEC
I-395 Signature Bridge over the Florida East Coast Railway (FEC)
SEAPORT
Port of Miami Seaport Security Grant Program
Port of Miami Passenger Boarding Bridges
Port of Miami Cruise Terminal Improvements
Port of Miami Upland Cargo Improvements

DRAFT

STATE TRANSIT BLOCK GRANT TO DTPW FOR OPERATING COSTS

This grant provides operating assistance for Miami-Dade Department of Transportation and Public Works (DTPW) Fixed Route Bus Service. The Metrobus fixed route bus service is run by Miami-Dade DTPW and operates seven days a week, 24 hours per day. A total of 73 routes – Miami-Dade DTPW directly operated regular bus service structure which are served by a total fleet of 767 buses and 30 contracted routes with 194 contractor-owned buses. Two of these Contract Routes are Express Bus Service in Monroe County with 11 buses. Metrobus includes local, feeder, circulator, limited-stop, express, and Bus Rapid Transit (BRT) Arterial Busway services. The FDOT provides 50% State Participation Rate for this program. The following benefits are included as part of this initiative:

FREIGHT OVERVIEW

From agriculture and heavy equipment to daily consumables, freight movement impacts every aspect of our daily lives. It is crucial for the nation's economy to maintain a safe and reliable transportation system that moves goods efficiently. Freight transportation has been a driving force for economic productivity, global competitiveness, and job creation. Every economic sector depends on a reliable, safe, and cost-effective network to move goods and services. As a leading international hub, this statement is very relevant to the state of Florida. With goods worth approximately hundreds of billions of dollars flowing through Florida's airports and seaports, it is critical for the State to maintain and improve its extensive multimodal freight infrastructure. Today, Miami International Airport (MIA) is the leader in the Americas in international freight and the world's largest gateway to Latin America & the Caribbean. Similarly, PortMiami is the State's fifth highest port for total trade tonnage and Second highest in TEU's. It is known as a Global Cargo Gateway. These major freight hubs, along with a booming construction industry, growing population and strong local economy indicate Miami-Dade County is vital for the movement of freight throughout Florida and beyond its borders. The following benefits are included as part of this initiative:

DRAFT

FDOT District Six is home to many diverse communities with unique transportation freight mobility and transportation needs. These needs can be traced back to some of the State's leading freight facilities and international trade gateways such as MIA and PortMiami. The Miami-Dade County Board of County Commissioners adopted a new capital improvement program at MIA that will fund 6.8 billion in airport modernization projects over the next 5-15 years. This paves the way for future growth in passenger and cargo traffic at MIA.

PortMiami is developing the nation's first net zero carbon emission supply chain, this is in line with Miami Dade County's 2030 25% emissions reduction goal at the port. The Infrastructure investment and Jobs Act (IIJA) has awarded PortMiami two RAISE grants in support of their Cargo Mobility Optimization and Resiliency Project and the NetZero On-and-off Port Master Planning effort. PortMiami is developing the nation's first net zero carbon emission supply chain, this is in line with Miami Dade County's 2030 25% emissions reduction goal at the port. The Infrastructure investment and Jobs Act (IIJA) has awarded PortMiami two RAISE grants in support of their Cargo Mobility Optimization and Resiliency Project and the NetZero On-and-off Port Master Planning effort.

Hence, it is essential that District Six and its industrial based communities identify and invest in infrastructure improvements to position themselves for economic development and growth in cargo. Key developments and tools should be incorporated such as ITS/technologies, truck parking needs, economic impact analyses, innovative funding programs, and land use and redevelopment opportunities-helping market these industrial based communities as competitive global logistics service centers.

District Six identified the following freight-intensive sub-areas:

- Town of Medley
- City of Opa-Locka
- Port of Miami River Corridor
- City of Doral
- City of Miami Gardens
- City of Hialeah
- City of Homestead
- Monroe County.

DRAFT

District Six has completed all Sub-area Freight Improvement Studies. District Six plans to perform one additional Freight Study that will be countywide and look at various types of improvements we can make to our sub-areas. This will be known as the Freight Improvement Plan Study of Miami-Dade County. These studies have resulted in a comprehensive Project Bank of freight-specific and freight-oriented projects.

For information related to this project, visit: https://www.fdotmiamidade.com/district-six-freight-village-analysis-study-countywide-freight-improvement-plan.html

PART 2: 5-YEAR PROJECT LISTINGS
FLORIDA'S TURNPIKE ENTERPRISE

DRAFT

FLORIDA'S TURNPIKE ENTERPRISE

Florida's Turnpike

Florida's Turnpike Enterprise is an agency of the Florida Department of Transportation and currently owns and operates over 515 miles of toll facilities and 148 interchanges in the State of Florida. The Turnpike System includes the 47-mile Turnpike Mainline / SR 821 located in Miami-Dade and Broward counties. It also includes the Turnpike Mainline / SR 91, which extends from North Miami to a junction with Interstate 75 in north central Florida, through Miami-Dade, Broward, Palm Beach, Martin, St. Lucie, Indian River, Okeechobee, Osceola, Orange, Lake, and Sumter counties. The remainder of the Turnpike System comprises several other facilities located throughout the State of Florida.

The Turnpike is a user-financed system that uses toll revenues, service plaza sales revenue, and bonds, to pay for new construction and maintenance of the entire system. It does not receive traditional gas tax revenue.

MIAMI-DADE COUNTY TURNPIKE PLANNED MAJOR PROJECTS

WIDENING PROJECTS:

#	PROJECT NAME	FPID	LIMITS
1	**Turnpike Mainline / SR 91 Widening (widen from 6 to 8 lanes)**	423373-5	MP 0.4X (Golden Glades Plaza) to MP 3.3X (Miami-Dade / Broward County Line) Includes interchange improvements at MP 2X (NW 199 Street)
2	**Turnpike Mainline / SR 821 Widening (widen from 4 to 6 lanes)**	444111-1	MP 3 (North of SW 312th Street / Campbell Drive) to MP 7 (North of SW 137th Avenue) Includes interchange improvements at MP 5 (SW 288th Street / Biscayne Drive) and MP 6 (SW 137th Avenue)

DRAFT

INTERCHANGE PROJECTS:

#	PROJECT NAME	FPID	LIMITS
1	**Turnpike Mainline / SR 91 Interchange Improvements (Partnership Project)**	437053-1,-2, -3,-4,-5	MP 0X (I-95 / US 441 / SR 826 – Golden Glades)
2	**Turnpike Mainline / SR 821 Transportation Systems Management & Operations (TSM&O) Interchange Improvements**	452112-1	MP 0 (US 1)
3	**Turnpike Mainline / SR 821 Interchange Improvements**	437211-1	MP 11 (SW 216th Street) and MP 12 (SW 211th Street / Caribbean Boulevard)

OTHER PROJECTS:

#	PROJECT NAME	FPID	LIMITS
1	**Service Plaza Improvements along Turnpike Mainline / SR 821**	442620-1	MP 19 (Snapper Creek Service Plaza General Improvements)

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

PART 2: 5-YEAR PROJECT LISTINGS
MOVING MIAMI-DADE

DRAFT

PART 2: 5-YEAR PROJECT LISTING

MOVING MIAMI-DADE

GREATER MIAMI EXPRESSWAY AGENCY (GMX)

DRAFT

This section of the TIP focuses on the major mobility improvement projects programmed by the Greater Miami Expressway Agency (GMX) for the next five years. GMX was created under the 2023 Florida Statute which granted ownership, and control of the roads that constitute the expressway system in Miami-Dade County and portions of northeast Monroe County.

THE EXPRESSWAY AUTHORITY SYSTEM

The GMX System includes five (5) of the busiest and most important State Roads in Miami-Dade County: Airport Expressway (SR 112); Dolphin Expressway (SR 836); Don Shula Expressway (SR 874); Snapper Creek Expressway (SR 878); and Gratigny Parkway (SR 924). It also includes NW 138th Street from US-27 to just east of NW 97th Avenue, the LeJeune Frontage Roads from SR 836 to Central Boulevard as well as portions of northeast Monroe County.

PROJECT FUNDING

GMX's primary source of revenue is the tolls collected on its five expressways. GMX does not receive any gas tax, property tax, sales tax, or any other source of revenue.

FY 2025-2029 TIP

Major projects included in the GMX FY 2025 - 2029 TIP are highlighted within the following pages. The projects have been organized by the following categories: Existing System Improvements and System Expansion.

EXISTING SYSTEM IMPROVEMENT PROJECTS

The following projects are categorized as Existing System Improvements in the current Five-Year TIP and include widening or reconstruction within an existing roadway segment:

PROJECT 83611 – SR 836 / I-95 INTERCHANGE IMPROVEMENTS

GMX has partnered with FDOT to acquire right-of-way, design and build the SR 836 improvements from NW 17th Avenue to I-95 in conjunction with the FDOT's I-95/I-395 project. Improvements to SR 836 include both eastbound and westbound widening for operational optimization between NW 17th Avenue to I-95. Additionally, a new viaduct consisting of an elevated 4 lane structure to bypass traffic on the lower level of SR 836 will be provided to improve mobility to and from Downtown Miami and Miami Beach.

Furthermore, the project will improve access to the Health District by providing better connections to the area from I-95 and SR 836. The design-build contract was executed in July 2018 and completion is anticipated by FY 2027. The total cost for the GMX project is estimated at $275.8 million.

PROJECT 83634 – SR 836 NEW HOMESTEAD EXTENSION OF FLORIDA'S TURNPIKE (HEFT) RAMP CONNECTIONS

This project consists of new ramps from eastbound SR 836 to northbound HEFT and from southbound HEFT to westbound SR 836. Additionally, SR 836 ramp connections are being provided to access the Dolphin Station Park-and-Ride site. Construction of this project is underway with an estimated completion date in early FY 2025. The total cost is estimated at $56.9 million.

DRAFT

SYSTEM EXPANSION PROJECTS

The following projects are categorized as System Expansions in the current Five-Year TIP and include all construction of new roadway segments on new alignments adjacent to the existing system that will increase the total centerline miles of the system:

PROJECT 83618 – SR 836 SOUTHWEST EXTENSION/ KENDALL PARKWAY

This 14-mile multimodal corridor will extend SR 836 from NW 137th Avenue to SW 136th Street and provide the residents in the southwestern portion of Miami-Dade County another transportation option. The project is envisioned to include: Express bus service and park & ride facilities in the vicinity of SW 88th Street and SW 136th Street; a multi-use recreational trail for non-motorized transportation including walking and biking; a minimum of 1,000 acres of land for wetland preservation and creation that will be held in perpetuity; widening of SR 836 Eastbound and Westbound from 107th Avenue to 97th Avenue; as well as improvements to 137th Avenue, 157th Avenue, SW 88th Street and SW 104th Street to facilitate access. The improvements to local streets and portions of ramp connections will be contributions to Miami-Dade County. GMX is continuing to work on the environmental permitting, right-of-way acquisition and transfer of government parcels for the mainline and trail alignment. Additionally, GMX is advancing the final design and construction of various components of the Kendall Parkway project such as the widening of SW 137th Avenue from SW 8th Street to SW 26th Street at an estimated total cost of $12.6 million; and the SR 836 Eastbound and Westbound mainline widening from 107th Avenue to 97th Avenue at a total cost of $35.4 million. The final design for the 137th Avenue widening has begun; and the final design of the SR 836 widening is scheduled to begin in late FY 2024.

The start date for final design and construction for the mainline extension, multi-use recreational trail and transit stations is to be determined pending funding availability. Total cost is estimated for all projects within the Kendall Parkway program is estimated at over $1 billion.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

PART 2: 5-YEAR PROJECT LISTINGS
THREE-CENT LOCAL OPTION FUEL TAX

DRAFT

THREE-CENT LOCAL OPTION FUEL TAX

Miami-Dade County

DRAFT

INTRODUCTION

The Capital Improvement Local Option Fuel Gas Tax, authorized by Section 336.025 (1) (B), Florida Statutes became effective January 1, 1994. It was reduced from five cents to three cents on September 1, 1996. In accordance with state statute, proceeds of this tax have been programmed for transportation expenditures needed to meet the requirements of the capital improvement element of the adopted comprehensive plan.

FY 2023-24 PROJECTED MUNICIPAL DISTRIBUTION

The actual distribution to the municipalities for FY 2023-24 will be based on a weighted formula which accounts for percentage of population (statistics from the Bureau of Economic and Business Research, at the University of Florida) and the centerline mileage of municipal roadway for each incorporated area from the "2017 City/County Mileage Report" – Florida Department of Transportation prepared in the Spring of each year with data reported as of September 30, 2017. The figures contained herein were calculated using these same reports. This estimate for FY 2023-24 will be sent to the municipalities at the time the County files its official estimate with the Florida Department of Revenue in April 2024.

In FY 2023-24, the estimated net revenue for the Capital Improvement Local Option Gas Tax projected as of February 2024 is $21.524 million at 95 percent with $7.184 million to be distributed to the municipalities and $14.34 million to be distributed to the County (26 percent to the municipalities and 74 percent to the County according to the current interlocal agreements). The State of Florida is allowed to impose a 7.3 percent administrative fee. The FY 2023-24 estimates, reflects a minor increase from the current year in fuel tax revenues.

PART 2: 5-YEAR PROJECT LISTING

AVIATION ON-SITE IMPROVEMENTS

Miami-Dade County Aviation Department

Miami International Airport (MIA)

The Miami-Dade County Transportation Improvement Program includes Capital Improvements for the Miami-Dade Aviation Department for the continued development of Miami International Airport (MIA) and the General Aviation Airports (GAA) – Miami-Opa Locka Executive Airport (OPF), Miami Executive Airport (TMB), Miami Homestead General Aviation Airport (X51) & Dade-Collier Training and Transition Airport (TNT). The funding for this program is primarily from revenue generated by the Aviation Department and from Federal and State grants.

