Planning Organization

FISCAL YEARS 2023-2027

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

APPROVED JUNE XX, 2022

TRANSPORTATION PLANNING ORGANIZATION FOR THE MIAMI URBANIZED AREAS

2023 – 2027 TIP

TRANSPORTATION IMPROVEMENT PROGRAM (TIP) | FISCAL YEARS 2022/2023 – 2026/2027

This document was prepared by the Transportation Planning Organization for the Miami Urbanized Area in collaboration with the Florida Department of Transportation; Miami-Dade Expressway Authority; Florida's Turnpike Enterprise; South Florida Regional Transportation Authority; Miami-Dade County Office of Strategic Business Management; Miami-Dade Department of Transportation and Public Works, Miami-Dade County Aviation Department; Miami-Dade Seaport Department; Miami-Dade League of Cities; Miami-Dade County Department of Regulatory and Economic Resources; and the Miami-Dade County Developmental Impact Committee.

The Miami-Dade TPO complies with the provisions of Title VI of the Civil Rights Act of 1964, which states: No person in the United States shall, on grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving federal financial assistance. It is also the policy of the Miami-Dade TPO to comply with all of the requirements of the Americans with Disabilities Act. For materials in accessible format please call (305) 375-4507.

The preparation of this report has been financed in part from the U.S. Department of Transportation (USDOT) through the Federal Highway Administration (FHWA) and/or the Federal Transit Administration (FTA), the State Planning and Research Program (Section 505 of Title 23, U.S. Code) and Miami-Dade County, Florida. The contents of this report do not necessarily reflect the official views or policy of the U.S. Department of Transportation.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP) EXECUTIVE SUMMARY

PORTMIAMI

Private Sector

TIP • FISCAL YEARS 2022/2023 TO 2026/2027
EXECUTIVE SUMMARY

The Transportation Improvement Program (TIP), a major federally required document of the Transportation Planning Organization (TPO) for the Miami Urbanized Area, specifies proposed transportation improvements to be implemented in Miami-Dade County over the coming five years. The primary emphasis of the TIP is on the first three years of the program. As required by federal regulations, projects receiving federal funds during the October 1, 2022 to September 30, 2027 time period are to be drawn from those listed in this document. In addition, projects not using federal funds, but which are part of the area's program of improvements, are shown in the TIP. Projects shown for FY 2024 and beyond, regardless of their funding source, are included as proposed. While it is anticipated that most of these projects will be implemented as programmed, they will be periodically evaluated by the TPO as the TIP is updated or amended as necessary. The projects in the TIP are also shown for a five-year time period. While the emphasis is on the first three years, presenting a five-year span allows for a more systematic forecast of funding needs during a five-year planning cycle and provides a more comprehensive view of the program for public information purposes. Included in the TIP are Intermodal, Highway, Transit, Aviation, Seaport and Non-Motorized improvements costing \$7,850 million.

Included are the following categories:

Funding Summary - Fiscal Years 2023 - 2027: (\$s in millions)

Highways - State Roads:

Primary (FDOT).....	\$	3,859	--	48.7%
Turnpike.....	\$	499	--	6.3%
Miami-Dade Expressway Authority...	\$	131	--	1.7%
	\$	4,489		56.7%

County Roads:

Secondary.....	\$	99	--	1.2%
Road Impact Fee.....	\$	448	--	5.7%
People's Transportation Plan.....	\$	34	--	0.4%
Private Sector.....		TBD	--	N/A
	\$	581		7.3%

Local Option Gas Tax.....	\$	94	--	1.2%
Transit.....	\$	1,840	--	23.2%
Aviation.....	\$	129	--	1.6%
Seaport.....	\$	788	--	9.9%
SFRTA.....	\$	2	--	0.0%
	\$	2,853		36.0%
TOTAL	\$	7,923		100.0%

The South Florida Regional Transportation Authority (SFRTA) 5-year funding for rail projects is allocated through FDOT District 4 (rail projects which are geographically located in Miami-Dade County are also included in this funding allocation).

The Secondary, Road Impact Fee, and the People’s Transportation Plan (PTP) Programs contain a number of key projects in the County Highway /Transit System costing just over \$580 million. Aviation improvements involve Miami International, Opa-Locka and Tamiami airports. Transit improvements involve a broad range of public transportation services and facilities. Seaport improvements consist of numerous new port facilities and major renovations and improvements to existing facilities. Funding for the implementation of several intermodal projects is also shown, as well as projects in the “non-motorized” category which includes improvements associated with pedestrian and bicycle facilities.

On June 2, 2022, the TPO Governing Board approved the Fiscal Years 2023-2027 TIP by Resolution #xx-2022. The TPO is concurrently producing the annual List of Priority Projects (LOPP) for TPO Governing Board approval in June 2022. The LOPP is compiled and submitted to FDOT early in order to maximize review and approval of funding in the tentative Work Program and inclusion in the future years' TIP. The TPO, will continue to assess critical transportation needs and prioritize essential projects for the mobility of people and goods in Miami-Dade County. Projects included in the 2023-2027 Transportation Improvement Program are selected in a cooperative manner with transportation partners as per requirements of C.F.R. 450.332(b).

On December 4, 2015, President Obama signed into law the Fixing America's Surface Transportation Act, or "FAST Act". Overall, the FAST Act largely maintains MAP-21 program structures and funding shares between highways and transit. The FAST Act builds upon the performance requirements enacted under MAP-21 by establishing timelines for State Departments of Transportation (DOTs) and MPOs to comply with the performance requirements. In compliance, the Miami-Dade TPO developed the Performance Management Report (Pages: PM-1 – PM-88), as a stand-alone document. This report is also summarized in this FY 2023-2027 TIP Executive Summary (Pages E-4 – E-8).

The projects and priorities in this TIP are consistent with those in the adopted 2045 Transportation Plan. Because the 2045 Plan was found to conform to federal regulations and the Florida State Transportation Improvement Plan (STIP), the TPO has found this TIP to also conform to all relevant laws, regulations and plans. Selected projects are from the prioritized projects found in the 2045 Miami-Dade Long Range Transportation (LRTP). The LRTP recommends phasing for surface transportation improvements classified into four categories:

Priority Period I - -Priority improvements to be constructed and opened to traffic by the year 2025. Funds for most of these improvements are already programmed in this Transportation Improvement Program.

Priority Period II - -Improvements where project development and funding efforts would take place between 2026 and 2030.

Priority Period III - -Improvements to be made between the year 2031 and 2035. In many cases, project development activities would need to commence in the 2026 and 2030 period, due to the amount of lead-time required to plan and implement a project.

Priority Period IV - Improvements to be made in the latter part of the 25-year plan period (2036 to 2045). Includes projects responding to long-range mobility needs and roadway improvements constructed through the county and the Sub-division process, which may be earlier than the 25-year period of the 2045 LRTP Plan.

Note: All \$ values represented in this document are in Year of Expenditure (YOE) dollars, as required by [23 CFR 450.324\(h\)](#).

"Project costs reported in the TIP are in Year of Expenditure (YOE) dollars, which takes into account the inflation rate over the five years covered by the TIP."

PUBLIC INVOLVEMENT

Public involvement for the development of the TIP is received through regularly scheduled meetings of the TPO Governing Board and its advisory committees. A typical TIP Development cycle, in Miami-Dade County, follows the following timeline:

- The TIP process begins at the start of each federal fiscal year on October 1st. FDOT District 6 and Florida's Turnpike Enterprise presents to advisory committees a very Tentative Five-Year Work Program document.
- During the month of November, the Citizen's Transportation Advisory Committee (CTAC) and the TIP Development Committee endorse the Tentative Five Year Work Program. November public hearings are also scheduled for review and input to the FDOT District 6 Tentative Work Program in Miami-Dade and Monroe Counties.
- In December, the Transportation Planning Council (TPC) and the TPO Governing Board endorse the Tentative Five-Year Work Program.
- By mid- December, the Interactive TIP web tool opens to county transportation stakeholder agencies.
- During the months of January and February of each year, the TIP Development Committee meets weekly to advance, review and approve a Draft TIP. These meetings are open to the public.
- By Mid-March of each year, a printed Draft TIP Program document is available for Public review and input at the TPO Office. The Draft TIP is posted prominently on the TPO website at: <http://www.interactip.com/> under TIP 2023 Documentation.
- By the end of March, a Citizen's TIP document is sent to CTAC and the TPC and a Draft TIP is posted to the TPO website for review and comment by the public. The Citizens TIP is a citizen user-friendly color booklet that condenses the big picture projects of that year's TIP, provide pictures, renderings and maps and educates user as to what is the TIP and what projects are underway and which ones have been completed from the previous year's TIP. The current 2022 Citizen's TIP is prominently posted on the TPO website at: 2022 TIP Citizen's Version.

- Parallel to these efforts, the TPO has regularly scheduled meetings with the community where the Draft TIP is distributed. Favorable verbal comments have been received and citizens have expressed their excitement in having a Citizens' Version of the program.
- The Draft TIP is typically included as an information item on or around the April meeting agendas of the CTAC. This meeting is open to public for comments and input.
- CTAC initial review of the Draft FY 2023-2027 TIP took place this year at their April 20, 2022 meeting. TPC initially reviewed at their pending April 25, 2022 Meeting.
- The TIP is advertised for public hearing.
- The Final Draft TIP is presented for approval on the May agendas of the CTAC and TPC committees, respectively. These meetings are open to the public.
- CTAC approved the FY 2023-2027 TIP at their May 18, 2022 meeting
- TPC approved the FY 2023-2027 TIP at their May 23, 2022 meeting
- The TIP is regularly approved by the TPO Governing Board at either their May or June meeting. In Miami-Dade County, the TPO Governing Board approves the Program Priorities concurrently with the TIP. This early approval allows FDOT for an early review of TPO Program Priorities in the development of their Tentative Work Program cycle.
- TPO Governing Board approved the FY 2023-2027 TIP at their June 2, 2022 meeting.
- The Miami-Dade TIP was sent in June to funding agencies for their review and input.

PERFORMANCE MANAGEMENT

Performance management is a strategic approach to connect investment and policy decisions to help achieve performance goals. Performance measures are quantitative criteria used to evaluate progress. Performance measure targets are the benchmarks against which collected data is gauged. The Moving Ahead for Progress in the 21st Century Act (MAP-21) requires State DOTs and MPOs to conduct performance-based planning by choosing critical performance measures, setting quantitative targets, and programming projects to help achieve those targets. Performance-based planning ensures the most efficient investment of federal transportation funds by increasing accountability, transparency, and providing for better investment decisions that focus on seven areas: Safety, Pavement Condition, Bridge Condition, Highway Performance, Freight Movement, Traffic Congestion, and On-road Mobile Sources. The Traffic Congestion and On-road Mobile Sources measures do not apply to Florida. The Fixing America's Surface Transportation (FAST) Act supplemented the MAP-21 legislation by establishing timelines for State DOTs and MPOs to comply with the requirements of MAP-21. State DOTs establish statewide targets and MPOs have the option to support the statewide targets or adopt their own.

SAFETY PERFORMANCE MEASURES

The Highway Safety Improvement Program and Safety Performance Management Measures Rule (Safety PM Rule) was published in the Federal Register on March 15, 2016.

The rule requires that states establish targets for the following performance measures:

- Number of Fatalities;
- Number of Serious Injuries;
- Number of Nonmotorized Fatalities and Serious Injuries;
- Rate of Fatalities per 100M Vehicle Miles Traveled (VMT); and
- Rate of Serious Injuries per 100M VMT.

FDOT has adopted the "Vision Zero" target of zero for all the safety performance measures. The TPO approved Resolution #08-19 establishing the FDOT "Vision Zero" targets for calendar year 2020 on January 30, 2020.

The 2023 TIP has been developed to help move towards the safety target in the following ways:

1. The 2023 TIP is a subset of the 2045 Long Range Transportation Plan and is guided by the LRTP goals and objectives. LRTP Goal #2 is to “Increase the Safety of the Transportation System for All Users” and is supported by the following objectives:
 - Improve the safety of the transportation system,
 - Promote projects in high crash locations, and
 - Improve safety of the transportation system of the elderly and disabled, and
 - Provide educational opportunities to older adults to learn about TNCs.
2. The TPO’s 2023 TIP Development Committee included representatives from the major transportation agencies and coordinated the preparation of the document. During the development cycle presentations were made to educate the committee members about performance management, the new federal requirements and the TPO’s approach to incorporating performance management into the transportation planning process. The transportation agencies were asked to highlight the safety efforts that are included in their 2023-2027 programs.

In total, the 2023 TIP includes \$95M programmed within FY 2023-2027 on 82 projects that improve safety and to support the achievement of the established safety targets. A list of the projects is included in the TPO’s “Transportation Performance Management System Performance Report.”

PAVEMENT CONDITION AND BRIDGE CONDITION

The final rule for the pavement condition and bridge condition performance measures was published on January 18, 2017. By Resolution #44-18 (approved Oct. 25, 2018) the TPO took action to support FDOT’s pavement and bridge condition performance measure targets:

PAVEMENT CONDITION PERFORMANCE MEASURES	TARGET	
	2 YEAR	4 YEAR
Percent of Interstate Pavement in Good Condition	n/a	≥ 60%
Percent of Interstate Pavement in Poor Condition	n/a	≤ 5%
% Non-Interstate NHS Pavement in Good Condition	≥ 40%	≥ 40%

% Non-Interstate NHS Pavement in Poor Condition	≤ 5%	≤ 5%
---	------	------

BRIDGE CONDITION PERFORMANCE MEASURES	TARGET	
	2 YEAR	4 YEAR
Percent in Good Condition by Deck Area	≥ 50%	≥ 50%
Percent in Poor Condition by Deck Area	≤ 10%	≤ 10%

The 2023 TIP includes \$375M programmed within FY 2023-2027 on 31 bridge improvement projects and \$286M on 116 pavement improvement projects to support the achievement of the established targets. A list of the projects is included in the TPO’s “Transportation Performance Management System Performance Report.”

SYSTEM PERFORMANCE AND FREIGHT MOVEMENT PERFORMANCE MEASURES

The final rule for the National Highway System and Freight Movement performance measures was published on January 18, 2017. By Resolution #44-18 (approved Oct. 25, 2018) the TPO established these FDOT system performance and freight mobility performance measure targets:

NHS AND FREIGHT MOBILITY PERFORMANCE MANAGEMENT MEASURES	TARGET	
	2 YEAR	4 YEAR
Percent of person-miles traveled on the Interstate that are reliable	≥ 75%	≥ 70%
% of person-miles traveled on the non-Interstate NHS that are reliable	n/a	≥ 50%
Truck travel time reliability ratio (TTR) on the Interstate	≤ 1.75	≤ 2.00

The 2023 TIP includes \$1.9B programmed within FY 2023-2027 on 128 projects that will improve mobility on the system to support the achievement of the established targets for mobility improvement performance. Included in the list of

NHS performance projects is \$193M programmed within FY 2023-2027 for 27 projects to improve mobility on the Interstate System.

The TPO's "Transportation Performance Management System Performance Report" includes the list of all projects.

DRAFT

COORDINATION WITH STATE AND FEDERAL DOCUMENTS

As part of the continuing coordination process to implement the new performance management requirements, the following documents are referenced in the development of the 2023 TIP:

TO BE INSERTED ONCE TIP RECEIVES FINAL APPROVAL

TRANSPORTATION IMPROVEMENT PROGRAM (TIP) INTRODUCTION

PORTMIAMI

Private Sector

TIP • FISCAL YEARS 2022/2023 TO 2026/2027
INTRODUCTION

PURPOSE

This document is prepared every year to fulfill Federal statutory requirements which provide that, as a condition to receive Federal funding, each urbanized area will have a continuing planning process that results in plans and programs consistent with the comprehensive development plan of the urbanized area. This purpose of this document is to provide a prioritization of projects covering a five-year period that is consistent with the LRTP, contains all transportation projects MPA funded with FHWA and FTA funds and regionally significant projects regardless of funding source. The priorities established by this document express the policy decision of the Transportation Planning Organization (TPO) as to the order in which transportation improvements will be advanced during the program period. This document also fulfills Federal requirements in that the included projects are derived from the area's 2045 Long-Range Transportation Plan (LRTP) for inclusion in the program and addresses program requirements relating to the federal transportation law passed in July, 2012 titled "Moving Ahead for Progress in the 21st Century Act (MAP-21)". On December 4, 2015, President Obama signed into law the Fixing America's Surface Transportation Act, or "FAST Act". Overall, the FAST Act largely maintains current MAP-21 program structures and funding shares between highways and transit. It is a down-payment for building a 21st century transportation system. On November 15, 2021 President Biden signed the Infrastructure Investment and Jobs Act (IIJA) into law, creating a historic transportation investment that will be implemented during this 5-year TIP window. Access to a bulk of the legacy infrastructure funding in place was authorized via Continuing Resolution for 2022.

The joint annual FDOT/TPO certification was completed in April 2020. The TIP and TIP process are also reviewed during the FHWA/FTA TPO quadrennial certification. The Miami-Dade TPO's quadrennial certification took place in April 2019. The next quadrennial certification is anticipated to take place in 2023. In addition to this TIP document, the TPO produces the TIP Citizen's Version, a user-friendly summary of projects in the TIP. The Citizen's Guide is available at: [DRAFT Citizen's 2023 TIP](#). Transportation Performance Management is fully integrated into the TPO planning process. As the Performance Management process advances,

the effectiveness of progress towards achieving the targets will be evaluated. The 2021 federal obligations for FDOT District 6 projects are found listed in FDOT's Office of Work Program Annual Obligations Report at: [FDOT - OFFICE OF WORK PROGRAM - ANNUAL OBLIGATIONS REPORT](#)

TRANSPORTATION PLAN

The Transportation Planning Organization Board adopted under TPO Resolution #48-19, in September 26, 2019, the 2045 Miami-Dade LRTP. Projects from the area's adopted TPO 2045 LRTP have been included for advancement during this program period. The next major update of the LRTP to the year 2050 is due September 2024. Major activities included are: support facilities for METRORAIL, express bus service, interstate highway projects, congestion management and non-motorized projects; express transit on managed lanes; arterial street improvements, aviation and seaport facilities, and additional bus transit and paratransit improvements, the construction of major intermodal facilities and the deployment of Intelligent Transportation System applications. The recommended improvement priorities of the adopted Long Range Transportation Plan provide the basis for preparing this document. The Plan presents the logical and systematically phased development of the area's transportation network and services to the year 2045. Transportation System Management (TSM) projects are proposed to be continued or expanded during Fiscal Years 2022/2023 through 2026/2027. The Miami-Dade Secondary Road Program and Road Impact Fee Program contain projects that are supportive of the areawide TSM effort. These included traffic flow improvements, provisions for preferential treatments of high occupancy vehicles where appropriate, improvements to intersection geometrics, lighting safety projects, and other related projects which provide for greater safety and better management of traffic flow and are supportive of on-going transportation demand management activities. TSM projects are consistently included in the preparation of project-adopted proposals in keeping with the TPO's commitment to fully develop TSM as a policy and investment strategy to continually enhance the mobility of the urban population. The Year 2045 Transportation Plan stresses the achievement of long-standing and fundamental planning objectives. In addition to land-use considerations, the Plan addresses related issues involving the quality of the environment and the conservation of limited natural resources. These concerns are particularly important as revisions to the Adopted Components of the Comprehensive Development Master Plan (CDMP) for Miami-Dade County are periodically

considered. An extensive public participation process is conducted during all major stages of Plan preparation and adoption and during periods when Plan revisions are formally considered.

Citizens review activities are coordinated by the Citizens Transportation Advisory Committee (CTAC), a body appointed by the TPO Board to provide formal input in all pertinent transportation issues.

COMPREHENSIVE DEVELOPMENT MASTER PLAN

The fiscal year 2023-2027 Transportation Improvement Program (TIP), as set forth in this document, is generally consistent with the Adopted Components of the Comprehensive Development Master Plan (CDMP) for Miami-Dade County, Florida, as amended through July 19, 2017. The CDMP contains twelve Plan elements. The Transportation Element specifically provides for an integrated multimodal transportation system for the circulation of motorized and non-motorized traffic in Miami-Dade County. The goal of the Transportation Element is to develop and maintain an integrated multimodal transportation system to move people of all ages and abilities and goods in a manner consistent with overall Countywide land use and environmental protection goals, and integration of climate change considerations in the fiscal decision-making process, objectives and policies, and to provide a comprehensive approach to the transportation system needs of the County by addressing all modes of transportation – pedestrian and bicycles facilities, traffic circulation, mass transit, aviation and ports. The Transportation Element is divided into five subelements: Traffic Circulation, Mass Transit, Aviation, Port of Miami River, and PortMiami Subelements. The Traffic Circulation Subelement addresses the needs of automobile traffic, bicyclists and pedestrians; the Mass Transit Subelement addresses the need to promote and expand the public mass transit system and to increase its role as a major component in the County's overall transportation system; the Aviation Subelement addresses the need for the expansion, development and redevelopment of the County's aviation facilities; and the Port of Miami River and PortMiami Subelements promote maritime business and traditional maritime related shoreline uses along the Miami River and PortMiami and their expansion needs. A key feature of the Traffic Circulation and Mass Transit Subelements is the establishment of level-of-service standards to ensure that adequate capacity will be available in all modes to service new development and redevelopment in Miami-Dade County. The ability to maintain the level-of-service

standards has become a primary determinant for addressing relative priority among the various transportation improvement needs.

The County is striving to provide roadway, transit, sidewalks, and bicycle lane improvements along congested corridors in order to develop a multimodal transportation network designed to include bus turnout bays, bus shelters, managed lanes, pedestrian and bicycles facilities, and mass transit services.

One of the most significant and far reaching provisions of Florida's "Community Planning Act (2011)" is the requirement that all local comprehensive plans contain a Capital Improvement Element (CIE). The intent of this requirement is to make the comprehensive plan fiscally feasible and to provide a schedule of capital improvements which includes any publicly funded federal, state, or local government projects, and may also include privately funded projects for which the local government has no fiscal responsibility. Projects which are necessary to ensure that any adopted level-of-service standards are achieved and maintained (sec. 163.3180(1)(b), F.S.) for the 5-year period must be identified as either funded or unfunded and given a level of priority for funding (sec. 163.3177(3)(a), F.S.). For this reason, the highway capacity-type of improvements on the County highway system, and the transit, aviation and seaport projects, which are programmed in the TIP, are also included in the County's CDMP Capital Improvements Element's (CIE) 6-year capital improvements schedule. Additionally, CDMP Policy TE-1H requires transportation plans to take into consideration climate change adaptation and mitigation strategies through project review, design, and funding for all transportation projects.

Every seven years, the Comprehensive Development Master Plan (CDMP) is reviewed and updated as required per Chapter 163 of the Florida Statutes, a process known as an Evaluation and Appraisal Report (EAR). The EAR includes an evaluation of the progress the County has made in implementing the goals, objectives, policies, maps and text of the CDMP and also recommends changes. The Department of Regulatory and Economic Resources (RER), Planning Division is currently conducting the EAR process and has conducted an extensive public participation plan involving social media, advertising, a survey, and over six workshops held in June 2017. RER received over 420 public comments and over 1,100 survey responses. Information about the EAR process, presentations made and public comments received, are posted on the Department's website at: <https://www.miamidade.gov/planning/ear-2018.asp>. The EAR shall be completed in accordance with the December 1, 2019 adoption deadline set by the Florida Department of Economic Opportunity (DEO).

PUBLIC INVOLVEMENT/PUBLIC HEARING

Reasonable opportunity for public comment was provided in accordance with the requirements of 450.316(b)(1) and, in maintenance TMAs, an opportunity for at least one formal public meeting during the TIP development process. This public meeting may be combined with the public meeting required under 450.322 (c). The TIP process begins at the start of each fiscal year. Correspondence is sent to all municipalities, involved agencies and private parties informing them that the process is to begin, providing them with the tentative scheduling and soliciting their input. The Citizens Transportation Advisory Committee (CTAC) provides a forum for citizens to evaluate the recommendations developed through the TPO's transportation planning and programming process. One of the main responsibilities of the CTAC is to ensure that proposed transportation projects are responsive to the community's perceived needs and goals. The TPO provides adequate public notices for public hearings so as to allow community citizens the opportunity to approve documents such as the TIP. The proposed TIP is published and made readily available for review and comment. Similarly, the approved TIP is published and made readily available for information purposes. The functional responsibilities of participating agencies are needed to insure the continuing development and operation of urban transportation system facilities. The 45-day public review period began on April 1, 2022 and concluded on May 15, 2022. All comments received during this period were collected, archived, and included in the final adoption agenda materials for the TPO Governing Board's review prior to approval.

PROGRAM FUNDING

The TIP categorizes all transportation improvements and identifies priorities, which establish multi-year fiscal programming. The biennial elements represent the list of projects, which are proposed for implementation during the first program phase and are viewed as the "Capital Improvements" budget for transportation facilities. This TIP document identifies all sources of funding which are known or are anticipated to be available during the program period. Program costs are consistent with current estimates of available revenue. Priorities in the program are identified by relative staging of projects for implementation during a particular year, consistent with funding availability and production constraints. Most Highway funding comes from gasoline taxes, motor vehicle fees, and other automobile-related "user fees". Major sources of existing and potential highway funding sources include:

Federal Gas Tax, State Motor Fuel Tax, Local Option Gas Tax, Voter Gas Tax, Motor Vehicle Fees, Impact Fees and Tolls. Transit funding is derived from a host of Federal, State and local programs, including the ½ cent sales tax increase approved by voters on November 2002. For rail and bus projects, funding is mostly sought through Federal and State grants. Transit operating costs are supported largely through local revenue sources.

SUMMARY OF TIP PROJECTS

The projects in the FY 2023-2027 TIP have been grouped into major categories, with order of priority established within each category insofar as possible or applicable. The groupings are established primarily by virtue of funding source and implementing responsibility.

The thrust of Miami-Dade County's effort to enhance the mobility of the urban population, achieve a balanced transportation system, to meet energy conservation needs, to improve air quality, as well as to preserve or enhance the physical and social environment of the community, is evident when it is noted that more than 22% of the FY 2023-2027 program budget is devoted to public transit projects. It should be noted that Primary, Interstate and Turnpike categories combined constitute about 57% of the approximate \$7.85B in the FY 2023-2027 program budget.

PLAN PERIODS

The 2045 Miami-Dade Transportation Plan - Long Range Element, recommended phasing for highway capacity improvements are classified into four Plan Periods:

Plan Period I

Priority improvements to be constructed and opened to traffic by the year 2025. Includes those projects needed to respond to existing traffic problems. Funds for most of these improvements are already programmed in this Transportation Improvement Program.

Plan Period II

Improvements where project development and funding efforts would take place between 2026 and 2030.

Plan Period III

Improvements to be made between the year 2031 and 2035. In many cases, project development activities would need to commence in the 2031 and 2025 period, due to the amount of lead-time required to plan and implement a project.

Plan Period IV

Improvements to be made in the latter part of the 25-year plan period (2036 to 2045). Includes projects responding to long-range mobility needs and roadway improvements constructed through the county and the Sub-division process, which may be earlier than the 25-year period of the 2045 LRTP Plan.

Because of the uncertainties of funding availability and the time required to develop a detailed project, the specific time periods and dates indicated in the above priority listing should be considered only as guidelines for project implementation.

The LRTP Update to the Year 2045 was approved by TPO Governing Board at its September 26, 2019 meeting.

AMENDMENTS

The TIP may be amended at any time during the program year through the same procedures required for developing and adopting this original program. The amendment(s) may be for the purpose of deleting projects, adding projects, revising the funding of a project, or modifying the scope or limits of a project. Detailed information of the amendment process is available from the Citizen's TIP, on page 16 of the TPO Prospectus

<http://www.miamidadetpo.org/library/reports/prospectus-for-transportation-improvements-2019.pdf> or from the TPO upon request.

WHAT IS A TIP AMENDMENT

An amendment is a revision to a TIP or STIP that involves a major change to a project in a TIP or STIP, including addition or deletion of a project, a major change in project cost, project phase initiation dates, or a major change in design concept or design scope (i.e., changing project termini or the number of through traffic lanes). [23 C.F.R. 450.104] An amendment requires public review and comment, demonstration of financial constraint, or a conformity determination, if applicable. Additionally, amendments to the TIP are available for public review at least fourteen (14) days prior to the scheduled public hearing. This information is also available to the public in the TPO Prospectus for Transportation Improvements at:

<http://www.miamidadetpo.org/library/reports/prospectus-for-transportation-improvements-2019.pdf>

WHAT IS A TIP ADMINISTRATIVE MODIFICATION

An administrative modification is a minor revision to a TIP or STIP that includes minor changes to project/project phase costs, minor changes to funding sources of previously included projects, and minor changes to project/project phase initiation dates. An administrative modification does not require public review and comment, re-demonstration of fiscal constraint, or a conformity determination, if applicable. [23 C.F.R. 450.104]

ADMINISTRATIVE TIP AMENDMENT BETWEEN THE START OF THE STATE AND FEDERAL FISCAL YEARS

An administrative TIP Amendment is an amendment that does not have to go to the full TPO Board for approval. FHWA and FTA will allow an administrative TIP Amendment during the three-month gap between the start of the new State fiscal year and the end of the old Federal fiscal year (July 1 to September 30) for new projects that were added during the Tentative Work Program development cycle.

In these instances, the TIP must be amended to include the project, but FHWA and FTA have agreed to allow the TPO Executive Director to process an Administrative TIP Amendment for these types of projects rather than having to go before the full Board. FHWA and FTA will allow this only under the following conditions:

- The amendment takes place between **July 1** and **September 30**;
- The project must appear in the amendment exactly as it appears in the newly adopted TIP; and
- The TPO Executive Director has been authorized by the Board to approve administrative TIP Amendments.

TIP • FISCAL YEARS 2022/2023 TO 2026/2027
BICYCLE ACCOMODATIONS LEGEND

CODE	NAME
Bike Lane	A bike lane is a portion of a roadway that is designated by signs and markings for preferential use by bicyclists.
Paved Shoulder	A paved shoulder is a portion of a roadway that has been delineated by edge line striping and may include bicycle lane pavement markings or signing.
Wide Curb Lane	A wide curb lane is a through lane that provides a minimum of 14 feet in width which allows most motor vehicles to pass cyclists safely within the travel lane.
Other Shared Use Path/ Paved Trails	A paved path that is physically separated from the road and is designed to accommodate two-way bicycle and pedestrian traffic. Sidewalks do not meet the width and operational criteria for multi-use paths.
Sharrow	An optional pavement marking used to indicate a shared environment for bicycles and motor vehicles. Sharrows are used where it is not practical to provide a bicycle facility. Note that a sharrow is not a bicycle facility.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

STRATEGIC MIAMI AREA RAPID TRANSIT (SMART) PLAN

PORTMIAMI

Private Sector

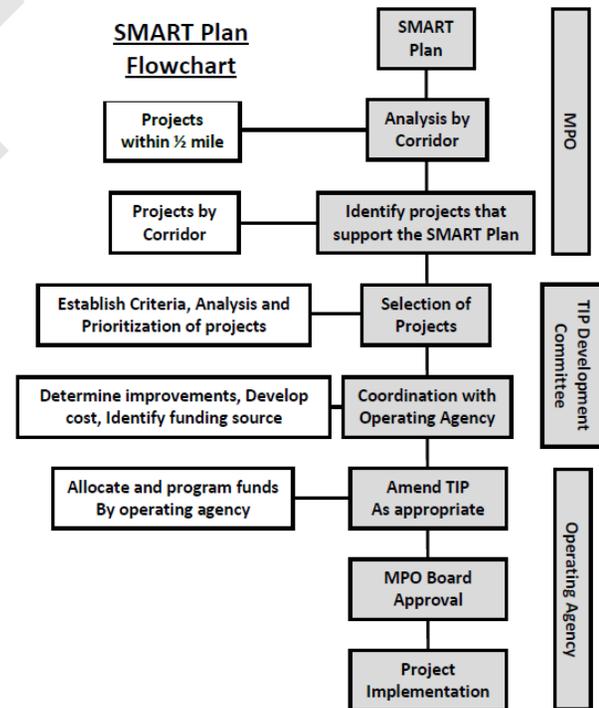

TIP • FISCAL YEARS 2022/2023 TO 2026/2027
STRATEGIC MIAMI AREA RAPID TRANSIT (SMART) PLAN

PURPOSE OF THIS SECTION

On February 18, 2016, the TPO Governing Board approved under Resolution #06-16, the establishment of a policy to set as highest priority the advancement of rapid transit corridor projects in Miami- Dade County. As a result of this Resolution, on April 21, 2016, the Strategic Miami Area Rapid Transit (SMART) Plan was endorsed by the Board under Resolution #26-16.

The purpose of this section is to support the advancement and implementation of the SMART Plan through analysis, monitoring, updating and engagement of the Miami-Dade Transportation Planning Organization (TPO) in association with our transportation partners. The SMART Plan includes six (6) rapid transit corridors and a bus express network, as shown in the attached map. All these corridors are connected to the Metrorail system that is the backbone of the transportation system in Miami-Dade County.

To comply with the TPO Governing Board Resolutions, the TPO is initiated a process under the purview of the TIP Development Committee. The objective of this effort is to integrate projects within a half mile to the SMART corridors that can improve transit along these selected corridors. Following is a flowchart of the proposed process.

The TPO has identified a list of projects within the ½ mile buffer. The following table shows the number of projects identified by Fiscal Year in the areas of:

- New road construction
- Adding capacity
- Widening lanes
- Pavement Resurfacing, Restoration and Rehabilitation
- Traffic improvements
- Bicycle & Pedestrian
- Intermodal facilities
- First/Last Mile improvements
- Port and Airport connectivity
- Landscaping
- Freight improvements,
- Planning studies and
- PD&Es, among others

NUMBER OF PROJECTS WITHIN 1/2 MILE OF THE CORRIDOR								
#	CORRIDOR	BOUNDARIES		FISCAL YEAR				
		FROM	TO	2022-23	2023-24	2024-25	2025-26	2026-27

FISCAL YEARS 2022/2023 TO 2026/2027

TRANSPORTATION PERFORMANCE MANAGEMENT

SYSTEM PERFORMANCE REPORT

JUNE 2022

This stand-alone report documents the Miami-Dade TPO efforts to address federal and state requirements for Highway and Transit Performance Measurement and Concurrence with FAST Act.