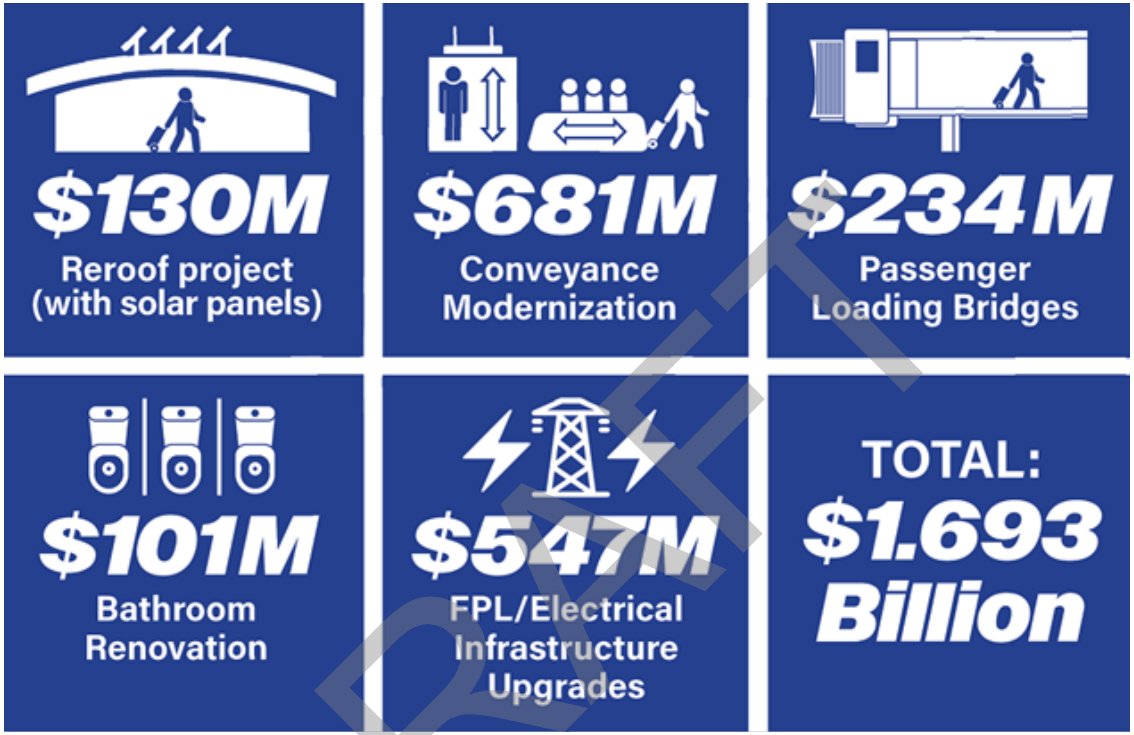
On January 18, 2024, Miami-Dade County Mayor Daniella Levine Cava addressed the County's unprecedented investment of $7 billion in capital improvements and $1.7 billion in maintenance upgrades at Miami International Airport (MIA). Mayor Levine Cava also provided an update on MIA's Concourse D Skytrain people mover system, which is scheduled for a nearly full return to service in March after it was shut down for safety repairs last September.

DRAFT



DRAFT

In addition to having another record-breaking year in passenger and cargo growth, MIA has also received a historic investment of maintenance and capital improvement funding that will transform our airport for years to come. My administration is focused on making MIA future-ready and to provide our passengers with the world-class airport experience they deserve.

Miami-Dade County Mayor Daniella Levine Cava

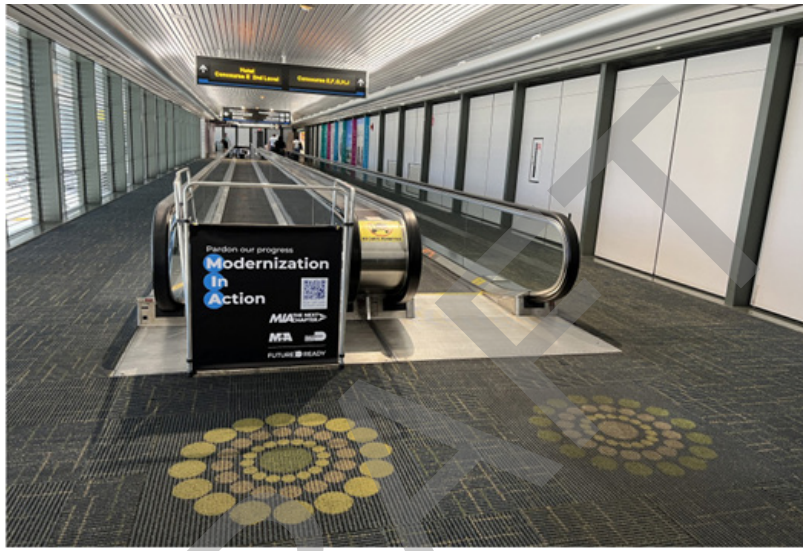
Under Mayor Levine Cava's leadership, last year Miami-Dade County's Aviation Department put in motion a Modernization in Action (M.I.A.) Plan that identifies priority areas receiving critical investments and informs the public. Below is a detailed update on key projects and other important maintenance improvements.

Conveyances: The M.I.A. Plan to upgrade elevators, escalators, and moving walkways received a boost in December when the Board of County Commissioners (BCC) approved more than $99 million in contracts that will modernize 64 of the aged units. Combined with a $582 million contract the BCC approved last July, the Plan is now fully funded to replace or renovate conveyance units at MIA in need of an upgrade. Of all the 616 units at the airport, currently, there are 53 out of service for repair or modernization, which represents 9% of all units. Under the Plan, at least 30 conveyance units are scheduled to be upgraded or replaced annually over the next five to seven years.

Escalators at MIA

DRAFT

Escalators at MIA



MIA Plan Signage

Passenger Loading Bridges: The first step a passenger takes from an airplane to the airport is onto a passenger loading bridge. MIA is improving that first impression by replacing or refurbishing all of its 126 passenger loading bridges. Installation of the first 32 has already been completed, with 10 bridges scheduled for completion every year through 2028. All future loading bridges will be glass, which provides cooler temperatures than metal and an improved visual aesthetic.

DRAFT

Restrooms: Thanks to an investment of $101 million and a new design contract approved by the BCC in December, MIA's 207 public restrooms are being renovated. A total of 33 bathrooms have already been modernized in concourses D, H, and J, and 32 more in MIA's other concourses are on schedule for renovation in 2024. The remaining 141 bathrooms pre- and post-security on all three levels are scheduled for completion during the third and final phase of the airport's restroom renovation program between 2025 and 2030.

Woman's Restroom

DRAFT

Electrical Infrastructure: To increase sustainability, a contract with Florida Power & Light Services, approved in December 2023, will bring to MIA $547 million in electrical infrastructure upgrades such as zero-emissions equipment and net-zero backup power generators. The airport is also moving forward with a $130-million project that will renovate the entire terminal roof and add solar-power-generating panels.

Skytrain: The Skytrain, built 25 years ago, was taken out of service on September 15, 2023, after a bi-annual regulatory inspection determined that cracks to three of the system's 100 concrete pier caps near its Station 1 had gone from minor to substantial since the last inspection in 2021. In an overabundance of caution for public safety, the entire system was taken out of service for additional inspection. Repairs to the area near Station 2 are currently undergoing, this will allow the system to safely return to service between Stations 2, 3 and 4 (gates D25 to D46), with only Station 1 (near D16) remaining out of service by the end of March 2024. Completion dates for repairs to the damaged area near Station 1 and the minor cracks in

other areas are yet to be determined. The estimated cost of all repairs is $4.2 million. Until the Skytrain returns to service, a courtesy trolley service and airside shuttle bus are available. Passengers who require wheelchair assistance should first contact American Airlines in advance before their flight.

In December 21, 2023 press release, Miami International Airport (MIA) has proudly achieved a remarkable milestone in its history, setting a new record for passenger volume this past weekend. This surge is in anticipation of the peak holiday travel period, which spans from December 21 through January 6.

MIA welcomed an impressive 171,371 passengers, marking the highest single-day passenger count in the airport's history. This unprecedented volume of travelers is a testament to MIA's commitment to providing exceptional service and a seamless travel experience, even during the busiest times of the year.

Major projects at Miami-Dade County's airports include phases of the following:

PROJECT NAME	DOLLARS IN MILLIONS (FUNDED)
MIA - Perimeter Road Widening Realignment & Bridge Replacement	$27.54
MIA - Terminal Wide Re-Roofing, Drains and Scuppers	$119.70
MIA - Central Terminal Phase 1 (E Thru F Connector and Cc F Infill)	$54.29
MIA - South Terminal Apron & Utilities Modification/Expansion & GSE Facility	$746.36
MIA - Employee Parking Garage	$102.95
MIA - New Fuel Storage Facility Expansion Phase 1	$39.23
MIA – Concourse D West Extension – D60 Bldg. Expansion -Design	$91.40
MIA – Concourse D West Extension – D60 Apron & Utilities - Design	$25.81
MIA - Central Base Apron and Utilities Modification and Expansion (Phase 1 & 2)	$108.48
MIA - Airport Operations Center (AOC)	$24.49
MIA - NTD Baggage Handling System Modifications to the Inline CBIS	$18.22
MIA- North and Central Terminal Passenger Boarding Bridges - Phase 1	$81.06
MIA- Central Base AOA Gate	$12.38

PART 2: 5-YEAR PROJECT LISTINGS
PORTMIAMI – MULTIMODAL SEAPORT DEVELOPMENT

DRAFT

MULTIMODAL SEAPORT DEVELOPMENT

The Dante B. Fascell Port of Miami-Dade (PORTMIAMI)

DRAFT

TRANSPORTATION IMPROVEMENT PROGRAM STRATEGY

PortMiami, one of the nation's busiest ports, contributes approximately $43 billion and more than 334,000 direct and indirect jobs annually to Florida's economy. Its sustained performance propels Miami to be recognized as the Cruise Capital of the World and Cargo Gateway of the Americas.

CRUISE

Despite the challenges posed by the Covid-19 pandemic, cruise activity at PortMiami, known as the Cruise Capital of the World, exceeded historical levels in FY 2023, setting a new world record with approximately 7.3 million passengers. In 2022-2023, the port transitioned back to cruising with over 4 million cruise passengers and continues to grow the cruise operations as demand increases.

CARGO

As Florida's busiest international port, PortMiami has handled more than one million twenty- foot equivalent units (TEU's) annually for the past nine years. The total value of inbound and outbound cargo merchandise moving via PortMiami in fiscal year 2023 was $48 billion dollars.

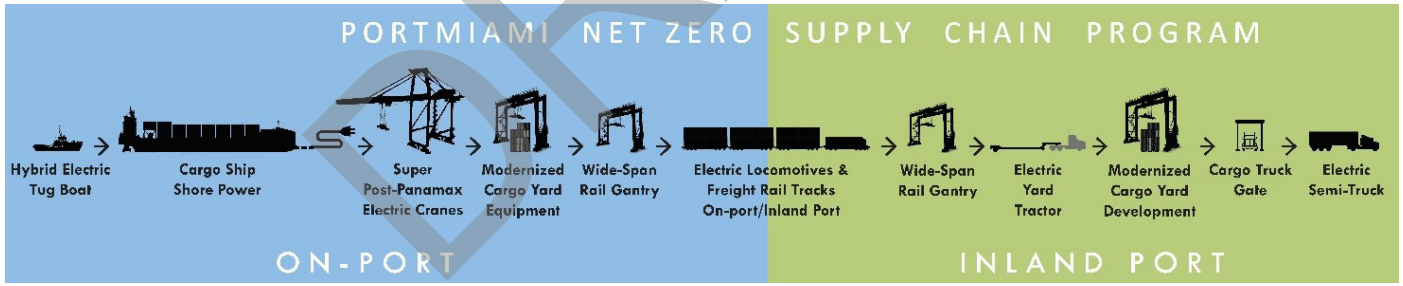
RESILIENCE AND NET ZERO

All PortMiami's projects are inherently committed to improving its robust climate adaptation, carbon mitigation, and resilience. PortMiami has adopted proactive policies that enhance its sustainability and ensure environmentally friendly port operations.

With this in mind, PortMiami has embarked on a visionary and transformational Net Zero program. This will be the nation's first end-to-end net zero carbon emission supply chain in line with the County's goal of a 25% reduction in emissions by 2030 for PortMiami, in accordance with the 2021 Miami-Dade Climate Action Strategy. The program addresses supply chain disruptions and congestion and is a significant step forward for the County's economic development goals.

The program began with electrification of key elements of the supply chain, including certain electric cargo handling equipment and all ship-to-shore gantry cranes, one stae of the art cargo security gate. In addition, PortMiami is working with our cargo partners to plan the next series of projects, which include expansion of rail infrastructure and operations, eliminating fossil fuel-burning trucks from the road, modernizing the cargo gates to minimize truck idling, stormwater, and paving improvements for cargo yard efficiencies, etc.

The Net Zero Cargo Emission Supply Chain Plan (NetZero Plan) seeks to optimize the current supply-chain system and reduce greenhouse gas emissions, all while improving operational efficiencies. A continuation of the Port's drive to sustainability, the plan follows the implementation of shore power at five cruise berths, previous conversions of diesel equipment to electric, and infrastructure investments that address sea-level rise. This plan includes an inland port that includes electric infrastructure in off-port areas that will create new jobs and have a positive economic impact within Miami-Dade County (County). The NetZero Plan contemplates additional programs to support the plan, including the development of a workforce training program with Miami Dade College to develop and train workers. The training program will focus on new technologies, additional resiliency elements such as a solar farm at the inland port, electric vehicle charging, and infrastructure improvements to key roadways and rail. infrastructure improvements to key roadways.



Infrastructure improvements to key roadways.

TRANSPORTATION

The Port's Transportation Improvement Program (TIP) is comprised of a total of approximately $2 billion in funded and unfunded projects over the next five years; and reflects the Port's aggressive strategy for optimizing land use and enhancing throughput capacity to meet the demands of the cargo and cruise industries.

DRAFT

MULTIMODAL SEAPORT DEVELOPMENT

As part of the Capital Development Program, the Port is dedicated to meet and exceed industry demands by supporting the following Capital Improvement Projects:

- Construction of Cruise Terminals and Parking Garages
- Roadway projects for new Cruise Terminals and efficient cargo movements
- Modernization of Cargo Yard Terminals
- Electric Ship-to-Shore Gantry Cranes
- Bulkhead Improvements
- Fumigation and Cold Chain Processing Facility
- Inland Ports
- FPL Substation Expansion and new duct-banks to service different projects
- Projects promoting Technological Improvements to reduce delays, emissions, and improve safety and efficiencies
- Projects promoting Sustainability and Resiliency
- Intermodal Railway Expansion
- State-of-the-Art Gates
- Yard Densification with both hybrid electrically powered rubber-tired gantries (eRTGs)
- Shorepower program

The Port continues to assertively seek grant funding from local, state, and federal sources. The TIP reflects participation from the Florida Department of Transportation (FDOT) with $32.7 million in support of roadways, cargo improvements and other infrastructure projects. This agency and the Port's partners continue to be part of the established goals to support the program and accommodate growth.

DRAFT

PORTMIAMI ACCOMPLISHMENTS

CRUISE

CRUISE TERMINAL V

PortMiami opened Cruise Terminal V on February 11, 2022, to support Virgin Voyage's growing operations. The project received LEED Gold Certification.

CRUISE TERMINAL F EXPANSION (Phase 2)

PortMiami completed Cruise Terminal F in 2022 to support Carnival Cruise Line's expanding operations. The project has achieved LEED Silver Certification.

CARGO

INFRASTRUCTURE IMPROVEMENTS – SOUTH FLORIDA CONTAINER TERMINAL (SFCT) – ERTG PHASE 1

Improved the infrastructure within South Florida Container Terminal's cargo yard to transition from diesel power cargo handlers to eRTGs. Each eRTG replaces approximately two diesel top loaders, and this first phase reduces carbon dioxide emissions by 20%.

GANTRY CRANES

PortMiami has been transitioning its 13-diesel dependent super post-panamax gantry cranes to electric for the last twenty years and is pursuing up to eight more super post-panamax gantry cranes. As part of the Port's NetZero program, the acquisition of up to 8 electric ship-to-shore gantry cranes will allow the port to handle more than 1.5M Twenty-foot equivalent unit (TEU) of containerized cargo, a 20% increase over what the port processes today, which is a key step to grow the economy and produce additional blue resilient jobs.

DRAFT

INFRASTRUCTURE (ELECTRIC)

FPL SUBSTATION EXPANSION

FPL has completed the relocation of its utilities in preparation the next phase –expanding its substation. The FPL substation expansion was completed in May of 2023.

PORTMIAMI CURRENT PROJECTS

CRUISE

CRUISE TERMINAL G

PortMiami is expanding Cruise Terminal G to support cruise line's expanding operations. The project will achieve a minimum of LEED Silver Certification, and include solar panels, a multimodal parking garage, and roadway improvements.

BERTH 10

PortMiami is developing an additional berth to supply berthing space for Cruise

Terminal AA (Shared Terminal) and introduces a resilient bulkhead system capable of addressing future sea level rise.

DRAFT

CRUISE TERMINALS A & AA ROADWAYS

PortMiami completed a roadway flyover and flyover associated roadway and stormwater improvements. The Port is currently improving additional roadways, storm, and sewer programs to continue addressing the areas and to optimize Cruise Terminal access and circulation, and minimize traffic congestion and reduce delays.

CRUISE TERMINALS AA (SHARED TERMINAL)

PortMiami has partnered with MSC Cruise Line with the design and construction of two new cruise berths, a shared "state of the art" multi-vessel Cruise Terminal, and Parking Garage Complex. The LEED Silver Certified terminal will be equipped with shore power.

SHORE POWER

As part of PortMiami's Net Zero goals the port will provide shore power to cruise terminals which will allow ships to turn off their primary engines while docked, resulting in reduced air emissions.

Phase 1 will be launched in the spring of 2024 and provides shore power capability at five terminals, with enough power for three vessels to utilize shore power at the same time.

CARGO

NETZERO CARGO PROGRAM

PortMiami is embarking on a visionary and transformational program to develop the nation's first end-to-end net zero carbon emission supply chain in line with Miami-Dade County's goal of reducing 25% of its emissions by 2030. Transformational endeavors include, but are not limited to, electric tugboats, shore power for cargo vessels, electric gantry cranes, rail expansion, improved cargo gates, cargo yard's operational efficiencies, infrastructure improvements to support both electric and hybrid electric cargo yard equipment.

As part of the program, PortMiami will construct additional rail capacity and increase the cargo gate optimization to reduce traffic congestion at the Port and lower carbon emissions.

ELECTRIC CARGO GANTRY CRANES

As PortMiami receives deeper draft vessels, the Port continues to add up to eight electric super post-panamax gantry cranes. The gantry cranes will improve productivity and support expanding operations, reduce energy costs by significantly reducing maintenance and repair.

DRAFT

INSPECTION & FUMIGATION FACILITY

The new facility will be a state-of-the-art cold chain processing and fumigation center that will provide a more efficient inspection, cold chain processing, and phytosanitary services for the Port's perishable goods. The facility will become the port's central location to serve various markets and reduce truck travel times and traffic accidents.

CARGO YARD TERMINAL EQUIPMENT & RTGs

As part of the NetZero Program, upgrade of cargo yard equipment, including hybrid RTG , to lower emissions

INFRASTRUCTURE

INFRASTRUCTURE IMPROVEMENTS - CRUISE CAMPUS

Infrastructure improvements including, but not limited to, road work, stormwater, landscape, and other emission-reduction projects, electric vehicle (EV) charging stations, solar panels, and relocations for future buildings.

INFRASTRUCTURE IMPROVEMENTS - PASSENGER BOARDING BRIDGES (PBBS)

PortMiami is purchasing passenger boarding bridges for various terminals in response to new cruise terminal construction, increased demand, and north bulkhead rehabilitation project.

INFRASTRUCTURE IMPROVEMENTS - CONTAINER YARD (SEABOARD)

Provide drainage improvements and various other resiliency improvements in Seaboard's container yard area. The projects will increase capacity, modernize the cargo gate, improve cargo yard pavement to handle hybrid electric cargo handling equipment, LED high mast lighting retrofits, and electric reefer racks for refrigerated cargo.

INFRASTRUCTURE IMPROVEMENTS - CONTAINER YARD (POMTOC)

Provide drainage improvements and various other improvements in the container yard area to increase capacity, and improve stormwater management, modernize cargo yard operations, security gates, charging stations, and similar NetZero projects.

INFRASTRUCTURE IMPROVMENTS – SOUTH FLORIDA CONTAINER TERMINAL (SFCT) - PHASE 2

PortMiami and SFCT have partnered to continue to improve the drainage in the SFCT's cargo yard, construct infrastructure improvements to support electric Rubber Tired Gantry Cranes (eRTGs) and construct a parking garage which in turn increases capacity with the cargo yard. This continued effort addresses sea level rise and meets the port's Net Zero goals by replacing diesel toploaders with 12 eRTGs that has reduced emissions in 2023.

DRAFT

INFRASTRUCTURE IMPROVEMENTS – PORTWIDE SECURITY ENHANCEMENTS

Purchase marine vessels for the Harbor patrol Unit of the Miami-Dade Police Department to provide Security Zone enforcement for cruise ships, new Command, Control, and Communications (C3) facility, and other security enhancements.

INFRASTRUCTURE IMPROVEMENTS - NORTH BULKHEAD REHABILITATION

PortMiami will rehabilitate six bulkheads along cruise berths over six years to add at least 75 years of life to the Port, improve resiliency, and raise the bulkhead in preparation for sea level rise. Other projects include shore power, water upgrades, fenders, and mooring improvements. This infrastructure project is seeking Envision Certification.

INFRASTRUCTURE IMPROVEMENTS – SOUTH BULKHEAD REHABILITATION

PortMiami is providing repairs and improvements to the Port's south bulkhead.

INFRASTRUCTURE IMPROVEMENTS - FEDERAL INSPECTION FACILITY (FIF)

PortMiami is planning to build a new facility for US Custom Border Patrol (CBP). As a national port of entry, PortMiami is required to fund the federal facilities that house the inspections, including contraband, of pulled imported cargo to ensure safe and secure cargo delivery to the community and nation, all while minimizing disruptions to the supply chain. This investment directly supports the local and national economies and helps ensure the safety and security for the residents of Miami Dade County.

INFRASTRUCTURE IMPROVEMENTS - WATER & SEWER UPGRADES

Upgrade the Port's water and sewer system for new services that improve the seaport's resiliency. To maintain or resume operations following a storm event it is critical that all Port asset types maintain their functional services. This Project will provide necessary road and stormwater improvements to reinforce the resiliency of a critical at-risk coastal infrastructure so that operations can continue considering climate change and sea level rise.

INFRASTRUCTURE IMPROVEMENTS - PORTWIDE

PortMiami is undergoing infrastructure improvements in various areas of the port. Portwide infrastructure improvements include beautification, drainage, dredging, road improvements, photovoltaics, generators, batteries, electric connectivity & charging stations, BMS upgrades, wayfinding, landscape, lighting, HVAC, sidewalks, etc. Additionally, the Port is partnering with the United States Army Corp of Engineers (US ACE) on the Miami Harbor Channel Improvement Feasibility Study. The upgrades promote innovative technology that increases safety and operational efficiencies, improves energy efficiency, cost savings, and resiliency.

DRAFT

INFRASTRUCTURE IMPROVEMENTS – VARIOUS FACILITY MOVES

PortMiami is overseeing the movement of customer warehouses and/or other facilities, as determined.

INFRASTRUCTURE IMPROVEMENTS – CTJ SEAWALL

PortMiami is continuing to replace bulkheads, expected to add at least 30 years of life to the Port, to address upkeep, address sea level rise, and improve resiliency.

INFRASTRUCTURE IMPROVEMENTS – BERTH REDEVELOPMENT (BAYS 165-177 AND 148-150)

PortMiami is improving the bulkheads along part of Seaboard Marine's cargo yards to address sea level rise and improve PortMiami's resiliency. The Port's infrastructure will be strengthened, and the berthing capacities increased by fixing the grade elevation, providing stormwater improvements, strengthening the wharf, and removing two existing roll-/roll-off ramps, which increase the overall linear length of the berth to allow multiple ships.

INFRASTRUCTURE IMPROVEMENTS – CHANNEL MODIFICATIONS

PortMiami is undergoing a safety and navigation improvements program with the US Army Corps of Engineers.

INFRASTRUCTURE IMPROVEMENTS – INLAND PORT LOGISTICS SUPPORT YARD

PortMiami is undergoing an Inland Port development of the container storage and transfer staging areas, including truck parking, workforce training center, solar farm, security gates, sustainable infrastructure for eRTGs, charging stations, reefer racks, etc.

INFRASTRUCTURE IMPROVEMENTS – NORTH CRUISE BOULEVARD EXTENSION

Extend and improve North Cruise Boulevard and ancillary roadways for added operations, including stormwater improvements.

PORTWIDE TRANSPORTATION MASTER PLAN

PortMiami is overseeing a near- and long-term traffic impact study and conceptual roadway plans to meet the current and future transportation demands.

INFRASTRUCTURE IMPROVEMENTS – CARGO GATE MODIFICATIONS

Purchase and install security systems for new gateway, as required

INFRASTRUCTURE IMPROVEMENTS – ROADWAY REALIGNMENT

Implementation of projects based on the PortMiami Transportation Master Plan to improve connectivity and congestion for cargo and cruise operations.

DRAFT

INFRASTRUCTURE COMPLIANCE

Rehabilitation, upgrades, and various infrastructure improvements, and berths and shoreline improvements throughout the seaport

OFF-DOCK LOGISTICS YARD RAIL EXTENSION – AIRPORT WEST

Expand railroad track along US27 to connect to the Inland Port and Logistics Center. The Rail Extension project will provide rail connection from the existing rail line in west Miami-Dade County to the future inland port and waste to energy facility at Airport West. The shift to rail will reduce truck traffic and emissions throughout the County.

NEW PARKING GARAGES

Parking garages for both cargo and cruise operations

PORT OPERATIONS AND ADMINISTRATION

New PortMiami Administrations and Operations Facility; includes police, safety, and security headquarters

PORTMIAMI FUTURE PROJECTS

INLAND PORT DEVELOPMENT

As part of the Net Zero program, an inland port will increase Port Miami's cargo capacity and volume, leading to new business opportunities and access to the burgeoning Orlando and Tampa markets. Preliminary estimates indicate that a new inland port could provide approximately 50% increase in container volume annually, increasing Miami Dade County's economic competitiveness at various scales. The program will include a variety of projects, including a solar farm over the CBP Inspection Facility truck parking, export consolidation, electric trucking, eRTGs, rail shuttles, etc.

FEDBRIGHTLINE TRAIN STATION

Build a train station for passengers and employees at a location that reduces congestion and emissions by optimizing access to terminals and employment destinations.

CRUISE TERMINAL K

Design and construct a new cruise terminal to support expanding operations.

WALKABILITY PLAN – SIDEWALKS & TREE CANOPY INSTALLATION

The Port's Walkability Plan project focuses on enhancing infrastructure and promoting pedestrian-friendly environments that provide safe, covered, and efficient mobility options for the millions of cruise passengers that visit the Cruise Capital of the World annually. The project involves comprehensive

DRAFT

urban planning, sidewalk enhancements, tree canopies, crosswalk installations, and traffic calming measures that will also help address the dangers of extreme heat. These improvements will provide enhancements to the passenger experience and provide a competitive advantage.

PORTWIDE UTILITIES MASTER PLANNING & IMPLEMENTATION

Stormwater master Plan, and Decarbonization and Electrification Master Plan; Implement projects to reduce emissions through electrification and stormwater management projects throughout all seaport operations for a more resilient PortMiami.

HYBRID TUGBOATS

As part of the NetZero Program introduce hybrid harbor tugboats to the seaport's end-to-end services.

SHORE POWER

Phase 2

Further investments in the Port's shorepower infrastructure will provide an immediate reduction in greenhouse gas emmisions at the Port. GOB funding will support the purchase of 2 additional electrical feeders for dedicated shore power to five terminals, instead of sharing 3 electrical feeders amongst the 5 terminals. The implementation of a battery storage system will help address peak electrical demand needs and help support the Seaport's NetZero initiative by storing excess energy during non-demand periods when shore power is not in use at any of the five terminals and relaying it during peak hours for the various needs across the cruise, cargo, and administrative programs. The backup power can also act as a reliable source of backup power during grid outages.

Phase 3

The Shore Power Phase 3 project will provide electrical power to additional cruise berths and introduce shore power to certain cargo berths, further reducing greenhouse gas emissions County-wide. The project will also fund the required new transmission lines and a substation in coordination with FPL.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

PART 2: 5-YEAR PROJECT LISTINGS
COUNTY TRANSPORTATION SYSTEM AND MAJOR PROJECTS

DRAFT

COUNTY TRANSPORTATION SYSTEM AND MAJOR PROJECTS

Miami-Dade County Department of Transportation and Public Works (DTPW)

DRAFT

This section of the TIP focuses on Major Projects from Miami-Dade's Department of Transportation and Public Works (DTPW). The DTPW's goal is to enhance the quality of life of Miami-Dade County residents, businesses, and visitors by providing high-quality, safe, clean, efficient, and connected public transportation infrastructure services.