INTRODUCTION

The Miami-Dade Transportation Planning Organization (TPO), formerly called the Metropolitan Planning Organization for the Miami Urbanized Area, guides the transportation planning process in Miami-Dade County. The TPO was created on March 2, 1977 as required under Section 163.01, Florida Statutes, and is established by an Interlocal Agreement between Miami-Dade County and the Florida Department of Transportation (FDOT).

A major role of the TPO is to ensure conformance with federal regulations requiring that highways, mass transit, and other transportation facilities and services are properly developed and deployed in relation to the overall plan of urban development and to approve plans for regional and state transportation network accessibility. In addition, federal guidelines require that the use of Federal Aid for transportation projects be consistent with TPO adopted plans and programs. Federal, state and local transportation planning funds are utilized on an ongoing basis to ensure the effectiveness of the TPO planning process.

The TPO's Long Range Transportation Plan (LRTP) is the plan for implementing transportation system improvements within Miami-Dade County. The LRTP is focused on providing safe mobility options, and is guided by a comprehensive vision to:

“ Provide mobility options for Miami-Dade County residents and visitors and promote economic competitiveness by investing in the County’s transportation infrastructure while protecting the environment and maximizing the efficiency of the existing transportation system ”

WHAT IS PERFORMANCE MANAGEMENT?

Transportation Performance Management is a strategic approach that uses system information to make investment and policy decisions to achieve performance goals at the national, state, and local levels. In short, Transportation Performance Management:

- Is systematically applied on an ongoing basis;
- Provides key information to help decision makers understand the consequences of investment decisions across transportation assets or modes;
- Improves communication between decision makers, stakeholders, and the traveling public; and
- Ensures measures and targets are developed in a cooperative fashion and are based on objective data.

WHY IS PERFORMANCE MANAGEMENT REQUIRED?

The “Moving Ahead for Progress in the 21st Century” Act (MAP-21), signed into law on July 6, 2012 (Pub. L. No. 112-141) established requirements for States and MPOs to conduct performance-based planning by tracking performance measures and setting data-driven targets to measure performance. Performance-based planning ensures the most efficient investment of transportation funds by increasing accountability, transparency, and providing for better investment decisions that focus on key outcomes related to the seven Federal Highway Program performance goals (National Goals) established under MAP-21:

- **Safety** - To achieve a significant reduction in traffic fatalities and serious injuries on all public roads;
- **Infrastructure Condition** - To maintain the highway infrastructure asset system in a state of good repair;
- **Congestion Reduction** - To achieve a significant reduction in congestion on the National Highway System;
- **System Reliability** - To improve the efficiency of the surface transportation system;
- **Freight Movement and Economic Vitality** - To improve the national freight network, strengthen the ability of rural communities to access national and international trade markets, and support regional economic development;
- **Environmental Sustainability** - To enhance the performance of the transportation system while protecting and enhancing the natural environment; and

- **Reduced Project Delivery Delays** - To reduce project costs, promote jobs and the economy, and expedite the movement of people and goods by accelerating project completion through eliminating delays in the project development and delivery process, including reducing regulatory burdens and improving agencies' work practices.
- [23 USC 150(b)]

Performance Management has been integrated into the transportation planning framework of the Federal Planning Factors, MAP-21 National Goals, and Federal Planning Emphasis Areas (see Figure 1: Federal and State Planning Requirements and Expectations). The "Fixing America's Surface Transportation" Act (FAST Act), signed December 4, 2015 (Pub. L. No. 114-94) builds upon the performance requirements enacted under MAP-21 by establishing timelines for State Departments of Transportation (DOTs) and MPOs to comply with the performance requirements.

WHAT ARE THE NATIONAL PERFORMANCE MANAGEMENT MEASURES?

Performance measures are indicators of progress toward attaining a goal, objective, or target (a desired level of future performance). A series of Federal rulemakings have been issued by FHWA and FTA to establish National Performance Management Measures to address the performance requirements established in MAP-21 and the FAST Act. The National Performance Management Measures are:

- Highway Safety Improvement Program,
- Assessing Pavement Condition for the National Highway Performance Program and Bridge Condition for the National Highway Performance Program, and
- Assessing Performance of the National Highway System, Freight Movement on the Interstate System, and Congestion Mitigation and Air Quality Improvement Program.

For each category above, there are specific National Performance Management Measures that will be used to assess progress. Progress will be judged by how States and MPOs perform based on self-imposed targets, relative to baseline conditions. Performance measure targets are the benchmarks against which collected data is gauged. State DOTs will establish targets for the state, while MPOs will adopt targets that are appropriate for their urbanized areas. MPOs may adopt the state's targets or establish their own.

HOW ARE PERFORMANCE MEASURES USED?

Because Florida's transportation system improvement needs exceed available funding, resources are invested in the most strategic, effective and efficient ways possible. Performance measures provide useful "feedback" and are integrated into FDOT's business practices on three levels:

AT THE STRATEGIC LEVEL

Performance measures help to establish and inform goals, objectives, and strategies as well as to monitor FDOT Mission attainment. Performance measures also communicate progress toward achieving goals in transportation plans and programs such as the Florida Transportation Plan, the Strategic Highway Safety Plan, and the Freight Mobility and Trade Plan.

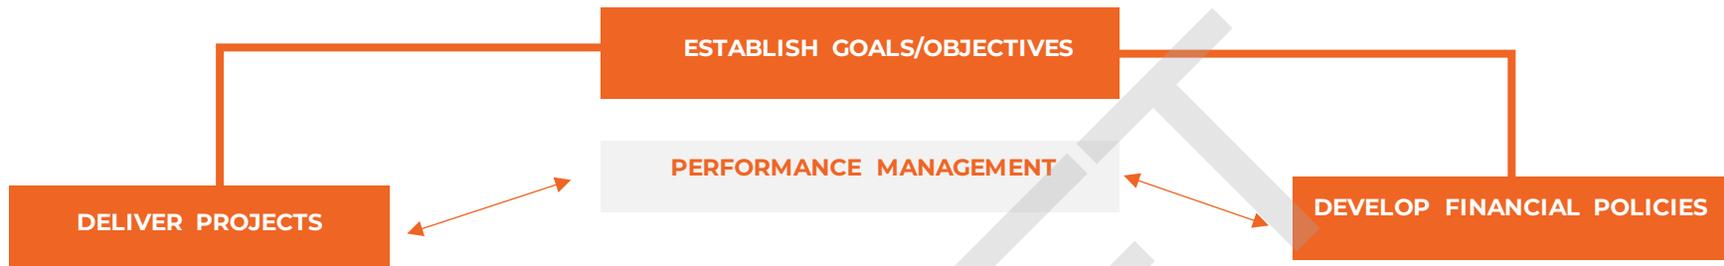

AT THE DECISION-MAKING LEVEL

Performance measures are used to inform and assess the financial policies for allocating funds among programs such as highway preservation, system expansion, and public transportation. These programs are defined in the Program and Resource Plan. Decision makers also consider various trends impacting transportation system performance.

AT THE PROJECT DELIVERY LEVEL

After projects are selected, performance measures help to monitor the efficiency and effectiveness of projects and services in the Five-Year Work Program and in relation to FDOT's Transportation Asset Management Plan. The measures also support organizational and operational improvements.

As shown in the **Performance-Based Planning and Programming Process** graphic below, performance management is at the heart of FDOT's planning and programming process.

WHY DO WE USE THEM?

FDOT uses performance measures to:

- Assess how well Florida's multimodal transportation system is functioning —including feedback from and collaboration with key stakeholder organizations
- Provide information to support and inform decision-making
- Assess how effectively and efficiently transportation programs, projects and services are being delivered
- Determine customer satisfaction levels
- Demonstrate transparency and accountability to Florida's citizens and to foster collaboration with FDOT's transportation system stakeholders

WHAT IS MEASURED?

Each performance report is listed below along with some of the associated performance measures:

SAFETY

Fatal and serious injuries related to impaired driving, speeding and aggressive driving, distracted driving, at-risk drivers, vulnerable road users

PRESERVATION

Percent of pavement and bridges meeting condition standards, percent of maintenance activities that meet department standards, roadway clearance times due to incidents and crashes

MOBILITY

Vehicle miles traveled, transit ridership, freight tonnage, freight and port access, hours of delay, travel time reliability, travel that is heavily congested

ECONOMY

Return On Investment of FDOT programs, capacity funds for the SIS, Florida share of U.S. trade, Florida value of freight, construction projects completed on-time and within budget

ENVIRONMENT

Air quality, water quality, impacts to the physical, natural and cultural environment, vibrant and healthy communities, and customer satisfaction.

HOW IS TRANSPORTATION PERFORMANCE MANAGEMENT BEING IMPLEMENTED?

The Moving Ahead for Progress in the 21st Century Act (MAP-21) included several provisions that collectively are transforming the Federal surface transportation program to be focused on the achievement of performance outcomes.

The performance outcomes provisions, administered by different agencies within the U.S. Department of Transportation (USDOT), were implemented by rulemakings, including several under FHWA's purview. The provisions are organized by six performance management elements.

The Fixing America's Surface Transportation (FAST) Act, signed in 2015, built on the MAP-21 changes and provided long-term funding certainty for surface transportation infrastructure planning and investment.

TPM performance management outcomes are grouped into six elements to more effectively communicate the efforts under way to implement the statutory requirements.

1. **National Goals:** Congressionally established goals or program purpose to focus the Federal-aid highway program into specific areas of performance.
2. **Measures:** FHWA-established measures to assess performance/condition in carrying out performance-based Federal-aid highway programs.
3. **Targets:** Targets established by Federal-aid highway funding recipients for the measures to document future performance expectations
4. **Plans:** Development of strategic and/or tactical plans by Federal funding recipients to identify strategies and investments that address performance needs.
5. **Reports:** Development of reports by Federal funding recipients that document progress toward target achievement, including the effectiveness of Federal-aid highway investments.
6. **Accountability and Transparency:** FHWA-developed requirements for Federal funding recipients to use to achieve or make significant progress toward targets.

WHAT ARE THE FEDERAL PLANNING REQUIREMENTS?

Per 23 CFR §450.306 Scopes of the metropolitan transportation planning process, the metropolitan transportation planning process shall be continuous, cooperative, and comprehensive; consider the Federal Planning Factors (**See Figure 1: Federal Planning Requirements and Expectations**), and provide a performance-based approach to decision making. Performance-based planning requires MPOs to establish performance targets that address the performance measures or standards of the National Performance Management Measures, Public Transportation Safety Program, and Transit Asset Management. **Figure 2: FHWA Performance Measures Implementation Requirements in Florida** outlines the schedule for the incorporation of the National Performance Management Measures into the planning process. MPOs shall also “integrate into the metropolitan transportation planning processes, directly or by reference, the goals, objectives, performance measures, and targets described in other State transportation plans and processes as well as any plans developed under 49 USC chapter 53 by providers of public transportation, including:”

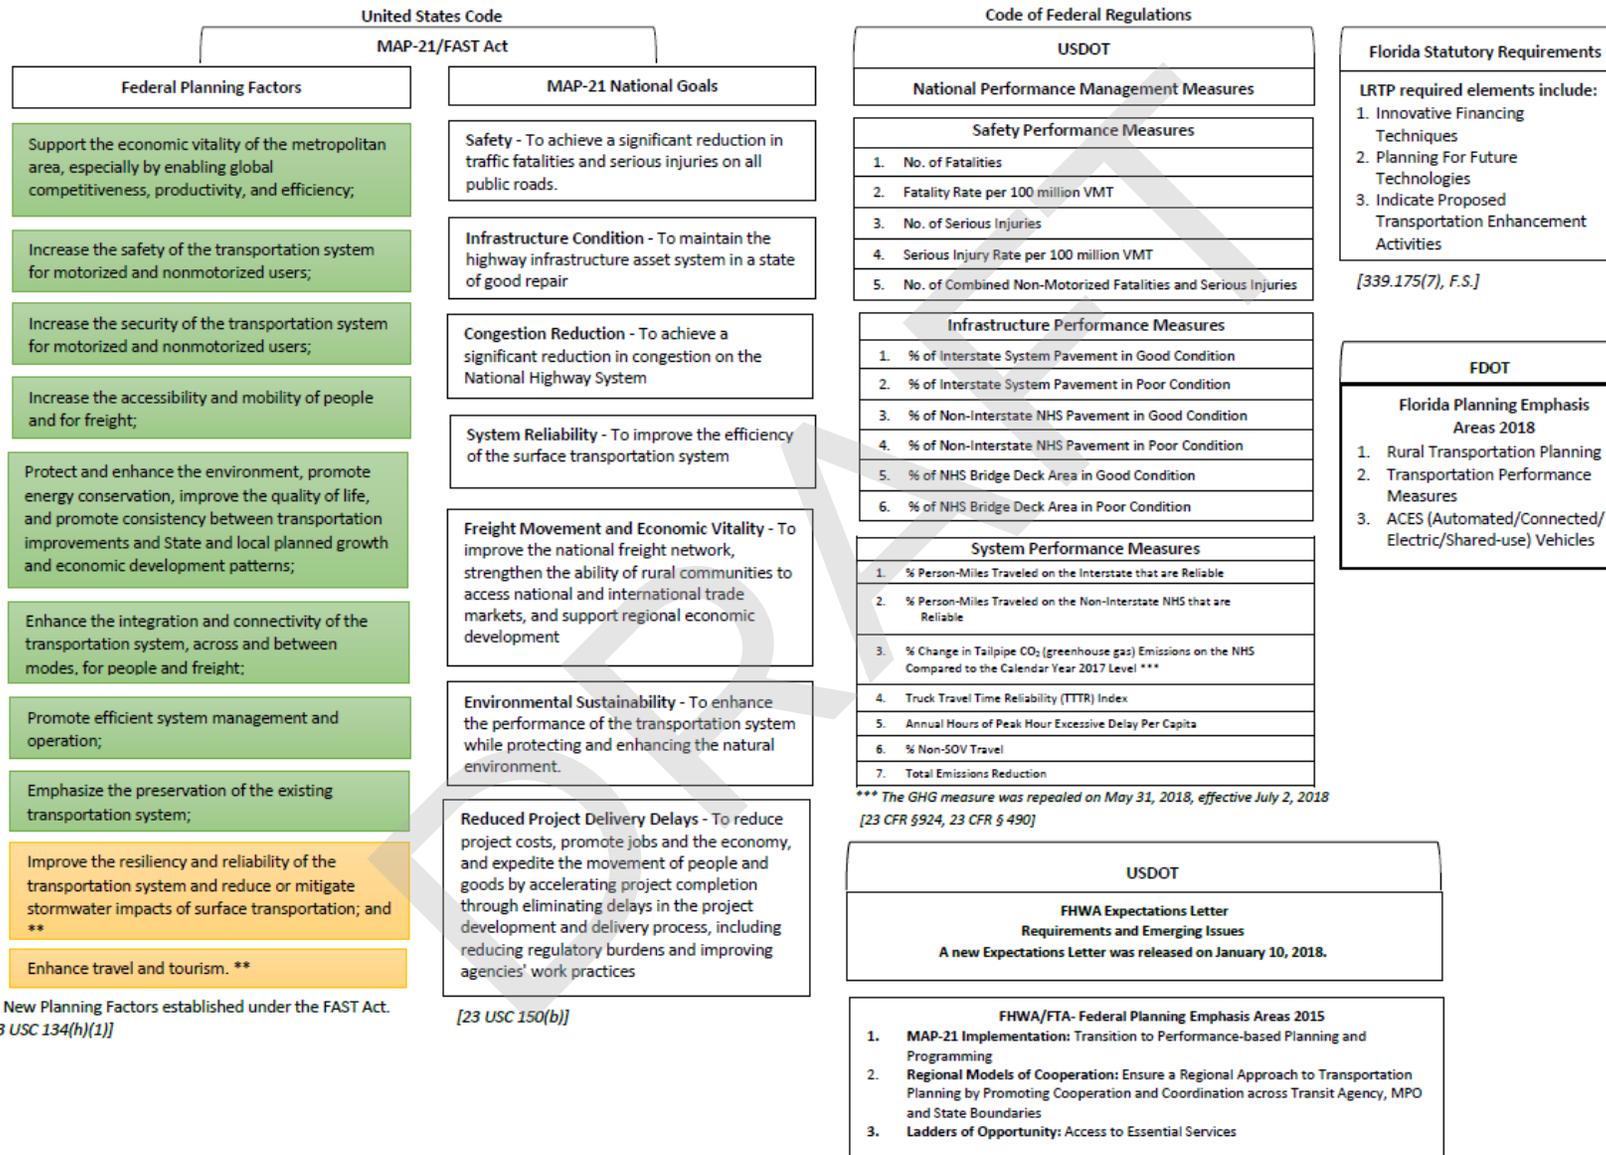

- State asset management plan and Transit Asset Management Plan;
- Appropriate portions of the Strategic Highway Safety Plan;
- Public Transportation Agency Safety Plan;
- Other safety and security planning and review processes, plans, and programs;
- The CMAQ Program Performance Plan, if applicable;
- Appropriate portions of the State Freight Plan;
- The congestion management process, if applicable; and
- Other State transportation plans and processes required as part of a performance-based program.

Per 23 CFR §450.324 Development and content of the metropolitan transportation plan, the MPO Long Range Transportation Plan (LRTP) shall include the following for the National Performance Management Measures:

- ***A description of the National Performance Management Measures and established performance targets*** used in assessing the performance of the transportation system
- A ***System Performance Report*** evaluating the condition and performance of the transportation system, including progress achieved by the MPO in meeting performance targets.
- MPOs that voluntarily elect to conduct scenario planning shall describe how the preferred scenario has “improved” performance of the transportation system. 23 CFR §450.324

Additionally, per 23 CFR §450.326 Development and content of the transportation improvement program (TIP), the Transportation Improvement Program (TIP) shall make progress toward achieving performance targets and include a ***description of the anticipated effect of the TIP toward achieving the performance targets*** identified by the MPO in the LRTP, linking investment priorities in the TIP to those performance targets.

Figure 1: Federal Planning Requirements and Expectations

** New Planning Factors established under the FAST Act. [23 USC 134(h)(1)]

[23 USC 150(b)]

*** The GHG measure was repealed on May 31, 2018, effective July 2, 2018 [23 CFR §924, 23 CFR § 490]

Legend:	Related to Performance Measures (Final Rules: 3/15/16, 1/18/17, 5/19/17)						
	Related to Plans the MPO Needs to Integrate (23 CFR 658.306(d)(4), which may or may not have Performance Measures (Federal Register Notice:10/14/16, Final Rule: 10/24/16)						
	Related to New Planning Requirements (Final Rule: 5/27/16)						
¹ The 2 year implementation date for the L RTP is Apr 2018. Since the planning rule is not effective until May 2018, that is when the Safety PM is required to be implemented.							
² 6/30/2019: FDOT Submits Asset Management Plan Meeting All Requirements; 11/23/2020: FDOT must prepare an evaluation to determine if there are reasonable alternatives to roads, highways, and bridges that require repair and reconstruction activities on two or more occasions due to emergency events prior to including any project relating to such facility in the STIP. (23 CFR 658.306(b))							
³ If targets are set and effective, the S/TIP is expected to meet the associated performance measurement requirements even if the L RTP has not yet been updated.							
Next L RTP Due Dates							
October 2019: Palm Beach (16); Miami-Dade (23)	October 2020: Gainesville (5); Charlotte-Punta Gorda (5); Space Coast (8)					Feb 2021: St. Lucie (3)	
November 2019: Hillsborough (12); North Florida (13)	November 2020: Florida-Alabama (3); Capital Region (16); Ocala-Marion (24)					March 2021: Heartland (16)	
December 2019: Hernando-Citrus (9); Pinellas (10); Broward (11); Pasco (11)	December 2020: METROPOLAN (9); Lake Sumter (9); Indian River (9); Polk (10);					June 2021: Bay (22)	
September 2020: River to Sea (23)	Collier (11); Martin (14); Sarasota-Manatee (14); Lee (18)					Feb 2022: Okaloosa-Walton (16)	

In 2022, the FDOT Office of Policy Planning distributed in Draft form to the MPOs a simplified Transportation Performance Measures timeline with the key dates for the latter portion of CY 2021, along with those for CY 2022 and CY 2023, which are illustrated below:

Figure 3: FDOT 2021-2023 Transportation Performance Measures Timeline

Office of Policy Planning

Florida Department of Transportation
605 Suwannee St, Tallahassee, FL

2021 TPM Deadlines – PM1, PM2, PM3, Transit Asset Management, Transit Safety/PTASP

2021 Date ¹	PM Area	Item
August 31	PM1	FDOT reports safety targets for 2022 in the HSIP annual report, along with a discussion of progress toward achieving targets, highway safety trends, basis of each established target, and reasons for differences in actual outcomes and targets.
September 30	PM2	FHWA will notify FDOT of its annual determination of minimum Interstate pavement condition level. The percentage of lane-miles of the Interstate System in poor condition must not exceed 5%.
October 1	PM2	FHWA will notify FDOT of its annual determination of minimum NHS bridge condition level. The percentage of the deck area of NHS bridges classified as structurally deficient must not exceed 10%.
October 1	PM3	FDOT must submit a request to FHWA if it intends to use an alternative travel time data set than the NPMRDS for the following calendar year
October 1	Transit Assets	Transit providers (and FDOT for the Group TAM Plan) report transit asset data to FTA and establish 2022 transit asset targets. MPOs set new targets as part of LRTP updates. MPOs should reference the most recent transit provider targets with each annual TIP update.

2022 TPM Deadlines – PM1, PM2, PM3, Transit Asset Management, Transit Safety/PTASP

2022 Date ¹	PM Area	Item
February 27 ²	PM1	MPOs establish 2022 PM1 targets, not later than 180 days after FDOT establishes and reports 2022 PM1 targets in the HSIP annual report (on or before August 31, 2021)
March 15	PM2	FDOT reports 2021 annual National Bridge Inventory (NBI) data to FHWA.
~March	PM1	FHWA will notify FDOT whether the State met or made significant progress toward its 2020 safety targets.
April 15	PM2	FDOT reports 2021 Interstate pavement data to HPMS.
June 15	PM2	FDOT reports 2021 non-Interstate NHS pavement data to HPMS.
June 15	PM3	FDOT reports metric data to HPMS for the PM3 travel-time based measures (Travel Time reliability and Freight reliability).

¹ All deadlines are on or before the date listed.
² MPO action must take place on or before 180 days after FDOT or transit provider action.

2022 Date ¹	PM Area	Item
July 1	NHSTA Safety	Florida reports 12 highway safety targets for 2023 to NHTSA.
July 20	PTASP	Transit providers subject to the PTASP requirements must certify an updated PTASP and 2023 transit safety targets. MPOs set new targets as part of LRTP updates. MPOs should reference the most recent transit provider targets with each annual TIP update.
August 31	PM1	FDOT reports safety targets for 2023 in the HSIP annual report, along with a discussion of progress toward achieving targets, highway safety trends, basis of each established target, and reasons for differences in actual outcomes and targets.
September 30	PM2	FHWA will notify FDOT of its annual determination of minimum Interstate pavement condition level. The percentage of lane-miles of the Interstate System in poor condition must not exceed 5%.
October 1	PM2	FHWA will notify FDOT of its annual determination of minimum NHS bridge condition level. The percentage of the deck area of NHS bridges classified as structurally deficient must not exceed 10%.
October 1	Transit Assets	FDOT develops a new Group TAM Plan with 2023 transit asset targets. Each transit provider not participating in FDOT's Group TAM Plan also develops a new TAM Plan with agency targets. MPOs set new targets as part of LRTP updates. MPOs should reference the most recent transit provider targets with each annual TIP update.
October 1	PM2 and PM3	FDOT submits the Final Performance Period Report to FHWA for the first performance period (Jan. 1, 2018 to Dec. 31, 2021).
October 1	PM2 and PM3	FDOT develops and submits its Baseline Performance Period report to FHWA for the second performance period (Jan. 1, 2022 to Dec. 31, 2025) with new 2-year and 4-year PM2 and PM3 targets.
October 1	PM3	FDOT must submit a request to FHWA if it intends to use an alternative travel time data set than the NPMRDS for the following calendar year
November 1	PM2	FDOT submits new TAMP to FHWA.

2023 TPM Deadlines – PM1, PM2, PM3, Transit Asset Management, Transit Safety/PTASP

2023 Date ¹	PM Area	Item
February 27 ²	PM1	MPOs establish 2023 PM1 targets, not later than 180 days after FDOT establishes and reports 2023 PM1 targets in the HSIP annual report (August 31, 2022)
March 15	PM2	FDOT reports 2022 annual National Bridge Inventory (NBI) data to FHWA.
~March	PM1	FHWA will notify FDOT whether the State met or made significant progress toward its 2021 safety targets.
March 30 ²	PM2 and PM3	MPOs establish new 4-year targets for the second performance period, not later than 180 days after FDOT establishes and reports new 2-year and 4-year PM2 and PM3 targets (October 1, 2022).
April 15	PM2	FDOT reports 2022 Interstate pavement data to HPMS.
June 15	PM2	FDOT reports 2022 non-Interstate NHS pavement data to HPMS.
June 15	PM3	FDOT reports metric data to HPMS for the PM3 travel-time based measures (Travel Time reliability and Freight reliability).
July 1	NHSTA Safety	Florida reports 12 highway safety targets for 2024 to NHTSA.
July 20	PTASP	Transit providers subject to the PTASP requirements must certify an updated PTASP and 2024 transit safety targets. MPOs set new targets as part of LRTP updates. MPOs should reference the most recent transit provider targets with each annual TIP update.
August 31	PM1	FDOT reports safety targets for 2024 in the HSIP annual report, along with a discussion of progress toward achieving targets, highway safety trends, basis of each established target, and reasons for differences in actual outcomes and targets.
September 30	PM2	FHWA will notify FDOT of its annual determination of minimum <u>Interstate</u> pavement condition level. The percentage of lane-miles of the Interstate System in poor condition must not exceed 5%.
October 1	PM2	FHWA will notify FDOT of its annual determination of minimum NHS bridge condition level. The percentage of the deck area of NHS bridges classified as structurally deficient must not exceed 10%.
October 1	PM3	FDOT must submit a request to FHWA if it intends to use an alternative travel time data set than the NPMRDS for the following calendar year
October 1	Transit Assets	Transit providers (and FDOT for the Group TAM Plan) report transit asset data to FTA and establish 2024 transit asset targets. MPOs set new targets as part of LRTP updates. MPOs should reference the most recent transit provider targets with each annual TIP update.

LONG RANGE TRANSPORTATION PLAN (LRTP) AND TRANSPORTATION IMPROVEMENT PROGRAM (TIP) COMPLIANCE

The FDOT Highway Safety Plan, Highway Safety Improvement Program, Freight Mobility Plan, and Asset Management Plan have been incorporated, by reference, into the 2045 LRTP and 2020 TIP as part of LRTP and TIP amendments through Resolution #33-19 (June 20, 2019).

The Miami-Dade 2045 Long Range Transportation Plan was adopted on September 26, 2019 and the Miami-Dade 2022/2023 – 2026/2027 TIP was adopted on May 20, 2021. Per the Planning Rule, the System Performance Report for the Miami-Dade TPO is included for the required Highway Safety (PM1), Bridge and Pavement (PM2), System Performance (PM3), Transit Asset Management (TAM) and Public Transit Agency Safety Plan (PTASP).

TRANSPORTATION PERFORMANCE MEASURES CONSENSUS PLANNING DOCUMENT

The TPM Consensus Document has been cooperatively developed by the FDOT and Florida's 27 Metropolitan Planning Organizations through the Florida Metropolitan Planning Organization Advisory Council (MPOAC), and, by representation on the MPO and TPO boards and committees, and the providers of public transportation in the MPO and TPO planning areas. The purpose of the document is to outline the minimum roles of FDOT, the MPO/TPOs, and the providers of public transportation in the MPO/TPO planning area to ensure consistency to the maximum extent practicable in satisfying the transportation performance management requirements promulgated by the United States Department of Transportation.

The current Federal legislation requires state DOTs, MPO/TPOs, and transit agencies to conduct performance-based planning by setting data-driven performance targets for several transportation performance measures, and programming transportation investments that are expected to result in achievement of defined targets. The document describes the general processes through which FDOT, the MPO/TPOs, and the providers of public transportation in MPO/TPO planning areas will cooperatively develop and share information related to transportation performance management.

Based on a recent directive of the Federal Highway Administration and FDOT Office of Policy Planning, it was suggested to all TPO/MPO's in Florida to separately adopt this document to avoid the need to include it with each TIP on an annual basis. Once adopted as a stand-alone resource, the TPO does not need to continuously include the Consensus Planning Document in the TIP.

By Resolution 12-2022 on March 3, 2022 (illustrated on the below in **Figure 1: TPO Resolution**), the TPO Governing Board adopted the Transportation Performance Measures Consensus Planning Document.

<p style="text-align: center;">Agenda Item 6.A.7</p> <p style="text-align: center;">TPO RESOLUTION #12-2022</p> <p style="text-align: center;">RESOLUTION ADOPTING THE TRANSPORTATION PERFORMANCE MEASURES CONSENSUS PLANNING DOCUMENT</p> <p>WHEREAS, the Interlocal Agreement creating and establishing the Metropolitan Planning Organization (MPO) for the Miami Urbanized Area requires that the Miami-Dade Transportation Planning Organization (TPO), in its role as the MPO, provide a structure to evaluate the adequacy of the transportation planning and programming process; and</p> <p>WHEREAS, the TPO Governing Board is charged with making transportation planning decisions in the Miami Urbanized Area; and</p> <p>WHEREAS, the Transportation Planning Council (TPC) has been established and charged with the responsibility and duty of fulfilling the aforementioned functions; and</p> <p>WHEREAS, the Transportation Performance Measures Consensus Planning Document has been cooperatively developed by the Florida Department of Transportation (FDOT) and Florida's twenty-seven (27) Metropolitan Planning Organizations (MPOs) through the Florida Metropolitan Planning Organization Advisory Council; and</p> <p>WHEREAS, this document describes the general processes through which FDOT, the MPOs, and the providers of public transportation in MPO planning areas will cooperatively develop and share information related to transportation performance management; and</p> <p>WHEREAS, based on a recent directive from the Federal Highway Administration and the FDOT Office of Policy Planning, it was requested that all MPOs in Florida separately adopt this document to reduce redundancy with the annual publication of said document in the Transportation Improvement Program (TIP); and</p> <p>WHEREAS, the TPC has reviewed the Transportation Performance Measures Consensus Planning Document, made a part hereof, and finds it consistent with the goals and objectives of the Transportation Plan for the Miami Urbanized Area,</p> <p>NOW, THEREFORE, BE IT RESOLVED BY THE GOVERNING BOARD OF THE TRANSPORTATION PLANNING ORGANIZATION IN ITS ROLE AS THE MPO FOR THE MIAMI URBANIZED AREA, that this Board hereby adopts the attached Transportation Performance Measures Consensus Planning Document.</p> <p>The adoption of the foregoing resolution was moved by Board Member Rebecca Sosa. The motion was seconded by Board Member Eileen Higgins, and upon being put to a vote, the vote was as follows:</p> <p style="text-align: center;">Chairman Oliver G. Gilbert III - Aye Vice Chairman Juan Carlos Bermudez - Absent</p> <table style="width: 100%; border: none;"> <tr> <td style="width: 33%;">Board Member Philippe Bien-Aime</td> <td style="width: 33%;">-Aye</td> <td style="width: 33%;">Board Member Steven D. **Transportation Performance Measures
Consensus Planning Document**

Purpose and Authority

This document has been cooperatively developed by the Florida Department of Transportation (FDOT) and Florida's 27 Metropolitan Planning Organizations (MPOs) through the Florida Metropolitan Planning Organization Advisory Council (MPOAC), and, by representation on the MPO boards and committees, the providers of public transportation in the MPO planning areas.

The purpose of the document is to outline the minimum roles of FDOT, the MPOs, and the providers of public transportation in the MPO planning areas to ensure consistency to the maximum extent practicable in satisfying the transportation performance management requirements promulgated by the United States Department of Transportation in Title 23 Parts 450, 490, 625, and 673 of the *Code of Federal Regulations* (23 CFR). Specifically:

- 23 CFR 450.314(h)(1) requires that "The MPO(s), State(s), and providers of public transportation shall jointly agree upon and develop specific written procedures for cooperatively developing and sharing information related to transportation performance data, the selection of performance targets, the reporting of performance targets, the reporting of performance to be used in tracking progress toward achievement of critical outcomes for the region of the MPO, and the collection of data for the State asset management plan for the National Highway System (NHS)."
- 23 CFR 450.314(h)(2) allows for these provisions to be "Documented in some other means outside the metropolitan planning agreements as determined cooperatively by the MPO(s), State(s), and providers of public transportation."

Section 339.175(1), Florida Statutes creates the MPOAC to "Assist MPOs in carrying out the urbanized area transportation planning process by serving as the principal forum for collective policy discussion pursuant to law" and to "Serve as a clearinghouse for review and comment by MPOs on the Florida Transportation Plan and on other issues required to comply with federal or state law in carrying out the urbanized transportation planning processes." The MPOAC Governing Board membership includes one representative of each MPO in Florida.

This document was developed, adopted, and subsequently updated by joint agreement of the FDOT Secretary and the MPOAC Governing Board. Each MPO will adopt this document by incorporation in its annual Transportation Improvement Program (TIP) or by separate board action as documented in a resolution or meeting minutes, which will serve as documentation of agreement by the MPO and the provider(s) of public transportation in the MPO planning area to carry out their roles and responsibilities as described in this general document.

Roles and Responsibilities

This document describes the general processes through which FDOT, the MPOs, and the providers of public transportation in MPO planning areas will cooperatively develop and share information related to transportation performance management.

Email communications will be considered written notice for all portions of this document. Communication with FDOT related to transportation performance management generally will occur through the Administrator for Metropolitan Planning in the Office of Policy Planning. Communications with the MPOAC related to transportation performance management generally will occur through the Executive Director of the MPOAC.