SHIFT305 is an initiative to revitalize Miami-Dade's Transportation System by 2025 which encompasses four objectives:

CLEAN **EFFICIENT** **SAFE** **CONNECTED**

The projects listed are the tactical execution of the SHIFT 305 strategy and include improvements to highways, transit, and bicycle/pedestrian modes over the next five fiscal years.

The DTPW section provides an overview of the following topics:

- Funding Overview
- Smart Program
- Better Bus Network
- Terminals & Park-and-Rides
- Metrorail & Metromover
- Transit Maintenance and Modernization
- Pedestrian & Bicycle
- Safety & Vision Zero
- Major Highway and Bridge Improvement Projects
- Neighborhood Improvement Projects

FUNDING OVERVIEW

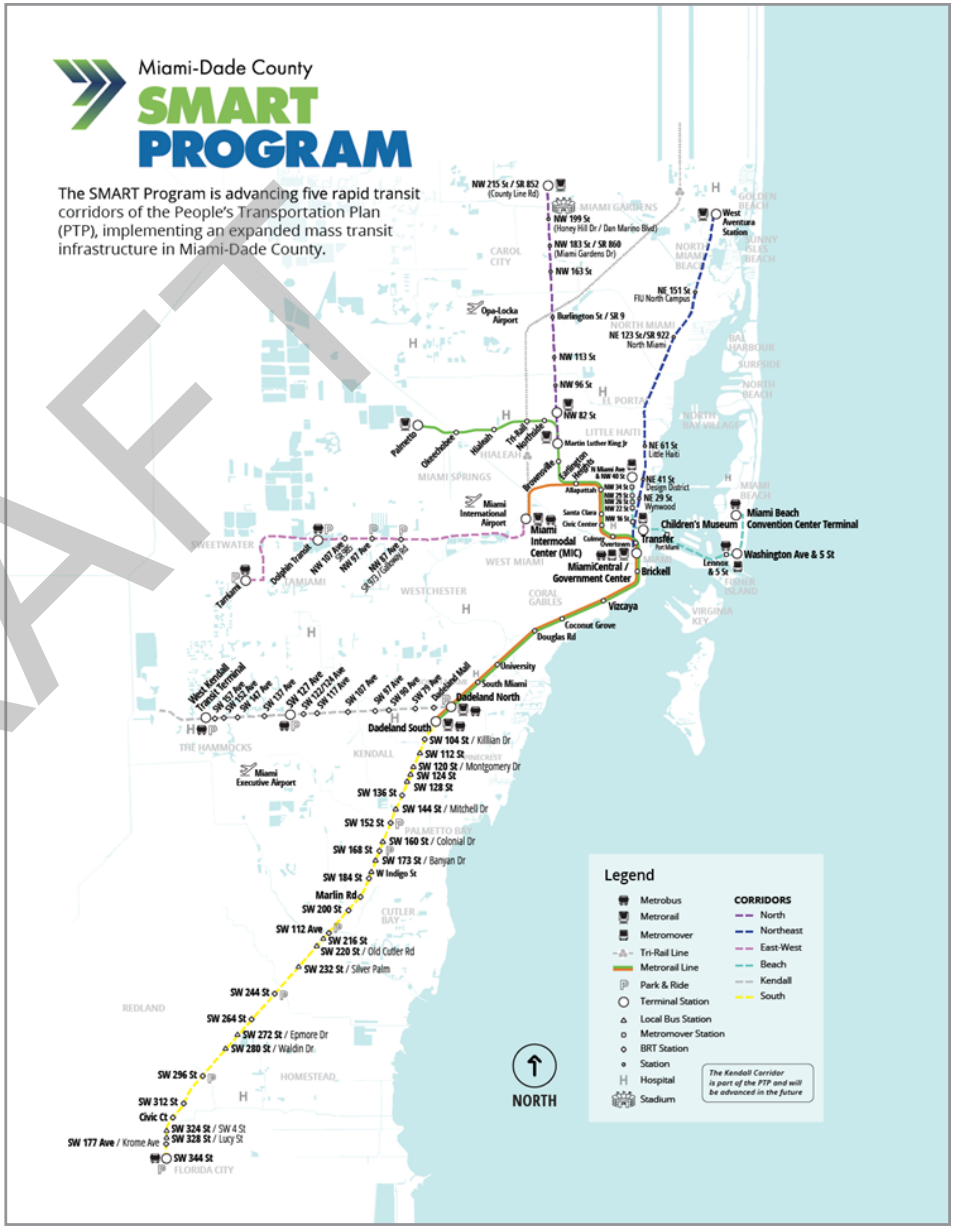
DTPW uses a mix of funding sources to plan for, construct and maintain transportation projects, including but not limited to:

- Local General Funds
- Secondary Gas Tax (SGT)
- Roadway Impact Fees (RIF)/Mobility Fee (MF)
- People's Transportation Plan (PTP)
- Federal and State Grants
- Private Sector
- Municipal Partners

SMART PROGRAM

The SMART Program is an infrastructure investment program of projects developed to improve transportation mobility and create a transit system that will support economic growth and competitiveness in the global arena. The program advances six rapid transit corridors of the PTP to create an expanded mass transit network in Miami-Dade County. It is the implementation of a vision for our region that is both strategic and far-reaching, creating a system of multiple transportation options by leveraging existing infrastructure and integrating technology at the highest levels. The implementation of the SMART Program increases opportunities for transit-oriented development projects along corridors, expands a network of premium transit to connect to more key destinations, improves reliability and on-time performance, creates more job opportunities in the transit industry, and increase the availability of real-time arrival and departure information at transit stations. The program is comprehensive, proactive and supports the future population and employment growth anticipated in our region with the implementation of the following corridors.

- Beach Corridor: Highest tourist demand in the region with major employment centers.
- East-West Corridor: Heaviest commuter travel for international, state, and local businesses.
- Kendall Corridor: One of the most congested arterial roadways with the highest demand.
- North Corridor: Key regional mobility linkage for access to jobs, the stadium, and educational facilities.
- Northeast Corridor: High transit demand and part of a critical regional corridor stretching to Palm Beach County.
- South Corridor: Experiencing the fastest population growth in Miami-Dade County.



DRAFT

BEACH CORRIDOR

The Beach Corridor project will serve the cities of Miami and Miami Beach along a 9.7-mile corridor, crossing Biscayne Bay to link Downtown Miami to Miami Beach. The Beach Corridor area is an epicenter for population and economic growth and a major employment center and tourist destination in the region and connects the Miami Design District to the Miami Beach Convention Center. As a result, the roadways between Miami and Miami Beach are typically heavily congested. This high bus transit ridership corridor has been identified as a candidate for consideration for premium transit over the past two decades as part of a strategy to address east-west directional travel demands. The envisioned project entails extensions of the Metromover system and dedicated bus lanes on Washington Avenue in Miami Beach.

In May 2017, DTPW initiated a Project Development & Environment (PD&E) Study to evaluate proposed transportation solutions between Downtown Miami and the City of Miami Beach via I-395 and I-195. In January 2020, the Miami-Dade TPO selected elevated automated rail transit for the Trunk Line, automated people mover for the Midtown/Design District and Bus/Trolley in dedicated lanes on Miami Beach as the locally preferred alternative (LPA), as recommended by the PD&E. The project received an Environmental Assessment (EA) as the National Environmental Policy Act (NEPA) Class of Action (COA) for the Beach Corridor Trunkline from the United States Coast Guard (USCG) and published the Draft EA document for public review and comment in Summer 2022.

Negotiations to develop and maintain a monorail system for the Beach Corridor Trunk Line ended in November of 2022 without an agreement due to significant increases in the project cost during the negotiating period. DTPW is working to advertise, evaluate, and negotiate a new solution for the Trunk Line project with the County's preference being a seamless extension of the existing Metromover system.

DRAFT

Along a 9.7-mile corridor, crossing Biscayne Bay linking Downtown Miami to Miami Beach		STRATEGIC TARGETS
Various premium transit modes	Project Development, NEPA for Trunk Line	

EAST-WEST CORRIDOR

The East-West Corridor project will run approximately 14 miles from the Miami Intermodal Center (MIC) at Miami International Airport (MIA), west along the SR-836/ Dolphin Expressway, to the Tamiami Terminal Station and Park and Ride facility at SW 8 Street and SW 147 Avenue. It provides multimodal solutions for severe traffic congestion along SR-836, the only east-west expressway in central Miami-Dade County. The intention is to connect southwestern residential areas with major activity centers including MIA, MIC, and Downtown Miami and major employment areas (Sweetwater, Doral, Health District, Central Business District, Brickell, etc.).

In April 2017, DTPW initiated a PD&E study to evaluate proposed transportation solutions along the SR836/Dolphin Expressway corridor. On October 22, 2020, the TPO Governing Board selected the LPA as BRT. The LPA includes BRT routes operating within dedicated transit-only lanes, including reversible transit-only lanes along SW 8th Street from the Tamiami Terminal to SW 137th Avenue and along SW 137th Avenue to the SR 836 Extension. Further east, the BRT routes would use dedicated lanes on the inside shoulders of SR 836 on route to the MIC and Downtown Miami. The East-West BRT routes would be in addition to and complement the SR836 Express Services which already began operating in the Corridor in early 2020. In August 2021, the County submitted a letter to the FTA requesting entry into the Project Development (PD) phase under the FTA Capital Investment Grants Small Starts program for the East-West Corridor Rapid Transit Phase One Project was granted entry into the program by FTA on October 26, 2021. DTPW is working closely with the FTA on the BRT LPA for the corridor while considering alternative modes and alignments as directed by the TPO board.

DRAFT

TPO Governing Board took action on January 25, 2024, and unanimously approved the DTPW to re-evaluate the project. The Department continues to coordinate with stakeholders and the Federal Transit Administration (FTA).

BRT or Commuter Rail

Project Development

STRATEGIC TARGETS

KENDALL CORRIDOR

The Kendall Corridor consists of implementing a premium transit service along SR 94/ Kendall Drive/SW 88 Street. The project also considers a connection with another segment running along SR 874 and SR 878 from Kendall Drive to the Dadeland North Metrorail Station, and potentially north along the HEFT from Kendall Drive to FIU (at the proposed Panther Station) and/or to the proposed Dolphin Station (at SR 836). In November 2019, Curbside Business Access Transit (BAT) Lane was identified as the recommended alternative for the Kendall Corridor. In March 2022, a joint-agency recommendation by the FDOT and DTPW to place the Kendall PD&E study on hold was approved by the TPO Governing Board. The Kendall Corridor PD&E study will remain on hold until the outcome of the Flagler Demonstration Project is assessed. The data collected from the Flagler Demonstration Project will inform the study team on an effective multi-modal transportation solution to improve transit along the Kendall Corridor.

FDOT PD&E on Hold

STRATEGIC TARGETS

DRAFT

NORTH CORRIDOR

The North Corridor is part of the Southeast Florida Region which includes Palm Beach and Broward Counties. The North Corridor is a 10-mile-long corridor along NW 27th Avenue, from NW 62nd Street/Dr. Martin Luther Kind, Jr. Metrorail Station to NW 215th Avenue. The Project consists of implementing a premium transit service Heavy Rail Transit (Metrorail) along NW 27 Avenue. The envisioned transit corridor will include public on-street transit stations located along a dedicated running way. These stations can include public or private facilities located adjacent to the corridor where potential park-and-ride or transit terminals will be considered. In October 2019, the Miami-Dade TPO selected elevated heavy rail transit as the locally preferred alternative for the North Corridor. On November 15, 2022, the Board of County Commissioners (BCC) passed a motion to terminate the development of the DTPW's RFP and to accelerate the implementation of the North Corridor as an elevated fixed guideway. In May 2023, FDOT and DTPW collaborated to conduct a Value Engineering (VE) Workshop to identify the best and most cost-effective methods of implementing the project. Results of the VE Workshop were formalized in a final VE Report which was completed October 2023. Currently FDOT is in the process of restarting the North Corridor PD&E with a notice to proceed (NTP) scheduled in early 2024.

STRATEGIC TARGETS

DRAFT

NORTHEAST CORRIDOR

The Northeast Corridor is roughly defined as U.S. Route 1 from the Downtown Miami area to the Aventura Mall near the Miami-Dade/Broward County line and is one of the busiest transit corridors in the region. It extends approximately 13.5 miles through the historic core of the County developed along the FEC railroad with five stops along the corridor, linking Aventura, North Miami Beach, North Miami, Little Haiti, Design District and Wynwood with the County's Central Business District located in Downtown Miami. Regional passenger rail service to the West Aventura Station, which began in December 2022, is considered the first phase of the Northeast Corridor. The project will implement a commuter rail service running within the existing Florida East Coast railway.

In June 2020, the County began its effort in advancing the implementation of the Northeast Corridor. In March 2021, the TPO Governing Board adopted commuter/passenger rail as the LPA for the Northeast Corridor. In August 2021, the County requested entry into the Project Development (PD) phase under the FTA Capital Investment Grants New Starts program. The project was accepted into the PD phase by FTA on October 26, 2021. The project received approval of the Categorical Exclusion (CE) in November 2023, completing the necessary steps under the National Environmental Policy Act (NEPA) for the planning and environmental phase of the project. The commuter rail service plan is 30-minute peak headway and 60-minute off-peak headway for both directions during weekdays and 60-minute headway during weekends. DTPW is currently working on advancing into the Engineering phase of the New Starts program.

FTA Review & NEPA

STRATEGIC TARGETS

DRAFT

SOUTH CORRIDOR

The project will run along the existing South Dade Transitway (formerly known as Busway), from the Dadeland South Metrorail station to the SW 344th Street Park-and Ride/Transit Terminal Facility. It will connect Florida City, City of Homestead, Town of Cutler Bay, Village of Palmetto Bay, and Village of Pinecrest, which represent the fastest population growth in Miami-Dade County. This project facilitates the highest demand movement of passengers to and from southern Miami-Dade to Downtown Miami, improving travel times and safety, while enhancing station platforms and increasing accessibility.

DTPW initiated a PD&E study to evaluate premium transit solutions in this corridor in April 2017. The TPO Governing Board selected the LPA on August 30, 2018, as BRT. The project was advertised on June 7, 2019, and Notice to Proceed (NTP) to the Design-Build Firm was issued on February 2, 2021. The estimated total project capital cost is $300 million. Miami Dade County and FDOT have both committed $100 million each to fund design and construction, while the project team successfully secured $100 million from the FTA Small Starts Grant program. The project is currently under construction.