1. Transportation performance data:

- a) FDOT will collect and maintain data, perform calculations of performance metrics and measures, and provide to each MPO the results of the calculations used to develop statewide targets for all applicable federally required performance measures. FDOT also will provide to each MPO the results of calculations for each applicable performance measure for the MPO planning area, and the county or counties included in the MPO planning area.¹ FDOT and the MPOAC agree to use the National Performance Management Research Data Set as the source of travel time data and the defined reporting segments of the Interstate System and non-Interstate National Highway System for the purposes of calculating the travel time-based measures specified in 23 CFR 490.507, 490.607, and 490.707, as applicable.
- b) Each MPO will share with FDOT any locally generated data that pertains to the federally required performance measures, if applicable, such as any supplemental data the MPO uses to develop its own targets for any measure.
- c) Each provider of public transportation is responsible for collecting performance data in the MPO planning area for the transit asset management measures as specified in 49 CFR 625.43 and the public transportation safety measures as specified in the National Public Transportation Safety Plan. The providers of public transportation will provide to FDOT and the appropriate MPO(s) the transit performance data used to support these measures.

2. Selection of performance targets:

FDOT, the MPOs, and providers of public transportation will select their respective performance targets in coordination with one another. Selecting targets generally refers to the processes used to identify, evaluate, and make decisions about potential targets prior to action to formally establish the targets. Coordination will include as many of the following opportunities as deemed appropriate for each measure: in-person meetings, webinars, conferences calls, and email/written communication. Coordination will include timely

¹ When an MPO planning area covers portions of more than one state, as in the case of the Florida-Alabama TPO, FDOT will collect and provide data for the Florida portion of the planning area.

² If any Florida urbanized area becomes nonattainment for the National Ambient Air Quality Standards, FDOT also will provide appropriate data at the urbanized area level for the specific urbanized area that is designated.

sharing of information on proposed targets and opportunities to provide comment prior to establishing final comments for each measure.

The primary forum for coordination between FDOT and the MPOs on selecting performance targets and related policy issues is the regular meetings of the MPOAC. The primary forum for coordination between MPOs and providers of public transportation on selecting transit performance targets is the TIP development process.

Once targets are selected, each agency will take action to formally establish the targets in its area of responsibility.

- a) FDOT will select and establish a statewide target for each applicable federally required performance measure.
 - i. To the maximum extent practicable, FDOT will share proposed statewide targets at the MPOAC meeting scheduled in the calendar quarter prior to the dates required for establishing the target under federal rule. FDOT will work through the MPOAC to provide email communication on the proposed targets to the MPOs not in attendance at this meeting. The MPOAC as a whole, and individual MPOs as appropriate, will provide comments to FDOT on the proposed statewide targets within sixty (60) days of the MPOAC meeting. FDOT will provide an update to the MPOAC at its subsequent meeting on the final proposed targets, how the comments received from the MPOAC and any individual MPOs were considered, and the anticipated date when FDOT will establish final targets.
 - ii. FDOT will provide written notice to the MPOAC and individual MPOs within two (2) business days of when FDOT establishes final targets. This notice will provide the relevant targets and the date FDOT established the targets, which will begin the 180-day time-period during which each MPO must establish the corresponding performance targets for its planning area.
- b) Each MPO will select and establish a target for each applicable federally required performance measure. To the extent practicable, MPOs will propose, seek comment on, and establish their targets through existing processes such as the annual TIP update. For each performance measure, an MPO will have the option of either³:
 - i. Choosing to support the statewide target established by FDOT, and providing documentation (typically in the form of meeting minutes, a letter, a resolution, or incorporation in a document such as the TIP) to FDOT that the MPO agrees to plan and program projects so that they contribute toward the accomplishments of FDOT's statewide targets for that performance measure.
 - ii. Choosing to establish its own target, using a quantifiable methodology for its MPO planning area. If the MPO chooses to establish its own target, the MPO will coordinate with FDOT and, as applicable, providers of public transportation regarding the approach used to develop the target and the proposed target prior to

³ When an MPO planning area covers portions of more than one state, as in the case of the Florida-Alabama TPO, that MPO will be responsible for coordinating with each state DOT in setting and reporting targets and associated data.

establishment of a final target. The MPO will provide FDOT and, as applicable, providers of public transportation, documentation (typically in the form of meeting minutes, a letter, a resolution, or incorporation in a document such as the TIP) that includes the final targets and the date when the targets were established.

- c) The providers of public transportation in MPO planning areas will select and establish performance targets annually to meet the federal performance management requirements for transit asset management and transit safety under 49 U.S.C. 5326(c) and 49 U.S.C. 5329(d).
 - i. The Tier I providers of public transportation will establish performance targets to meet the federal performance management requirements for transit asset management. Each Tier I provider will provide written notice to the appropriate MPO and FDOT when it establishes targets. This notice will provide the final targets and the date when the targets were established, which will begin the 180-day period within which the MPO must establish its transit-related performance targets. MPOs may choose to update their targets when the Tier I provider(s) updates theirs, or when the MPO amends its long-range transportation plan by extending the horizon year in accordance with 23 CFR 450.324(c).
 - ii. FDOT is the sponsor of a Group Transit Asset Management plan for subrecipients of Section 5311 and 5310 grant funds. The Tier II providers of public transportation may choose to participate in FDOT's group plan or to establish their own targets. FDOT will notify MPOs and those participating Tier II providers following of establishment of transit-related targets. Each Tier II provider will provide written notice to the appropriate MPO and FDOT when it establishes targets. This notice will provide the final targets and the date the final targets were established, which will begin the 180-day period within which the MPO must establish its transit-related performance targets. MPOs may choose to update their targets when the Tier II provider(s) updates theirs, or when the MPO amends its long-range transportation plan by extending the horizon year in accordance with 23 CFR 450.324(c).
 - iii. FDOT will draft and certify a Public Transportation Agency Safety Plan for any small public transportation providers (defined as those who are recipients or subrecipients of federal financial assistance under 49 U.S.C. 5307, have one hundred (100) or fewer vehicles in peak revenue service, and do not operate a rail fixed guideway public transportation system). FDOT will coordinate with small public transportation providers on selecting statewide public transportation safety performance targets, with the exception of any small operator that notifies FDOT that it will draft its own plan.
 - iv. All other public transportation service providers that receive funding under 49 U.S. Code Chapter 53 (excluding sole recipients of sections 5310 and/or 5311 funds) will provide written notice to the appropriate MPO and FDOT when they establish public transportation safety performance targets. This notice will provide the final targets and the date the final targets were established, which will begin the 180-day period within which the MPO must establish its transit safety

performance targets. MPOs may choose to update their targets when the provider(s) updates theirs, or when the MPO amends its long-range transportation plan by extending the horizon year in accordance with 23 CFR 450.324(c).

- v. If the MPO chooses to support the asset management and safety targets established by the provider of public transportation, the MPO will provide to FDOT and the provider of public transportation documentation that the MPO agrees to plan and program MPO projects so that they contribute toward achievement of the statewide or public transportation provider targets. If the MPO chooses to establish its own targets, the MPO will develop the target in coordination with FDOT and the providers of public transportation. The MPO will provide FDOT and the providers of public transportation documentation (typically in the form of meeting minutes, a letter, a resolution, or incorporation in a document such as the TIP) that includes the final targets and the date the final targets were established. In cases where two or more providers operate in an MPO planning area and establish different targets for a given measure, the MPO has the options of coordinating with the providers to establish a single target for the MPO planning area, or establishing a set of targets for the MPO planning area.

3. Reporting performance targets:

- a) Reporting targets generally refers to the process used to report targets, progress achieved in meeting targets, and the linkage between targets and decision making processes FDOT will report its final statewide performance targets to the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) as mandated by the federal requirements.
 - i. FDOT will include in future updates or amendments of the statewide long-range transportation plan a description of all applicable performance measures and targets and a system performance report, including progress achieved in meeting the performance targets, in accordance with 23 CFR 450.216(f).
 - ii. FDOT will include in future updates or amendments of the statewide transportation improvement program a discussion of the anticipated effect of the program toward achieving the state's performance targets, linking investment priorities to those performance targets, in accordance with 23 CFR 450.218 (q).
 - iii. FDOT will report targets and performance data for each applicable highway performance measure to FHWA, in accordance with the reporting timelines and requirements established by 23 CFR 490; and for each applicable public transit measure to FTA, in accordance with the reporting timelines and requirements established by 49 CFR 625 and 40 CFR 673.
- b) Each MPO will report its final performance targets as mandated by federal requirements to FDOT. To the extent practicable, MPOs will report final targets through the TIP update or other existing documents.
 - i. Each MPO will include in future updates or amendments of its metropolitan long-range transportation plan a description of all applicable performance measures

and targets and a system performance report, including progress achieved by the MPO in meeting the performance targets, in accordance with 23 CFR 450.324(f)(3-4).

- ii. Each MPO will include in future updates or amendments of its TIP a discussion of the anticipated effect of the TIP toward achieving the applicable performance targets, linking investment priorities to those performance targets, in accordance with 23 CFR 450.326(d).
- iii. Each MPO will report target-related status information to FDOT upon request to support FDOT's reporting requirements to FHWA.
- c) Providers of public transportation in MPO planning areas will report all established transit asset management targets to the FTA National Transit Database (NTD) consistent with FTA's deadlines based upon the provider's fiscal year and in accordance with 49 CFR Parts 625 and 630, and 49 CFR Part 673.
- 4. Reporting performance to be used in tracking progress toward attainment of performance targets for the MPO planning area:
 - a) FDOT will report to FHWA or FTA as designated, and share with each MPO and provider of public transportation, transportation performance for the state showing the progress being made towards attainment of each target established by FDOT, in a format to be mutually agreed upon by FDOT and the MPOAC.
 - b) If an MPO establishes its own targets, the MPO will report to FDOT on an annual basis transportation performance for the MPO area showing the progress being made towards attainment of each target established by the MPO, in a format to be mutually agreed upon by FDOT and the MPOAC. To the extent practicable, MPOs will report progress through existing processes including, but not limited to, the annual TIP update.
 - c) Each provider of public transportation will report transit performance annually to the MPO(s) covering the provider's service area, showing the progress made toward attainment of each target established by the provider.
- 5. Collection of data for the State asset management plans for the National Highway System (NHS):
 - a) FDOT will be responsible for collecting bridge and pavement condition data for the State asset management plan for the NHS. This includes NHS roads that are not on the State highway system but instead are under the ownership of local jurisdictions, if such roads exist.

TRANSPORTATION PERFORMANCE MANAGEMENT

SYSTEM PERFORMANCE REPORT: SAFETY

DRAFT

SAFETY PERFORMANCE MANAGEMENT MEASURES

Safety is the first national goal identified in MAP-21 and maintained in the FAST Act. In March of 2016, the Highway Safety Improvement Program (HSIP) Final Rule and National Performance Management Measures: Highway Safety Improvement Program Final Rule (known as the Safety Performance Management Measures (Safety PM) Final Rule) were published in the Federal Register [23 CFR 924, 23 CFR 490] with an effective date of April 14, 2016. The HSIP Final Rule was established to clarify requirements under the HSIP and address MAP-21 and the FAST Act for consistency. The objective of the HSIP is to “significantly reduce fatalities and serious injuries resulting from crashes on all public roads,” [23 CFR 924].

PERFORMANCE MANAGEMENT MEASURES

The Safety PM Final Rule was developed to support the HSIP and requires State DOTs and MPOs to set targets for the following Safety Performance Management Measures (which apply to all public roads) and to report on progress toward achieving those targets to the State DOT.

- Number of Fatalities
- Fatality Rate per 100 million Vehicle Miles Traveled (VMT)
- Number of Serious Injuries
- Serious Injury Rate per 100 million VMT
- Number of Combined Non-Motorized Fatalities and Serious Injuries

PERFORMANCE TARGETS

In 2012, Florida adopted “Driving Down Fatalities,” their version of the national traffic safety vision “Toward Zero Deaths.” Understanding that zero fatalities cannot be reached within the 2018 Highway Safety Plan (HSP), Florida developed data models to forecast the number of fatalities and serious injuries that are statistically expected to occur to drive down fatalities and serious injuries with an ultimate vision of zero. [Source: SHSP, HSP] (2017 Florida Highway Safety Improvement Program). FDOT firmly believes that every life counts and established a 2018 target of zero for each of the Safety Performance Management Measures in the 2017 Highway Safety Improvement Plan (HSIP).

The TPO, along with FDOT and other traffic safety partners, shares a high concern about the upward trending of traffic crashes, both statewide and nationally. As such, the Miami-Dade TPO supports FDOT's statewide 2022 safety targets. The safety initiatives within this TIP are intended to contribute toward achieving these targets.

Annually in August, FDOT establishes and reports statewide safety performance targets in the HSIP Annual Report to FHWA. By February of the following year, the TPO will adopt FDOT's targets or establish their own.

FDOT has continuously supported a target of zero for the Safety Performance Management Measures. The 2020 HSIP Annual Report continued to establish a target of zero for each of the five federal Safety Performance Management Measures for Calendar Year 2022. By adopting these targets (Per Resolution #05-22) on January 20, 2022 as illustrated below in **Figure 1: TPO Resolution**, the Miami-Dade TPO will support achievement of the safety performance management targets by planning and programming projects in the TIP and LRTP that once implemented, are anticipated to make progress toward achieving accomplishment of the FDOT safety target of zero. The targets for the five Safety Performance Management Measures adopted by the TPO for 2022, shown in **Table 1: 2022 Safety Performance Management Measure Targets**, indicates the TPO is expressly supporting the statewide targets developed by FDOT.

<TPO Resolution on following pages>

Figure 1: TPO Resolution

Agenda Item 6.B.4

TPO RESOLUTION #05-2022

RESOLUTION ESTABLISHING THE FLORIDA DEPARTMENT OF TRANSPORTATION'S "VISION ZERO" SAFETY PERFORMANCE MEASURE TARGETS FOR TRAFFIC FATALITIES AND INJURIES FOR CALENDAR YEAR 2022

WHEREAS, the Interlocal Agreement creating and establishing the Metropolitan Planning Organization (MPO) for the Miami Urbanized Area requires that the Miami-Dade Transportation Planning Organization (TPO), in its role as the MPO, provide a structure to evaluate the adequacy of the transportation planning and programming process; and

WHEREAS, the Transportation Planning Council (TPC) has been established and charged with the responsibility and duty of fulfilling the aforementioned functions; and

WHEREAS, the Moving Ahead for Progress in the 21st Century Act (MAP-21) required the United States Department of Transportation (USDOT) to establish mobility performance measures for fatalities and serious injuries, both number and rate per vehicle mile traveled, on all public roads; and

WHEREAS, federal rules developed to implement MAP-21 require that state DOTs establish statewide targets each year for the traffic safety performance measures: number of fatalities, rate of fatalities, number of serious injuries, rate of serious injuries and number of non-motorized fatalities and non-motorized serious injuries; and

WHEREAS, MPOs have the option to support the statewide performance measure targets or establish their own; and

WHEREAS, the 2021 Florida Highway Safety Improvement Program includes "Vision Zero" targets for federal safety performance measures for 2022; and

WHEREAS, the TPO has coordinated the establishment of "Vision Zero" performance measure targets with the Florida Department of Transportation (FDOT) through the statewide Metropolitan Planning Organization Advisory Council; and

WHEREAS, under TPO Resolution #15-2021, the TPO Governing Board established the FDOT's "Vision Zero" performance measure targets for calendar year 2021; and

WHEREAS, the TPC has reviewed the attached FDOT 2022 "Vision Zero" Performance Measure Targets for Traffic Fatalities and Injuries, and finds them consistent with the goals and objectives of the Transportation Plan for the Miami Urbanized Area,

NOW, THEREFORE, BE IT RESOLVED BY THE GOVERNING BOARD OF THE TRANSPORTATION PLANNING ORGANIZATION (TPO) IN ITS ROLE AS THE MPO FOR THE MIAMI URBANIZED AREA, that this Board hereby establishes the attached Florida Department of Transportation's "Vision Zero" Safety Performance Measure Targets for: fatalities; rate of fatalities; serious injuries; rate of serious injuries and non-motorized fatalities and serious injuries for calendar year 2022.

The adoption of the foregoing resolution was moved by Board Member Rodney Harris. The motion was seconded by Board Member Kionne L. McGhee, and upon being put to a vote, the vote was as follows:

Chairman Oliver G. Gilbert III -Aye
Vice Chairman Juan Carlos Bermudez -Absent

Board Member Philippe Bien-Aime -Absent	Board Member Steven D. Losner -Aye
Board Member Danielle Cohen Higgins -Aye	Board Member Roberto Martell -Absent
Board Member Jose "Pepe" Diaz -Aye	Board Member Joe A. Martinez -Absent
Board Member Rene Garcia -Aye	Board Member Kionne L. McGhee -Aye
Board Member Perla T. Hantman -Absent	Board Member Jean Monestime -Aye
Board Member Keon Hardemon -Absent	Board Member Raquel A. Regalado -Aye
Board Member Rodney Harris -Aye	Board Member Rebeca Sosa -Absent
Board Member Sally A. Heyman -Absent	Board Member Javier D. Souto -Aye
Board Member Eileen Higgins -Absent	Board Member Francis Suarez -Absent
Board Member Vince Lago -Aye	

The Chairperson thereupon declared the resolution duly passed and approved this 20th day of January 2022.

TRANSPORTATION PLANNING ORGANIZATION

By 
Tawana Parker, Clerk
Miami-Dade TPO

Attachment

SAFETY PERFORMANCE MEASURE TARGETS

FDOT's 2021 Highway Safety Improvement Program (HSIP) includes Vision Zero targets for each of the federal performance measures. The TPO has coordinated with FDOT through the MPOAC and is supporting the same targets. The five federal safety performance measures and FDOT targets for 2022 are:

Safety Performance Measure	2022 Target
Number of fatalities	0
Rate of fatalities (per 100 million VMT)	0
Number of serious injuries	0
Rate of serious injuries (per 100 million VMT)	0
Number of non-motorized fatalities and serious injuries	0

The safety performance measures are evaluated with a rolling five-year average of traffic crash data and daily vehicle miles travelled. The most recent safety statistics (2016-2020) for Florida and Miami-Dade County are:

Performance Measure	Florida	Miami-Dade
Fatalities (annual average)	3,188.8	297.4
Fatality Rate per 100M VMT	1.453	1.478
Serious Injuries (annual average)	18,992.4	1,518.4
Serious Injury Rate per 100M VMT	8.641	7.497
Ped/Bike Fatalities & Serious Injuries (annual average)	3,192.4	398.2

DATA SOURCES: fatality and serious injury counts from Florida Dept. of Transportation (FDOT) State Safety Office's Crash Analysis Reporting (CAR) database as of December 14, 2021; any figures that include the 2021 data are preliminary at this time and may change with future updates traffic volumes as published by the FDOT office of Transportation Data and Analytics at <http://www.fl.gov/planning/statistics/mileage-rpts/>

On August 31, 2021, FDOT established statewide performance targets for the safety measures for calendar year 2021. On January 20, 2022, the Miami-Dade TPO agreed to support FDOT’s statewide safety performance targets, thus agreeing to plan and program projects in the TIP that once implemented, are anticipated to make progress toward achieving the statewide targets:

Table 1: 2022 Safety Performance Management Measure Targets

SAFETY PERFORMANCE MEASURE	2022 MIAMI-DADE TPO SAFETY TARGETS	2022 FDOT STATEWIDE SAFETY TARGETS
Number of Fatalities	0	0
Fatality Rate per 100 million Vehicle Miles Traveled (VMT)	0	0
Number of Serious Injuries	0	0
Serious Injury Rate per 100 million Vehicle Miles Traveled (VMT)	0	0
Number of Combined Non-Motorized Fatalities and Serious Injuries	0	0

DRAFT

BASELINE CONDITIONS

Safety Performance Management Measures are evaluated using a 5-year rolling average of traffic crash data and vehicle miles traveled. Baseline safety performance conditions are established based on the 5-year rolling average ending in the calendar year prior to the establishment of the State's target. FDOT established its target for Safety Performance Management Measures for 2022 in 2021. Therefore, the baseline year for Florida MPOs for Calendar Year 2022 is the rolling 5-year average for 2016-2020. The baseline performance for Florida and Miami-Dade County for CY 2022 is shown in **Table 2: Baseline Safety Performance Management Measures**.

Table 2: Baseline Safety Performance Management Measures (2016-2020 5-Year Average)

FDOT BASELINE SAFETY PERFORMANCE MEASURES		
DATA FROM 5-YEAR ROLLING AVERAGE FROM 2016-2020		
PERFORMANCE MEASURE	FLORIDA	MIAMI-DADE
Number of Fatalities (annual average)	3,188.8	297.4
Fatality Rate per 100M VMT	1.453	1.478
Number of Serious Injuries (annual average)	18,992.4	1,518.4
Serious Injury Rate per 100M VMT	8.641	7.497
Number of Combined Non-Motorized Fatalities and Serious Injuries (annual average)	3,192.4	398.2

Single-county MPO/TPOs that encompass the entire limits of the county are calculated using the total county fatalities, serious injuries and traffic volumes as published. Multiple-county MPO/TPOs that encompass the entire limits of each of their included counties are calculated using the fatalities, serious injuries and traffic volumes summed for all of the included counties and are combined totals and rates calculated based on combined totals and combined traffic volumes. MPO/TPOs that do not encompass whole counties are not calculated at the MPO/TPO level but the county calculations for each included county are presented in the lower table.

DATA SOURCES: fatality and serious injury counts from Florida Dept. of Transportation (FDOT) State Safety Office's Crash Analysis Reporting (CAR) database as of December 14, 2021; any figures that include the 2020 data are preliminary at this time and may change with future updates; traffic volumes as published by the FDOT office of Transportation Data and Analytics at <http://www.fdot.gov/planning/statistics/mileage-rpts/>

TRENDS FOR MIAMI-DADE – STATISTICS

The TIP development process, consistent with the process used to develop the MPO’s Long-Range Transportation Plan, includes analysis of safety data trends, including the location and factors associated with crashes with emphasis on fatalities and serious injuries. These data are used to help identify regional safety issues and potential safety strategies for the LRTP and TIP.

The TPO uses crash data tracking fatalities and serious injuries in Miami-Dade County to analyze past trends and identify regional safety issues. Tracking these measures will help to estimate the effectiveness of future TPO transportation investment, as reflected in the TIP. The changes in Safety Performance Measures for the Miami-Dade TPO from 2016 through 2020 are shown in **Table 3: Miami-Dade Safety Performance Management Measure Data**. The measures shown in Table 3 were calculated by following the same methodology as that used to calculate the baseline conditions.

Table 3: Miami-Dade Safety Performance Management Measure Data (5-Year Rolling Averages)

FDOT ROLLING 5-YEAR AVERAGE SAFETY FOR MIAMI-DADE COUNTY STATISTICS					
PERFORMANCE MEASURE	2012-2016	2013-2017	2014-2018	2015-2019	2016-2020
Number of Fatalities (annual average)	273.8	285.0	298.8	302.4	297.4
Fatality Rate per 100M VMT	1.417	1.453	1.502	1.482	1.478
Number of Serious Injuries (annual average)	1,895.4	1,807.4	1,747.6	1,664.6	1,518.4
Serious Injury Rate per 100M VMT	9.859	9.252	8.793	8.170	7.497
Number of Combined Non-Motorized Fatalities and Serious Injuries (annual average)	441.8	431.6	435.6	426.8	398.2
VMT (100 MVMT)	192.652	195.795	199.092	204.564	202.135

DATA SOURCES: fatality and serious injury counts from Florida Dept. of Transportation (FDOT) State Safety Office's Crash Analysis Reporting (CAR) database as of December 14, 2021; traffic volumes as published by the FDOT office of Transportation Data and Analytics at <http://www.fdot.gov/planning/statistics/mileage-rpts/>.

ASSESSMENT OF SIGNIFICANT STATE PROGRESS

Florida's performance on meeting the Safety Performance Management Measures will be assessed by FHWA by determining if the state's target has been met or if significant progress toward meeting the target was made. "A State DOT is determined to have met or made significant progress toward meeting its targets when the targets for at least 4 out of the 5 safety performance targets are met or the outcome for a performance measure is better than its baseline." (<http://safety.fhwa.dot.gov>; Let's Talk Performance Webinar FAQs, Safety Performance Management Measures; page 5).

The first assessment of significant progress was conducted by FHWA in December 2019 to see if Florida met its 2014-2018 HSIP targets. States will be notified in March 2020 of their progress. The 2012-2016 baseline data will be used to assess whether significant progress was made. Subsequent assessments will be conducted in December of each year for the next rolling 5-year period for targets and baseline data (i.e.: the assessment in December 2020 will determine if the targets for 2015-2019 will be met or if significant progress is made toward the 2013-2017 baseline conditions).

COORDINATION WITH STATEWIDE SAFETY PLANS AND PROCESSES

The TPO recognizes the importance of linking goals, objectives, and investment priorities to established performance objectives, and that this link is critical to the achievement of national transportation goals and statewide and regional performance targets. As such, the Miami-Dade 2045 LRTP reflects the goals, objectives, performance measures, and targets as they are available and described in other state and public transportation plans and processes; specifically, the Florida Strategic Highway Safety Plan (SHSP), the Florida Highway Safety Improvement Program (HSIP), and the Florida Transportation Plan (FTP).

- The 2021 Florida Strategic Highway Safety Plan (SHSP) is the statewide plan focusing on how to accomplish the vision of eliminating fatalities and reducing serious injuries on all public roads. The SHSP was developed in coordination with Florida's 27 metropolitan planning organizations (MPOs) through Florida's Metropolitan Planning Organization Advisory Council (MPOAC). The SHSP guides FDOT, MPOs, and other safety partners in addressing safety and defines a framework for implementation activities to be carried out throughout the State.

- The FDOT HSIP process provides for a continuous and systematic process that identifies and reviews traffic safety issues around the state to identify locations with potential for improvement. The ultimate goal of the HSIP process is to reduce the number of crashes, injuries and fatalities by eliminating certain predominant types of crashes through the implementation of engineering solutions.
- Transportation projects are identified and prioritized with the MPOs and non-metropolitan local governments. Data are analyzed for each potential project, using traffic safety data and traffic demand modeling, among other data. The FDOT Project Development and Environment Manual requires the consideration of safety when preparing a proposed project's purpose and need, and defines several factors related to safety, including crash modification factor and safety performance factor, as part of the analysis of alternatives. MPOs and local governments consider safety data analysis when determining project priorities.

CONTRIBUTIONS TO ACHIEVING SAFETY PERFORMANCE TARGETS

The TPO and the Florida Department of Transportation (FDOT) are committed to making roadways safer in Miami-Dade County as a means to improve Florida's overall level of safety. The TPO has many programs, initiatives, and projects identified in the TIP and the LRTP to make transportation safer in Miami-Dade County. FDOT's key plan is its Work Program. The TPO and FDOT coordinate their plans and programs in order to improve the safety of the Miami-Dade transportation system, according to C.F.R. 450.332(b).

The TIP includes specific investment priorities that support all of the TPO's goals including safety, using a prioritization and project selection process established in the LRTP. The TPO has developed a TIP project selection process that identifies and prioritizes projects aimed at improving transportation safety. The ranking criteria are updated annually and are included in the appendices of the TIP. The current ranking criteria give the most point value to projects with the greatest anticipated fatality reduction. Going forward, the project evaluation and prioritization processes used in the LRTP and the TIP will continue to use a data-driven strategy that considers stakeholder input to evaluate projects that have an anticipated effect of reducing both fatal and injury crashes.

The program of projects identified through this process are anticipated to contribute toward achievement of the safety targets. The safety infrastructure investments are targeted at specific opportunities to improve safety. In addition to the specific safety programs included in the TIP, other programs also consider safety as a key factor. Safety impacts are considered in the evaluation of proposed preservation, capacity, and operations projects, including projects on Florida's Strategic Intermodal System as well as regionally significant facilities identified in the LRTP. All projects in this TIP inherently support progress towards achieving the safety performance targets, through their adherence to the TPOs policies, programs, and standards related to safety.

MIAMI-DADE TPO

TRANSPORTATION IMPROVEMENT PLAN

In total, the 2023-2027 TIP includes \$95M programmed within FY 2023-2027 on 82 projects that improve safety and to support the achievement of the established safety targets. The FY 2022/2023 to FY 2026/2027 TIP is located on the internet at: <http://www.interactip.com/>.

This includes Safe Routes to School projects, pedestrian safety projects, intersection safety projects and safety pushbutton projects. The Safety Performance Management Measures are incorporated into the 2022/2023 to 2026/2027 TIP to continue to advance transportation safety and link our investments to achieve our safety targets.

DRAFT

LONG RANGE TRANSPORTATION PLAN

The Miami-Dade 2045 LRTP increases the safety of the transportation system for motorized and non-motorized users as required. The LRTP aligns with the Florida SHSP and the FDOT HSIP with specific strategies to improve safety performance focused on prioritized safety projects, pedestrian and/or bicycle safety enhancements, and traffic operation improvements to address the goal to reduce fatalities and serious injuries. The TPO's commitment to safety is emphasized through the 2045 LRTP Goal to Increase the Safety of the Transportation System for All Users, which includes the following objectives:

- Improve the safety of the transportation system,
- Promote projects in high crash locations, and
- Improve safety of the transportation system of the elderly and disabled.

There are over 100 projects listed in the 2045 LRTP that will help improve safety of the Miami-Dade transportation system, including: capacity and operational improvements, redesigns of roadway segments, transportation systems management and operation (TSM&O), roadway and access improvements, adding truck lanes, and reconstruction projects. For a complete list of projects, please see Chapter 7 of the Miami-Dade 2045 LRTP;

<https://miamidade2045lrtp.com/> .

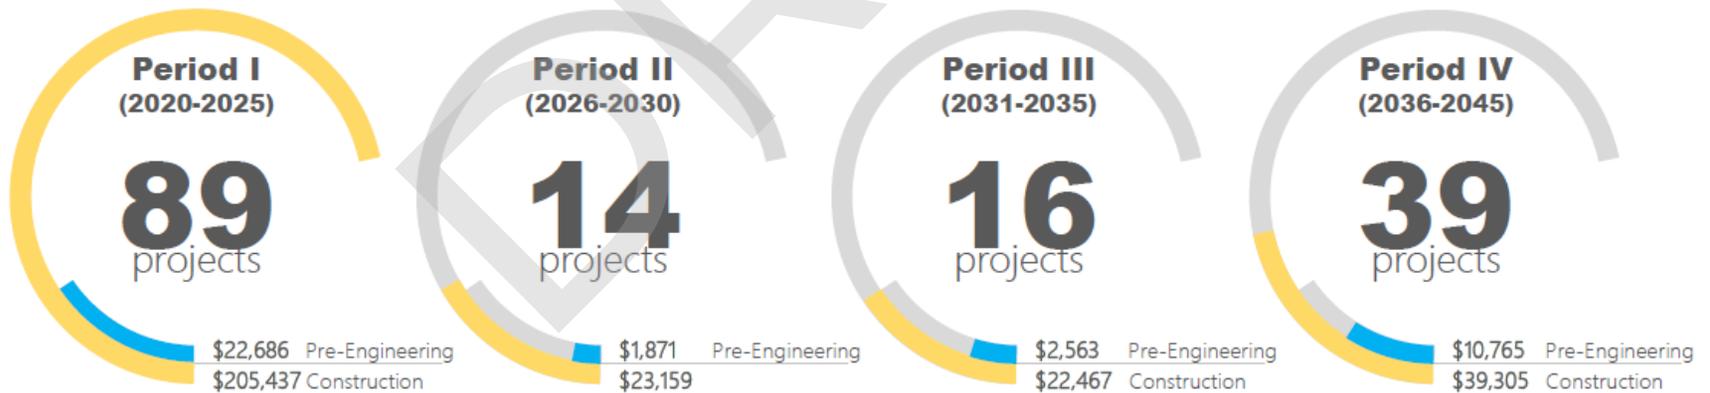

The 2045 Miami-Dade Bicycle Pedestrian Master Plan serves as the non-motorized transportation element of the 2045 LRTP. The vision of the 2045 Miami-Dade Bicycle Pedestrian Master Plan is to enhance the accessibility, safety, public health, social equity, environment, and overall quality of life within Miami-Dade County by creating interconnected bicycle and pedestrian friendly communities throughout the county—with safety being a key component of the plan. A snapshot of the number of projects by Priority, improvement type, and funding allocation by priority and phase from the 2045 LRTP are summarized in Figure 6: Bicycle/Pedestrian Projects by Improvement Type and Priority and **Figure 7: Allocation of Bicycle/Pedestrian Funding by Priority and Phase (Thousands YOE \$)** on the next page. The 2045 Bicycle Pedestrian Master Plan can be located at: <http://miamidadetpo.org/library/plans/miami-dade-2045-bicycle-pedestrian-master-plan-2019-09.pdf>

For additional information on the Miami-Dade 2045 LRTP, please see the Miami-Dade 2045 Long Range Transportation Section of this report starting on page PM-80.

Figure 6: Bicycle/Pedestrian Projects per Priority Period and Improvement Type

Figure 7: Allocation of Bicycle/Pedestrian Funding by Priority Period and Phase (Thousands YOE \$)

UNIFIED PLANNING WORK PROGRAM (UPWP)

The Miami-Dade TPO Unified Planning Work Program (UPWP) for Transportation Planning Activities, Fiscal Years 2022/2023, outlines the planning projects the PTO will undertake to improve Miami-Dade County's multimodal transportation system. The UPWP identifies the planning projects budgets and activities that support the comprehensive and multimodal transportation improvement program approved for the metropolitan area in the 2045 LRTP. The planning efforts in the UPWP must implement the transportation priorities in the County Comprehensive Plan, which are based on the goals from the 2045 LRTP—inclusive of improving the safety of the transportation system for all users. Safety is addressed specifically in the Aging Road Users Strategic Safety Plan, Municipal Grant Program - South Miami Pedestrian Safety and Mobility Infrastructure Improvement Plan, and several Safe Routes to School tasks. Safety is also woven into many tasks that address safety improvements for trucking and goods movement and improving bicycle and pedestrian safety.

SMART MOVES PROGRAM: CONNECTING SMART IDEAS

The SMART Moves Program will be used by the TPO to prioritize and program planning studies in Miami-Dade that will support the delivery of projects including complete streets, first/last mile connections, connected and autonomous vehicles, and other priority projects that enhance connectivity, accessibility, and integration of the entire transportation system.

The SMART Moves Program can potentially utilize federal funding that is the responsibility of the TPO (such as Metropolitan Planning Funds (PL), Federal Transit Administration Section 5305(d) Funds, Congestion Mitigation for Air Quality (CMAQ), Surface Transportation Block Grant Program, etc.). This process will involve a once-a-year call for all local roadway, transit, freight, bicycle and pedestrian projects, and will result in an annual portfolio of projects in the UPWP.

The SMART Moves Program has two components:

1. Call for SMART Ideas: Connecting SMART Ideas to collect the public's input.
2. Application from Municipalities, which provides a mechanism to partner with local agencies for the implementation of projects.

PROGRAM OBJECTIVES

- Provide a mechanism for the TPO to partner with local agencies in the implementation of projects that will support complete streets, first/last mile connections, connected and autonomous vehicles and the SMART Plan.
- Develop a holistic approach for identifying and prioritizing highly effective transportation projects.
- Assist local agencies with delivery of multimodal projects that support transportation priorities in Miami-Dade County.
- Create a tracking system to monitor project status and expenditure of programmed funds.

VISION ZERO

The TPO is developing a plan for implementing safety countermeasures aimed at reducing the number of vehicular fatalities and serious injuries in Miami-Dade County, giving special emphasis to vulnerable road users (pedestrians, bicyclists, motorcyclists, transit riders, as well as construction workers and emergency services personnel) using a systematic safety planning process. A data-driven approach is being designed to identify and address high crash areas to reduce the number and severity of traffic crashes, and improve the environment for residents and visitors, especially critical populations such as children and the elderly. The Vision Zero Plan was completed in June 2018 and is currently part of an implementation plan by DTPW.

FDOT

BICYCLE/PEDESTRIAN CORRIDOR IMPROVEMENTS

The bicycle/pedestrian network is a component of the overall transportation system. FDOT evaluates bicycle and pedestrian improvements in conjunction with capacity and resurfacing projects. Bicycle and pedestrian projects are also implemented by local agencies, who oversee construction and management. In addition, some projects are funded through the federally funded Transportation Alternatives Program (TAP) or the state funded Shared Use Non-motorized (SUN) Trail Program. FDOT is also in the process of developing a Bicycle Network Connectivity Assessment that is aimed to assess and inventory the Existing and Planned Bicycle Network and incorporate new potential corridors within a plan to improve the connectivity, accessibility, and safety of cyclists within Miami-Dade County. This

assessment is placing a significant focus on the greenways and trails which will act as the centerpiece for which all other connections (existing, upcoming, previously planned, and new proposed projects determined through this process) will be viewed. The result of this assessment will be a detailed action plan containing proposed projects that will improve the safety and comfort of cycling throughout the County.

SAFE ROUTES TO SCHOOL

Florida's Safe Routes to School (SRTS) program is designed to help communities address school transportation safety needs and to encourage students to walk or ride their bicycle to school. The program encourages children to walk and bike to school by making walking and biking safe and appealing. The SRTS program integrates safety, traffic relief, health, environmental awareness and physical activity and fitness within a single program that is aimed at increasing walking and bicycling to school safely.

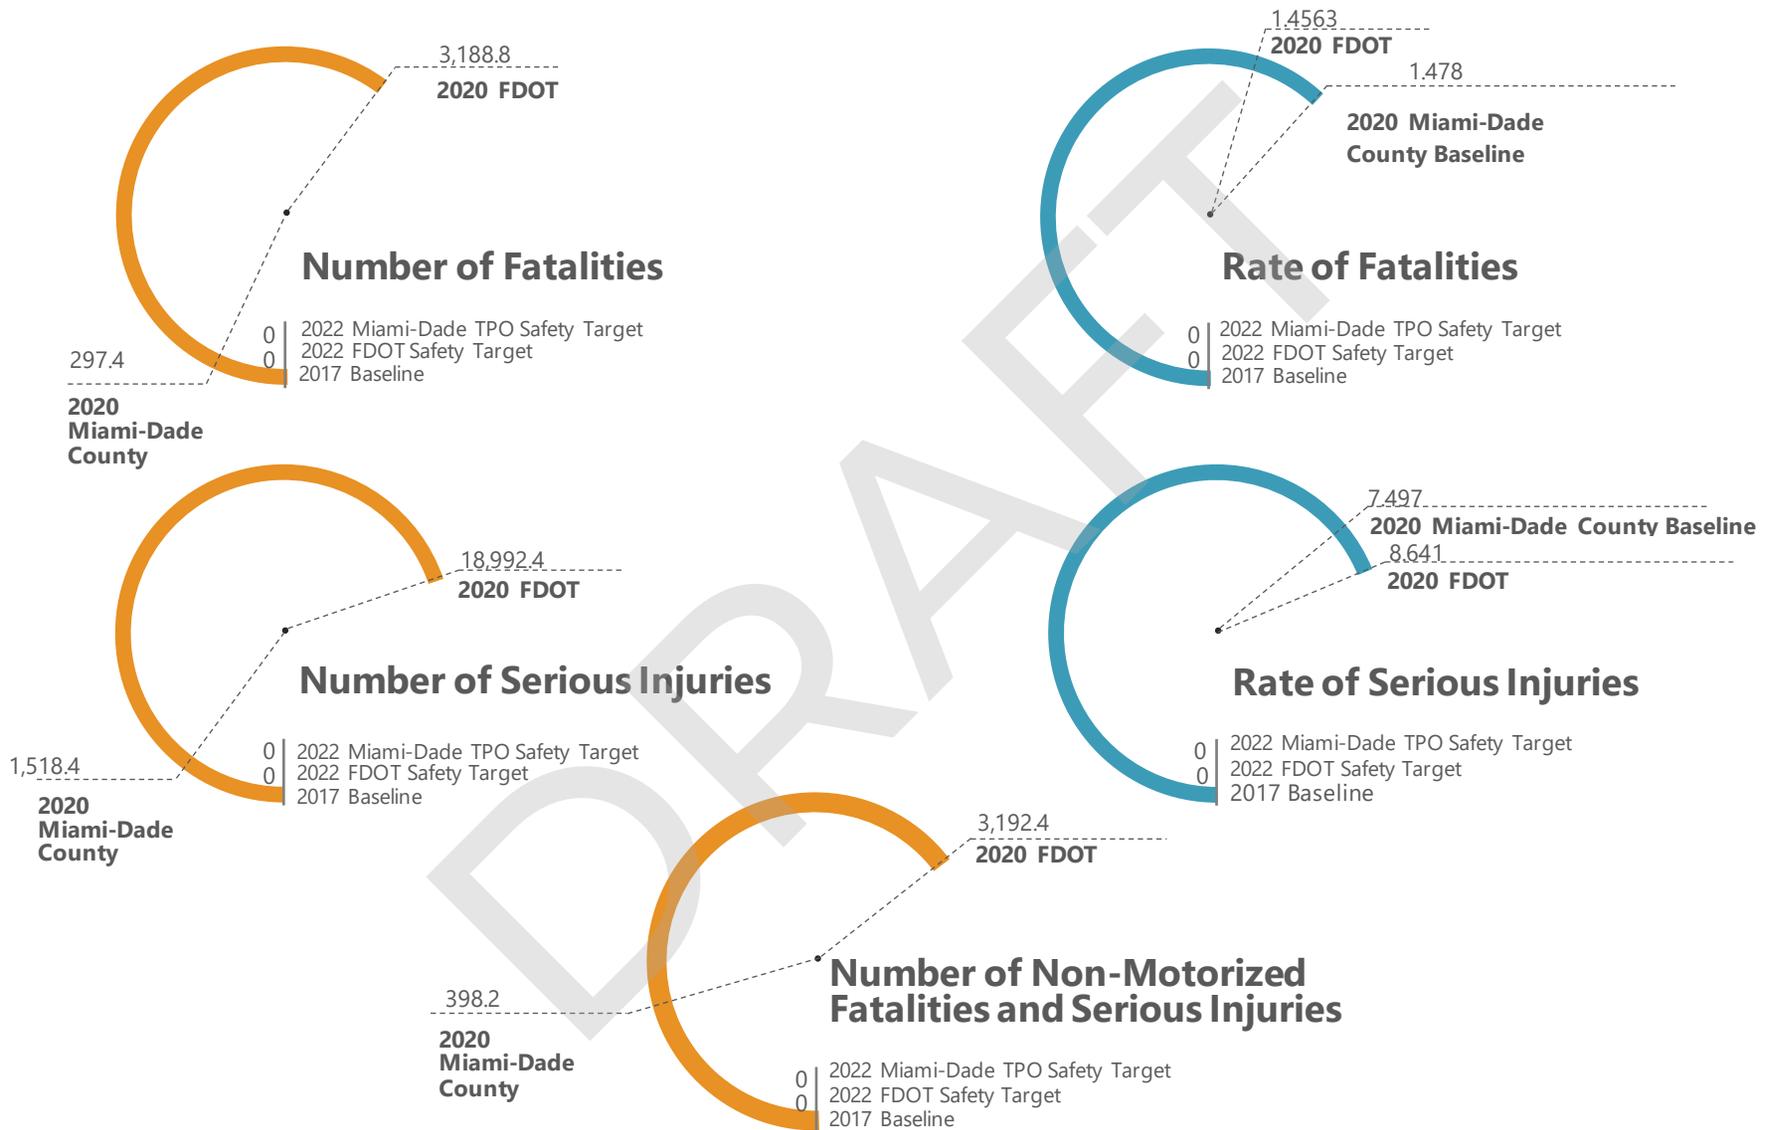

COMPLETE STREETS PROJECTS

FDOT's Complete Streets Policy, adopted in September 2014, promotes safety, quality of life, and economic development. FDOT developed the Complete Streets Implementation Plan in partnership with the national not-for-profit organization Smart Growth America to guide FDOT's efforts to implement its Complete Streets Policy. The Plan recommended a five-part implementation framework for integrating a Complete Streets approach into FDOT's practices to ensure that future transportation decisions and investments address the needs of all users of the transportation system and is responsive to community goals and context. The Plan also proposed a two-year schedule for Complete Streets Implementation, including: (1) revising guidance, standards, manuals, policies, and other documents; (2) updating decision-making processes; (3) modifying approaches for measuring performance; (4) managing internal and external communication and collaboration during implementation; and (5) providing ongoing education and training.

Figure 8 shows a summary of the five Safety Performance Management Measures including: 2017 FDOT and Miami-Dade TPO baseline and 2022 FDOT and Miami-Dade TPO targets.

Figure 8: Summary of Safety Performance Management Measures

TRANSPORTATION PERFORMANCE MANAGEMENT

SYSTEM PERFORMANCE REPORT: INFRASTRUCTURE

PAVEMENT AND BRIDGE

DRAFT

INFRASTRUCTURE (PAVEMENT & BRIDGE) PERFORMANCE MANAGEMENT MEASURES

Infrastructure Condition is the second national goal identified in MAP-21 and maintained in the FAST Act. In January 2017, the Federal Highway Administration published a Final Rule in the Federal Register entitled “National Performance Management Measures: Assessing Pavement Condition for the National Highway Performance Program and Bridge Condition for the National Highway Performance Program,” that included National Performance Management Measures to evaluate the pavement and bridge conditions on the National Highway System (NHS) [23 CFR § 490]. The Infrastructure Rule became effective on February 17, 2017.

PERFORMANCE MANAGEMENT MEASURES

The Infrastructure Rule requires State DOTs and MPOs to set targets for the following Infrastructure Performance Management Measures for the Interstate System and Non-Interstate NHS, and to report on progress toward achieving those targets. State DOTs report progress to FHWA, while MPOs report progress to their State DOT. FDOT’s 2017 Initial Transportation Asset Management Plan (TAMP) was released on April 30, 2018 and is the basis for setting the Transportation Performance Measure targets for pavement and bridge condition required by the performance management regulations in 23 CFR 490. The TAMP was later updated on June 28, 2019.

[https://fdotwww.blob.core.windows.net/sitefinity/docs/default-source/planning/performance/fdot-transportation-asset-management-plan_\(june-28-2019\).pdf?sfvrsn=36c94a6b_2](https://fdotwww.blob.core.windows.net/sitefinity/docs/default-source/planning/performance/fdot-transportation-asset-management-plan_(june-28-2019).pdf?sfvrsn=36c94a6b_2)

In determining its approach to establishing performance targets for the federal pavement and bridge condition performance measures, FDOT considered many factors. To begin with, FDOT is mandated by Florida Statute 334.046 to preserve the state’s pavement and bridges to specific standards. To adhere to the statutory guidelines, FDOT prioritizes funding allocations to ensure the current transportation system is adequately preserved and maintained before funding is allocated for capacity improvements. These statutory guidelines envelope the statewide federal targets that have been established for pavements and bridges.

In addition, MAP-21 requires FDOT to develop a Transportation Asset Management Plan (TAMP) for all NHS pavements and bridges within the state. The TAMP must include investment strategies leading to a program of projects that would make progress toward achievement of the state DOT targets for asset condition and performance of the NHS. FDOT’s TAMP was updated to reflect MAP-21 requirements in 2018.

Further, the federal pavement condition measures require a new methodology that is a departure from the methods currently used by FDOT and uses different ratings and pavement segment lengths. For bridge condition, the performance is measured in deck area under the federal measure, while the FDOT programs its bridge repair or replacement work on a bridge by bridge basis. As such, the federal measures are not directly comparable to the methods that are most familiar to FDOT.

In consideration of these differences, as well as other unknowns and unfamiliarity associated with the new required processes, FDOT took a conservative approach when establishing its initial pavement and bridge condition targets. It is the intent of FDOT to meet or exceed the established performance targets.

The performance targets for bridge condition, pavement condition, National Highway System performance and freight mobility were released by FDOT on May 18, 2018.

FDOT released the following 2-year and 4-year targets for pavement and bridge condition:

National Performance Management Measures to Assess Pavement Condition (23 CFR 490.307)

PERFORMANCE MEASURE	2-YEAR TARGET	4-YEAR TARGET
% of Interstate pavements in Good condition	n/a	≥ 60%
% of Interstate pavements in Poor condition	n/a	≤ 5%
% of non-Interstate NHS pavements in Good condition	≥ 40%	≥ 40%
% of non-Interstate NHS pavements in Poor condition	≤ 5%	≤ 5%

National Performance Management Measures to Assess Bridge Condition (23 CFR 490.407)

PERFORMANCE MEASURE	2-YEAR TARGET	4-YEAR TARGET
% of NHS bridges classified as in Good condition by deck area	≥ 50%	≥ 50%
% of NHS bridges classified as in Poor condition by deck area	≤ 10%	≤ 10%

PERFORMANCE TARGETS

By Resolution 44-18 on October 25, 2018 (illustrated on the next page in **Figure 1: TPO Resolution**), the TPO Governing Board agreed to support FDOT's statewide pavement and bridge performance targets. By adopting these targets, the TPO will support achievement of the pavement and bridge targets by planning and programming projects in the TIP and LRTP that once implemented, are anticipated to make progress toward achieving the statewide targets.

Figure 1: TPO Resolution

TPO RESOLUTION #44-18 Agenda Item 5.B.2

RESOLUTION ESTABLISHING THE FLORIDA DEPARTMENT OF TRANSPORTATION'S PERFORMANCE MEASURE TARGETS FOR PAVEMENT CONDITION, BRIDGE CONDITION, NATIONAL HIGHWAY SYSTEM PERFORMANCE AND FREIGHT MOVEMENT

WHEREAS, the Interlocal Agreement creating and establishing the Miami-Dade Metropolitan Planning Organization (MPO), for the Miami Urbanized Area, now known as the Transportation Planning Organization (TPO), requires that the TPO provide a structure to evaluate the adequacy of the transportation planning and programming process; and

WHEREAS, the Transportation Planning Council (TPC) has been established and charged with the responsibility and duty of fulfilling the aforementioned functions; and

WHEREAS, the TPC has reviewed the Florida Department of Transportation's performance measure targets, made a part hereof, and finds it consistent with the goals and objectives of the Transportation Plan for the Miami Urbanized Area,

NOW, THEREFORE, BE IT RESOLVED BY THE GOVERNING BOARD OF THE TRANSPORTATION PLANNING ORGANIZATION IN ITS ROLE AS THE MPO FOR THE MIAMI URBANIZED AREA, that the attached Florida Department of Transportation's performance measure targets for pavement condition, bridge condition, national highway system performance and freight movement, are hereby established.

The adoption of the foregoing resolution was moved by Board Member Jose "Pepe" Diaz. The motion was seconded by Board Member Rebeca Sosa, and upon being put to a vote, the vote was as follows:

Chairman Esteban L. Bovo, Jr. - Aye			
Vice Chairman Francis Suarez - Absent			
Board Member Juan Carlos Bermudez	-Aye	Board Member Vince Lago	-Absent
Board Member Jose "Pepe" Diaz	-Aye	Board Member Daniella Levine Cava	-Absent
Board Member Audrey M. Edmonson	-Aye	Board Member Roberto Martell	-Aye
Board Member Dan Gelber	-Absent	Board Member Joe A. Martinez	-Aye
Board Member Oliver G. Gilbert, III	-Aye	Board Member Jean Monestime	-Absent
Board Member Perla T. Hanman	-Absent	Board Member Dennis C. Moss	-Aye
Board Member Carlos Hernandez	-Absent	Board Member Jeff Porter	-Absent
Board Member Sally A. Heyman	-Absent	Board Member Shelly Smith Fano	-Absent
Board Member Eileen Higgins	-Aye	Board Member Rebeca Sosa	-Aye
Board Member Barbara J. Jordan	-Aye	Board Member Javier D. Souto	-Aye
Board Member Smith Joseph	-Aye	Board Member Xavier L. Suarez	-Aye

The Chairperson thereupon declared the resolution duly passed and approved this 25th day of October, 2018.

Federal Performance Measures
FDOT Initial Targets for Pavement, Bridge and System Performance
May 18, 2018

Pavement Condition - National Highway System	2yr	4yr
Performance Measure	Target	Target
% of Interstate pavements in Good condition	n/a	≥ 60%
% of Interstate pavements in Poor condition	n/a	≤ 5%
% of non-Interstate NHS pavements in Good condition	≥ 40%	≥ 40%
% of non-Interstate NHS pavements in Poor condition	≤ 5%	≤ 5%

Bridge Condition - National Highway System	2yr	4yr
Performance Measure	Target	Target
% of NHS bridges classified as in Good condition by deck area	≥ 50%	≥ 50%
% of NHS bridges classified as in Poor condition by deck area	≤ 10%	≤ 10%

National Highway System and Freight Reliability	2yr	4yr
Performance Measure	Target	Target
% of person-miles traveled on the Interstate that are reliable	75%	70%
% of person-miles traveled on the non-Interstate NHS that are reliable	n/a	50%
Truck travel time reliability ratio (TTR) on the Interstate	1.75	2

ASSESSING PAVEMENT CONDITION FOR THE NATIONAL HIGHWAY PERFORMANCE PROGRAM

State DOTs are required to collect performance measure data on the Interstate and Non-Interstate NHS and report it to the Highway Performance Monitoring System (HPMS). The Final Rule required State DOTs to submit a Data Quality Management Program plan to FHWA for approval by May 20, 2018. The Data Quality Management Program plan must include the State's methods for identifying (i) how data collection equipment is calibrated and certified; (ii) how persons performing the data collection are certified; (iii) how quality control measures are implemented before, during and after the data is collected; (iv) how sampling, review and checking of the data is conducted; and (v) what procedures are used to resolve errors, along with criteria used to accept data [23 CFR § 490.319]. Once the State's Data Quality Management Program has been approved by FHWA, State DOTs shall use the program to collect and report performance measure data to assess the State's overall pavement condition.

For each pavement metric, a threshold is used to establish good, fair, or poor condition. Pavement condition is assessed for each 0.1 mile section of the through travel lanes of mainline highways on the Interstate or the non-Interstate NHS using these metrics and thresholds. A pavement section is rated as good if all three metric ratings are good, and poor if two or more metric ratings are poor. Sections that are not good or poor are considered fair.

The good/poor measures are expressed as a percentage and are determined by summing the total lane-miles of good or poor highway segments and dividing by the total lane-miles of all highway segments on the applicable system. Pavement in good condition suggests that no major investment is needed and should be considered for preservation

Figure 2: Pavement Condition Metric Thresholds

Rating	Good	Fair	Poor
IRI <i>(inches/mile)</i>	<95	95-170	>170
PSR* <i>(0.0-5.0 value)</i>	≥4.0	2.0-4.0	≤2.0
Cracking Percent <i>(%)</i>	<5	<i>CRCP: 5-10</i> <i>Jointed: 5-15</i> <i>Asphalt: 5-20</i>	<i>>10</i> <i>>15</i> <i>>20</i>

treatment. Pavement in poor condition suggests major reconstruction investment is needed due to either ride quality or a structural deficiency.

The Pavement Condition Metrics used for the evaluation include:

- International Roughness Index (IRI) - an indicator of roughness; applicable to all asphalt and concrete pavements;
- Cracking percent - percentage of the pavement surface exhibiting cracking; applicable to all asphalt and concrete pavements;
- Rutting - extent of surface depressions; applicable to asphalt pavements;
- Faulting - vertical misalignment of pavement joints; applicable to certain types of concrete pavements; and
- Present Serviceability Rating (PSR) – a quality rating applicable only to certain lower speed roads (may be use on roadways with a posted speed limit of less than 40 Miles per Hour (MPH)).

“These metrics collectively provide a way to quantify pavement condition in terms of roughness and cracking for all pavement types, rutting for asphalt pavement surfaces, and faulting (misalignment between concrete slabs) for jointed concrete pavement surfaces,” [23 CFR § 490]. The Pavement Condition Metric Thresholds can be seen in

Figure 2 Pavement Condition Metric Thresholds.

Pavement condition is assessed for each 0.1-mile section of the through travel lanes of mainline highways on the Interstate or the non-Interstate NHS using these metrics and thresholds. A pavement section is rated as good if all three metric ratings are good, and poor if two or more metric ratings are poor. Sections that are not good or poor are considered fair.

The good/poor measures are expressed as a percentage and are determined by summing the total lane-miles of good or poor highway segments and dividing by the total lane-miles of all highway segments on the applicable system. Pavement in good condition suggests that no major investment is needed and should be considered for preservation treatment. Pavement in poor condition suggests major reconstruction investment is needed due to either ride quality or a structural deficiency.

INTERSTATE SYSTEM PAVEMENT PERFORMANCE

State DOTs began collecting data for Interstate pavement condition on January 1, 2018. State DOTs must submit their Interstate performance data, consistent with the requirements established under the Final Rule by April 15, 2019, and annually thereafter every April 15th.

If a state has greater than 5 percent of pavement lane miles in poor condition for a given year, the state must obligate funds from their National Highway Performance Program (NHPP) funds and transfer a portion of it to their Surface Transportation Program (STP) funds in order to improve their Interstate pavement condition.

NON-INTERSTATE NHS PAVEMENT PERFORMANCE

Starting January 1, 2020, State DOTs will begin collecting performance data for Non-Interstate NHS pavement condition. State DOTs are required to submit their Non-Interstate NHS pavement condition data by June 15, 2021, and annually thereafter every June 15th.

DRAFT

ASSESSING BRIDGE CONDITION FOR THE NATIONAL HIGHWAY PERFORMANCE PROGRAM

State DOTs, Federal agencies, and Tribal Governments are required to annually submit bridge inventory data to FHWA using the National Bridge Inspection Standards (NBIS). The data is reported in the National Bridge Inventory (NBI) Database, and includes data on bridge Deck, Superstructure, Substructure, and Culverts. State DOTs are required to submit their most recent NBI data by March 15th of each year. Under the Infrastructure National Performance Management Measures Final Rule, these metrics will be used to assess overall bridge condition. The Final Rule applies to all bridges on the NHS, including bridge on-ramps and off-ramps that are connected to the NHS. The condition metric thresholds used to evaluate bridges can be seen in **Figure 3: Bridge Condition Metric Thresholds**.

Figure 3: Bridge Condition Metric Thresholds

NBI Rating Scale <i>(from 0 – 9)</i>	9	8	7	6	5	4	3	2	1	0
	Good			Fair		Poor				
Deck <i>(Item 58)</i>	≥ 7			5 or 6		≤ 4				
Superstructure <i>(Item 59)</i>	≥ 7			5 or 6		≤ 4				
Substructure <i>(Item 60)</i>	≥ 7			5 or 6		≤ 4				
Culvert <i>(Item 62)</i>	≥ 7			5 or 6		≤ 4				

Source: FHWA¹

If any of the metrics are less than or equal to 4 on the NBI rating scale, the bridge is considered structurally deficient. A bridge in good condition suggest that no major investment is needed. A bridge in poor condition is safe to drive on however, it is nearing a point where substantial reconstruction or replacement is needed. “FHWA shall calculate a ratio of the total deck area of all bridges classified as Structurally Deficient to the total deck area of all applicable bridges for each state,” [23 CFR § 490]. If 10 percent or less of the total deck area of bridges in the state are classified as structurally deficient, then the state has met the minimum condition level. If the state does not meet the minimum condition level for a period of 3 consecutive years, they must dedicate NHPP funds to eligible NHS bridge projects.ⁱ

BASELINE CONDITIONS

On January 1, 2018, the first 4-year performance period for the Infrastructure Performance Management Measures began. State DOTs are required to report baseline performance data for Non-Interstate Pavement Performance Management Measures and Bridge Performance Management Measures on October 1, 2018 and must report on their progress for the 1st performance period on October 1, 2020. The baseline conditions for pavement condition for Florida and for Miami-Dade County are shown in **Table 1: Baseline Pavement Condition Performance Management Measures 2017 and 2019**. The baseline conditions for bridge condition are shown in **Table 2: Baseline Bridge Condition Performance Management Measures 2018 and 2019**.

Table 1: Baseline Pavement Condition Performance Management Measures 2017 and 2019

PAVEMENT CONDITIONS				
Pavement Condition	2017		2019	
	Florida	Miami-Dade	Florida	Miami-Dade
% of Interstate Pavements in Good Condition	66%	68.6%	68.5%	74%
% of Interstate Pavements in Poor Condition	0.1%	0.0%	0.2%	0.0%
% of non-Interstate NHS Pavements in Good Condition	45%	45.7%	41.0%	47%
% of non-Interstate NHS Pavements in Poor Condition	0.4%	0.6%	0.2%	0.1%

Table 2: Baseline Bridge Condition Performance Management Measures 2018 and 2019

BRIDGE CONDITIONS				
Bridge Condition	2018		2019	
	Florida	Miami-Dade	Florida	Miami-Dade
% of NHS bridges classified as in Good condition by deck area	72%	68.4%	65.6%	81.6%
% of NHS bridges classified as in Poor condition by deck area	1%	0.2%	0.5%	0.2%

Source: FDOT

For the first performance period only, State DOTs are not required to report baseline condition/performance or 2-year targets for the Interstate System Pavement Performance Management Measures to the State's Baseline Performance Report. The implementation dates for the Infrastructure Performance Management Measures are depicted in **Table 3: Infrastructure Performance Management Measures-Implementation Schedule**. In 2020, FDOT did not make any adjustments to the PM2 performance targets at the midpoint reporting period of October 1, 2020.

ASSESSMENT OF SIGNIFICANT STATE PROGRESS

FHWA will not evaluate significant state progress toward achieving 2-year Interstate System Pavement Performance Targets for the Mid Performance Period Progress Report, due October 1, 2020. The 2-year condition identified between 2018 and 2020 will become the baseline condition for the first performance reporting period. However, FHWA will evaluate significant State progress toward achieving Non-Interstate NHS Pavement Performance Targets at the midpoint (January 1, 2018 through December 31, 2019 reporting period – which is to be reported to FHWA by October 1, 2020) and the end of the first performance period (January 1, 2020 through December 31, 2021 reporting period – which is to be reported to FHWA by October 1, 2022) [23 CFR § 490]. In 2020, FDOT did not make any adjustments to the PM2 performance targets at the midpoint reporting period of October 1, 2020.

COORDINATION WITH STATEWIDE PLANS AND PROCESSES

The TPO recognizes the importance of linking goals, objectives, and investment priorities to established performance objectives, and that this link is critical to the achievement of national transportation goals and statewide and regional performance targets. As such, the Miami-Dade 2045 LRTP reflects the goals, objectives, performance measures, and targets as they are described in other state and public transportation plans and processes, including the Florida Transportation Plan (FTP) and the Florida Transportation Asset Management Plan.

- The FTP is the single overarching statewide plan guiding Florida's transportation future. It defines the state's long-range transportation vision, goals, and objectives and establishes the policy framework for the expenditure of state and federal funds flowing through FDOT's work program. One of the seven goals defined in the FTP is Agile, Resilient, and Quality infrastructure.
- The Florida Transportation Asset Management Plan (TAMP) explains the processes and policies affecting pavement and bridge condition and performance in the state. It presents a strategic and systematic process of operating, maintaining, and improving these assets effectively throughout their life cycle.

CONTRIBUTIONS TO ACHIEVING PAVEMENT & BRIDGE PERFORMANCE TARGETS

The TPO and FDOT are committed to ensuring the pavement and bridge condition in Miami-Dade County achieves the identified targets. The TPO has many programs, initiatives, and projects identified in the TIP and the LRTP to address pavement and bridge condition in Miami-Dade County. FDOT's key plan is its Work Program. The TPO and FDOT coordinate their plans and programs to maintain an acceptable pavement and bridge condition of the Miami-Dade transportation system.

"The TIP shall reflect the investment priorities established in the current metropolitan transportation plan . . ." (23 CFR 450.326). The transportation plan (LRTP) "shall include both long-range strategies/actions that provide for the development of an integrated multimodal system..." (23 CFR 450.24). The TIP considers potential projects that fall into specific investment priorities established by the TPO in the LRTP including the goal to Improve and Preserve the Existing Transportation System. This process evaluates projects that have an anticipated effect on improving pavement and bridge conditions.

MIAMI-DADE TPO

TRANSPORTATION IMPROVEMENT PLAN

A preliminary review of the FY 2022/2023 to FY 2026/2027 TIP includes 116 projects totaling \$286M in Pavement and 31 projects totaling \$375M in Bridge Improvement Projects. The FY 2022/2023 to FY 2026/2027 TIP is located on the internet at: <http://www.interactip.com/>

This includes Safe Routes to School projects, pedestrian safety projects, intersection safety projects and safety pushbutton projects. The Pavement and Bridge Performance Management Measures are incorporated into the 2022/2023 to 2026/2027 TIP to continue to assess and preserve infrastructure investments to achieve our pavement and bridge targets. The projects identified as contributing to the achievement of Miami-Dade County's pavement and bridge performance targets are listed in the table below:

LONG RANGE TRANSPORTATION PLAN

The Miami-Dade 2045 LRTP seeks to address system preservation, identifies infrastructure needs within the metropolitan planning area, and provides funding for targeted improvements. The TPOs commitment to Pavement and Bridge Performance is emphasized through the 2045 LRTP Goal to Improve and Preserve the Existing Transportation System, which includes the following objectives:

- • Improve the resiliency/reliability of the transportation system,
- • Reduce the vulnerability and increase the resilience of critical infrastructure to the impacts and events.
- Preserve infrastructure (sustainability and resilience), and
- • Site and design new transportation infrastructure to minimize exposure to sea level rise within the infrastructure life span, based on the Southeast Florida Regional Climate Change Compact's 2015 Unified Sea Level Rise Projection.

Projects listed in the 2045 LRTP that contribute to pavement and bridge improvements are incorporated with capacity improvement projects. For a complete list of projects, please see Chapter 7 of the Miami-Dade 2045 LRTP; <https://miamidade2045lrtp.com/>.

For additional information on the Miami-Dade 2045 LRTP, please see the Miami-Dade 2045 Long Range Transportation Section of this report starting on page PM-80.

TRANSPORTATION PERFORMANCE MANAGEMENT

SYSTEM PERFORMANCE REPORT: SYSTEM & FREIGHT

DRAFT

SYSTEM & FREIGHT PERFORMANCE MANAGEMENT MEASURES

Congestion Reduction, System Reliability, and Freight Movement and Economic Vitality are three of the seven national goals identified in MAP-21 and maintained in the FAST Act. In January 2017, FHWA issued a Final Rule for system performance/freight/Congestion Mitigation Air Quality (CMAQ), entitled “National Performance Management Measures; Assessing Performance of the National Highway System, Freight Movement on the Interstate System, and Congestion Mitigation and Air Quality Improvement Program,” [23 CFR § 490]. The Rule went into effect on May 20, 2017, except for certain components of the greenhouse gas (GHG) measure, which went into effect as of September 28, 2017. Subsequently, FHWA repealed this performance management measure that assessed the percent change in tailpipe carbon dioxide (CO₂) (Greenhouse Gas) emissions on the NHS Compared to the Calendar Year 2017, effective July 2, 2018.

PERFORMANCE MANAGEMENT MEASURES

The Final Rule addresses the three areas as its name implies: performance, freight movement, and congestion/air quality. The Performance Management Measures under this rule will “assess the performance of the Interstate and non-Interstate National Highway System (NHS) for the purpose of carrying out the National Highway Performance Program (NHPP);” “freight movement on the Interstate System;” and “traffic congestion and on-road mobile source emissions for the purpose of carrying out the Congestion Mitigation and Air Quality (CMAQ) Program [23 CFR § 490]. State DOTs and MPOs are required to set targets for the Interstate System and Non-Interstate NHS, and to report on progress toward achieving those targets. State DOTs report progress to FHWA, while MPOs report progress to their State DOT. The CMAQ measures are limited to urbanized areas that are a part of a nonattainment or maintenance area for ozone, carbon monoxide, or particulate matter. Since Miami-Dade County and all of Florida is attainment for these three pollutants, the CMAQ Performance Management Measures do not apply.