Once completed, BRT will provide rail-like travel time, iconic stations, level boarding through all doors, and pre-paid fares for speedy access. BRT will also provide enhanced safety features and other upgrades along dedicated lanes with multilayered service lines on the Transitway Station along the existing Transitway (formerly known as Busway) to the SW 344th Street Park-and-Ride/Transit Terminal Facility. It will connect Florida City, City of Homestead, Town of Cutler Bay, Village of Palmetto Bay, and Village of Pinecrest, which represent the fastest population growth in Miami-Dade County. This project facilitates the highest demand movement of passengers to and from southern Miami-Dade to Downtown Miami. Project Completion is anticipated by Summer 2024.

STRATEGIC TARGETS

DRAFT

FLAGLER CORRIDOR

The Flagler Corridor consists of implementing a rapid transit service along SR 968/Flagler Street. This includes multimodal street improvements to accommodate rapid transit service along Flagler Street. On January 28, 2021, the Miami-Dade TPO selected Curbside Bus Access Transit (BAT) Lanes as the recommended alternative with the exception that the PD&E study shall not consider the reduction of vehicular traffic lanes for any portion of Flagler Street west of NW 24 Avenue. On March 3, 2022, the TPO adopted a resolution to place the Flagler PD&E study on hold to implement a Flagler Street SMART Demonstration Project. On April 2023, the TPO adopted a resolution to remove the exception that said study shall not consider the reduction of vehicular traffic lanes for any portion of Flagler Street west of West 24th Avenue to allow FDOT to continue with the study of the recommended alternative. On November 28, 2023, the project restarted, however on January 25, 2024, the TPO unanimously passed a resolution requesting FDOT to pause the study and evaluate an elevated rail option from Downtown Miami to Florida International University.

Bus Access Lanes (BAT)

FDOT PD&E on Hold

STRATEGIC TARGETS

FLAGLER DEMONSTRATION PROJECT

The Flagler Demonstration Project will implement Business Access Transit (BAT) Lanes along a portion of the Flagler Corridor. The project consists of implementing BAT lanes by repurposing an existing travel lane along SR 968 Flagler Street (westbound) and SW 1 Street (eastbound) between SW 27 Avenue and SW 6 Avenue. As part of the Flagler Demonstration Project, traffic analysis, monitoring plan and design plans for implementation of dedicated transit lane will be developed. FDOT will conduct before and after studies to evaluate the performance of the implementation of the curbside of the BAT lanes. The data collected will allow FDOT, the TPO and DTPW to jointly evaluate and determine the feasibility of a dedicated curbside rapid transit lane concept throughout the corridor.

Bus Access Lanes (BAT)

Design Phase

STRATEGIC TARGETS

METROBUS SYSTEM

The Better Bus Network (BBN) launched in 2023 creating a new foundation of a high-frequent bus network connecting more people to more places more quickly. Phase I was deployed in July 2023, bringing upgrades to three high-frequency corridors, and the final Phase II was deployed in November 2023, adding the additional improvements recommended in the plan approved in 2021. The redesigned bus network for Miami-Dade County was based on community input and a vetted through a data-driven process. The new network is designed to be more useful for more people by increasing frequent service, creating easier connections, and improving evening and weekend bus service. For example, the new network improved the number of high-frequency routes in the County that arrive every 15 minutes or less throughout the day from five to nineteen, allowing people to reach more places more quickly.

Since implementation, staff have reviewed public feedback and performance metrics to make further improvements to the network. These changes will be reflected in the April service change and staff will continue to monitor and make adjustments at every opportunity.

Additionally, staff continue to engage with those communities most impacted by the network changes and work with municipal staff to adjust their trolley service to better complement the new network. DTPW enhanced mobility even further through an uber voucher program intended to bridge the mobility gap for those along discontinued routes and will continue to review and consider all types of mobility solutions that are appropriate to the demand in different areas.

DTPW is currently working with municipalities to realign their service with the new network and continues to engage with communities to educate of the changes and listen to concerns.

BUS PASSENGER AMENITIES PROGRAM

The Bus Passenger Amenities Program is part of the department's strategic vision to operate and grow a safer, cleaner, quicker, and more connected transit system. The program consists of the installation of new bus passenger amenities, new trash containers, new bicycle racks, improved pedestrian accessibility to and from bus passenger amenities, and a complete renovation of the existing bus passenger amenities inventory installed within Miami-Dade County's Metrobus service area. The program will ensure that all bus passenger amenities, either new or existing ones, trash containers and bicycle racks are well maintained, safe, clean, well illuminated, and have an attractive appearance. As of February 2024, 354 bus shelters, 354 trash containers, 330 new bus shelter illuminations systems and 740 bicycle racks have been installed. These new transit amenities and accessibility improvements will be completed by summer of 2024.

Shelter Types

Cantilever shelter

Installation will be on sidewalks with 5 or 6 feet of right of way

TERMINALS & HUBS AND TERMINALS

AVENTURA STATION

In an effort to advance the implementation of the SMART Program Northeast Corridor, Miami-Dade County Commissioners approved an agreement with Brightline Trains Florida, LLC to provide highspeed rail service between the Aventura Mall and the company's downtown train station. The County approved $76.7 million toward the recently completed project, which runs high-speed trains utilizing the Florida East Coast (FEC) rail corridor. The County owns the land for the new Aventura Station, while Brightline is responsible for all operation and maintenance costs. The Aventura Station project includes an 860-foot platform located inside the FEC Railway/Brightline right-of-way and the construction of a new pedestrian bridge over the railroad right-of-way and Biscayne Boulevard. The station also includes a Park-and-Ride facility with 240 parking spaces, a bus drop-off/pick-up for Miami-Dade Transit passengers, and newly landscaped and hardscape areas. The project also features a platform design that can accommodate Tri-Rail or other commuter trains in the future. Construction of the Aventura Station was completed December 2022. Completion of the pedestrian bridge over Biscayne Boulevard which will connect the station circulation to the Aventura mall bus depot and amenities is underway with expected completion by December 2024.

DRAFT

METRORAIL & METROMOVER

DTPW is actively working to upgrade the Metrorail, a 25-mile dual track system that provides service to Miami International Airport (MIA) and runs from Kendall through South Miami, Coral Gables, and Downtown Miami; to the Civic Center/Jackson Memorial Hospital area; and to Brownsville, Liberty City, Hialeah, and Medley in northwest Miami-Dade, as well as upgrade the Metromover, a free elevated people mover system that operates seven days a week in the Downtown Miami, Omni, and Brickell areas.

METRORAIL ACOUSTICAL BARRIER REPLACEMENT

The Metrorail Acoustical Barrier Replacement Program consists of the installation of acoustical barriers with associated hardware along the Metrorail system where Type "B" concrete barriers have been removed. The new barriers are intended to abate sound/noise produced by passing trains avoiding its propagation to adjacent properties. In 2019, DTPW launched a three-phase acoustical barrier replacement program. Currently, Phases One and Two have been completed. The first two phases of the program involved the removal of Type B barrier. On January 4, 2021, DTPW entered Phase Three of the program which entails the replacement of the acoustical barriers in the areas where the Type "B" panels were removed. Currently, the program is well underway, at about 98% of the installation completed. It is estimated to be completed in August 2025.

Improvements Across Most of Metrorail System

Rapid Transit Improvement

Construction Phase

STRATEGIC TARGETS

METROMOVER WAYSIDE SYSTEM OVERHAUL

Metromover is an automated people mover system that was designed and installed by Bombardier Transportation and began passenger service in April 1986. The Metromover system is comprised of 21 stations, 4.4 miles of dual lane guideway, 25 guideway switches, 29 vehicles and a central control facility located at the Government Center. Throughout Metromover's 32-year history, the system has expanded, and vehicle fleet has been replaced, however, many major subsystems that make up the system have not been replaced or refurbished and have now reached the end of their design life. These subsystems include the Automatic Train Control (ATC) System, Data Transmission System (DTS) with Supervisory Control and Data Acquisition (SCADA), several Power Distribution System (PDS) elements (e.g., low voltage breakers, protective relays, ground switches, etc.), guideway switch equipment and the central control equipment. To maintain good equipment reliability and an overall high Metromover system service availability, these major subsystems need to be replaced or refurbished. The comprehensive wayside overhaul will include the design, supply manufacture, installation, testing and commissioning of the system into a fully functional, safe, and reliable Metromover system. Project anticipated completion is May 2025. The design is 99% complete and construction has begun.

Improvements Across Most of Metrorail System

Rapid Transit Improvement

Construction Phase

STRATEGIC TARGETS

DRAFT

TRANSIT MAINTENANCE AND MODERNIZATION

Regular maintenance and upgrades to the transit infrastructure not only improve the passenger experience, but also help to reduce delays and breakdowns, which can have a significant impact on the overall efficiency of the system. Additionally, modernization efforts, such as the introduction of new technologies and the use of cleaner and more sustainable energy sources, can help to improve the environmental impact of transit. These improvements have become more critical with the implementation of the BBN as the need for transfers has increased. Key transfer locations within the County have been identified so enhanced facilities can be implemented to east these transfers. For example, DTPW modernization efforts include:

- Electric signage at Metrorail and Metromover stations
- Parking space counters at Metrorail parking garages

SOUTH DADE BUS MAINTENANCE FACILITY

With the implementation of the SMART Program, the County inventoried the availability of garages located within the south Miami-Dade area of the County for bus maintenance facilities and determined that the closest maintenance facility to the South Miami-Dade area is the Coral Way facility, which has reached its capacity and is approximately 30-miles away from the southern county line of Miami-Dade. A new facility in this area is necessary. This new maintenance facility will improve Transit's operational efficiency by decreasing the turnaround time for placing buses back in revenue service. A county owned site with good access was identified at the NW Quadrant of Biscayne Drive and SW 127th Avenue. The Project was advertised on September 28, 2023, to procure a Contractor for the construction of the Facility. The Bid Opening took place on December 20, 2023. The Project continues to be in the Cone of Silence. Award of the Contract is scheduled for April 2, 2024. Notice to Proceed to the Contractor will follow once all the contractual documents are finalized.

Transit Modernization	NEPA & Design Phase	

ADDITIONAL ELEVATORS AT DADELAND NORTH METRORAIL STATION PARKING GARAGE

Since its completion in 1984, the Dadeland North Metrorail Station's use has increased dramatically through the years. Because of increasing ridership at the Dadeland North Metrorail Station, the existing bank of elevators (four elevators) does not provide an acceptable level of service during peak hours. Peak passenger flows create congestion and long waiting periods for Metrorail passengers waiting for the elevators, generating complaints from existing customers. DTPW is adding two elevators to the existing parking facility. The two proposed (new) elevators will be built at the Northern end of the existing Parking Garage. DTPW is currently in the Design-Builder selection process for design-build services. As of February 2023, the Final Acceptance is scheduled for April 2026.

DRAFT

Proposed 11-story building to house two proposed elevators at the North end of the existing Dadeland North Metrorail Station Parking Garage

Station Modernization

Procurement Phase to Select Design-Build Firm

STRATEGIC TARGETS

BUS NEW VEHICLE REPLACEMENT

DTPW continues to implement its bus replacement program. Funding for this program is provided through various sources including PTP, FDOT and Federal funding sources. The DTPW bus fleet is continuously aging; therefore, an aggressive bus replacement plan is in place to ensure compliance with FTA's bus retirement criteria. After examining various alternative fuels, DTPW decided to migrate its bus fleet to clean-burning, compressed natural gas (CNG). The purchase of alternative fuel buses for replacements and enhancements is not only an improvement to transit, but also promotes the county's long-term initiative towards a state of good repair, economic competitiveness, livability, sustainability, safety, job creation, and economic stimulus.

In addition to CNG, a total of 69 Proterra 40' Electric Buses have been delivered and assigned for services to date. These vehicles are the first of their kind in Miami-Dade County's Metrobus Fleet and complement the ongoing modernization of the fleet. In January 2023, DTPW procured 100 articulated 60-foot Battery Electric zero-emission buses and furnishing 50 Charging Systems for depot-based charging. Two pilot buses are estimated to be delivered by March 2024, Sixty (60) Production Buses delivery between August 2024 and March 2025, and balance of Buses delivery by August 2025.

Procurement Phase

Transit Modernization

STRATEGIC TARGETS

DRAFT

PEDESTRIAN & BICYCLE

THE UNDERLINE

The Underline is a 10-mile mobility corridor from Brickell to the Dadeland South Metrorail station that repurposes existing underutilized industrial space under the existing Miami-Dade County Metrorail, which is the most widely used regional transit heavy rail system. The project increases connectivity to eight Metrorail stations and bus terminals, allowing for increased ridership and increased safety. As a multi-modal corridor, this project will help to connect individual streets and neighborhoods. The Underline will serve as the first and last mile connections to 24 schools, one (1) university, two (2) hospitals, three (3) urgent care facilities, four (4) major malls and over 250,000 residents within ¼ mile. The project includes transportation and non-transportation components. The Underline is building separate bicycle and pedestrian paths as well as improving 34 intersections along US-1. DTPW and FDOT are working together in the coordination of intersection improvements. It encourages active transportation and a healthier lifestyle by promoting mass transit, walking, and biking, and reducing US-1 traffic by five percent. It will serve as the spine for a future network of 180 miles of county and city trails and as the spine for the 22-mile Miami Loop. The project was originally planned with nine segments for development, and it is getting built in three phases. As of February 2024, the estimated completion date for Phase 2 is Spring 2024, and Phase 3 is Summer 2026.

From the southern bank of the Miami River to the northern curb of Dadeland Blvd

Multimodal Urban Trail

Phase II Under Construction

STRATEGIC TARGETS

DRAFT

The Underline Phase I – Brickell Backyard Project — The Brickell Backyard is 0.5 miles long and the most complex of all the phases. It extends from the southern edge of the Miami River to SW 13th Street (Coral Way). This phase is within the limits of the City of Miami. This phase of The Underline features urban biking and walking paths, flex basketball and soccer courts, outdoor gym, nature, and butterfly gardens gathering spaces to eat, play, discover and relax.

Commenced Construction in December 2018; Completed 2021

The Underline Phase II – Hammock Trail — The Hammock Trail extends from SW 13th Street (Coral Way) to SW 19th Avenue. This segment is approximately 2.14 miles long. Phase Two is within the City of Miami.

Currently Under Construction; Completion Expected Spring 2024

The Underline Phase III — This segment is the longest of all the Underline Phases. It extends 7.36 miles, from SW 19th Avenue to the Dadeland South Kiss-and-Ride Facility. The phase will traverse through the Cities of Miami, Coral Gables, and South Miami and end in Unincorporated Miami-Dade County. Similar to Phase 2, this phase is also designed on three key drivers, highlighting safe multi-modal transportation, nature, and community.