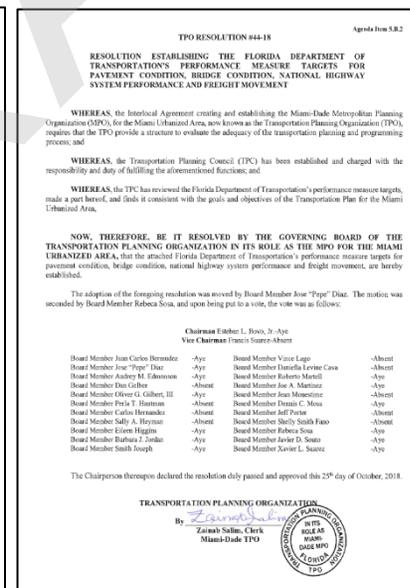

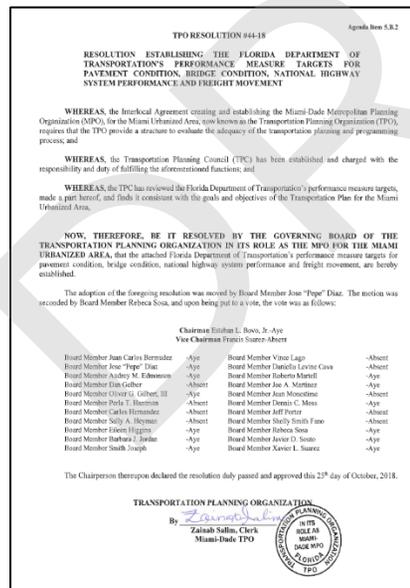

On May 18, 2018, FDOT established the following 2-year and 4-year performance targets for the NHS and freight travel time reliability:

National Performance Management Measures to Assess Performance of the NHS and Freight (23 CFR 490.507 and 490.607)

PERFORMANCE MEASURE	2-YEAR TARGET	4-YEAR TARGET
% of person-miles traveled on the Interstate that are reliable	75%	70%
% of person-miles traveled on the non-Interstate NHS that are reliable	n/a	50%
Truck travel time reliability ratio (TTR) on the Interstate	1.75	2.0

PERFORMANCE TARGETS

The TPO Governing Board established the FDOT performance targets for National Highway System performance and freight mobility by Resolution 44-18 on October 25, 2018 (illustrated below in Figure 1: TPO Resolution). By adopting these targets, the TPO will support achievement of the NHS performance and freight mobility targets by planning and programming projects in the TIP and LRTP that once implemented, are anticipated to make progress toward achieving the statewide targets.

ASSESSING PERFORMANCE OF THE NATIONAL HIGHWAY SYSTEM

Travel Time Reliability is used to report the percent of person-miles traveled that are reliable on the Interstate and Non-Interstate NHS. “Data to reflect the users can include bus, auto, and truck occupancy levels.”ⁱⁱ The Level of Travel Time Reliability (LOTRR) is defined as:

$$\frac{\text{Longer Travel Time (80th)}}{\text{Normal Travel Time (50th)}} = \frac{\# \text{ seconds}}{\# \text{ seconds}} = \text{Level of Travel Time Reliability Ratio}$$

Data for the LOTT metric is collected in 15-minute increments during four time periods for each reporting segment:ⁱⁱⁱ

- Monday - Friday
 - 6:00 AM – 10:00 AM
 - 10:00 AM – 4:00 PM
 - 4:00 PM – 8:00 PM
- 6:00 AM Saturday – 8:00 PM Sunday

States and MPOs in coordination will define the reporting segments, and they must be continuous on the mainline highway. Starting in 2018, State DOTs are required to report the “LOTRR metrics and the corresponding 80th and 50th percentile times for each time period and directional AADT for each reporting segment by June 15th of each year, for the previous year’s measures,”ⁱⁱⁱ to the Highway Performance Monitoring System (HPMS). The LOTTR ratio for each segment must be below a 1.50 during all four time periods, otherwise the segment is not considered reliable.ⁱⁱⁱ

The Interstate Travel Time Reliability and Non-Interstate NHS Travel Time Reliability are reported to the nearest tenth of a percent. The formula for calculating Travel Time Reliability is:

$$100 \times \frac{\sum_{i=1}^R SL_i \times AV_i \times OF_j}{\sum_{i=1}^T SL_i \times AV_i \times OF_j}$$

Where:

R = total number of Interstate (Non-Interstate NHS) System reporting segments that are exhibiting an LOTTR below 1.50 during all of the time periods identified in § 490.511(b)(1)(i) through (iv);

I = Interstate (Non-Interstate NHS) System reporting segment “i”;

SL_i = length, to the nearest thousandth of a mile, of Interstate (Non-Interstate NHS) System reporting segment “i”;

AV_i = total annual traffic volume to the nearest single vehicle, of the Interstate (Non-Interstate) System reporting segment “i”;

J = geographic area in which the reporting segment “i” is located where a unique occupancy factor has been determined;

OF_i = occupancy factor for vehicles on the NHS within a specified geographic area within the State/Metropolitan planning area; and

T = total number of Interstate (Non-Interstate NHS) System reporting segments.

ASSESSING FREIGHT MOVEMENT ON THE INTERSTATE SYSTEM

Freight movement on the Interstate is assessed using the Truck Travel Time Reliability (TTTR) Index also known as the Freight Reliability Measure. The TTTR Index metric is defined as:

$$\frac{\text{Longer Truck Travel Time (95th)}}{\text{Normal Truck Travel Time (50th)}} = \frac{\text{\# seconds}}{\text{\# seconds}} = \text{Truck Travel Time Reliability (TTTR) Ratio}$$

Data for the Truck Travel Time Reliability (TTTR) metric is collected during five time periods for each reporting section:

- Monday - Friday
 - Morning peak (6:00 AM -10:00 AM)
 - Midday (10:00 AM – 4:00 PM)
 - Afternoon peak (4:00 PM – 8:00 PM)
- Weekends (6:00 AM – 8:00 PM)
- Overnights for all days (8:00 PM – 6:00 AM)

Starting in 2018, State DOTs are required to report the “TTTR metrics and the corresponding 95th and 50th percentile times for each time period and each reporting segment by June 15th of each year, for the previous year’s measures,” iii to the HPMS. The Truck Travel Time Reliability is reported to the nearest hundredth. The formula for calculating Truck Travel Time Reliability is:

$$\frac{\sum_{i=1}^T (SL_i \times \max TTTR_i)}{\sum_{i=1}^T (SL_i)}$$

Where:

i = An Interstate System reporting segment;

maxTTTR_i = The maximum TTTR of the five time periods in paragraphs (a)(1)(i) through (v) of § 490.611, to the nearest hundredth, of Interstate System reporting segment “i”;

SL_i = Segment length, to the nearest thousandth of a mile, of Interstate System reporting segment “i”; and

T = A total number of Interstate System reporting segments.

BASELINE CONDITIONS

On January 1, 2018, the first 4-year performance period for the System & Freight National Performance Management Measures began. For the first performance period only, State DOTs are not required to report baseline condition/performance or 2-year targets for the non-Interstate NHS Reliability Performance Management Measure in the State's Baseline Performance Report due to FHWA on October 1, 2018. State DOTs do need to report the 2-year and 4-year targets for the Interstate System Reliability Performance Management Measure and the TTTR Index Performance Management Measure in the State's Baseline Performance Report [23 CFR § 490]. The baseline conditions for NHS and freight mobility for Florida and for Miami-Dade County are shown in Table 1: Baseline NHS and Freight Mobility Performance Management Measures 2017, 2018 and 2019. In 2020, FDOT did not make any adjustments to the PM3 performance targets at the midpoint reporting period of October 1, 2020.

Table 1: Baseline NHS and Freight Mobility Performance Management Measures 2017, 2018 and 2019

NHS AND FREIGHT MOBILITY PERFORMANCE MANAGEMENT MEASURES						
Baseline						
PERFORMANCE MEASURE	2017		2018		2019	
	Florida	Miami-Dade	Florida	Miami-Dade	Florida	Miami-Dade
% of person-miles traveled on the Interstate that are reliable	82%	57%	83%	59%	83.4%	57%
% of person-miles traveled on the non-Interstate NHS that are reliable	84%	59%	86%	65%	87.0%	62%
Truck travel time reliability ratio (TTR) on the Interstate	1.43	2.98	1.43	2.86	1.45	3.08

Source: FDOT

The first 4-year performance period is scheduled to end on December 31, 2021. The full progress report for the first 4-year performance period is due on October 1, 2022, and the Baseline report for the second performance period is also due on that date. The implementation dates for the System and Freight Performance Management Measures are depicted in **Table 2: System & Freight Performance Management-Implementation Schedule**. In 2020, FDOT did not make any adjustments to the PM3 performance targets at the midpoint reporting period of October 1, 2020."

ASSESSMENT OF SIGNIFICANT STATE PROGRESS

FHWA will not evaluate significant State progress toward achieving 2-year non-Interstate NHS Reliability Performance Targets for the Mid Performance Period Progress Report, due October 1, 2020. They will be reported in the second performance period, beginning January 1, 2022. FHWA will evaluate significant State progress toward achieving Interstate System Reliability Performance Targets and the TTTR Index Performance Targets at the midpoint (January 1, 2018 through December 31, 2019 reporting period – which is to be reported to FHWA by October 1, 2020) and the end of the first performance period (January 1, 2020 through December 31, 2021 reporting period – which is to be reported to FHWA by October 1, 2022). In 2020, FDOT did not make any adjustments to the PM3 performance targets at the midpoint reporting period of October 1, 2020.

COORDINATION WITH STATEWIDE PLANS AND PROCESSES

The TPO recognizes the importance of linking goals, objectives, and investment priorities to established performance objectives, and that this link is critical to the achievement of national transportation goals and statewide and regional performance targets. As such, the Miami-Dade 2045 LRTP reflects the goals, objectives, performance measures, and targets as they are described in other state and public transportation plans and processes, including the Florida Transportation Plan (FTP) and the Florida Freight Mobility and Trade Plan.

- The FTP is the single overarching statewide plan guiding Florida's transportation future. It defines the state's long-range transportation vision, goals, and objectives and establishes the policy framework for the expenditure of state and federal funds flowing through FDOT's work program. One of the seven goals of the FTP is Efficient and Reliable Mobility for People and Freight.
- The Florida Freight Mobility and Trade Plan presents a comprehensive overview of the conditions of the freight system in the state, identifies key challenges and goals, provides project needs, and identifies funding sources. Truck reliability is specifically called forth in this plan, both as a need as well as a goal.

CONTRIBUTIONS TO ACHIEVING SYSTEM & FREIGHT PERFORMANCE TARGETS

The TPO and FDOT are committed to ensuring the System and Freight performance in Miami-Dade County achieves the identified targets. The TPO has many programs, initiatives, and projects identified in the TIP and the LRTP to address system and freight performance in Miami-Dade County. FDOT's key plan is its Work Program. The TPO and FDOT coordinate their plans and programs to improve the reliability of the Miami-Dade transportation system, according to C.F.R. 450.332(b).

"The TIP shall reflect the investment priorities established in the current metropolitan transportation plan . . ." (23 CFR 450.326). The transportation plan (LRTP) "shall include both long-range strategies/actions that provide for the development of an integrated multimodal system..." (23 CFR 450.24). The TIP considers potential projects that fall into specific investment priorities established by the TPO in the LRTP. The TIP includes specific investment priorities that support the TPOs goals including improving system and travel, using a prioritization and project selection process established in the LRTP. This process evaluates projects that have an anticipated effect on improving the reliability of the NHS, Non-Interstate NHS, and truck travel time in Miami-Dade County.

MIAMI-DADE TPO

TRANSPORTATION IMPROVEMENT PLAN

A preliminary review of the FY 2022/2023 to FY 2026/2027 TIP includes 128 projects totaling \$1,892M in projects that improve travel reliability. The FY 2022/2026 to FY 2026/2027 TIP is located on the internet at: <http://www.interactip.com/>. This includes capacity improvement and operational projects. The Pavement and Bridge Performance Management Measures are incorporated into the 2022/2023 to 2026/2027 TIP to continue to assess and preserve infrastructure investments to achieve our pavement and bridge targets.

The projects identified as contributing to the achievement of Miami-Dade County's system and freight performance targets are listed in the table below:

LONG RANGE TRANSPORTATION PLAN

The Miami-Dade 2045 LRTP seeks to address system reliability and congestion mitigation through various means, including capacity expansion and operational improvements. The TPO's commitment to System and Freight Performance is emphasized through the 2045 LRTP Goal to Maximize Mobility Choices Systemwide, which includes the following objectives:

- Provide a comprehensive transportation network for dependable and reliable transportation options,
- Reduce congestion,
- Promote system reliability, and
- Increase mobility choices throughout the county.

There are over 60 projects listed in the 2045 LRTP that will help improve the system reliability of the Miami-Dade transportation system, including: implementation of the SMART Plan, other transit projects, and roadway capacity projects (widening and extensions) projects. For a complete list of projects, please see Chapter 7 of the Miami-Dade 2045 LRTP; <https://miamidade2045lrtp.com/>.

For additional information on the Miami-Dade 2045 LRTP, please see the Miami-Dade 2045 Long Range Transportation Section of this report starting on page PM-80.

TRANSPORTATION PERFORMANCE MANAGEMENT

SYSTEM PERFORMANCE REPORT: TRANSIT ASSET MANAGEMENT

DRAFT

TRANSIT ASSET MANAGEMENT

In July of 2016, FTA published the “Transit Asset Management; National Transit Database” Final Rule. The Transit Asset Management (TAM) Final Rule requires grant recipients of FTA funds to develop asset management plans to inventory their public transportation assets. These assets include equipment, rolling stock, infrastructure, and facilities. The Final Rule also establishes performance measures and annual reporting requirements, and defines “state of good repair” (SGR).ⁱ The Rule went into effect as of October 1, 2016. [49 CFR § 625, 630].

SGR PERFORMANCE MEASURES

The TAM Final Rule required “transit providers and group TAM plan sponsors” to set initial SGR performance targets of the following measures by January 1, 2017. The transit providers and group TAM plan sponsors must coordinate with the State DOTs and MPOs to establish regional TAM performance targets. The transit providers and group TAM plan sponsors were required to provide the TAM targets to the MPO by June 30, 2017.ⁱⁱ

ASSETS (ONLY THOSE FOR WHICH THE AGENCY HAS CAPITAL RESPONSIBILITY)	SGR PERFORMANCE MEASURE
Equipment: Non-revenue support -service and maintenance vehicles	Percentage of non-revenue vehicles met or exceeded Useful Life Benchmark
Rolling Stock: Revenue vehicles by mode	Percentage of revenue vehicles met or exceeded Useful Life Benchmark
Infrastructure: Only rail fixed-guideway, track, signals, and systems	Percentage of track segments with performance restrictions
Facilities: Maintenance and administrative facilities; and passenger stations (buildings) and parking facilities	Percentage of assets with condition rating below 3.0 on FTA TERM Scale

Source: [49 CFR § 625, 630]

For equipment and rolling stock classes, useful life benchmark (ULB) is defined as the expected lifecycle of a capital asset, or the acceptable period of use in service, for a particular transit provider’s operating environment. ULB considers a provider’s unique operating environment such as geography and service frequency and is not the same as an asset’s useful life.

The TAM rule defines two tiers of public transportation providers based on size parameters. Tier I providers are those that operate rail service or more than 100 vehicles in all fixed route modes, or more than 100 vehicles or more in one non-fixed route mode. Tier II providers are those that are a subrecipient of FTA 5311 funds, or an American Indian Tribe, or have 100 or less vehicles across all fixed route modes or have 100 vehicles or less in one non-fixed route mode. A Tier I provider must establish its own transit asset management targets, as well as report performance and other data to FTA. A Tier II provider has the option to establish its own targets or to participate in a group plan with other Tier II providers whereby targets are established by a plan sponsor, typically a state DOT, for the entire group. There are two Tier I transit agencies that serve Miami-Dade County and include:

- Miami-Dade Department of Transportation and Public Works (DTPW) – Transit
- South Florida Regional Transportation Authority (SFRTA)

MIAMI-DADE DEPARTMENT OF TRANSPORTATION AND PUBLIC WORKS (DTPW) - TRANSIT

PERFORMANCE TARGETS

Public transportation agencies are required to establish and report transit asset management targets annually for the following fiscal year. Each public transit provider or its sponsors must share its targets, TAM, and asset condition information with each MPO in which the transit provider's projects and services are programmed in the MPO's TIP.

MPOs are required to establish initial transit asset management targets within 180 days of the date that public transportation providers establish initial targets. However, MPOs are not required to establish transit asset management targets annually each time the transit provider establishes targets. Instead, subsequent MPO targets must be established when the MPO updates the TIP or LRTP.

The Miami-Dade DTPW 2018 Transit Asset Management Plan was presented to the TPO Governing Board on July 19, 2018. The Miami-Dade TPO originally adopted the Miami-Dade Department of Transportation and Public Works SGR targets for Calendar Year 2018 per Resolution 06-18 on January 25, 2018. The Miami-Dade Department of Transportation and Public Works SGR targets were updated for Calendar Year 2021 and were adopted by the Miami-Dade TPO (Per Resolution #16-2021 on March 18, 2021 which establishes the relationship between performance, plans, and programs, and provides the basis and foundation for this performance framework. Beginning in 2022, the TPO will adopt the SGR targets annually as part of its TIP and will no longer utilize a separate resolution.

The Miami-Dade DTPW has established the following SGR performance targets for Fiscal Year 2021/2022:

Asset Category: Rolling Stock

ASSET CATEGORY	ASSET CLASS / ASSET TYPE	FLEET SIZE	FLEET AGE	USEFUL LIFE (ULB)	FY20 TARGET	FY 20 PERFORMANCE METRIC (% Exceeding ULB)	FY 21 TARGET
REVENUE VEHICLES	Minibus (MB)	3	8.3	10	0%	0%	0%
	Over-The-Road (BU)	11	14.4	14	21.8%	100%	0%
	40 Foot Bus (BU)	710	5.39	14		30.6%	10.3%
	Articulated Bus (BU)	89	5.89	14		0%	0%
	Metrorail (HR)	220	15.61	31	22%	40.9%	22.7%
	Metromover (AG)	30	10.41	20	0%	.03%	0%

Paratransit and Contingency vehicles are not calculated in the performance metric based on SGR Reporting requirements. See TAM/NTD Crosswalk table for clarification.

Performance Metric Variance / Forecasted Changes

- a) **Minibus / Cutaway (Small Buses)** – A sale of small buses have adjusted the overall fleet age, performance metrics target and forecasted target. In addition, it is important to note that there are additional small vehicles used for passenger service which are owned and operated by a 3rd party contractor.
- b) **Large Bus Fleet** – The sale of many of the vehicles and anticipated receipt of one hundred and forty (140) Compressed Natural Gas (CNG) vehicles, projected addition of seventeen (17) Electric vehicles; the performance metrics will decrease. In addition, it is important to note that there are additional commuter vehicles used for passenger service which are owned and operated by a 3rd party contractors.
- c) **Metrorail (Heavy Railcars)** – Addition of thirty-eight (38) vehicles as of 9/30/18, fifty-eight (58) as of 9/30/19, thirty-four (34) as of 9/30/20, projection of the remaining six (6) vehicles prior to 9/30/21 and sale of fifty (50) legacy vehicles; the anticipated performance target is not expected to decrease.
- d) **Metromover (Automated Guideway)** – Useful Life Benchmark (ULB) adjustment from 31yrs to 20yrs per vendor signed contract.

SYSTEM PERFORMANCE REPORT

Asset Category: Non-Revenue Vehicles (Equipment)

ASSET CATEGORY	ASSET CLASS / ASSET TYPE	FLEET SIZE	FLEET AGE	USEFUL LIFE (ULB)	FY 20 TARGET	FY 20 PERFORMANCE METRIC (% Exceeding ULB)	FY 21 TARGET
Equipment	Automobile	82	8.48	8	40%	28%	25%
	Steel Wheel Vehicles	8	24.64	25	57%	50%	50%
	Trucks & Other Rubber Tire Vehicles	225	10.23	14	40%	37.3%	33.3%

Equipment with an acquisition value that exceeds \$50,000.00 such as construction and maintenance equipment (cranes, prime mover, fork lifts, solar panels battery packs and generators) are not calculated in the performance metric based on SGR Reporting requirements.

Performance Metric Variance / Forecasted Changes

- a) **Automobiles** – The sale and replacement of vehicles has decreased the fleet age and performance metric. Additional vehicle replacements are projected for the next fiscal year; therefore, the target is expected to decrease. Note: Many vehicles are put in service after the initial model year.
- b) **Steel Wheel Vehicles** – The sale and replacement of vehicles has decreased the fleet age and performance metric. However, the performance metrics is not expected to decrease as no replacement vehicles are requisitioned for next fiscal year.
- c) **Trucks & Other Rubber Tire Vehicles** – The addition of fifty (50) vehicles in conjunction with sale and replacement of decommissioned vehicles has resulted with a decreased fleet age. The forecasted performance target is a result of anticipated vehicle sales and no replacement vehicles within the next fiscal year.

Asset Category: Infrastructure

ASSET CATEGORY	ASSET CLASS	SYSTEM (TRACK FEET)	TOTAL PERFORMANCE RESTRICTIONS	FY 20 TARGET	FY 20 PERFORMANCE METRIC (% Performance Restrictions)	FY 21 TARGET
Infrastructure	Rail Fixed Guideway	298,957	136	0%	6.36%	0%
	Mover Automated Guideway	46,464	0	0%	0%	0%

Infrastructure performance restrictions are being developed to capture the data as outlined by the revised definition. Currently the data is captured and reported at the highest level.

Guideway Performance Restrictions Requirements

- a) A performance restriction is defined to exist on a segment of rail fixed guideway when the maximum permissible speed of transit vehicles is set to a value that is below the guideway’s full service speed. This does not include the operationally modified design speed.
- b) The length of track miles under restrictions each month and must be calculated separately for each combination of rail fixed guideway modes and service types (Metrorail and Metromover).
- c) All restrictions are documented to the specific segment of track (except system-wide restrictions due to inclement weather, for example) are required to be included in the calculation, regardless of cause or duration, including temporary speed restrictions placed due to maintenance activity.
- d) An annual value for the length of track miles under performance restrictions to FTA by averaging the values calculated each month over the course of the year (DTPW reports on a fiscal year October to September).

SYSTEM PERFORMANCE REPORT

Asset Category: Facilities

ASSET CATEGORY	ASSET CLASS	ASSET CLASS / ASSET TYPE	NUMBER OF REPORTABLE FACILITIES	TOTAL FACILITIES ASSESSED	FY 20 PERFORMANCE METRIC (< 3 on TERM Scale)	FY 21 TARGET
Facilities	Maintenance & Administrative	Service & Inspection	3*	3	0%	0%
		Heavy Maintenance & Overhaul	1	1		
		Administrative / Sales Offices	2	6		
		Vehicle Washing	5	5		
		Revenue Collection	4	4		
		Combined Administrative & Maintenance	2	4		
		Vehicle Testing	1	1		
		Vehicle Blow-Down	2*	2		
		Vehicle Fueling	4	4		
		General Purpose Maintenance Facility/Depot	4	4		
		Other	15*	15		
	Passenger & Parking	Bus Transfer Center	25*	25	0%	0%
		Elevated Fixed Guideway Station	44	44		
		Parking Structure	9	9		
		Surface Parking Lot	24*	24		
Other		6	6			

*Total number of facility locations were revised by definition.
Software is under development to capture and store future assessments.

Source: DTPW

MIAMI-DADE 2022/23-2026/27 TIP CONTRIBUTIONS TO ACHIEVING TAM PERFORMANCE TARGETS

Projects in the 2022/23-2026/27 TIP that contribute to achieving the TAM performance targets include:

TPO PROJECT NO	FACILITY/PROJECT NAME	PROJECT DESCRIPTION
TA000106	MDT-Bus Purchase	Purchase of Vehicles/Equipment
TA11	FTA Section 5337 Federal Formula Funding	FTA Sec 5337 State of Good Repair Metromover/Metrorail
TA18	MDT Additional Elevators @ Dadeland North Metrorail Station	Construction of additional elevators at Dadeland North Metrorail Station
TA0000022	Rail Vehicle Replacement	Rail vehicle replacement of 136 car fleet
TA0000034	Metrorail and Metromover Fixed Guideway Bridge Inspection	Capital maintenance of existing guideway
TA0000006	Capitalization of Preventative Maintenance	Bus systems including security and emergency facilities and equipment
TA7	Bus Replacement	Replacement of buses to maintain the bus fleet replacement plan
TA0000076	Metromover Brickell Extension Guideway Painting	Painting and restoration of 1.1 miles of the existing rusted steel girders of the Metromover's Brickell extension
TA0000078	Metrorail Escalators Replacement and Elevators Refurbishment	Replace escalators and elevators at 22 Metrorail stations, and may also include bus garages and maintenance facilities
TA0000093	Track & Guideway Rehabilitation	Rehabilitate existing track and guideway equipment and fixtures
TA0000097	MDT Infrastructure Renewal Program	Replace and upgrade physical assets according to normal replacement cycles; program focuses on bus overhauls, rehabilitation of bus and rail facilities and system equipment
TAMDT290	Metromover Escalator Replacement and Elevator Refurbishment	Replace escalators and elevators at the 21 Metromover stations, and may also include bus garages and maintenance facilities

SOUTH FLORIDA REGIONAL TRANSPORTATION AUTHORITY (SFRTA)

PERFORMANCE TARGETS

The South Florida Regional Transportation Authority (SFRTA) 2018 Transit Asset Management Plan was submitted to the TPO on September 28, 2018. The Miami-Dade TPO adopted the SFRTA SGR targets for Fiscal Year 2018 Per Resolution #19-19 on February 21, 2019, which established the relationship between performance, plans, and programs, and provides the basis and foundation for this performance framework. The SFRTA SGR targets were updated for Calendar Year 2022 and beginning in 2022, the TPO will adopt the SFRTA targets annually as part of its TIP, and will no longer utilize a separate resolution.

The South Florida Regional Transit Authority (SFRTA) has established the following SGR performance targets for Calendar Year 2022:

FTA Asset Classes	Performance Measure	2020 Performance	2021 Performance	2022 Target
Rolling Stock (Revenue Vehicles)	39 Year Useful Life	26.67%	26.32%	25%
Infrastructure (Rail fixed-guideway track)	Performance Restrictions (slow orders)	0.13%	2.12%	3.5%
Facilities (Stations, Maintenance Facilities and Operations Center)	1-5 Scale	5%	5%	5%
Equipment (Non-revenue support-service and maintenance vehicles)	8 Year Useful Life	44.44%	50.00%	55.56%

DRAFT

TRANSPORTATION PERFORMANCE MANAGEMENT

SYSTEM PERFORMANCE REPORT: TRANSIT SAFETY PERFORMANCE

DRAFT

FTA published a final Public Transportation Agency Safety Plan (PTASP) rule and related performance measures as authorized by Section 20021 of the Moving Ahead for Progress in the 21st Century Act (MAP-21). The PTASP rule requires operators of public transportation systems that receive federal financial assistance under 49 U.S.C. Chapter 53 to develop and implement a PTASP based on a safety management systems approach. Development and implementation of PTASPs is anticipated to help ensure that public transportation systems are safe nationwide.

The rule applies to all operators of public transportation that are a recipient or sub-recipient of FTA Urbanized Area Formula Grant Program funds under 49 U.S.C. Section 5307, or that operate a rail transit system that is subject to FTA's State Safety Oversight Program. The rule does not apply to certain modes of transit service that are subject to the safety jurisdiction of another federal agency, including passenger ferry operations that are regulated by the United States Coast Guard, and commuter rail operations that are regulated by the Federal Railroad Administration.

The PTASP rule was published on July 19, 2018 with an effective date of July 19, 2019. Transit operators subject to the rule must have a PTASP and safety targets in place by July 20, 2020. Due to the COVID-19 pandemic, this date was extended to December 31, 2020 and later extended again to July 20, 2021. MPOs must then establish transit safety targets no later than 180 days after the transit operators establishes its targets. Transit operators are required to review, update, and certify their PTASP annually.

The transit agency sets targets for the Transit Safety Performance Measures in the PTASP based on the safety performance measures established in the National Public Transportation Safety Plan (NPTSP). The DTPW established safety performance targets (SPTs) for the FTA National Transit Database (NTD) are illustrated in **Figure 1: Safety Performance Targets**.

SYSTEM PERFORMANCE REPORT

Figure 1: DTPW Safety Performance Targets 2022

SAFETY PERFORMANCE TARGETS	METRO RAIL	METRO OVER	METRO BUS
1.Total NTD Reportable Fatalities	3	2	5
2.Total NTD Reportable Fatality Rate per 1 Million Vehicle Revenue Miles	0.33	1.67	0.18
3.Total NTD Number of Reportable Injuries	7	2	41
4.Total NTD Rate of Reportable Injuries per Total Vehicle Revenue Miles	0.78	1.64	1.45
5.Total NTD Number of Reportable Safety Events	14	3	27
6.Total NTD Rate of Reportable Events per Total Vehicle Revenue Miles	1.56	2.46	0.96
7.System reliability - Mean distance in miles between major mechanical failures	39,000 (Service Disruptions)	6,000 (Failures)	4,000 (Failures)

The initial Miami-Dade DTPW PTASP was presented to the TPO Governing Board on March 18, 2021 and were adopted by the Miami-Dade TPO (Per Resolution #14-2021) which establishes the relationship between performance, plans, and programs, and provides the basis and foundation for this performance framework. DTPW has informed the TPO that its Safety Performance Targets for 2022 will remain unchanged from 2021. In addition, beginning in 2022, the TPO will adopt the DTPW PTASP targets annually as part of its TIP, and will no longer utilize a separate resolution.

TRANSPORTATION PERFORMANCE MANAGEMENT

SYSTEM PERFORMANCE REPORT: 2045 MIAMI-DADE LONG RANGE TRANSPORTATION PLAN

DRAFT

The Miami-Dade 2045 LRTP was adopted by the Miami-Dade TPO Governing Board on September 26, 2019. The 2045 LRTP guides citizens, businesses, and elected officials in fostering an innovative vision for the future of the transportation system over the next 26 years. The plan serves as a mechanism for the implementation of improvements to the transportation network through the identification and prioritization of transportation projects to address current and future needs.

The existing transportation system was analyzed with the projected increased population in 2045 to identify deficiencies in the transportation system for the 26-year period from 2020 to 2045. Over 300 improvement projects were identified to meet the desired mobility conditions.

These projects were reviewed and evaluated to develop the 2045 Cost Feasible Plan based on the projected available revenue of \$19.3 billion YOY dollars for new capital and new Operating and Maintenance (O&M).

- The development of the 2045 LRTP highlights the changes in transportation over the last five years, from focus areas and policy changes, to innovative and emerging technologies including: the implementation of the SMART Plan, Bus Express Rapid Transit (BERT), and rapid transit corridors; a standardized built environment classification system to help identify criteria for roadway design elements; the use of rideshare services, scooters and mobile applications to increase mobility and connectivity; and the emergence of connected, autonomous and electric vehicles.
- Miami-Dade County's population is projected to grow from 2.7 million in 2019 to 3.5 million people in 2045, representing a growth rate of 34 percent. The employment is projected to grow from 1.3 million to 1.8 million for the same time period, representing a 38 percent growth rate.

TRANSPORTATION PERFORMANCE MANAGEMENT

The 2045 Plan was developed through a performance-driven, outcome-based approach considering all modes of transportation. The Federal Highway Administration (FHWA) issued rules establishing required performance management measures for safety, pavement, bridges, system and freight, which are illustrated in the plan. FHWA defines Transportation Performance Management as a strategic approach that uses system information to make

investment and policy decisions to achieve national performance goals. Transportation Performance Management is systematically applied, provides key information to understand investment decisions, and improves communications between decision makers, stakeholders, and the traveling public.

SCENARIO PLANNING

The 2045 LRTP implemented a scenario planning process to better understand the effect proposed strategies with different sets of transportation projects will have on the transportation system. Various multimodal transportation improvement and land use combinations including the SMART Plan, highway, transit, multimodal improvements, and new technologies were evaluated. Scenario Planning is an analytical framework that informs decision makers about the implications of various investments and policies on the transportation system and performance. The results of the SMART Plan land use planning process were incorporated into the scenario planning assessment. The TPO developed a tiered approach, with six scenarios, which aligned with the three scenarios used in the regional transportation plan, include the following:

Existing + Committed Network (Base Network)

The E+C Network represents the baseline conditions which consists of all existing transportation facilities plus projects that have construction funds committed through 2024.

Scenario 1- 2040 Cost Feasible Plan

Scenario 1 consists of projects in the E+C Network and highway projects in the 2040 Cost Feasible Plan.

Scenario 2 – SMART Plan Transit

Scenario 2 consists of Scenario 1 projects plus all associated with the SMART Plan.

Scenario 3 – Highway Projects

Scenario 3 consists of Scenario 2 projects, adds additional highway projects in transportation agency master plans (FDOT, FTE, MDX, DTPW - Roadway), plus highway projects identified by stakeholders and public input to address deficiencies.

Scenario 4 – Beyond SMART Plan Transit Projects

Scenario 4 consists of Scenario 3, adds additional transit projects from past studies, plus transit projects beyond the SMART Plan identified by stakeholders and the public to address deficiencies.

Scenario 5 – Alternative Land Use

Scenario 5 consists of Scenario 4 projects with an alternate Land Use of the projected 2045 population and employment, shifting population growth along the SMART Plan rapid transit corridors; and

Scenario 6 – Technologies

Scenario 6 is the technologies scenario, which represents the implementation of future technologies identified, and their anticipated effect on the transportation system.