Construction Completion Expected in 2026

DRAFT

SOUTH BAYSHORE DRIVE

The South Bayshore Drive project will provide continuous pedestrian and bicycle facilities to improve the connections to parks, trails, and transit facilities. This project includes a 10-feet wide shared-use path north of Aviation Avenue that forms part of the Commodore Trail – an essential trail that connects the Old Cutler Trail to the Rickenbacker Causeway. Improvements include resurfacing of roadway pavement and upgrading signing and pavement markings. This project will remove pinch points and deficiencies in the trail network, improve existing trail crossings and increase safe access to the trail. The project completion is anticipated by the end of 2027. The Commodore Trail Master Plan has now been completed and the project will incorporate as feasible recommendations from the Master Plan.

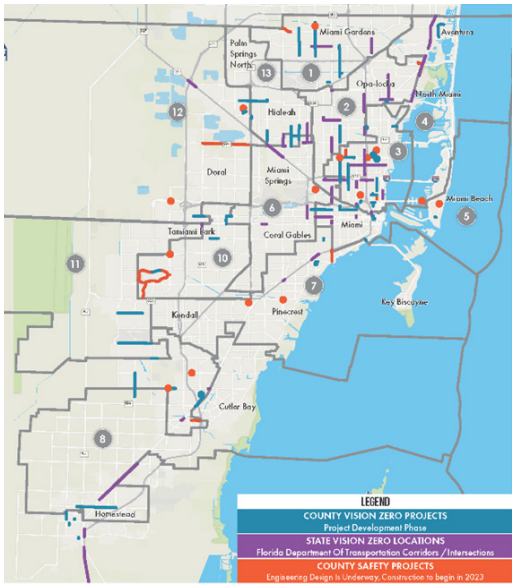
STRATEGIC TARGETS

SAFETY & VISION ZERO

Vision Zero is a countywide safety initiative with a goal to eliminate all traffic fatalities and severe injuries by 2040, while increasing the safety, mobility, and health of all county residents. DTPW's Vision Zero program is focused on system-level changes in how we plan, design, and build our transportation network. The program kicked off in late 2021 with the development of the Vision Zero Framework Plan which identified over 2,000 locations where fatalities or serious injuries have taken place across the county and established actions the county must take to achieve zero.



On average, more than 300 vehicle crash fatalities take place in Miami-Dade County per year. Of these fatal crashes, more than 100 involve vulnerable road users, including pedestrians and bicyclists. Miami-Dade County continues to be identified as one of the most dangerous counties for vulnerable road users (Smart Growth America: Dangerous by Design 2010 to 2022). While the County continues to thrive economically and grow in population and travel demand, it is DTPW's imperative to ensure a safe transportation network. Miami-Dade County is committed to eliminating traffic deaths and serious injuries within our transportation network by 2040. Building from the results of the 2021 Vision Zero Framework Plan Miami-Dade County formally established the Vision Zero Program and identified the top 100 high injury crash locations where to implement safety countermeasures across the County, prioritizing locations near transit facilities and equity neighborhoods.

Making a commitment to zero traffic deaths means addressing all aspects of safety through five overarching program focus areas. DTPW's focus areas are based on the Safe System Approach that, together, creates a comprehensive approach with layers of protection for all road users.

Our focus areas are:

- Promote a Culture of Safety
- Enhance Process and Collaboration
- Build Safe Streets for Everyone
- Create Safe Speeds
- Make Data-Driven Decisions

DRAFT

DTPW - COUNTY TRANSPORTATION SYSTEM AND MAJOR PROJECTS

In 2023, DTPW was awarded a $16.2 million Implementation Grant under the Safe Streets and Roads for All (SS4A) program, administered by the United States Department of Transportation. The awarded funds will focus on infrastructure improvements at 24 critical locations within the County's high-injury network, helping to enhance safety for all road users, particularly in areas of the County where pedestrians and cyclists have been disproportionately impacted by road crashes. DTPW has completed the construction and operational improvements of ten safety projects throughout Miami-Dade County and has nine more projects under construction. DTPW is anticipating completing 22 safety projects by 2024.

DTPW is currently in the construction phase for nine projects, with 10 of 24 projects completed. DTPW anticipates the completion of the remaining projects by the end of 2024.

MAJOR HIGHWAY AND BRIDGE IMPROVEMENT PROJECTS

Major road and bridge projects under construction or scheduled to begin construction include, but are not limited to:

- NW 37 Avenue from North River Drive to NW 79 Street
- SW 137 Avenue from US-1 to SW 200 Street
- SW 216 Street from SW 127 Avenue to HEFT

NW 25 STREET CORRIDOR ROAD WIDENING

NW 25 Street is a County-maintained section line road within the City of Doral and Sweetwater. A feasibility study was completed in 2015. Recommendations from the study include the widening of NW 25 Street from four to six lanes. The scope of work for this project includes, but is not limited to, widening of the road to provide three lanes in each direction, a raised median, a 6-foot sidewalk on the south side and a 10-foot shared use path on the north side, a new drainage system, a new signalized intersection at 99 Avenue, and the addition of turning lanes at major intersections to increase capacity. Design was completed in Fall 2022; construction is partially funded.

NW 25 Street from West of NW 117 Avenue to NW 87 Avenue		STRATEGIC TARGETS
Infrastructure Improvement	Construction Phase	

DRAFT

NW 12 STREET IMPROVEMENTS

The project consists of widening and resurfacing NW 12 Street from the Dolphin Park and Ride Facility to NW 114 Avenue. The project will increase capacity for existing left turn and right turn lanes as well as provide new left turn and right turn lanes along NW 12 Street. Exit ramps from the Florida Turnpike, and the right turn lane exit from the Dolphin Mall at NW 114 Avenue will be improved. The project will also add new Bus Only lanes to service the new Dolphin park-and-ride facility.

The project will include a new storm drainage system, pavement markings and signage, intersection and signalization improvements, roadway lighting, permitting, culvert extension, and construction administration services. The project length is approximately 0.65 miles. The project is currently in the design phase (90% Plan). The 100% Plan phase will be completed in May 2024.

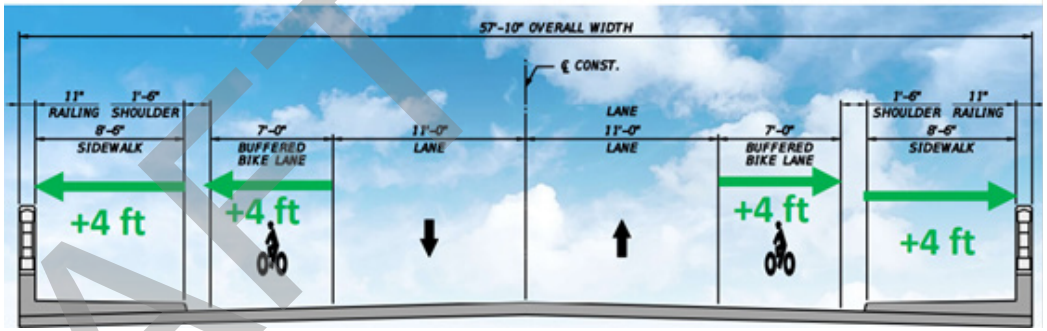
Design Phase

STRATEGIC TARGETS

VENETIAN CAUSEWAY



Proposed

The historic Venetian Causeway is a 2.5-mile-long facility that provides a major link between the City of Miami on the west and City of Miami Beach on the east. The Venetian Causeway is comprised of ten fixed bridges and two bascule bridges separated by five spoil islands, and six residential islands. Following the PD&E study, it was determined that eleven of the twelve bridges will require replacement. Miami Dade County has started the final design phase for the replacement of 11 bridges along the Venetian Causeway, following completion of the PD&E study, performed by FDOT.

The final design will provide new wider bridges which will enhance safety and connectivity for all modes of transportation, including pedestrians, bicyclists, navigable traffic, and vehicular traffic. The replacement bridges will adhere to the existing causeway historic aesthetic and ensure minimal environmental impact. Additionally, resiliency measures are being studied to ensure the new bridges are not affected by sea-level rise effects, and that they can provide continued connectivity for emergency services, construction, and commerce vehicles. The final design phase has begun and is expected last 18 to 24 months, concluding in Summer 2025, with Construction advertisement to immediately follow.

11 bridges along the Venetian Causeway, a 2.5-mile-long roadway spanning 11 man-made islands

Infrastructure Improvement

Final Design Phase

STRATEGIC TARGETS

RICKENBACKER CAUSEWAY

The Rickenbacker Causeway is a multimodal corridor that provides the only ingress and egress connection to the Village of Key Biscayne, including access to several unique cultural sites and water sports opportunities, and serves as one of the busiest bicycling and running routes in Miami-Dade County.

The Rickenbacker Causeway is approximately 3.6 miles in overall length with 1.2 miles of bridge structures and 2.4 miles of roadway with the toll facility near its western terminus at Brickell Avenue on the mainland. The eastern terminus occurs at the end of the Bear Cut Bridge where the roadway becomes Crandon Boulevard.

MASTER PLAN

DTPW is developing a Master Plan that will provide for a holistic planning framework for the Causeway. The scope of the Master Plan includes coordination with partner agencies and stakeholders, the identification of short-term projects aimed at funding within the Capital Improvement Program (CIP), and long-term projects for future funding opportunities.

The Master Plan will provide the opportunity to solidify recommendations into a coordinated plan that will solidify traffic flow while creating a multimodal safety environment and include continued coordination with the Village of Key Biscayne, MDPD, Miami-Dade Parks, Recreation and Open Spaces Department (MDPROS), and other stakeholders. The study is scheduled to be completed in early 2024.

DRAFT

PHASE I SAFETY ENHANCEMENTS

In late spring 2022, Miami-Dade County allocated resources to implement immediate safety enhancements within the Rickenbacker Causeway. These enhancements protect bicyclists and pedestrians who utilize the Causeway and minimize conflict zones with motorists.

The improvements were developed with input from various stakeholders and in response to existing conflicts along the Rickenbacker Causeway, specifically located along the existing U-Turn at the William Powell Bridge.

Rickenbacker Causeway at the U-Turn at the William Powell Bridge		STRATEGIC TARGETS
Infrastructure Improvement	Completed July 2022	

PHASE II SAFETY ENHANCEMENTS

The second phase of safety enhancements along the Rickenbacker Causeway will involve the relocation of the entrance driveway to Hobie Beach Park immediately east of the William Powell Bridge. The entrance will be relocated approximately 350 feet east of its existing location. The relocation will serve to improve two conflict points: a) It will improve the conflict between vehicular traffic entering the park and cyclists crossing the entrance point; and b) It will provide a larger distance which increases advanced warning time for vehicles entering the park. Other enhancements with Phase II are the consolidation of driveways east of the William Powell Bridge and west of the Bear Cut Bridge. The plan is to reduce the number of driveways, which will help minimize conflict points within those limits.

Rickenbacker Causeway at the U-Turn at the William Powell Bridge		STRATEGIC TARGETS
Infrastructure Improvement	Completed July 2023	

DRAFT

SPEED LIMIT UPDATE

In 2022, DTPW conducted a technical analysis of speed limits on the Rickenbacker Causeway. The analysis, which utilized traffic field data collected during the period of June through July of 2022, indicates that speeds should be adjusted to 40 miles per hour in the segment of the Rickenbacker from the Toll Plaza to Calusa Circle. Throughout the summer of 2022, DTPW piloted modified speed limits across the Rickenbacker, yielding valuable information that's being used to implement safety enhancements such as the establishment of a constant speed limit along the entirety of the Causeway. This change is anticipated to promote safety while facilitating enforcement and setting of driver expectations. The cumulative impact of these updated speed limits, short-term improvements, and long-term planning for the corridor in coordination with stakeholders will lead to a safer Rickenbacker Causeway for all users.

Infrastructure Improvement	Completed in 2022	

BEAR CUT BRIDGE PD&E STUDY

Miami-Dade County is performing the planning study to analyze the options for replacement or major rehabilitation of the Bear Cut Bridge from Virginia Key to Key Biscayne. A portion of the bridge was constructed in 1944 and will require replacement of part, all or major rehabilitation to continue to serve as the only connection between mainland Miami and the Village of Key Biscayne. The study will include public outreach and input, stakeholder coordination, design alternative development, cost benefit analysis, long range cost estimating, and analysis of the environmental, archaeological, and socioeconomic impact of the design alternatives. Design or Design Build is set to begin in Spring or Summer 2025 with Construction to begin in 2027.

DRAFT

HOBIE ISLAND BEACH NORTH SIDE SHORELINE STABILIZATION

The purpose of this project is to stabilize the shoreline along the north side of Hobie Island Beach through shoreline protection and stormwater treatment solutions for the north half of the open space along the Rickenbacker Causeway.

As part of this shoreline protection project, 160 invasive Australian Pine trees must be removed, in accordance with Chapter 19 of the Code of Miami-Dade County. These invasive trees will be replaced with 290 native trees, palms, and additional shrub species. This project will improve and beautify this open space by increasing the resiliency of the shoreline and beach, and improving the parking area, while providing an improved pedestrian and bicycle underpass beneath the William Powell Bridge that connects Hobie Island Beach North to Hobie Island Beach South.

This Project covers 9.6 acres of recreational shoreline along the Rickenbacker Causeway and is currently an area that has been closed to the public due to damage caused by Hurricane Irma in 2017. The construction has been scheduled to start.

DRAFT

NW 17TH AVENUE BRIDGE OVER MIAMI RIVER PD&E STUDY

Miami Dade County will be performing a PD&E study, to analyze alternatives for the replacement or major rehabilitation of the NW 17th Avenue movable Bridge from NW 7th Street to NW 14th Street within the City of Miami and Miami-Dade County. The study will aim to address operational reliability, structural and functional deficiencies, as well as address future transportation demands and multimodal safety opportunities for pedestrians and bicyclists. Constructed in 1928, this bridge provides access to many major points of interest and emergency services in Miami and provides interchange access to the Dolphin Expressway/SR 836.

The PD&E study will include public outreach and input, stakeholder coordination, design alternative development, cost benefit analysis, long range cost estimating, and analysis of the environmental, archaeological, and socioeconomic impact of the design alternatives. The PD&E study is expected to take approximately four years to conclude, which will then be followed by Final Design. The Final Design phase is tentatively expected to take approximately two years to complete.

PD&E Study

STRATEGIC TARGETS

NEIGHBORHOOD IMPROVEMENT PROJECTS

DTPW, as part of the PTP, has been tasked with coordinating and constructing various categories of Neighborhood Improvement Projects. To address the various non-site-specific categories discussed in the PTP Ordinance, the Department created "The Neighborhood Improvement Projects Formula" to allocate funds. The formula considers population in the Unincorporated Municipal Service Area for each commission district, the needs as reported to the Department, and the percentage of maintained arterial and collector lane miles. A portion is then evenly distributed to each district.

PTP neighborhood Improvements include modifications of intersections, resurfacing of local and arterial roads, installation / repairs of guardrails, installation of school flashing signals, enhancement of greenways and bikeways, A.D.A. curb cuts / repairs, pavement markings, roadway lighting, traffic calming, traffic signals, and traffic sign replacement / repair. Such improvements also include replacement / repair of sidewalks, repair / installation of drainage and landscape beautification (including community image enhancements) related to the development, construction, operation, or maintenance of roads and bridges in the County or to the expansion, operation, or maintenance of bus and fixed guideway system.

The Neighborhood Improvement Projects include:

- Site Specific Neighborhood Improvement Sites
- Non-Site-Specific Neighborhood Improvement Sites
- Countywide Neighborhood Improvements
- School Flashing Signals Program

PART 2: 5-YEAR PROJECT LISTINGS
PUBLIC TRANSPORTATION IMPROVEMENTS

DRAFT

PUBLIC TRANSPORTATION IMPROVEMENTS

South Florida Regional Transportation Authority (SFRTA)

DRAFT

The mission of the South Florida Regional Transportation Authority (SFRTA) is to collaborate with partners, deliver a safe convenient, and effective service that serves as South Florida's multimodal backbone. SFRTA is an agency of the State of Florida, created in 2003 by Chapter 343, Florida Statute, and is authorized to own, operate, maintain, and manage a transit system in the tri-county area of Miami-Dade, Broward, and Palm Beach Counties. SFRTA operates the Tri-Rail Commuter Rail System. The following projects are included in SFRTA's Capital Budget and or Five-Year Plan in Fiscal Year 2025 thru 2029.

THE TRI-RAIL DOWNTOWN MIAMI LINK (TRDML)

SFRTA, in coordination with multiple partners, has extended the Tri-Rail commuter rail service to provide a new service from Tri-Rail's northern most station at Mangonia Park in Palm Beach County to its southern most station at the "MiamiCentral Station" in Downtown Miami. The 9.05-mile extension, known as Tri-Rail Downtown Miami Link (TRDML), provides a connecting service from the South Florida Rail Corridor (SFRC) at the Tri-Rail Metrorail Transfer Station, to the Florida East Coast (FEC) railway corridor, into Downtown Miami. TRDML service began on January 13, 2024. The MiamiCentral Station serves as Downtown Miami's multimodal hub, providing connections to Brightline, Tri-Rail, the existing Miami Dade county bus system, Metrorail, and Metromover.

TRDML is a cost-effective and strategic transit solution for Miami-Dade County. The new service will leverage Brightline express train service and station investment, together with the recent SFRC connections to the FEC railway corridor; quiet zone funds provided by the Miami-Dade Transportation Planning Organization (TPO); and the region's previous investment in the Tri-Rail system.

The project was leveraged with local investments by public partners of $70 million for incremental construction costs for the MiamiCentral Station, to accommodate Tri-Rail trains and new rail infrastructure to support the new extension into Downtown Miami.

SFRTA – PUBLIC TRANSPORTATION IMPROVEMENTS

ROLLING STOCK

On May, 5, 2023, SFRTA was awarded $71.7M in federal funds to support the purchase of new Rolling Stock to replace up to 24 rail vehicles or a third of its current fleet. Procurement of new Tri-Rail Rolling stock will enable SFRTA to both maintain and provide additional passenger service operations on the existing South Florida Rail Corridor (SFRC). New rolling stock will also allow for increased ridership capacity, operational and train scheduling flexibility.

TRI-RAIL PASSENGER INFORMATION SYSTEM (PIS)

Tri-Rail PIS will provide train locations and predicted arrival times at each station via the internet, smartphone app, telephone, text message, and LCD display location on the station platforms. The system will include onboard signage and an audio system on train cars to display and announce next station arrival and destination information. The train-tracking component is available via internet and smartphone app.

SAFETY AND SECURITY CAMERAS, PHASE 2

This project is for the installation of surveillance camera hardware and monitoring technology at all Tri-Rail Stations. Cameras will be installed in parking lots, stairwells, pedestrian walkways and bridges, and locations within stations that require safety monitoring. The Phase 1 project was recently completed and focused on installing surveillance cameras on Tri-Rail station platforms.

These surveillance cameras and monitoring technology allows SFRTA's Public Safety Coordination Center (PSCC) to monitor/detect suspicious and/or unlawful activities in real time for quick detection and response. Activities are recorded for reference, training, system improvement, and/or as video evidence when further law enforcement is needed.

MIAMI RIVER-MIAMI INTERMODAL CENTER CAPACITY IMPROVEMENT

The MR-MICCI Project will provide an additional mainline track within the South Florida Rail Corridor from just north of the Tri-Rail Hialeah Market Station to the Tri-Rail Miami Airport Station located at the Miami Intermodal Center. The project will increase capacity and improved track connections across the Miami River, including bridge, track, and signal upgrades. SFRTA has finalized the Project Development and Environment (PD&E) Study. The final design and construction will be completed by the Florida Department of Transportation, District Four.

PLANNING AND CAPITAL DEVELOPMENT

The Planning and Capital Department performs short- and long-term planning activities and facilitates the performance of planning studies and efforts such as the update of the Transit Development Plan (TDP), Transit-Oriented Development (TOD) station area plans, Bicycle and Pedestrian Studies and Passenger Surveys, along with other regionally significant projects.

DRAFT

PROGRAM OF PROJECTS

SFRTA receives annual Federal Appropriations Sections 5307 and 5337 funding from the Federal Transit Administration (FTA). This funding is programmed in SFRTA's Capital Budget to include preventive maintenance expenditures such as rolling stock maintenance and station maintenance; along with other capital projects and initiatives that the Agency plans to undertake, which are allowable expenditures of funds under FTA guidelines.

DRAFT

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

PART 2: 5-YEAR PROJECT LISTINGS
NON-MOTORIZED COMPONENT

DRAFT

PART 2: 5-YEAR PROJECT LISTING
NON-MOTORIZED COMPONENT

DRAFT

The development of safe facilities for people who walk or use a bicycle is guided by the Comprehensive Development Master Plan (CDMP) and the 2045 Long Range Transportation Plan (LRTP).

CDMP Transportation Element Objective TE-2 states: "In furtherance of pedestrianism and other non-motorized modes of transportation in the planned urban area, Miami-Dade County shall enhance its transportation plans, programs and development regulations as necessary to accommodate the safe and convenient movement of pedestrians, non-motorized vehicles and motorized vehicles."

The 2045 LRTP lists the following goals and objectives, related to non-motorized projects/programs:

LRTP GOAL 1: MAXIMIZE MOBILITY CHOICES SYSTEMWIDE

- Objective: Provide a comprehensive transportation network for dependable and reliable transportation options.
- Objective: Increase mobility choices throughout the county

LRTP GOAL 2: INCREASE THE SAFETY OF THE TRANSPORTATION SYSTEM FOR ALL USERS

- Objective: Improve the safety of the transportation system
- Objective: Promote projects in high crash locations – (locations with the highest number of crashes)
- Objective: Improve safety of the transportation system for the elderly and disabled

Bicycle and pedestrian projects in the 2024/2025 to 2028/2029Transportation Improvement Program are taken from the non-motorized section of the 2045 LRTP, the Transportation Alternatives Program application cycle and through agency coordination for other transportation projects,. Projects are presented to the Miami-Dade Bicycle Pedestrian Advisory Committee (BPAC) for public information and comment.

NON-MOTORIZED COMPONENT

The Miami-Dade 2045 Bicycle Pedestrian Master Plan assesses opportunities amongst the SMART Plan transit hubs and stations to expand the reach of bicycle and pedestrian trip distances to the entire county, with the help of transit connections. This plan's primary focus is on the daily commuter trip and aims to incentivize projects that safely connect the largest number of people, that need it the most, to the most places, on a daily basis. This plan also looks at other pedestrian and bicycle trip destinations such as educational facilities, major medical centers, high employment areas, and outdoor recreational locations. Realizing these opportunities will help manage the ever-present issue of traffic any metropolitan area deals with and further encourages healthy and sustainable communities within the County. This plan serves as the Bicycle and Pedestrian element of the 2045 Long Range Transportation Plan (LRTP).

More information on the TPO's Bicycle Pedestrian Program is available from the TPO website at: http://miamidadetpo.org/bicycle-pedestrian-program.asp.

PART 2: 5-YEAR PROJECT LISTINGS
INTELLIGENT TRANSPORTATION SYSTEMS (ITS)

DRAFT

INTELLIGENT TRANSPORTATION SYSTEMS (ITS)

DRAFT

An Intelligent Transportation Systems (ITS) is a combination of leading-edge applications and communication technologies used to improve transportation safety, efficiency, and sustainability of surface transportation system. ITS technologies enable the users to be better informed and make smarter use of the network in our region. ITS encompasses a broad range of advanced and traditional communications-based information and electronic technologies to:

- Improve safety by increasing information to the driver and augmenting driver control of the vehicle. Features include warning systems that activate when cars get too close to another vehicle or the edge of the road and enhanced traffic control systems that decrease stops and speed variations, reducing the number of crashes.
- Reduce congestion and improve accessibility through rapid detection and clearing of incidents that cause delays; enhanced public transit systems can reduce highway traffic; and real-time traffic control systems can adapt automatically to changing conditions and improve the flow of traffic.
- Improve energy efficiency and environmental quality by providing travelers with information to support decisions that can reduce highway demand and travel time and vehicle emissions by providing mobility options to use high occupancy vehicles or public transit or on demand services to mitigate congestion.
- Enhance economic productivity by improving the transportation system efficiency through better routing of vehicles, automated toll collection, safety enhancements and streamlining commercial vehicle regulatory enforcement and compliance.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

PART 2: 5-YEAR PROJECT LISTINGS
TRANSPORTATION DISADVANTAGED SECTION (ADA)

DRAFT

TRANSPORTATION DISADVANTAGED SECTION (ADA)

DRAFT

Section 427.015, Florida Statutes, requires that the Metropolitan Planning Organization, as part of its Transportation Improvement Program "shall... identify transportation improvements that will be advanced with [transportation disabled] funds during the program period." This requirement is reiterated in section 3(f)2.g of the Florida Department of Transportation directive 525-010-012-c ("Transportation Improvement Program Development and Review"). The purpose of this section is to meet these requirements, and to reference, in a user-friendly format, transportation improvements to assist the safe and efficient transport of those citizens who need special services and facilities to obtain access to life-sustaining activities.

EXPLANATION

The projects listed in this section do show funding amounts but no construction schedules. This is because the same projects are also listed in other sections of this document grouping projects by funding category. The items listed are referenced by the page number in which they appear in other TIP sections.

In addition, this section includes pedestrian facilities and sidewalks and some transit passenger amenities which, once completed, could enhance and facilitate usage by not only disadvantaged passengers but the public in general. This section does not include relevant improvements associated with larger transportation projects. Examples would include curb cuts and tactile surface treatments added onto sidewalks as part of an intersection widening and reconstruction, or wheelchair ramps and elevators included within the design of major facilities, as required by the 1991 Americans with Disabilities Act.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

PART 2: 5-YEAR PROJECT LISTINGS
CONGESTION MANAGEMENT PROCESS

DRAFT

CONGESTION MANAGEMENT PROCESS

DRAFT

Congestion Management is an integral part of the planning process, and the Congestion Management Process (CMP) is required to be developed and implemented pursuant to Title 23 U.S. Code 134 – Metropolitan Transportation Planning in Transportation Management Areas (TMAs). The congestion management process in Miami-Dade is being developed cooperatively with FDOT and is being implemented on a Countywide basis. The application of CMP strategies will improve transportation system performance and reliability by reducing the adverse impacts of congestion on the movement of people and goods through demand reduction and operational improvements.

The FAST Act retained the requirement for a congestion management process for MPOs that serve a Transportation Management Area (TMA), the law also allows an MPO that serves a TMA to develop a congestion management plan (distinct from the congestion management process) that will be considered in the MPO's transportation improvement program. The Miami-Dade 2045 LRTP, adopted September 2019, included such Congestion Management Plan. The plan identifies proposed projects and programs to reduce congestion and increase job access opportunities. This plan will be updated again within the Miami-Dade 2050 LRTP process to be adopted in September of 2024.

The Miami-Dade County 2019 Congestion Management Plan Update improved upon the 2014 Miami-Dade Congestion Management Process. The CMP was developed based on the 8-step process outlined in the FHWA CMP Guidebook. CMP objectives were drawn from the Miami-Dade County's 2045 Long Range Transportation Plan (LRTP) goals and objectives and serve as one of the primary points of connection between the CMP and LRTP and define the direction for development of CMP Performance Measures. Similar to the 2014 CMP update process, transit, freight, and non-motorized modes are evaluated through the 2045 LRTP update process as a separate effort, thus are not included in the CMP update process. To avoid duplication with significant transportation investments committed to by the TPO, the CMP list eliminated congested locations which coincided with the cost feasible plan (CFP) projects or with SMART Plan Corridors including the BERT network. The observed congestion at these locations were assumed to be addressed by the cost feasible plan and Smart Plan investments.

The project list which follows is based on the adopted 2045 LRTP which incorporated the 2019 Congestion Management Process Update. The process and projects are further detailed on pages 7-126 through 7-133 of the 2045 LRTP document.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

PART 2: 5-YEAR PROJECT LISTINGS
FREIGHT RELATED TRANSPORTATION IMPROVEMENTS

DRAFT

FREIGHT RELATED TRANSPORTATION IMPROVEMENTS

DRAFT

On November 15, 2021, President Biden signed into law the $1.2 trillion Infrastructure Investment and Jobs Act (IIJA), a bipartisan bill committed to a five-year plan over fiscal years 2022 through 2026 that will impact every aspect of the nation's transportation system. In brief, it will finance the rebuilding and rehabilitation of thousands of decaying bridges, tens of thousands of miles of roadway, improvements in railroad infrastructure in addition to increasing the capacity and resilience of the nation's airports, seaports and waterways. The IIJA funding represents an increase of $273.9 billion over the Fixing America's Surface Transportation (FAST) Act baseline.