Projects in each scenario were listed, mapped, modeled in the travel demand model (Southeast Florida Regional Planning Model - SERPM 8). Since this is a tiered scenario approach that is additive, the scenarios were modeled in numerical order. Scenario 6 Technologies was not modeled since the effects of technologies on transportation systems are not proven at this time. SERPM 8 is also being used for the development of the Southeast Florida Regional Transportation Plan (RTP) (for Miami-Dade, Broward, and Palm Beach Counties) for adoption in June 2020. The RTP is testing three scenarios including:

The scenarios analyzed for the Miami-Dade LRTP were tested corresponding to the regional scenarios as identified below:

MIAMI-DADE SCENARIOS	1	2	3	4	5
REGIONAL PLAN SCENARIOS	1	2	2	2	3

SYSTEMS PERFORMANCE

System measures assess the performance of the County’s transportation system as an integrated multimodal system. These measures were used to evaluate the scenarios. The scenarios, which represent a group of systemwide projects, were evaluated at the systems level to identify how each scenario compared to the baseline (E+C network) and to each previous scenario in the tiered approach. The criteria selected for evaluation came from the SERPM 8 and included:

- Transit Route Miles
- Vehicle Hours Traveled
- Vehicle Miles Traveled
- Lane Miles
- Peak Period Speed (MPH)
- Transit Boardings
- Vehicle Trips

The results of the Scenario testing are shown in the table below **Table 3-1**. The scenarios analyzed for the Miami-Dade 2045 LRTP were tested corresponding to the regional scenarios as identified below:

Table 3-1 Scenario Results

SCENARIO	TRANSIT ROUTE MILES	VEHICLE HOURS TRAVELED	VEHICLE MILES TRAVELED	LANE MILES	PEAK PERIOD SPEED (MPH) (CONGESTED)	PERCENT LANE MILES WITH V/C > 1.0 (AM PEAK)	WORK TRIP LENGTH (MILES) (FROM COUNTY)	TRANSIT BOARDINGS	TOTAL NUMBER VEHICLE TRIPS
Existing + Committed Network	3,429.3	3,229,753	59,910,810	6,336.5	18.5	12.3%	14.5	528,116	9,327,652
1. 2040 Cost Feasible Plan	3,416.4	2,803,522	60,089,935	6,542.1	21.4	11.0%	14.6	545,829	9,332,792
2. SMART Plan Transit	4,043.4	2,700,914	58,803,508	6,500.9	21.8	10.7%	14.7	817,691	9,140,544
3. Highway	4,028.9	2,624,261	60,140,875	6,983.9	22.9	8.1%	14.8	783,792	9,214,728
4. Beyond SMART Plan	6,207.3	2,573,450	59,277,677	6,900.7	23.0	7.8%	14.8	965,672	9,085,476
5. Alternative Land Use	6,207.3	2,562,543	58,600,863	6,900.7	22.9	7.7%	14.7	1,005,772	9,026,204

* Scenario 6 was not analyzed at the same level due to unknown requirements and influences/impacts at this time.

The scenarios were also evaluated based on how each scenario contributes to meeting the targets of the National Performance Management Measures on the systemwide level. **Table 3-2** shows these results using a color scale to depict incremental anticipated improvements from the baseline (E+C network) by scenario and is based on:

- Transit projects provide additional mobility options, increases safety, and improves system reliability by eliminating vehicles on roadways,
- Roadway projects provide additional capacity, improve system reliability,
- Resurfacing, restoration, and rehabilitation projects improve pavement and bridge conditions, and
- Operational and intersection projects improve safety.

Table 3-2: Performance Measure Scenario Results

SCENARIO/PLAN	SAFETY	PAVEMENT/ BRIDGE	SYSTEMS/ FREIGHT
Existing + Committed Network	BASELINE	BASELINE	BASELINE
1. 2040 Cost Feasible Plan	■	■	■
2. SMART Plan Transit	■	■	■
3. Highway	■	■	■
4. Beyond SMART Plan	■	■	■
5. Alternative Land Use	■	■	■
Cost Feasible Plan	■	■	■

- Scenario provides some improvement over the baseline
- Scenario provides more improvement over the baseline
- Scenario provides the most improvement over the baseline

PROJECT PRIORITIZATION

All projects identified as part of the scenario planning effort were evaluated in developing the Cost Feasible Plan. These projects represent a comprehensive and multimodal network of transportation projects to meet forecasted system-wide travel demands of Miami-Dade County. Scenario 5 (Alternative Land Use) is being addressed through separate initiatives that support the rapid transit corridors prioritized in this 2045 LRTP. Scenario 6 (Future Technologies) were highlighted in the 2045 LRTP, under Chapter 9, as to their potential impact on the future transportation network. Projects prioritization was based on scenario planning analysis,

TPO Governing Board resolutions, agency project priorities, and the 2045 LRTP Goals and Objectives. The combined results were used to develop the Cost Feasible Plan, which is constrained by available resources, as reflected in Chapter 7 of the Miami-Dade 2045 LRTP.

Projects in the Cost Feasible Plan contributing to meeting the TPO and FDOT targets for the National Performance Management Measures are identified in the project tables by the primary performance measure addressed:

- PM1 Safety
- PM2 Pavement/Bridge
- PM 3 System/Freight

SYSTEMS PERFORMANCE

The TPO recognizes the importance of linking goals, objectives, and investment priorities to established performance objectives, and that the link is critical to the achievement of the national transportation goals and statewide and regional performance targets. As such, the Miami-Dade 2045 LRTP reflects the goals, objectives, performance measures, and targets as they are available and described in other state and public transportation plans and processes; specifically the Florida Strategic Highway Safety Plan (SHSP), the Florida Highway Safety Improvement Program (HSIP), the Florida Transportation Plan (FTP), the Florida Transportation Asset Management Plan, the Florida Freight Mobility and Trade Plan, and other public transportation plans and process.

SAFETY PERFORMANCE

The Miami-Dade 2045 LRTP increases the safety of the transportation system for motorized and non-motorized users as required. The LRTP aligns with the Florida SHSP and the FDOT HSIP with specific strategies to improve safety performance focused on prioritized safety projects, pedestrian and/or bicycle safety enhancements, and traffic operation improvements to address the goal to reduce fatalities and serious injuries.

The TPO's commitment to safety is emphasized through the 2045 LRTP Goal to Increase the Safety of the Transportation System for All Users, which includes the following objectives:

- Improve the safety of the transportation system,
- Promote projects in high crash locations, and
- Improve safety of the transportation system of the elderly and disabled.

The TPO will provide information from the FDOT HSIP annual reports to track the progress made toward the statewide safety performance targets. The TPO will document the progress on safety performance targets established by the TPO for its planning area.

The Miami-Dade 2045 LRTP identifies safety needs within the metropolitan planning area and provides funding for targeted safety improvements. There are many projects listed in the LRTP that will help improve safety of the Miami-Dade transportation system, including: capacity and operational improvements, redesigns of roadway segments, transportation systems management and operation (TSM&O), roadway and access improvements, adding truck lanes, and reconstruction projects. In addition, a financial set-aside was established for bicycle and pedestrian, congestion management, and freight projects to ensure funding for these important projects that can improve safety of the Miami-Dade transportation system. For a complete list of projects, please see project listings **(pages 07-06 to 07-141) of the Miami-Dade 2045 LRTP.**

PERFORMANCE AND BRIDGE PERFORMANCE

The Miami-Dade 2045 LRTP seeks to address system preservation, identifies infrastructure needs within the metropolitan planning area, and provides funding for targeted improvements. The TPOs commitment to Pavement and Bridge Performance is emphasized through the 2045 LRTP Goal to Improve and Preserve the Existing Transportation System, which includes the following objectives:

- Improve the resiliency/reliability of the transportation system,
- Reduce the vulnerability and increase the resilience of critical infrastructure to the impacts and events. Preserve infrastructure (sustainability and resilience), and
- Site and design new transportation infrastructure to minimize exposure to sea level rise within the infrastructure life span, based on the Southeast Florida Regional Climate Change Compact's 2015 Unified Sea Level Rise Projection.

The cost to operate and maintain the existing and future transportation system were accounted for in the development of the Cost Feasible Plan. Operating and maintenance (O&M) cost for DTPW transit and roadways and for Districtwide SHS Existing Facilities are identified in Chapter 6. For FTE and MDX the cost to operate and maintain their existing facilities were identified in the process of developing the forecasted revenues. FTE also assumed the O&M for future projects through this process.

On or before October 1, 2020, FDOT will provide FHWA and the TPO a detailed report of pavement and bridge condition performance covering the period of January 1, 2018 to December 31, 2019. FDOT and the TPO also will have the opportunity at that time to revisit the four-year targets. Miami-Dade County currently achieves the established targets for Pavement and Bridge.

There are many projects listed in the Miami-Dade 2045 LRTP that will improve pavement and bridge conditions as a secondary benefit to widening and reconstruction projects. For a complete list of projects, please see project listings.

TRANSIT ASSET MANAGEMENT

A total of \$27,900 million is identified to support progress towards TAM performance targets, transit investment, and maintenance funding in the Miami-Dade 2045 LRTP. This includes \$5,195 million for new transit capital and new O&M (27% of the available funds for new capital and new O&M (\$19.318), or 12% of the total LRTP revenue (\$43,745)). Also, DTPW – Transit has \$22,705 million of reoccurring obligations which includes \$905 million (2% of the total LRTP revenue (\$43,745 million)) for bus replacement and \$14,754 million (34% of the total LRTP revenue (\$43,745 million)) for O&M of the existing system. Improving the State of Good Repair (SGR) of capital assets is an overarching goal of this process.

DRAFT

SUMMARY

Projects contributing to meeting the TPO and FDOT targets for the National Performance Management Measures are identified in the project listings by the primary performance measure (PM number) addressed by the project. A summary of projects contributing to the performance management targets and are summarized by agency in **Table 7-16**.

Number of Projects by Agency Contributing to PM Targets

AGENCY/MODE	PM1 SAFETY	PM2* PAVEMENT/BRIDGE	PM3* SYSTEMS/FREIGHT
Transit	1	0	11
FDOT SIS	6	0	8
FDOT Other Roads	7	0	3
FTE	4	0	5
MDX	2	0	2
DTPW - Roads	5	N/A	N/A
Bike/Ped	55	N/A	N/A
CMP	9	0	1
Freight	16	0	1

* INCLUDES INTERSTATE AND NON-INTERSTATE NHS FACILITIES
PM1 - INCLUDES ALL FACILITIES

Memorandum

Date: April 22, 2022

To: Aileen Bouclè, Executive Director
Transportation Planning Organization

From: Eulois Cleckley, Director and CEO 
Department of Transportation and Public Works

Subject: Request for Placement on the Agenda

On July 6, 2012, the Federal Transit Administration (FTA) signed into law Moving Ahead for Progress in the 21st Century Act of 2012 (MAP-21). This Act requires Miami-Dade County Department of Transportation and Public Works (DTPW) develop a Transportation Asset Management (TAM) Plan. The TAM Plan establishes the requirements for managing transit assets and their condition, as well as an accountability/communication tool for established capital and operations planning efforts.

This item is critical for DTPW to be in compliance with Federal regulations governed under MAP-21. It focuses on identifying and prioritizing maintenance and repair needs of transit vehicles and infrastructure, which may lower the cost, increase reliability and performance, reduce travel delays for passengers, promote resilience, and yield system safety improvements. MAP-21 also mandates the development of performance-driven results-based program that would provide a greater level of transparency and accountability, improve project decision-making, and more efficient investment of Federal transportation funds.

I respectfully request placement of this item onto the May 2022 Board meeting, Transportation Planning Organization agenda to ensure we maintain a safe and reliable transit service to the residents and visitors of Miami-Dade County.

Fiscal Year
21/22
January 2022 Submission

STATE OF GOOD REPAIR
PERFORMANCE TARGETS

In accordance with the Moving Ahead for Progress in the 21st Century Act (MAP-21) (Pub. L. 112-141 (2012), codified at 49 U.S.C. 5326) Planning Rule, each transit agency is required to establish performance targets for State of Good Repair (SGR). The new rule requires development of a performance-driven and outcome-based program to strengthen the infrastructure of the United States Transportation System. In response to this requirement, the Miami-Dade County Department of Transportation and Public Works (DTPW) approves and adopts the established State of Good Repair Performance Targets.

As hereby certified by:

Eulois Cleckley
Director and CEO / Accountable Executive
Miami-Dade Department of Transportation and Public Works

Date: 4/21/2022

Miami-Dade County, Transportation and Public Works

State of Good Repair

Performance Targets by Asset Category

REVENUE SERVICE VEHICLES

By definition, one target is set for each mode/class/asset type within the Agency's Inventory. If multiple fleets exist within one asset type of different service age, the fleets must be combined to calculate the performance metric percentage of the asset type and to set the following fiscal years target. Specifically, vehicles with similar characteristics are grouped together as a class/type. As an example, Minibus and Cutaway vehicles are classified as small revenue buses therefore they are grouped and are presented as a single performance target.

ASSET CATEGORY	ASSET CLASS / ASSET TYPE	FLEET SIZE	FLEET AGE	USEFUL LIFE (ULB)	FY 22 TARGET
REVENUE VEHICLES	Minibus (MB)	3	9.32	10	100%
	Over-The-Road (BU)	1	15.43	14	0%
	40 Foot Bus (BU)	763	5.85	14	12.5%
	Articulated Bus (BU)	89	6.77	14	0%
	Metrorail (HR)	186	15.96	31	0%
	Metromover (AG)	30	11.41	20	0%

Paratransit and Contingency vehicles are not calculated in the performance metric based on SGR Reporting requirements. See TAM/NTD Crosswalk table for clarification.

Performance Metric Variance / Forecasted Changes

- a) **Minibus / Cutaway (Small Buses)** – A sale of small buses have adjusted the overall fleet age, performance metrics target and forecasted target.
- b) **Large Bus Fleet** – The sale of many of the vehicles and anticipated receipt of thirty-three (33) Electric vehicles; the performance metrics will decrease. In addition, it is important to note that there are additional commuter vehicles used for passenger service which are owned and operated by a 3rd party contractors.
- c) **Metrorail (Heavy Railcars)** – All heavy rail vehicles are on property. The sale of fifty (50) legacy vehicles; the anticipated performance target is expected to decrease.
- d) **Metromover (Automated Guideway)** – Useful Life Benchmark (ULB) adjustment from 31yrs to 20yrs per vendor signed contract.

Miami-Dade County, Transportation and Public Works

State of Good Repair

Performance Targets by Asset Category

NON-REVENUE VEHICLES

By rule, there are multiple asset classifications that are grouped within the 'Equipment' category that must be included in the comprehensive Transit Asset Management Inventory. However, Non-Revenue Vehicles are the only reportable assets used to set and measure performance targets. Within this asset type, the reportable classes are limited to automobiles, trucks & other rubber tire vehicles and steel wheel vehicles. This asset category is calculated by model year not by in-service date.

ASSET CATEGORY	ASSET CLASS / ASSET TYPE	FLEET SIZE	FLEET AGE	USEFUL LIFE (ULB)	FY 22 TARGET
Equipment	Automobile	95	8.16	8	20%
	Steel Wheel Vehicles	11	25.58	25	63.6%
	Trucks & Other Rubber Tire Vehicles	248	7.81	14	25%

Equipment with an acquisition value that exceeds \$50,000.00 such as construction and maintenance equipment (cranes, prime mover, forklifts, solar panels battery packs and generators) are not calculated in the performance metric based on SGR Reporting requirements.

Performance Metric Variance / Forecasted Changes

- a) **Automobiles** – The sale and replacement of vehicles has decreased the fleet age and performance metric. Additional vehicle replacements are projected for the next fiscal year; therefore, the target is expected to decrease. Note: Many vehicles are put in service after the initial model year.
- b) **Steel Wheel Vehicles** – The purchase of three (3) vehicles has provided for potential increased performance. However, the performance metrics is not expected to decrease as no replacement vehicles are requisitioned for next fiscal year.
- c) **Trucks & Other Rubber Tire Vehicles** – The addition of forty-seven (47) vehicles in conjunction with sale and replacement of decommissioned vehicles has resulted with a decreased fleet age. The forecasted performance target is a result of anticipated vehicle sales and no replacement vehicles within the next fiscal year.

Miami-Dade County, Transportation and Public Works

State of Good Repair

Performance Targets by Asset Category

FACILITIES

The rule requires that percentage of facilities by group that are below 3.0 on the Transit Economic Requirements Model (TERM) Scale are measured and reported. The condition data grouped into two classes:

- (1) Administrative & Maintenance; (2) Passenger & Parking

Note: Additional structures were assessed to accurately rate the condition of the facilities. However, the additional facilities are not required for Performance Measures and Targets.

ASSET CATEGORY	ASSET CLASS	ASSET CLASS / ASSET TYPE	NUMBER OF REPORTABLE FACILITIES	TOTAL FACILITIES ASSESSED	FY 22 TARGET
Facilities	Maintenance & Administrative	SCHEDULED 2022			0%
	*Passenger & Parking	Bus Transfer Center	25	0	0%
		Fixed Guideway Station	44	23	
		Parking Structure**	9	9	
		Surface Parking Lot	24	12	
		Other	7	5	

*Metrorail Facilities and Ancillary Structures, Overpasses and Parking Only

**Parking will be modified during this TAM Cycle as a result of 'New Construction'

Performance Metric Variance / Forecasted Changes

- a) **Passenger Facilities** – Twenty-three (23) Metrorail stations and twenty-nine (29) support structures (see *Ancillary Assets*) included within this phase. Approximately thirty percent (30.4%) of the Passenger Facilities are 'Under Construction'. Additional Passenger facilities are pending development.
- b) **Parking** – Nine (9) Parking Garages and twelve (12) Surface Parking Lots (does not include parking for ancillary facilities). Demolition/Renovation of current parking locations are in progress. Two (2) additional structures are under construction and will be assessed upon completion.
- c) **Maintenance** – Facilities or compounds in which maintenance activities are performed. This could include dispatch, fueling, vehicle wash, warehouses and other buildings. Additional maintenance compound pending construction.
- d) **Administrative** – Executive and /or support offices where administrative functions are performed. This could include but not limited to accounting, engineering, quality, safety and security, scheduling and planning, and other offices that are not at passenger stations.
- e) **Other** – Four (4) Pedestrian Overpasses and one (1) Tail Track Building included within this phase.

Miami-Dade County, Transportation and Public Works

State of Good Repair

Performance Targets by Asset Category

INFRASTRUCTURE

Infrastructure measure is the percentage of track segments by mode that has incurred performance restrictions. The performance measure only applies to rail fixed guideway systems. It is also important to note that speed restrictions on a specific track segment may be caused by issues with any class of rail infrastructure, not solely the track elements.

ASSET CATEGORY	ASSET CLASS	SYSTEM (TRACK FEET)	TOTAL PERFORMANCE RESTRICTIONS	FY 22 TARGET
Infrastructure	Rail Fixed Guideway	298,957	268	6.0%
	Mover Automated Guideway	46,464	0	0%

Infrastructure performance restrictions are being developed to capture the data as outlined by the revised definition. Currently the data is captured and reported at the highest level.

Guideway Performance Restrictions Requirements

- a) Due to the pandemic, there was a 97% increase in Performance Restrictions due to scheduled work which did not impact the revenue service.
- b) A performance restriction is defined to exist on a segment of rail fixed guideway when the maximum permissible speed of transit vehicles is set to a value that is below the guideway's full-service speed. This does not include the operationally modified design speed.
- c) The length of track miles under restrictions each month and must be calculated separately for each combination of rail fixed guideway modes and service types (Metrorail and Metromover).
- d) All restrictions are documented to the specific segment of track (except system-wide restrictions due to inclement weather, for example) are required to be included in the calculation, regardless of cause or duration, including temporary speed restrictions placed due to maintenance activity.

An annual value for the length of track miles under performance restrictions to FTA by averaging the values calculated each month over the course of the year (DTPW reports on a fiscal year October to September).

Miami-Dade County, Transportation and Public Works

State of Good Repair

Performance Targets by Asset Category

ANCILLARY ASSETS

DTPW has additional assets including combination of structural elements, track, third-rail, bridges, ancillary structures, traction power substations, and train control systems. These assets are vital for the delivery of public transportation services but may not be required for performance reporting. The data contained in the table below is intended to provide the percentage of additional assets that have been assessed below 3.0 on the Transit Economic Requirements Model (TERM) Scale.

ASSET CATEGORY	ASSET CLASS	ASSET CLASS / ASSET TYPE	TOTAL ASSESSED	FY 22 TARGET
Infrastructure Equipment	Metrorail	Train Control - Locations	25	40%
		Traction Power - Locations	27	40%
	Metromover	Automatic Train Control - Locations	22	5%
		Vital Relay Cabinets	46	53%
		Power Distribution System - Locations	21	5%
Infrastructure Facilities (Structures Only)	Metrorail	Sub/Gap Stations	30	0%
	Metromover	Sub/Gap Stations	18	0%
Infrastructure Superstructures (Elevated)	Metrorail	Bridges	7	0%
	Metromover	Loops	3	0%
Infrastructure (Track/Elements)	Metrorail (Revenue Miles)	Curve	15.36	0%
		Tangent	35.60	0%
	Metromover	Elevated	9.43 Miles	0

- a) **Infrastructure Equipment** – Train Control equipment is the process by which the movement of rail cars is regulated. Traction Power equipment provide the system with power.
- b) **Infrastructure Facilities (Structures Only)** – Ancillary buildings which holds the electrical components essential to the rail and mover system. The facilities are generally but not always located adjacent to a primary station. These structures are assessed by hierarchal categories (example: walls, doors, HVAC, ceiling, etc.).
- c) **Infrastructure Superstructures (Elevated)** – Elevated bridges or loops sections are carried by guideway superstructure supported on a substructure consisting of columns or pier caps. These elevated sections form the interconnected elevated ribbon on which the trains operate.
- d) **Track Elements** – The various types of track, frogs, crossings etc.

Ms. Aileen Boucle, AICP
Executive Director
Miami-Dade Transportation Planning Organization
150 West Flagler Street, Suite 1900
Miami, FL 33130

**RE: South Florida Regional Transportation Authority (SFRTA)
2022 Transit Asset Management (TAM) Targets**

Dear Ms. Boucle:

Attached, please find SFRTA's 2022 TAM Targets. Per the Federal Transit Administration (FTA) TAM Final Rule published on July 26, 2016, SFRTA is required to provide each Metropolitan Planning Organization (MPO) with an update on the condition of its transit assets on an annual basis. SFRTA's TAM Targets are established based on current transit asset conditions, capital improvement projects and SFRTA's State of Good Repair (SGR) Policy.

We look forward to continued collaboration with the Miami-Dade TPO on its Transportation Improvement Program, Long Range Transportation Plan and other regional transportation initiatives.

Sincerely,

Loraine Cargill, AICP
Director of Strategic Planning/EEO Officer

PART 1: 4-YEAR FEDERAL FUNDED PROJECT LISTING

PURPOSE, CONTENTS, PROJECT SELECTION, AND CONCLUDING STATEMENTS

PORTMIAMI

TIP • FISCAL YEARS 2022/2023 TO 2026/2027
FEDERALLY FUNDED PROJECTS

PURPOSE OF THIS SECTION

On December 4, 2015, President Obama signed into law the Fixing America's Surface Transportation Act, or "FAST Act". The FAST Act authorizes \$305 billion over fiscal years 2016 through 2020 for the Department's highway, highway and motor vehicle safety, public transportation, motor carrier safety, hazardous materials safety, rail, and research, technology and statistics programs. Overall, the FAST Act largely maintains current MAP-21 program structures and funding shares between highways and transit. It is a down-payment for building a 21st century transportation system. On September 30, 2020, the Senate passed a one-year extension of the FAST Act through Continuing Resolution. This extension also added \$13.6B to the Highway Trust Fund.

The intention of this section of Miami-Dade County's FY 2022/2023-2026/2027 TIP is to illustrate how the TPO's priorities are to be funded, by Federal funding category, and by fiscal year. Specifically, this section addresses the requirements for TIP development as cited in Title 23 USC Section 134 (subsections (h) 2 and (i) 4).

CONTENTS OF THIS SECTION

This section contains the project listings by major funding category. Projects are identified by Work Program Item Numbers and show the corresponding project description, type of work and funding for each of the first four (4) years of the TIP.

CONCLUDING STATEMENTS

- This section is presented in order to fulfill federal requirements as noted in Section 134 of Title 23, United States Code (ISTEA).
- Only major categories of federal funds are highlighted in this section.
- Only the first four years of the TIP (FY 2022/2023, 2023/2024, 2024/2025 and 2025/2026) are included in this section.
- The projects shown in this section are consistent with the FDOT District VI Adopted Work Program.
- Federal funds can reasonably be expected to be made available for all projects included in this section.

All information contained in this section is consistent with the adopted TIP attached hereto.

PART 2: 5-YEAR PROJECT LISTING
STATE TRANSPORTATION SYSTEM AND MAJOR PROJECTS

TIP • FISCAL YEARS 2022/2023 TO 2026/2027

STATE TRANSPORTATION SYSTEM AND MAJOR PROJECTS

FLORIDA DEPARTMENT OF TRANSPORTATION, DISTRICT 6 (FDOT, D6)

This section of the Transportation Improvement Program (TIP) focuses on the State Transportation System and Major Projects located within Miami-Dade County. The projects listed include improvements to highways, transit, aviation, rail, seaport, freight, and bicycle/pedestrian modes over the next five fiscal years.

The FDOT, District Six, section provides an overview of the following topics:

- The FDOT Five Year Work Program
- The Work Program Cycle
- Programs and Funding
- Strategic Intermodal System (SIS) Projects
- Other Major Corridor Improvements
- Intelligent Transportation System (ITS) Program
- Bicycle/Pedestrian Corridor Improvements
- Freight Projects
- Public Transportation Projects
- SMART Plan Projects

THE FLORIDA DEPARTMENT OF TRANSPORTATION'S FIVE-YEAR WORK PROGRAM

The FDOT District Six Work Program is a major component of the Miami-Dade Transportation Planning Organization's (TPO) TIP. The Work Program, which is updated annually, is a project specific list of transportation activities and improvements that the FDOT will undertake during the next five-year period. It is developed by the District in cooperation with the Miami-Dade TPO and is consistent with the 2045 Long Range Transportation Plan (LRTP), and TPO priorities. The projects must also meet the objectives of the Florida Transportation Plan (FTP). The first three years of the Adopted Work Program represent a commitment that local governments may rely on for planning purposes, and for the development of capital improvement elements of the local government comprehensive plans.

**All renderings used in this report are subject to change as they continue through the project phase and may not denote the final product*

THE WORK PROGRAM CYCLE

The Department coordinates development of the Work Program with the TPO TIP Committee process and input is received through public hearings. In the summer of 2021, FDOT began the new cycle to develop the Tentative Work Program for Fiscal Years (FY) 2023 - 2027. The Tentative Work Program is then sent to the Governor's Office, Legislature, Florida Transportation Commission and the Department of Economic Opportunity for review and it will become effective as the Adopted Work Program on July 1, 2022.

PROGRAMS AND FUNDING

PROGRAM DESCRIPTIONS

For budgeting purposes, the FDOT's Work Program comprises of six departmental programs including: Product, Product Support, Operations and Maintenance, Administration, Fixed Capital Outlay (FCO), and Other. An overview of each program is summarized below:

PRODUCT

The FDOT's Work Program Product consists of all transportation improvement projects for highways, bridges, transit,

aviation, rail, seaport, freight, and bicycle/pedestrian modes. It also includes the land cost of right-of-way acquisition, resurfacing improvements for preservation of the transportation system, and safety programs.

PRODUCT SUPPORT

Product Support includes preparation of planning studies, project development and environmental studies, design plans, right-of-way support costs for acquisition activities, environmental mitigation, and construction engineering and inspection of projects noted above under the heading – Product. It also includes management and program oversight for public transportation grants.

OPERATIONS AND MAINTENANCE

Operations and Maintenance includes the activities necessary to maintain and operate the transportation infrastructure once it is constructed. This includes routine roadway and roadside maintenance, bridge inspection, traffic engineering and operations, toll collection, and enforcement of motor carrier compliance laws.

ADMINISTRATION

Administration includes Work Program development, financial services and budget, information systems, legal, personnel, and contract administration functions.

FIXED CAPITAL OUTLAY

Fixed capital outlay comprises construction and rehabilitation of department buildings and facilities.

OTHER

Other activities include debt service, State Infrastructure Bank (SIB) loan payback, maintenance of the FDOT's mobile equipment and operation of the FDOT warehouse and supply system.

FUNDING OVERVIEW

The Department's funds are allocated among seven Districts statewide and the Florida Turnpike Enterprise. In Miami-Dade, the Department in consultation with the TPO, determines the best use of Miami-Dade's share of funding. The Department's resources are primarily from federal and state dedicated sources. The State Transportation Trust Fund

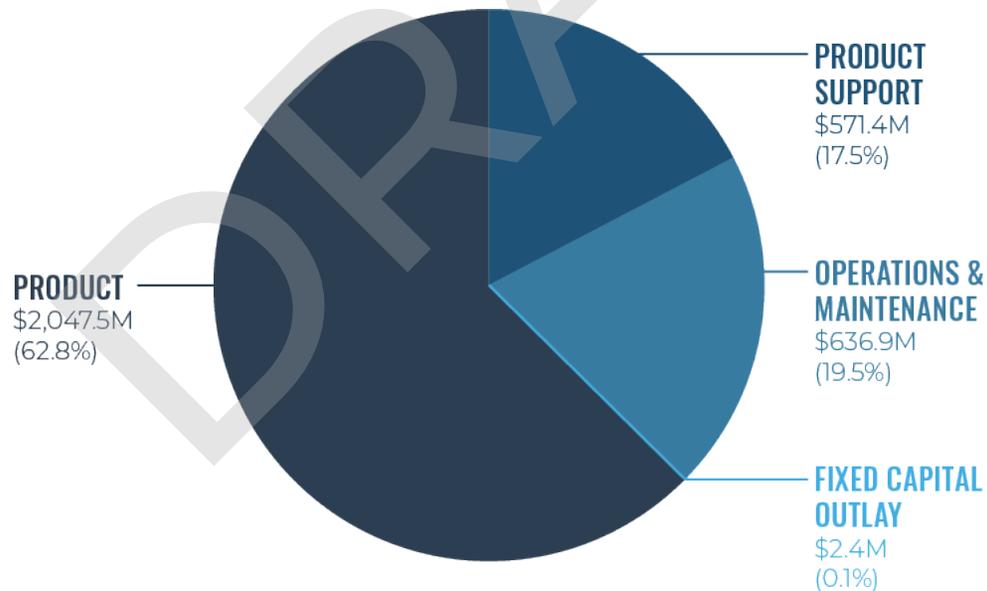

and the Federal Highway Trust Fund receive revenue from specific tax sources for transportation purposes. Additional funding for Work Program projects comes from local and discretionary sources. By statute, the Department must develop a program that is balanced to cash and revenue forecasts.

FDOT DISTRICT SIX,
TOTAL BUDGET BREAKDOWN, TENTATIVE FIVE-YEAR WORK PROGRAM
FISCAL YEARS 2023 - 2027

As shown in the Total Budget Breakdown chart below, the majority of the Department's \$3.25 billion budget is applied to the product budget in the amount of \$2.048 billion.

FDOT District Total Work Program Chart

Total 5-Year Tentative Work Program **\$3.25BB**

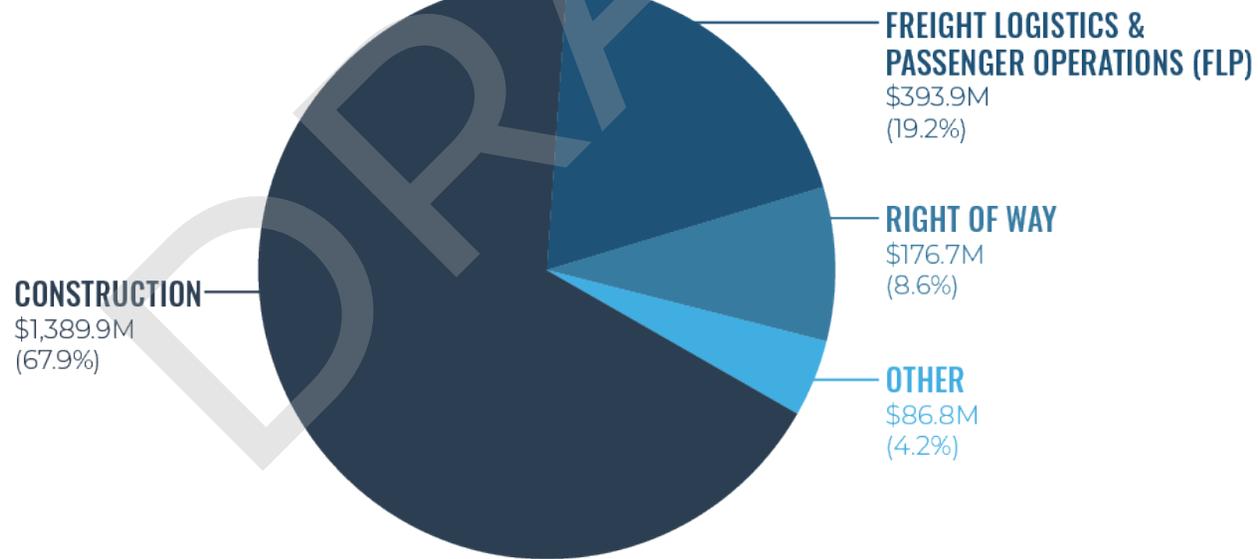

FDOT DISTRICT SIX,
PRODUCT BUDGET BREAKDOWN TENTATIVE FIVE-YEAR WORK PROGRAM

FISCAL YEARS 2023 - 2027

The product budget includes money spent on construction, freight, logistics & passenger operations, and right-of-way. As shown in the Product Budget Breakdown chart below, approximately \$1,389.9 million (67.9% of product budget) will go towards funding construction projects, which fall under four major construction categories: capacity improvement, safety, bridge repair and replacement, and resurfacing; approximately \$393.9 million (19.2% of the product budget) will go towards freight and public transportation programs and services; approximately \$176.7 million (8.6% of the product budget) will go towards the purchasing of right-of-way; and approximately \$86.8 million (4.2% of the product budget) will go towards other aspects of production.