SIGNIFICANT FREIGHT PROVISIONS

The IIJA includes a number of provisions to improve the condition and performance of the national freight network and support investment in freight-related surface transportation projects. Specifically, the Freight Provisions over the next five years (along with the funding amounts) are as follows:

- **Office of Multimodal Freight Infrastructure and Policy**: USDOT will establish a Freight Office led by an Assistant Secretary for Multimodal Freight. The Office will oversee national and state freight planning and policy as well as implement and administer multimodal freight grant programs
- **INFRA Grant Program – Nationally Significant Freight and Highway Projects:** Freight-specific competitive grant program with broad applicant eligibility that provides funding for large highway and bridge projects, as well as port, rail, intermodal, and rail-highway at-grade crossing and grade separation projects. A maximum of 30 percent of annual INFRA funding may go toward non-highway freight projects ($8 billion).
- **Freight Formula Program – National Highway Freight Program:** Freight-specific formula program for statewide projects. A maximum of 30 percent of annual freight formula funding may go toward non-highway freight projects ($7.15 billion).
- **National Infrastructure Project Assistance Program:** Fully multimodal competitive grant program available to a wide variety of large transportation infrastructure projects. 50 percent of funding will go toward projects that have a total cost of at least $500 million and 50 percent will be set aside for projects with a total cost between $100-$500 million ($5 billion).
- **TIGER/BUILD/RAISE Grant Program – Local and Regional Project Assistance:** Codifies the TIGER/BUILD/RAISE grant program, previously subject to annual appropriations, into reauthorization law for the first time. The program is fully multimodal and open to a broad range of eligible transportation projects ($7.5 billion).

- **Railroad Crossing Elimination Program:** Discretionary grant program for highway-rail or pathway-rail grade crossing improvement projects, including: grade separations or closures; track relocations; installation of related protective devices, signals or signs; and related planning or environmental reviews ($3 billion).
- **Consolidated Rail Infrastructure and Safety Improvements Program:** Discretionary grant program for passenger and freight rail safety, efficiency, and reliability improvement projects. Eligible projects include: the deployment of railroad safety technology (including positive train control); capital rail projects to address congestion and safety challenges affecting rail service; highway-rail grade crossing improvement projects; projects to improve short-line or regional railroad infrastructure; and projects to enhance multimodal connections or facilitate service integration between rail service and other modes ($5 billion).
- **Port Infrastructure Development Program:** Multi-year direct appropriations for the PIDP grant program, which provides grants to improve facilities, operations, and intermodal connections near or within seaports, inland ports, and Great Lakes ports. This program is typically subject to annual appropriations. While it still remains separate from surface transportation reauthorizations within the IIJA, this provision ensures consistent funding for the PIDP program over the next five years ($2.25 billion).
- **Bridge Program – Formula:** Creates a bridge replacement, rehabilitation, preservation, protection, and construction program. Funding is distributed by formula based on a state's share of bridges in "poor" and "fair" condition ($27.5 billion).
- **Bridge Investment Program – Discretionary:** Establishes a competitive grant program for projects to replace, rehabilitate, preserve, or protect bridges on the National Bridge Inventory ($12.5 billion).

The Florida Strategic Intermodal System (SIS) program also has freight-emphasis. The SIS was established to ensure that transportation dollars were invested in areas that supported the local economic generators such as the seaport and the airport and the roadway facilities that connect them. The 2045 Miami-Dade Long Range Transportation Plan (LRTP) Update embraced freight movement with the inclusion of a freight element that includes projects that focus on improving freight movement along major corridors, and specifically, in to and out of Miami International Airport (MIA) and PortMiami. Miami-Dade County is committed to providing a transportation system that enhances the efficiency of freight movement. .

The Freight Transportation Advisory Committee (FTAC), that includes representatives from the freight, logistics, warehousing and intermodal industries in addition to consultants and municipalities, is the industry's advisory panel to the TPO Governing Board on freight movement and truck traffic needs. Aside from advising the TPO, the FTAC considers the types of improvements that should be made with regard to safety and freight efficiency in the county including:

- Determining logistics for truck parking/staging
- Development of Inland Port locations for PortMiami
- Improving the turning radii for trucks
- Enhancing access to freight trucks

DRAFT

- Increasing capacity through select road widening projects
- Modifying access to both seaport cargo and cruise operations at PortMiami
- Promoting regular communication among freight businesses, elected officials, and appointed officials

MIAMI-DADE COUNTY FREIGHT PLAN

The county is home to a well-established and expanding freight transportation system. This system serves as the cornerstone of the region's economy, providing goods and services to Florida's largest consumption market as well as connecting the region to the global economy through major sea and air gateways, taking into account emerging and future technologies. The Freight Plan was recently updated in Spring 2024..

PLANNED FREIGHT-RELATED TRANSPORTATION IMPROVEMENTS

Taking advantage of existing freight provisions, multiple freight-related projects have been planned to prepare Miami-Dade County for the future. For starters, a network of Connected and Autonomous Vehicles (CAV) corridors is planned to modernize the county's freight infrastructure. Starting with SR 821/Homestead Extension of the Florida's Turnpike (HEFT) from SR 836/Dolphin Expressway to NW 106th Street and followed by SR 826/Palmetto Expressway to/from SR 836/Dolphin Expressway to US 27/SR 25/Okeechobee Road, CAV technology will be researched, tested, and implemented on dedicated lanes. Moreover, the county continues in the process of developing its first full-service truck travel center at the Golden Glades Interchange, known as the GGTTC, it will be the only full-service truck parking facility in Miami-Dade County and is located approximately 14miles south from the nearest comparable facility for truckers traveling to PortMiami. The GGTTC will inform truckers on the highway of parking availability through an intelligent network of digital signs called Truck Parking Availability System (TPAS). Other potential private sector full-service truck parking sites are currently being planned for future development.

With trucks moving more than 75% of the county's annual freight tonnage, traffic operation and signal improvements are planned for SR 969/NW 72nd Avenue/Milam Dairy Road at SR 934/SW 74th Street/Hialeah Expressway and US 27/SR 25/Okeechobee Road from SR 821/HEFT to NW 74th Street. Aside from these projects, other large improvements are ongoing or have been planned such as interchange improvements at SR 826/Palmetto Expressway at US27/SR 25/Okeechobee Road, SR 924/Gratigny Expressway west extension, new SR 821/HEFT interchanges at NW 170th Street and I-75, new direct ramps at SR 821/HEFT and NW 12th Street, new direct ramps at SR 948/NW 36th Street and US 27/SR 25/Okeechobee Road, and capacity improvements along US 27/SR 25/Okeechobee Road, I-395/SR 836/Dolphin Expressway and at the Golden Glades Interchange. The TPO, along with FDOT District 6, annually submits freight related projects to the MPOAC Freight Priorities Program in an effort to obtain and advance additional funding for locally significant freight projects.

More information on the TPO's Freight & Logistics Program is available from the TPO website at:
https://miamidadetpo.org/freight-logistics-planning-program.asp

PART 2: 5-YEAR PROJECT LISTINGS
REGIONALLY SIGNIFICANT TRANSPORTATION IMPROVEMENTS

DRAFT

REGIONALLY SIGNIFICANT TRANSPORTATION IMPROVEMENTS

DRAFT

The Southeast Florida region comprised of Palm Beach, Broward, and Miami-Dade Counties has a 2020 population of over 6.1 million, as of April 1, 2020. Miami-Dade County's 2020 total population is 2.7 million.

Hundreds of facilities make up our region's transportation network; facilities that carry freight, auto, and transit traffic. To develop this network, the region critically looked at the intended uses and functionalities of the existing and future facilities to determine what is regional.

This assessment considered technical components as well as the Long Range Transportation Plan's goals and objectives to ensure compatibility and consistency. Ultimately, four criteria were utilized to guide the regional corridor network development: covering roadway, rail and hub. The four criteria definitions and sources are described in detail below.

PRINCIPAL ARTERIALS

Definition: Interstate, Freeway/Expressway and all other Principal Arterials

Source: Draft 2010 Functional Classification for FDOT Districts 4 and 6, May 9, 2013

PLANNED PHYSICAL EXTENSIONS OF PRINCIPAL ARTERIALS

Definition: Interstate, Freeway/Expressway and all other Principal Arterials that are in the adopted LRTP Cost Feasible Plans for future expansion

Source: 2045 LRTP Cost Feasible Plan for Broward, Miami-Dade and Palm Beach County MPOs

STRATEGIC INTERMODAL SYSTEM (SIS) NETWORK

Definition: SIS and Emerging SIS Corridors, Hubs, Connectors, Railways and Waterways

Source: FDOT Central Office SIS facilities, April 2013

PRINCIPAL ARTERIAL CONNECTIONS

Definition: (1) Minor Arterials connecting to Freeways/Expressways, and/or SIS Corridors; (2) extensions of Principal Arterials that cross the intercostal for evacuation purposes; (3) key connections of "gaps" in the network; (4) Non-principal Arterials carrying 50,000 AADT or greater; and (5) extensions of facilities carrying 50,000 AADT or greater to complete a regional network connection.

The following project list reflects regional projects of major significance based upon:

A. Within the regional network

B. Capacity projects identified for construction phases

C. Over $5,000,000 total construction allocations

DRAFT

1. LUDLAM TRAIL

Miami-Dade Parks, Recreation and Open Spaces (MDPROS) is proposing to develop the Ludlam Trail, a 5.6-mile multi-use trail within a former railroad corridor. As a priority paved land trail from the Florida Greenways and Trails System (FGTS) Priority Network and Shared-Use Nonmotorized (SUN) Trail Network, the proposed publicly accessible corridor will serve bicyclists, pedestrians, and other types of non-motorized uses. The Ludlam Trail is intended to provide a safe, dedicated, and direct means of non-motorized transportation to and from areas of residences, transit, work, schools, parks, and shopping centers.

The project limits extend from SW 80th Street to 400 feet north of NW 7th Street, between 69th and 70th Avenue. The County acquired the right of way (ROW) for the Ludlam Trail in December 2018, including fee simple owned areas and easements through three private development node areas for a continuous trail. The ROW for the proposed Ludlam Trail Corridor is approximately 100 feet wide for most of its length, although it narrows to between 75 and 80 feet in some areas and down to 18 feet in easement sections through areas designated for mixed-use development. The Ludlam Trail traverses sections of the City of Miami and unincorporated Miami-Dade County (MDC). It is adjacent to the City of South Miami and proximate to the City of West Miami.

The multi-use trail generally consists of a 12-foot-wide, two-way, asphalt bike path, separated by a landscaped buffer from an 8-foot-wide concrete pedestrian path with a 2-foot-wide soft natural jogging surface adjacent to it.

The trail development will include eleven (11) at-grade crossings, four (4) grade-separated bridge crossings over roadways (at SR 976 / SW 40th Street /Bird Road; SW 24th Street / Coral Way; US 41 / SR 90 / SW 8th Street / Tamiami Trail / Calle Ocho; and SR 968 / W Flagler Street), and two (2) bridges across existing South Florida Water Management District (SFWMD) canals (C-3/ Coral Gables Canal and C-4 / Tamiami Canal).

The purpose of the proposed Ludlam Trail Corridor Project is to encourage the use of alternate modes of transportation and enhance overall connectivity and accessibility to schools, parks, transit stations, and bus stops for more than 30,500 residents present within two (2) miles of the proposed project corridor. The need for the proposed project is based on the criteria identified below.

The project supports the vision of the MDPROS Open Space Master Plan (OSMP), a primary element of which is to "provide an interconnected trail system which offers transportation alternatives and reduces traffic congestion." The OSMP provides a 50-year unifying vision for a livable and sustainable MDC, which involves the development of a seamless system of greenways, trails, and water trails. The Ludlam Trail will be a vital component of this network as it will link open spaces and civic institutions to neighborhoods, while offering a reliable transportation alternative.

From a regional perspective, the proposed project will connect to the Metrorail Dadeland North Station via existing sidewalks along SW 70th Avenue from SW 80th Street to SW 85th Street; the proposed Strategic Miami Area Rapid Transit

(SMART) Plan Corridor #2 (East-West Corridor) near NW 7 Street to the north; and to other planned trails including The Underline/East Coast Greenway, South Dade Trail, Snapper Creek Trail, East/West Trail, and Merrick Trail.

DRAFT

2. BISCAYNE TRAIL

Miami-Dade Parks, Recreation and Open Spaces (MDPROS) is developing Segment D of the Biscayne Trail in two phases, which is part of the larger, 43-mile Biscayne-Everglades Greenway which is the only trail in the nation that connects two National Parks, Biscayne National Park to the east and Everglades National Park to the west. As a priority paved land trail from the Florida Greenways and Trails System (FGTS) Priority Network and Shared-Use Nonmotorized (SUN) Trail Network, the trail corridor will serve bicyclists, pedestrians, and users of other types of non-motorized vehicles. The purpose of the Biscayne Trail is to encourage the use of alternate modes of transportation and enhance overall connectivity and accessibility to schools, local and national parks, and transit hubs for more than 127,000 residents present within the census tracts of the proposed corridor.

Phase 1
Phase 2

The project limits for Segment D Phase 1 begin at SW 328th St. at Biscayne National Park and Miami-Dade County's Homestead Bayfront Park, then head north along the L31-E Canal, then west along the south bank of the Mowry Canal to SW 117th Ave. Phase 2 of the Biscayne Trail picks up at SW 117th Ave., then continues west along the Mowry Canal, south along SW 127th Ave., west along SW 320th St., then north along SW 137th Ave. and ending at the Mowry Canal, where it will connect to the segment recently completed by the City of Homestead. Together, these segments will connect users between Downtown Homestead, and Biscayne National Park to the east, with connection to convenient transit access to the rest of Miami-Dade County.

The trail will generally consist of a 10 to 12-foot-wide, two-way, asphalt multi-use path within SFWMD right-of-way, and dedicated bikes when the trail utilizes road right-of-way. The trail will include high emphasis pavement markings at intersections, regulatory and wayfinding signage, bike racks, benches, and bike repair stations.

DRAFT

PARKS, RECREATION AND OPEN SPACES

This trail project supports the vision of the MDPROS Open Space Master Plan (OSMP), a primary element of which is to "provide an interconnected trail system which offers transportation alternatives and reduces traffic congestion." The OSMP provides a 50-year unifying vision for a livable and sustainable MDC, which involves the development of a seamless system of greenways, trails, and water trails. The Biscayne Trail will be a vital component of the Biscayne-Everglades Greenway within the overall OSMP network as it will link people to Homestead and Florida City, National Parks, and transit hubs, while offering a reliable transportation alternative. From a regional perspective, the trail will connect to the SMART Plan South Corridor in Downtown Homestead, as well as the South Dade Trail.