FDOT District Total Work Program Chart

FY 2023 - 2027

STRATEGIC INTERMODAL SYSTEM (SIS) PROJECTS

The Florida Legislature established the Strategic Intermodal System (SIS) to enhance Florida's transportation mobility and economic competitiveness. The SIS consists of a network of high-priority transportation facilities which includes commercial airports, spaceports, deep water seaports, freight rail terminals, passenger rail, intercity bus terminals, rail corridors, waterways, and highways. These facilities represent the state's primary means for moving people and freight between Florida's diverse regions, between states and nations. The following are major SIS improvement projects in Miami-Dade County:

SR 826/PALMETTO EXPRESSWAY LANE REPURPOSING

This project consists of capacity improvements along the SR 826/Palmetto Expressway from North of NW 154 St to US 1/SR 5/Dixie Highway. The full project is approximately 17 miles in length. It is expected to improve mobility, relieve congestion, accommodate future growth and development in the region, enhance emergency evacuation, and improve connectivity with SR 826/Palmetto Expressway, I-75, SR 924/Gratigny Parkway, Florida's Turnpike, I-595, and the SR 869/Sawgrass Expressway. The project is divided into 2 major segments:

1. SR 826/PALMETTO EXPRESSWAY LANE REPURPOSING

In February 2020 FDOT announced proposed improvements to this segment of the Palmetto express lanes to further address congestion, the planned improvements include:

The Department recently completed phase 1 improvements in the Northbound direction which included the following:

- Relocate the existing ingress north of NW 36 Street to the Okeechobee Road ingress to provide additional general purpose lanes capacity.
- Relocate the existing ingress north of Okeechobee Road to south of the northbound Okeechobee Road on-ramp to eliminate lane diving.
- Remove the exiting ingress at NW 36 Street.
- Relocate the existing egress south of NW 154 Street to south of NW 103 Street which creates a single express lane from NW 103 Street to NW 154 Street to provide additional general-purpose lanes capacity.

Improvements were completed and began operations September 2020.

The Department has recently executed a design-build contract for phase 2, Palmetto Expressway Capacity Improvements project from South of NW 36 Street to North of NW 154 Street, which consists of improvements in both northbound and southbound as follows:

In the Northbound direction the improvement consists of:

- Widen as well as mill and resurface the mainline to provide full width inside and outside shoulders for improvements recently completed.

In the Southbound direction the improvement consists of:

- Modifying the NW 103 Street westbound to southbound flyover ramp pier along the outside general-purpose lane and subsequently widen the SR 826 mainline bridge and walls to create an additional general-purpose lane through NW 103 Street.
- Extend auxiliary lane between the Okeechobee Road and NW 74 Street interchanges to better facilitate weaving and improve capacity in the general-purpose lanes.
- Widen the bridge over NW 74 Street and Metrorail to better facilitate weaving and improve capacity in the general-purpose lanes.
- Relocate express lane ingress access at NW 154 Street to NW 103 Street to allow access to the express lane from NW 154 Street and NW 122 Street. This will convert an existing express lane to general-purpose lane from NW 154 Street to I-75.

Phase 2 is anticipated to be completed by Summer 2024.

2. SR 826/PALMETTO EXPRESSWAY SOUTH

The project on SR 826/Palmetto Expressway from US 1/SR 5/Dixie Highway to SR 836/Dolphin Expressway, approximately seven miles, is proposing corridor improvements that are expected to add highway and interchange capacity with the implementation of capacity and interchange improvements to meet future transportation demand, improve travel time reliability and provide long-term mobility options.

The project includes improvements to 10 interchanges, operational improvements to the Palmetto general purpose lanes and a direct connection to the Busway at the southern end of the project. This project will also include a new drainage system, lighting system and ITS system. Signalized intersections will be upgraded to current standards.

The project is in the Project Development and Environment (PD&E) phase.

For more information related to this project, visit <http://www.fdotmiamidade.com/826expresssouth.html>

For more information on these Palmetto Expressway projects visit: www.palmettoexpresslanes.com

GOLDEN GLADES INTERCHANGE RECONSTRUCTION

The Florida Department of Transportation (FDOT) District Six and Florida's Turnpike Enterprise are developing the design of several roadway projects within the Golden Glades Interchange (GGI) in Miami-Dade County. The proposed enhancements to the GGI Interchange include several miles of roadway and ramps. The overall project will help increase the regional connectivity to this major interchange. The project area consists of the following five major facilities: State Road (SR) 9A/I-95, SR 826/Palmetto Expressway, Florida's Turnpike, SR 9 and SR 7/US 441/NW 7 Avenue. The scope of the project includes the following:

- Milling and resurfacing the Palmetto Expressway between NW 17 Avenue and the GGI
- Providing a direct connection flyover ramp from eastbound Palmetto Expressway to northbound I-95
- Relocating NW 12 Avenue entrance ramp to I-95
- Rebuilding and realigning various ramps throughout the interchange to meet current standards
- Rebuilding and widening northbound and southbound I-95 from the GGI to Miami Gardens Drive to accommodate future express lanes
- Rebuilding Florida's Turnpike Connector at the intersection of NW 2 Avenue and NW 167 Street

- Widening the southbound lanes of the Turnpike Connector to accommodate two lanes from Florida's Turnpike and three lanes from eastbound Palmetto Expressway to southbound I-95
- Providing a direct express lane connection from Florida's Turnpike to the southbound I-95 Express Lanes
- Relocating the SR 7 exit ramp from southbound I-95
- Rebuilding the westbound Palmetto Expressway bridge and entrance ramp to enhance access from Florida's Turnpike
- Widening southbound I-95 from Biscayne Canal to NW 135 Street to accommodate an additional lane for the southbound Turnpike Connector
- Rebuilding the pedestrian bridge at NW 147 Street to enhance pedestrian safety for Thomas Jefferson Middle School, Biscayne Gardens Elementary and the surrounding communities
- Rebuilding toll gantry
- Rebuilding and widening I-95 to provide a direct connection from northbound I-95 Express Lanes to Florida's Turnpike
- Rebuilding ramp connections to meet current standards

The construction of the GGI projects will let in March of 2023, and the design and right-of-way phases are ongoing.

For more information on the project, please visit: <http://www.fdotmiamidade.com/design-projects/expressways/golden-glades-interchange-enhancement-projects.html>

The project video will provide a better visualization of this complex project.

SR 25/US 27/OKEECHOBEE ROAD IMPROVEMENTS

A Project Development and Environment (PD&E) study was completed for SR 25/US 27/Okeechobee Road from SR 997/Krome Avenue to NW 79 Avenue in 2016. The following corridor improvements on SR 25/Okeechobee Road include:

SEGMENT LIMITS	IMPROVEMENTS	CONSTRUCTION YEAR
Broward County Line to East of the HEFT	Widening, capacity improvements, milling and resurfacing, as well as improving the frontage road on the north side of the said limits.	Construction Started: February 2022
West of HEFT to West of NW 138 Street	Widening, milling and resurfacing the roadway. Including reconstruction of Frontage Road, storm sewer, Miami Canal dredging, signing and pavement marking, signalization, lighting, and intelligent transportation systems updates. Project Managed by Florida Turnpike Enterprise.	Construction Started: March 2020
West of NW 138 Street to East of NW 107 Avenue	Reconstruct and widen roadway and widen the bridge over the Miami Canal at NW 138 St and NW 107 Avenue to provide a wider turning radius for large trucks. Improve the intersection of SR 25 at NW 107 Avenue and NW 138 St by adding new turn lanes and signals. Project is managed by Florida Turnpike Enterprise.	Construction Started: March 2020
East of NW 107 Avenue to East of NW 116 Way	Full reconstruction to provide concrete and rigid pavement, replacement of bridges at NW 121 Avenue and NW 116 Way over Miami (C-6) Canal, design of two braided ramps under SR 25/Okeechobee Road to connect the mainline with the Frontage Road.	Construction Started: March 2022
East of NW 116 Way to East of NW 87 Avenue	Full reconstruction to provide rigid pavement, grade separation of bridges over 87 Avenue, design of left turn lanes flyover bridges from Southbound NW 87 Avenue to Eastbound Okeechobee Road and from Northbound NW 87 Avenue to Westbound Okeechobee Road, a construction of a new bridge at NW 106 Street over the Miami (C-6) Canal, and the realignment of NW 103 Street and the frontage road within the project limits.	Early 2026
East of NW 87 Avenue to NW 79 Avenue	Road reconstruction using rigid pavement, widening Okeechobee Road, modify the intersection of NW 95 Street and Frontage Road, widen NW 79 Avenue bridge of Miami (C-6) Canal, and provide new access from Frontage Road to Westbound Okeechobee Road.	Early 2025
Interchange with SR 826/Palmetto Expressway	Three new flyover ramps, the addition of turn lanes at the ramp intersections, and improvements to the Okeechobee Road and W 18 Avenue intersection.	Early 2025

For more information visit: <http://www.fdotmiamidade.com/design-projects/north-miami-dade.html>

SR 112/I-195/JULIA TUTTLE CAUSEWAY BUS ON SHOULDER FROM BISCAYNE BLVD TO ALTON ROAD

This project's Planning phase was completed in January of 2020. The project improvement includes increasing the width of the inside paved shoulders and reducing the widths of the center and inside travel lanes and reconstructing the inside shoulder to allow Bus On Shoulder operations. The use of the inside shoulders of the Julia Tuttle Causeway for Bus Express Rapid Transit (BERT) service is a joint effort between FDOT and Miami-Dade County Department of Transportation and Public Works (DTPW) to provide greater mobility options and support DTPW's BERT network that is part of the County's Strategic Miami Area Rapid Transit (SMART) Plan.

This project is anticipated to begin construction in September of 2022. An interim project to allow the use of the outside shoulders was completed. The current use of the outside shoulder for bicyclists, was suspended to allow buses to run along these shoulders with service starting in December 2021. The use of the outside shoulders for bus operations will be discontinued when the inside shoulders open for operation which is anticipated in December of 2023.

For information related to the project visit <http://www.fdotmiamidade.com/design-projects/beaches/sr-112i-195julia-tuttle-cswy-from-e-of-sr-5biscayne-blvd-to-sr-907alton-rd.html>

PROJECT DEVELOPMENT AND ENVIRONMENTAL STUDIES (PD&E)

The following are major PD&E projects in Miami-Dade County:

SR 90/SW 8 STREET/SW 7 STREET FROM SW 27 AVENUE TO SR 5/US-1/BRICKELL AVENUE

PD&E Study for SR 90/SW 8 Street and SR 90/SW 7 Street in Miami will evaluate potential physical, operational and safety needs of the project corridor, including the interchanges at SW 8 Street and I-95 and SW 7 Street and I-95. Proposed improvements will be developed to enhance traffic operations, promote safety, provide a multimodal and pedestrian friendly corridor, and provide better access to the Brickell area. The study limits are along SR 90/SW 8 Street/SW 7 Street from SW 27 Avenue to SR 5/US 1/Brickell Avenue.

This study will improve physical, operational and safety deficiencies along the one-way pair of SR 90/SW 8 Street and SR 90/SW 7 Street, including at the interchanges of these roadways with Interstate 95 (I-95).

Estimated project completion date is winter 2022.

For information related to the project, visit <http://www.fdotmiamidade.com/CalleOchoStudy.html>.

SR 9A/I-95 FROM SOUTH OF MIAMI GARDENS DRIVE TO BROWARD COUNTY LINE

PD&E Study for SR 9A/I-95 from South of Miami Gardens Drive to Broward County Line will evaluate potentially providing additional express and/or general use lanes on SR 9A/I-95 from south of SR 860/Miami Gardens Drive to the Broward County Line and implementing interchange improvements at SR 860/Miami Gardens Drive and CR 854/Ives Dairy Road within Miami-Dade County.

Overall, the project will offer enhanced mobility options for motorists and transit users as it will provide additional capacity along the SR 9A/I-95 corridor throughout northern Miami-Dade County. Consistent with the existing managed lanes system on SR 9A/I-95, the additional express lanes are anticipated to operate using variable toll pricing based on congestion to optimize traffic flow.

The PD&E Study has the following project objectives:

- Address the deficient operational capacity and relieve existing/future congestion along the SR 9A/I-95 corridor.
- Preserve the operational integrity and regional functionality of SR 9A/I-95 (and, therefore, the regional transportation network) by complementing similar corridor improvements throughout Miami-Dade, Broward, and Palm Beach Counties.
- Enhance emergency evacuation and response times.

For information related to the project, visit <http://www.fdotmiamidade.com/i95northPDE.html>

RESURFACING PROJECTS

The following are major resurfacing projects in Miami-Dade County:

SR 90/SW 8 STREET FROM SW 74 COURT TO SR 9/SW 27 AVENUE

The design for this project is underway and divided into three segments. The projects entail repaving and restriping the roadway of State Road (SR) 90/SW 8 Street from SW 74 Court to SR 9/SW 27 Avenue. Specific improvements for each segment are listed below. The projects are anticipated to begin construction in September of 2022 and will cost approximately \$8 million combined.

For information about the construction schedule or related information, visit: <http://www.fdotmiamidade.com/design-projects/south-miami-dade/sr-90sw-8-st-from-sw-74-ct-to-sr-9sw-27-ave.html>

SEGMENT LIMITS	IMPROVEMENTS
West of SW 74 Court to West of SR 959/SW 57 Avenue/Red Road	<ul style="list-style-type: none"> • Upgrading pedestrian ramps and reconstructing damaged sidewalks • Removal of concrete crosswalks at SW 72 Avenue • Installing high emphasis pedestrian crosswalks at all legs on signalized intersections and mid-block crossings • Upgrading signalization pedestrian features • Upgrading lighting to LED at existing and new mid-block crossings • Upgrading signing and pavement markings • Installing 2 new signalized mid-block pedestrian crossings at east of SW 68 Avenue and east of SW 73 Avenue as per City of Miami Resolution R-20-0016 • Installing No Turn on Red/Yield to Pedestrians electronicsigns at SW 74 Avenue and SW 67 Avenue intersections
West of SR 959/SW 57 Avenue/Red Road to West if SR 953/SW 42 Avenue/LeJeune Road	<ul style="list-style-type: none"> • Adjusting the existing utility manhole tops and valves • Replacing the existing concrete crosswalks at SW 57 Avenue and SW 56 Avenue with special emphasis crosswalk pavement markings • Reconstructing damaged or uneven sidewalks • Replacing all pavement markings • Providing special emphasis crosswalk markings at all signalized intersections • Removing existing pavement loops and installing video detection system • Adding two new signalized traffic signals and pedestrian crosswalks at the intersections of SR90/SW8Street and Genoa Street and SW 44 Avenue • Upgrading lighting to Light-Emitting-Diode at existing mid-block crossings • Installing No Turn on Red/Yield to Pedestrians electronicsigns at SW 47 Avenue/Cortez Street. • Implementing right turn movement only at the intersection of SR 90/SW 8 Street and SW 44 Avenue • Relocating landscape • Reconstructing driveways at SW 44 Avenue
East of SR 953/ SW 42 Avenue/LeJeune Road to West of SR 9/SW 27 Avenue	<ul style="list-style-type: none"> • Upgrading pedestrian ramps and reconstructing damaged sidewalks • Removing abandoned driveways • Replacing the existing concrete crosswalks at SW 8 Street and SW 37 Avenue with special emphasis crosswalk pavement markings • Adjusting the existing utility manhole tops and valves • Installing a new signalized intersection at SW 8 Street and SW 39 Court • Upgrading signing and pavement markings • Adding “Share the Road” pavement markings for bicycles • Installing No Left Turn signs on the existing raised island on SR 90/SW 8 Street and SW 29 Avenue • Installing No Turn on Red/Yield to Pedestrians electronicsigns at Ponce de Leon, Galiano Street, and SW 27 Avenue • Upgrading signalization pedestrian features • Upgrading lighting to Light-Emitting-Diode at existing mid-block crossings • Relocating landscape within the limits of the corridor

SR 5/US 1/S DIXIE HIGHWAY FROM NORTH OF SW 80 STREET TO SOUTH OF RIVIERA DRIVE

The design for this project is underway. The project entails repaving and restriping the roadway of SR 5/US 1/S Dixie Highway from north of SW 80 Street to south of Riviera Drive. This project will also be reconstructing the northbound left turn lane south of SW 72 Street; providing extra-wide crosswalks at SW 62 Avenue and SW 70 Street; reducing crosswalk width to improve visibility at SW 63 Avenue, SW 61 Avenue, and Madruga Court; constructing a curb bulb-out at the northeast corner of 61 Avenue and Yumuri Street; and replacing traffic signals along US1 at SW 72 Street, Alhambra Circle and Stanford Drive.

This project is anticipated to begin construction in August of 2022 and will cost approximately \$5 million. For information about the construction schedule or related information, visit: <http://www.fdotmiamidade.com/design-projects/south-miami-dade/sr-5us-1s-dixie-from-north-of-sw-80-street-to-south-of-riviera-drive.html>

Below is a sampling of resurfacing projects included in the 5-year Work Program.

ROADWAY	PROJECT AREA	CONSTRUCTION YEAR
SR 852/County Line Road	From East of NW 27 Avenue to West of NW 1700 Block	2023
SR 934/NW 74 Street/W-E 21 Street	From East of W 4 Avenue to E 4 Avenue	2024
SR 972/Coral Way/SW 3 Avenue	From 400 feet West of SW 12 Avenue to Brickell Avenue	2025
SR 90/US 41/SW 7 Street	From Brickell Avenue to West of SW 2 Avenue	2026
SR A1A/Collins Avenue	From SR 907/W 63 Street to 75 Street	2027

OTHER MAJOR PROJECTS

The following are major projects in Miami-Dade County:

SR 90/US 41/SW 8 ST AT SW 109 AVE PEDESTRIAN BRIDGE

This project is currently in the Design phase, it entails installing a pedestrian bridge over SW 8 street and the C-4 Canal west of SW 109 Avenue. Providing pedestrian plazas with elevator and stairs on the north-end and south-end of the pedestrian bridge. Installing decorative LED street lighting, street signage, sidewalk, hardscaping and landscaping along SW 109 Avenue between SW 7 Terrace and SW 6 Street. Upgrading pedestrian signals at SW 8 Street and SW 109 Avenue intersection. Providing mid-block crosswalk on the north end of SW 7 Terrace and SW 109 Avenue intersection.

The project is anticipated to begin construction mid-2023 and will last about two years and will cost approximately \$11.78 million. For information about the construction schedule or related information, visit:

<http://www.fdotmiamidade.com/design-projects/south-miami-dade/sr-90us-41sw-8-st-at-sw-109-ave-pedestrian-bridge-replacement.html>

SR 934/NE/NW 79 STREET

A Project Development and Environment (PD&E) study was completed for this SR 934/NE/NW 79 Street Project in 2019. This project is to improve capacity deficiencies/traffic operations and multimodal use along SR 934/NW/NE 79 Street and NW/NE 81/82 Street from west of I-95 (13 Ct) to end of SR 934/1 Way to address existing congestion and future travel demand, including safety conditions. A major objective of the project is to achieve a balance between the "Complete Streets/Livability Goals" of the local community and both local and regional "Mobility Goals". To achieve this 81/82 Street is to be converted to a two-lane, two-way facility. Improvements along the SR 934 corridor are intended to stimulate economic redevelopment within the overall area while balancing livability enhancements with mobility needs, traffic operations, and safety concerns.

The project is currently in the Design Phase which anticipated to complete in 2025.

SR 907/ALTON ROAD FROM MICHIGAN AVENUE TO 43 STREET

This project is currently in the Design phase and it generally entails roadway reconstruction on Alton Road from Michigan Avenue to 43 Street. The design of this project includes elevating the roadway profile, adding a two-way protected bicycle facility from Michigan to Chase, upgrading roadway lighting to LED, upgrading pedestrian ramps and sidewalks to current standards, replacing signal mast arms, and providing signing and pavement markings. The project will also provide drainage improvements by designing and constructing a new roadway drainage system, including two pump stations, with one outfall to the Intracoastal Waterway.

The project is anticipated to begin construction in Spring 2025 and end Fall 2027 and will cost approximately \$25 million. For information about the construction schedule or related information, visit:

<http://www.fdotmiamidade.com/design-projects/beaches/sr-907alton-road-from-michigan-avenue-to-43-street-1.html>

SR 860/MIAMI GARDENS DRIVE FROM EAST OF I-75 TO NW 82 AVENUE

This project is currently in the Design phase. The primary purpose of this project is to improve safety and relieve congestion along Miami Gardens Drive from east of I-75 to NW 79 Place by providing for access management modifications to various median opening and increasing vehicular capacity. The proposed design widens the roadway from a four-lane facility to a six-lane facility, provides for additional turn lanes at major intersections, and proposes a bicycle lane in each direction. Further improvements include milling and resurfacing of the existing pavement, replacing signal mast arms, lighting, upgrading pedestrian ramps and sidewalks to current standards, drainage improvements, and upgrades to the signing and pavement markings. Additional right-of-way acquisition is anticipated for this project.

The project is anticipated to begin construction in Spring 2025 and end Spring 2027 and will cost approximately \$10 million. For information related to this project, visit: <http://www.fdotmiamidade.com/mgdplanningstudy.html>

BICYCLE/PEDESTRIAN CORRIDOR IMPROVEMENTS

The bicycle/pedestrian network is a component of the overall transportation system. The Department evaluates bicycle and pedestrian improvements in conjunction with all capacity and resurfacing projects. Bicycle & pedestrian projects are also implemented by local agencies, who oversee construction and management. In addition, some projects are funded through the federally funded Transportation Alternatives Program (TAP) or state funded Shared Use Non-motorized (SUN) Trail Program.

The Florida Department of Transportation (FDOT) makes use of its expertise in efficiently providing transportation projects to develop a statewide system of paved non-motorized trails as a component of the Florida Greenways and Trails System (FGTS), which is planned by the Florida Department of Environmental Protection (FDEP). The Safe Routes to Schools (SRTS) program integrates safety, traffic relief, health, environmental awareness and physical activity and fitness under one program focusing on school zones.

SE 8 STREET AND BRICKELL AVENUE INTERSECTION IMPROVEMENT

To enhance mobility and safety for pedestrians at the intersection of SE 8th Street and Brickell Avenue, FDOT District 6 partnered with the Miami-Dade County Department of Transportation and Public Works (DTPW) and the Miami-Dade Transportation Planning Organization (TPO) within the SMART Street Transportation Enhancement Program (STEP) to evaluate and construct a scramble intersection. The TPO and DTPW evaluated the intersection for the potential improvement and FDOT had the responsibility of designing and constructing the enhancements. The project was determined to go forward in the spring of 2021, and the project is currently in construction.

However, the improvements and mobility enhancements can be seen at the intersection as of January 22, 2022. The intersection improvements include special emphasis crosswalks diagonally placed with pedestrian signal heads facing the diagonal movements as well as the traditionally horizontal crosswalks. The intersection also includes signs to prevent right hand turning vehicles during the pedestrian-only phase (two no-turn on red signs and one blank out sign). The pedestrian signal timing now supports the time necessary for a pedestrian to cross diagonally, and audible pedestrian signals replaced the previous pedestrian pushbuttons to enable the visually impaired to better navigate the

unique intersection. The resulting design is one in which supports all pedestrian movements safely and efficiently and separates all vehicular and pedestrian movements to prevent crashes between motorists and pedestrians.

Below is a sample of bicycle/pedestrian projects included in the FY 2023 - 2027 Work Program.

PROJECT SEGMENT	PROJECT TYPE	PROJECT AREA
SR A1A/MacArthur Causeway	Bike Path/Trail	From SR 5/Biscayne Blvd to SR 907/Alton Rd
City of Miami	Bike Lane/Sidewalk	Miami River Greenway From NW 22 Avenue to NW 19 Avenue
Village of Miami Shores	Bike Path/Trail	Various locations
Safe Routes to School Infrastructure	Pedestrian Safety Improvements	Georgia Jones-Ayers Middle, Bob Graham Education Center, Ojus Elementary, Miami Edison High, Norland Elementary, Norland Middle, and Olympia Heights Elementary
Miami-Dade County	Bike Path/Trail	Snapper Creek Trail Segment A SW 107 Avenue Gap
City of Coral Gables	Sidewalk	Last Mile Transit Stop Improvements
City of Miami Gardens	Bike Path/Trail	West Side Blueway Trail NW 199 St to Snake Creek Canal

INTELLIGENT TRANSPORTATION SYSTEM (ITS) PROGRAM

The Florida Department of Transportation's District Six Transportation Systems Management and Operations (TSM&O) Program Office focuses on implementing multi-modal traffic management strategies to optimize the safety and people-moving capacity of our regional roadway system.

The Office uses a series of innovative services and technologies to provide the transportation solutions that meet traffic demand. These services include incident management, traveler information, managed lanes, transit, and others. The combination of these strategies provides our roadways with a multi-pronged approach to congestion management to benefit all users. The SunGuide Transportation Management Center (TMC) houses the District's TSM&O Program and serves as the main traffic hub for the southeast Florida region. TSM&O staff located at the TMC uses Intelligent Transportation System (ITS) devices such as closed-circuit television cameras and roadway detectors to manage traffic 24 hours per day, 7 days per week. They monitor the roadways to provide real-time traffic management services and identify potential improvements. The goal is to optimize current operations while expanding the program to meet future demand. The Office has remained committed to this goal and recently implemented adaptive signal control technologies and infrastructure to vehicle strategies in Miami-Dade County and is working to launch its first connected and automated vehicle project in Monroe County.

The District Six TSM&O program is committed to improving safety, enhancing mobility, and inspiring innovation through the implementation of proven traffic management strategies and technologies. For more information, please visit www.sunguide.info

FREIGHT, LOGISTICS AND PASSENGER OPERATIONS

The FDOT Freight, Logistics and Passenger Operations (FLP); commonly known as Modal Development; Office encompasses a level of modal representation and industry engagement unlike any other state DOT organization. FLP acts as a tool to better connect, develop, and implement a freight planning process that maximizes the use of existing facilities while integrating and coordinating the various modes of transportation, including the combined utilization of both government owned and privately-owned resources.

Annually, FLP allocates funds toward transportation infrastructure improvements in all the modes. Working together collaboratively, FLP leads Florida’s multimodal transportation initiatives through work with federal and local government partners in planning, coordination, financing, grant management, ridership, and regional analysis. The Modal Development Office includes Aviation, Rail, Freight, Seaports, and Transit.

RAIL	AVIATION
Passenger and Freight Rail Safety Projects	MIA Perimeter Road Widening and Realignment
Railroad Crossing Surface Rehabilitation Projects	MIA Fuel Tanker Parking Facility
Grade Separation on NE 203 Street	MIA Central Base Pavement Rehabilitation
SR 826 / Palmetto Expressway (SB) Bridge Widening over the FEC	MIA Airport Operations and Communication Center (AOCC)
I-395 Signature Bridge over the Florida East Coast Railway (FEC)	MIA Surface Management System (Aerobahn System)

Port of Miami Inland Cargo and Container Distribution Center	

STATE TRANSIT BLOCK GRANT TO DTPW FOR OPERATING COSTS

This grant provides operating assistance for Miami-Dade Department of Transportation and Public Works (DTPW) Fixed Route Bus Service. The Metrobus fixed route bus service is run by Miami-Dade DTPW and operates seven days a week, 24 hours per day. A total of 73 routes – Miami-Dade DTPW directly operated regular bus service structure which are served by a total fleet of 767 buses and 30 contracted routes with 194 contractor-owned buses. Two of these Contract Routes are Express Bus Service in Monroe County with 11 buses. Metrobus includes local, feeder, circulator, limited-stop, express, and Bus Rapid Transit (BRT) Arterial Busway services. The FDOT provides 50% State Participation Rate for this program.

FREIGHT OVERVIEW

From agriculture and heavy equipment to daily consumables, the movement of freight impacts every aspect of our daily lives. It is crucial for the nation's economy to maintain a safe and reliable transportation system that moves goods efficiently. Freight transportation has been a driving force for economic productivity, global competitiveness, and job creation. Every economic sector depends on a reliable, safe, and cost-effective network to move goods and services. As a leading international hub, this statement is very relevant to the state of Florida. With goods worth approximately hundreds of billions of dollars flowing through Florida's airports and seaports, it is critical for the State to maintain and improve its extensive multimodal freight infrastructure. Today, Miami International Airport (MIA) is the nation's top handler of international air cargo. Similarly, PortMiami is the world's top processor of cruise passengers and is the State's fourth highest port for total trade tonnage and highest in cargo value. It is known as a Global Cargo Gateway. These major freight hubs, along with a booming construction industry and growing population and local economy, indicate Miami-Dade County is vital for the movement of freight in Florida.

FDOT District Six is home to many diverse communities with unique transportation freight mobility and transportation needs. These needs can be traced back to some of the State's leading freight facilities and international trade gateways such as MIA and PortMiami. With significant investments made to these facilities in order to compete globally for new cargo opportunities stemming from the expansion of the Panama Canal, increased use of the Suez Canal, and growing North/South trade, these facilities are expected to increase demand for regional warehouses, distribution centers, cold

treatment facilities, foreign trade zones, and truck parking facilities. With an anticipated doubling in cargo activity handled at PortMiami, Port Everglades, and MIA; these investments will be critical to the overall freight transportation network.

Hence, it is essential that District 6 and industrial based communities identify and invest in infrastructure improvements to position themselves for economic development and growth in cargo. Key developments and tools should be incorporated such as ITS/technologies, truck parking needs, economic impact analyses, innovative funding programs, and land use and redevelopment opportunities-helping market these industrial based communities as competitive global logistics service centers.

District 6 has identified a strategy to help advance its freight and logistics system focused on partnering with local communities to develop subarea freight plans; these freight focused plans help identify freight mobility strategies at the project level. The Town of Medley, one of the leading freight hubs in Miami-Dade County and South Florida, is the first area scrutinized through this process due to its long history as a leader in the industrial sector; providing services to PortMiami, Port Everglades, MIA, Florida East Coast Railway, and the South Florida business community. With access to SR 826, I-75, Florida's Turnpike, US 27, and connections with the region's major freight activity centers, Medley is accessible to local, regional, and state markets.

These planning level studies will assess freight accessibility to and from each sub-area and will develop strategies to enhance access and improve freight mobility. The following table lists all the sub-area freight planning efforts currently completed and programmed by District 6. The Miami River Freight Improvement Plan is unique amongst the sub-area freight planning efforts as it does not focus on a specific town or city. Instead, this study developed viable options to improve intermodal freight movement and assess the potential of short sea shipping along the Miami River.

FDOT D6 SUB-AREA FREIGHT PLANNING EFFORTS:

NAME	STATUS
Town of Medley Freight Improvement Plan	Completed
Opa-Locka Freight Improvement Plan	Completed
Miami River Freight Improvement Plan	Completed
Doral Freight Improvement Plan	Completed
Miami Gardens Freight Improvement Plan	Completed
Hialeah Freight Improvement Plan	In Progress
Homestead Freight Improvement Plan	In Progress
Freight Village Analysis Study	To be Executed in 2022/2023

DRAFT

STRATEGIC MIAMI AREA RAPID TRANSIT (SMART) PLAN

The Strategic Miami Area Rapid Transit (SMART) Plan is an infrastructure investment program of projects developed to improve transportation mobility and create a transit system that will support economic growth and competitiveness in the global arena.

The SMART Plan is expected to expand transit options in Miami-Dade County along six critical corridors that are linked to local, regional, national, and global economic markets as highlighted below. Another critical component of the SMART Plan will be a network of Express Buses, known as Bus Express Rapid Transit (BERT), which is intended to expand South Florida's Express Lanes network with the implementation of six identified BERT express lane concepts. This innovative approach effectively expands the reach of transit in Miami-Dade County and beyond.

BEACH CORRIDOR

Highest tourist demand in the region with major employment centers.

EAST-WEST CORRIDOR

Heaviest commuter travel for international, state, and local businesses.

KENDALL CORRIDOR

One of the most congested arterial roadways with the highest demand.

NORTH CORRIDOR

Key regional mobility linkage for access to jobs, the stadium, and educational facilities.

NORTHEAST CORRIDOR

High transit demand and part of a critical regional corridor stretching to Palm Beach County.

SOUTH CORRIDOR

Experiencing the fastest population growth in Miami-Dade County.

FDOT is conducting the Project Development and Environmental (PD&E) study for the following three SMART & BERT corridors:

NW 27 AVENUE PREMIUM TRANSIT CORRIDOR

A PD&E study is being conducted to evaluate the implementation of a premium transit service (Bus Rapid Transit (BRT), Heavy Rail Transit (Metrorail), and appropriate variation of Heavy Rail Transit (Rail At-Grade) along NW 27 Avenue from NW 215 Street (Countyline Road) to approximately NW 38 Street and from the Miami Intermodal Center (at Miami International Airport) to NW 27 Avenue via SR 112 Expressway. The study focused on implementation of a premium transit service and infrastructure along SR 9/SR 817/NW 27 Avenue. The study included public on-street transit stations/stops as well as public and/or private facilities located adjacent to or off-corridor where potential park-and-ride and/or transit terminals (including the Miami Dade College North Campus) will be considered. The study considered public and private station/stop facilities, new or upgraded park-and-ride locations, and transit terminals.

Three viable alternatives were developed and presented to the public. Each of these represents the three modes running within the existing roadway. BRT would operate in the curb lanes. Heavy rail whether at-grade or elevated would run over the centerline of the roadway. The study developed detailed engineering criteria and evaluated the environmental impacts that would result from implementation. Cost estimating, ridership forecasting, and traffic impacts were evaluated. On December 6, 2018, the Miami-Dade Transportation Planning Organization (TPO) Governing Board adopted as the Locally Preferred Alternative (LPA) an elevated fixed guideway transit system. Following this action, Miami-Dade County has requested that FDOT evaluate three alternative technologies: 1.) Monorail; 2.) Automated Peplemover; and 3.) Maglev.

In October 2019, the Miami-Dade TPO selected elevated heavy rail transit as the LPA for the North Corridor. On April 23, 2020, the TPO Governing Board accepted a report by Miami-Dade County's Department of Transportation and Public Works (DTPW) on alternative transit technologies for NW 27 Avenue and directed DTPW to issue a request for proposals to identify whether transit technologies, other than heavy rail are viable for the corridor. FDOT has placed its North Corridor PD&E study on hold after the consulting with the Federal Transit Administration (FTA) until the outcome of the DTPW Request for Proposals (RFP) process is known and a final decision on the transit technology and alignment for NW 27 Avenue is made by the TPO Governing Board.

FLAGLER STREET PREMIUM TRANSIT CORRIDOR

A PD&E study is being conducted to evaluate the implementation of rapid transit along SR 968/Flagler Street. This study focuses on multimodal street improvements to accommodate rapid transit service along Flagler from SW/NW 107 Avenue to the Government Center with branches along SW 8 Street and NW 12 Street. Viable alternatives analyzed as part of this study include: Bus Rapid Transit (BRT) along curbside lanes, BRT along curb lanes with a center reversible auto lane.

In April 2019, the Curbside Business Access and Transit (BAT) Lanes alternative was identified as the recommended alternative for the Flagler corridor. FDOT has conducted a series of meetings with elected officials, stakeholders and communities on the corridor and presented the recommended alternative to the TPO Governing Board on July 18, 2019. A workshop with TPO Board members was held January 30, 2020; where FDOT was asked to further analyze the implementation of reversible auto lanes along the Flagler corridor.

FDOT conducted a study on the implementation of reversible lanes along segments of the corridor as a traffic mitigation measure. The additional analysis on reversible lanes was completed in January 2021 and results of the analysis demonstrated that reversible lanes are not feasible on the Flagler Corridor. On January 28, 2021, the TPO Governing Board adopted Resolution No. 07-2021 supporting FDOT's Alternative -1 Curbside Bus Rapid Transit Lanes with the exception that the PD&E study shall not consider the reduction of vehicular traffic lanes for any portion of Flagler Street west of NW 24 Avenue.

FDOT is coordinating with our partner agencies to present a project update to the TPO Governing Board in March 2022.

KENDALL DRIVE PREMIUM TRANSIT CORRIDOR

A PD&E study is being conducted to evaluate implementation of a premium transit service (BRT, Light Rail Transit, and other appropriate transit technologies) along SR 94/Kendall Drive/SW 88 Street from approximately SR 997/Krome Avenue/SW 177 Avenue to the Dadeland North Metrorail Station (at approximately US 1/SR 5). The study will also consider connecting with another segment running along SR 874 and SR 878 from Kendall Drive to the Dadeland North Metrorail Station, and potentially north along the HEFT from Kendall Drive to FIU (at the proposed Panther Station) and/or to the proposed Dolphin Station (at SR 836).

This study focuses on multimodal street improvements to accommodate rapid transit service, as well as walking and bicycle trips, along Kendall Drive. The study will evaluate various options for transit service - mode, station stop locations, signalization for transit, use of exclusive lanes, etc. Kendall Drive will serve as the primary premium transit running way via exclusive arterial transit lines but will also include other roadways and expressways connecting to Kendall Drive for accommodating branched transit routes. The study will also include public on-street transit stations located along various running ways as well as potential park-and-ride and/or transit terminal locations.

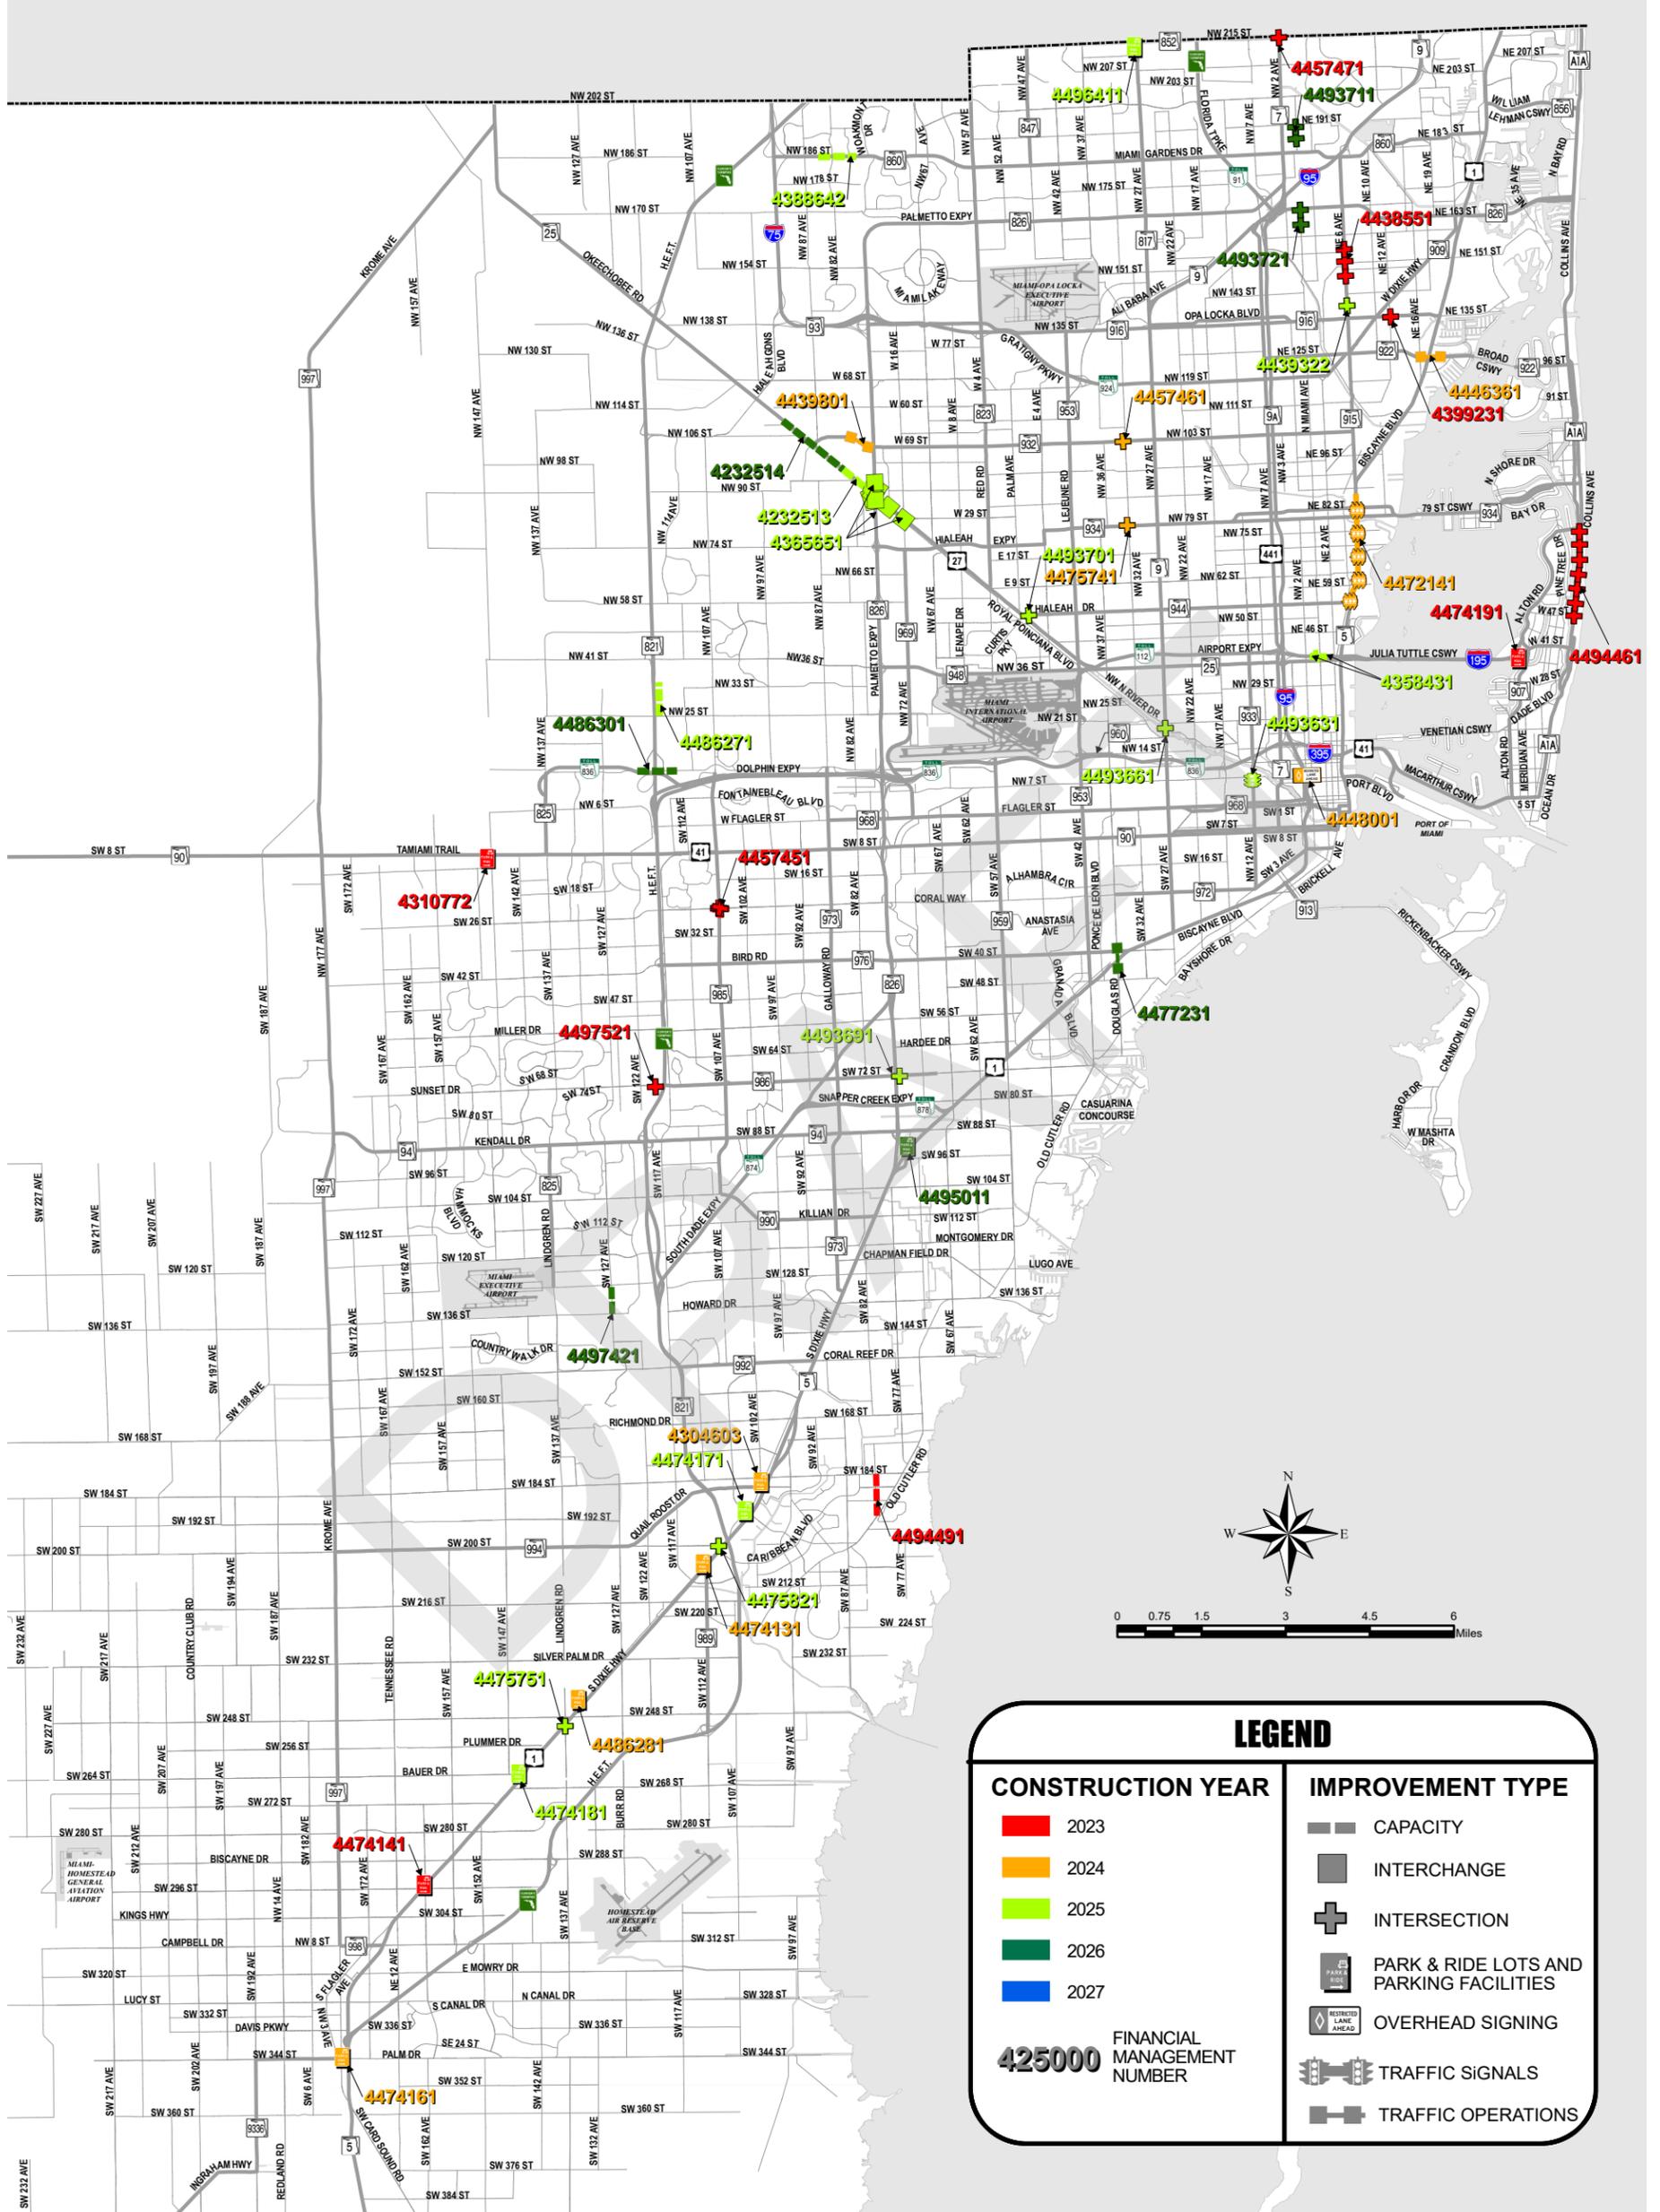

Three alternatives were initially identified as viable alternatives: BRT running in the curb lanes or median lanes, and rail at-grade. At the request of the TPO, a concept that includes BRT in the curb lanes and a reversible center auto lane to supplement peak direction traffic was added to the scope of work. In response to public interest, an elevated rail alternative was also added to the scope.

In November 2019, Curbside BRT was identified as the recommended alternative for the Kendall corridor and was presented at a series of Public Workshops in December 2019. In February 2020, the TPO requested for FDOT to further analyze the implementation of reversible lanes along the Kendall Corridor. This additional analysis on reversible lanes was completed in November 2020. Results of the reversible lanes analysis demonstrate that reversible lanes are not feasible on the Kendall Corridor.

FDOT is coordinating with our partner agencies to present a project update to the TPO Governing Board in March 2022

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)
PART 2: 5-YEAR PROJECT LISTING
FLORIDA'S TURNPIKE ENTERPRISE

TIP • FISCAL YEARS 2022/2023 TO 2026/2027
FLORIDA'S TURNPIKE ENTERPRISE
 FLORIDA DEPARTMENT OF TRANSPORTATION

Florida's Turnpike Enterprise continues to invest significant funding for transportation infrastructure in District Six. In fact, in recent years investments totaling more than \$1.4 billion have been made on the Turnpike System in Miami-Dade County. This includes funding for major capacity improvements on over 34 miles of the Turnpike Mainline / SR 821 from SW 288th Street / Biscayne Drive to I-75, interchange improvements at SW 312th Street / Campbell Drive, and a new interchange at NW 170th Street, as well as other safety, maintenance, and operations projects. These projects are listed in the table below.

PROJECT TYPE	FACILITY	LOCATION	FPN
Add Lanes	Turnpike Mainline / SR 821	SW 288 th Street / Biscayne Drive to I-75 (MP 5 to MP 39)	423372-2,-3 415488-1 406096-1,-2,-3 415051-1,-2 427146-1,-2 415051-4,-5 435543-1 427685-1,-2 435542-1
Interchange	Turnpike Mainline / SR 821	SW 312 th Street / Campbell Drive (MP 2)	435462-1
Interchange	Turnpike Mainline / SR 821	NW 170 th Street (MP 37) New Interchange Buttonhook at NW 107 th Avenue Flyover Bridge over NW 170 th Street	443790-1,-2

PROJECT TYPE	FACILITY	LOCATION	FPN
Miscellaneous	Turnpike Mainline / SR 821	Thermoplastic (MP 19 to MP 26)	406096-6
		Ramp Intersection (MP 27)	427687-1,-2
		Safety Improvements (MP 29)	433929-1
		Lighting Renovations at Snapper Creek Plaza (MP 19)	443880-1
		Thru Lane Implementation (MP 4 to MP 27)	443882-2,-5,-6
		Okeechobee Road / US 27 Improvements	435542-3
		SR 924 West Extension	443747-1
	Turnpike Mainline / SR 91	Dolphin Plaza Renovations	415462-9
		Dolphin Stadium Interchange (MP 2X) Ultimate	441067-1
		All-Electronic Tolling (AET) Installation	

Florida’s Turnpike Enterprise continues to make project investments in District Six. In FY 2023 through FY 2027, Turnpike projects with construction funding total over \$494 million within Miami-Dade County.

The following summarizes project phase information that is referenced in subsequent project tables:

PHASE		FUNDING CODE
ENV	Environmental	C2, C8
PE	Preliminary Engineering	31, 32
ROW	Right of Way	41, 43, 45, 4B
RRU	Railroad and Utilities	56, 57
CST	Construction	52, 53, 54, 58, 61, 62

SUMMARY OF MAJOR PROJECT FUNDING BY PROJECT TYPE

The table below summarizes the funding programmed for the major Turnpike projects in the Tentative Five-Year Work Program (FY 2023 through FY 2027) that are located in District Six.

PROJECT TYPE	FISCAL YEAR					5 YEAR TOTAL
	FY 2023	FY 2024	FY 2025	FY 2026	FY 2027	
Add Lanes & Reconstruction	\$2,357,000	\$180,000	\$887,000	\$50,000	\$92,817,000	\$96,291,000
Interchange Improvements	\$319,327,000	\$0	\$49,875,000	\$0	\$0	\$369,202,000
MAJOR PROJECTS TOTAL	\$321,684,000	\$180,000	\$50,762,000	\$50,000	\$92,817,000	\$465,493,000

SUMMARY OF MAJOR PROJECTS BY COUNTY

MIAMI-DADE COUNTY PROJECTS

WIDEN THE TURNPIKE MAINLINE / SR 91 FROM THE GOLDEN GLADES TOLL PLAZA (MP 0.4X) TO THE MIAMI-DADE / BROWARD COUNTY LINE (MP 3.3X)

FPN: 423373-5

The project widens a segment of the Turnpike Mainline/SR 91 from the Golden Glades Toll Plaza to the Miami-Dade / Broward County Line. The widening will increase the number of travel lanes from six to eight. Work includes pavement widening, milling and resurfacing, All-Electronic Tolling (AET) gantry replacement, bridge widening and replacement, and interchange improvements at NW 199th Street (MP 2X).

PHASE	FISCAL YEAR					5 YEAR TOTAL
	FY 2023	FY 2024	FY 2025	FY 2026	FY 2027	
ENV	\$0	\$120,000	\$0	\$50,000	\$0	\$170,000
PE	\$495,000	\$0	\$0	\$0	\$0	\$495,000
ROW	\$30,000	\$60,000	\$887,000	\$0	\$0	\$977,000
RRU	\$1,832,000	\$0	\$0	\$0	\$0	\$1,832,000
CST	\$0	\$0	\$0	\$0	\$92,817,000	\$92,817,000
TOTAL	\$2,357,000	\$180,000	\$887,000	\$50,000	\$92,817,000	\$96,291,000

INTERCHANGE IMPROVEMENTS ON THE TURNPIKE MAINLINE / SR 91 AT I-95 / US 441 / SR 826 (GOLDEN GLADES) (MP OX)

FPN: 437053-1,-2,-3,-4,-5

The project improves operations at the I-95 / US 441 / SR 826 (Golden Glades) interchange. The project includes improved northbound and southbound connections between I-95 and the Turnpike Mainline / SR 91. Improvements also include reconstruction of the express lanes and general toll lanes along I-95, and ramp improvements from the Turnpike Mainline / SR 91 to SR 826 and SR 9A. Additionally, the Turnpike Mainline / SR 91 northbound ramps from NW 167th Street and SR 826, and the southbound ramp to NW 167th Street will be reconstructed. FTE is managing and funding FPN: 437053-5, while other portions of the project (FPN: 437053-1 through -4) are funded by FTE, but are being managed by FDOT District 6. This project goes with FDOT District 6 project FPN: 428358-1,-4,-6,-8.

PHASE	FISCAL YEAR					5 YEAR TOTAL
	FY 2023	FY 2024	FY 2025	FY 2026	FY 2027	
RRU	\$1,858,000	\$0	\$0	\$0	\$0	\$1,858,000
CST	\$317,069,000	\$0	\$1,730,000	\$0	\$0	\$318,799,000
TOTAL	\$318,927,000	\$0	\$1,730,000	\$0	\$0	\$320,657,000

INTERCHANGE AND SURFACE STREET IMPROVEMENTS ON THE TURNPIKE MAINLINE / SR 821 AT SW 216TH STREET (MP 11) AND SW 211TH STREET / CARIBBEAN BOULEVARD (MP 12)

FPN: 437211-1

The project increases operational capacity, improves safety, addresses roadway and structural deficiencies, and enhances overall traffic operations on the Turnpike Mainline / SR 821 at the SW 216th Street and SW 211th Street / Caribbean Boulevard interchanges. The project also includes improvements along the Turnpike Mainline / SR 821 between the two interchanges.

PHASE	FISCAL YEAR					5 YEAR TOTAL
	FY 2023	FY 2024	FY 2025	FY 2026	FY 2027	
ENV	\$100,000	\$0	\$0	\$0	\$0	\$100,000

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)
PART 2: 5-YEAR PROJECT LISTING
MIAMI-DADE EXPRESSWAY AUTHORITY (MDX)

TIP • FISCAL YEARS 2022/2023 TO 2026/2027

MOVING MIAMI-DADE

MIAMI-DADE EXPRESSWAY AUTHORITY (MDX)

This section of the TIP focuses on the major mobility improvement projects programmed by the Miami-Dade Expressway Authority (MDX) for the next five years. MDX is an agency of the State enabled by the Florida Legislature and created by Ordinance of the Miami-Dade County Commission in December 1994 which allowed MDX to acquire, hold, construct, improve, maintain, operate, own and lease an expressway system located in Miami-Dade County.

THE EXPRESSWAY AUTHORITY SYSTEM

The MDX System includes five (5) of the busiest and most important State Roads in Miami-Dade County: Airport Expressway (SR 112); Dolphin Expressway (SR 836); Don Shula Expressway (SR 874); Snapper Creek Expressway (SR 878); Gratigny Parkway (SR 924) as well as NW 138th Street from US-27 to just east of NW 97th Avenue and the LeJeune Frontage Roads from SR 836 to Central Boulevard.

PROJECT FUNDING

MDX's primary source of revenue is the tolls collected on its five expressways which are reinvested in Miami-Dade County to improve mobility and offer transportation choices within the county. MDX borrows money to fund its projects by selling bonds and uses the toll revenues as collateral. Like a mortgage loan where collateral is offered to the bank to secure the loan until fully paid, MDX offers the projected revenues as assurance that the bond's principal and interest will be paid. MDX does not receive any gas tax, property tax, sales tax or any other source of revenue.

FY 2023-2027 TIP

Major projects included in the MDX FY 2023 - 2027 TIP are highlighted within the following pages. The projects have been organized by the following categories: Existing System Improvements and System Expansion.

EXISTING SYSTEM IMPROVEMENT PROJECTS

The following projects are categorized as Existing System Improvements in the current Five-Year TIP and include widening or reconstruction within an existing roadway segment:

PROJECT 83611 – SR 836/I-95 INTERCHANGE IMPROVEMENTS

MDX has partnered with FDOT to acquire right-of-way, design and build the SR 836 improvements from NW 17th Avenue to I-95 in conjunction with the FDOT's I-95/I-395 project. Improvements to SR 836 include both eastbound and westbound widening for operational optimization between NW 17th Avenue to I-95. Additionally, a new viaduct consisting of an elevated 4 lane structure to bypass traffic on the lower level of SR 836 will be provided to improve mobility to and from Downtown Miami and Miami Beach. Furthermore, the project will improve access to the Health District by providing better connections to the area from I-95 and SR 836. The design-build contract was executed in July 2018 and completion is anticipated by FY 2024. The total cost for the MDX project is estimated at \$247.7 million.

PROJECT 83634 – SR 836 NEW HOMESTEAD EXTENSION OF FLORIDA'S TURNPIKE (HEFT) RAMP CONNECTIONS

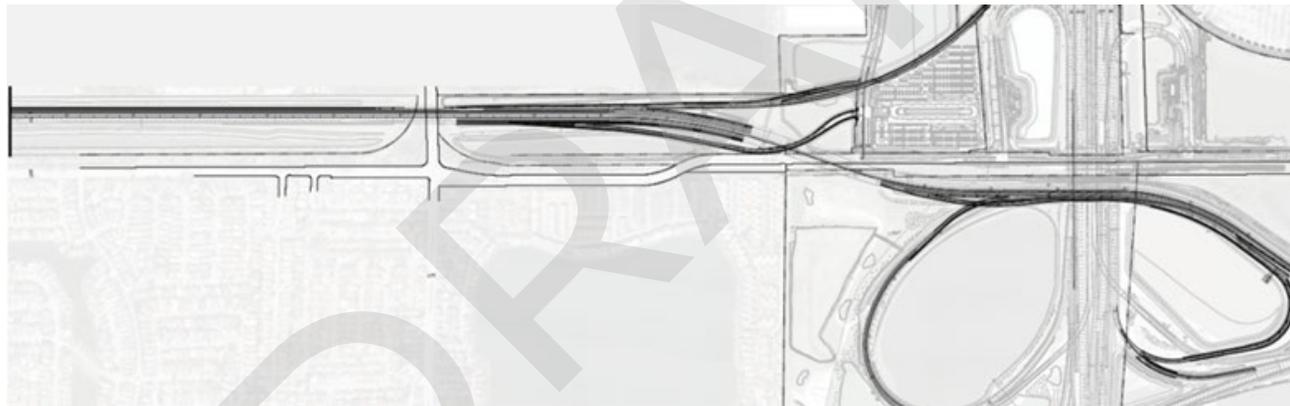

This project consists of new ramps from eastbound SR 836 to northbound HEFT and from southbound HEFT to westbound SR 836. Additionally, SR 836 ramp connections are being provided to access the Dolphin Station Park-and-Ride site. This project has been advertised and will start in the summer of FY 2022. The total cost is estimated at \$522 million.

SYSTEM EXPANSION PROJECTS

The following projects are categorized as System Expansions in the current Five-Year TIP and include all construction of new roadway segments on new alignments adjacent to the existing system that will increase the total centerline miles of the system:

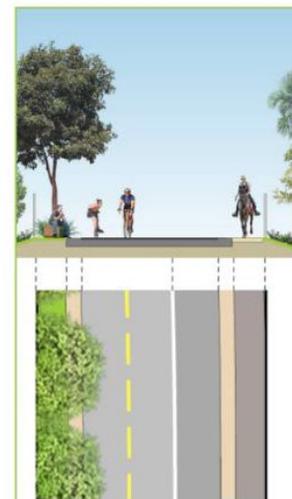

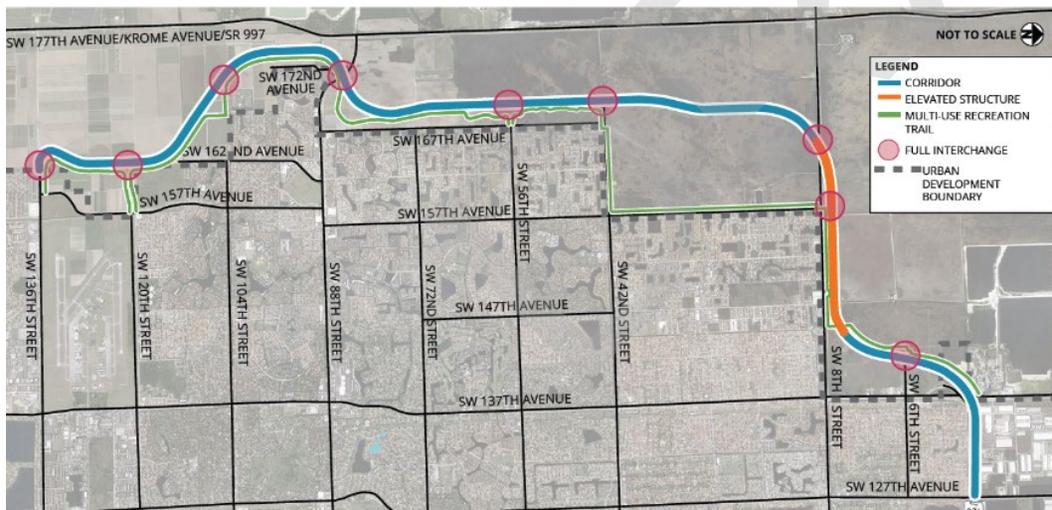

PROJECT 92408 – SR 924 PARTIAL INTERCHANGE AT NW 67TH AVENUE

This project will construct a new westbound on-ramp and off-ramp on SR 924 at NW 67th Avenue and new eastbound on-ramp from NW 67th Avenue. This partial interchange will provide congestion relief to Miami Lakes and Hialeah by providing additional traffic movements and access to SR 924 at NW 67th Avenue. Design-build is anticipated to begin in FY 2024. Total cost is estimated at \$41.1 million.

PROJECT 83618 – SR 836 SOUTHWEST EXTENSION/KENDALL PARKWAY

This 14-mile multimodal corridor will extend SR 836 from NW 137th Avenue to SW 136th Street and provide the residents in the southwestern portion of the County another transportation option. The project is envisioned to include: Express bus service and park & ride facilities in the vicinity of SW 88th Street and SW 136th Street; a multi-use recreational trail for non-motorized transportation including walking and biking; a minimum of 1,000 acres of land for wetland preservation and creation that will be held in perpetuity; widening of SR 836 Eastbound from 107th Avenue to 97th Avenue; as well as improvements to 137th Avenue, 157th Avenue, SW 88th Street and SW 104th Street to facilitate access. The improvements to local streets and portions of ramp connections will be contributions to Miami-Dade County. MDX is continuing to work on the environmental permitting, right-of-way acquisition and transfer of government parcels for the mainline and trail alignment. Additionally, MDX is advancing the final design and construction of various components of the Kendall Parkway project such as the SR 836 Eastbound widening from 107th Avenue to 97th Avenue at a total cost of \$9.0 million; and the widening of SW 137th Avenue from SW 8th Street to SW 26th Street at an estimated total cost of \$8.5 million. The final design for these 2 components will begin in FY 2023. **The start date for final design and construction for the mainline extension, multi-use recreational trail and transit stations is yet to be determined pending funding availability.** Total cost is estimated for all projects within the Kendall Parkway program is estimated at over \$1 billion.

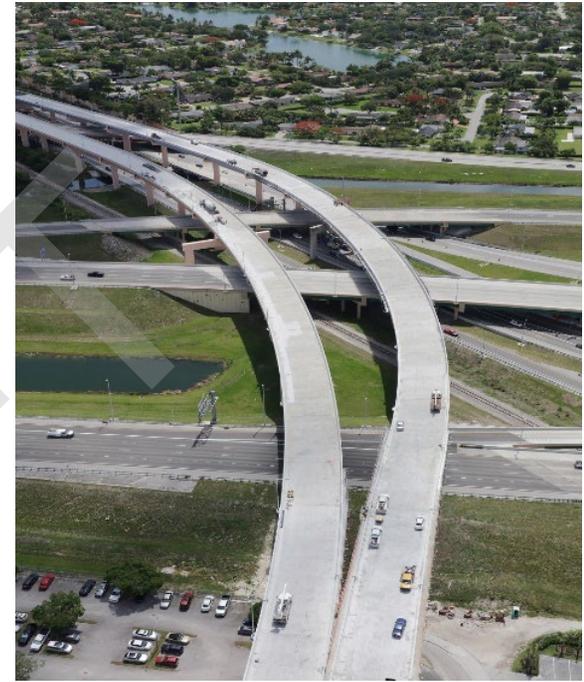

PROJECT 87410 – SR 874 RAMP CONNECTOR TO SW 128TH STREET

The construction has been completed for the new access ramp connection from the southern terminus of SR 874 to SW 128th Street. This new ramp provides expressway access to the growing southwest Miami-Dade communities, previously only serviced by access to and from Florida's Turnpike, through the SW 120th Street and the SW 152nd Street ramps. MDX widened SW 128th Street from two to five lane sections with two through lanes in each direction and a continuous turn lane in the median from SW 137th Avenue to SW 122nd Avenue as a contribution to Miami-Dade County. A portion of this project was constructed by the Florida's Turnpike Enterprise through an interagency agreement with MDX as part of a larger project that widened the HEFT and reconstructed the HEFT/SR 874 Interchange to yield efficiencies and eliminate future throwaway costs. This project also includes the extension of SW 127th Avenue from SW 128th Street to SW 124th Street funded by Miami-Dade County. The construction is complete, but the project will be closed financially in FY 2023. Total cost is estimated at \$115.5 million including the Miami-Dade County project.

PROJECT 92404 – SR 924 EXTENSION WEST TO THE HOMESTEAD EXTENSION OF THE FLORIDA'S TURNPIKE (HEFT)

MDX has completed the PD&E study for the 2.3-mile expressway extension of SR 924 west to the HEFT. This work program includes funding for the right-of-way acquisition and construction of substructures in critical areas which was procured and is being managed by FTE as part of their larger project. It also includes the right-of-way acquisition, final design and construction of the extension of SR 924 mainline from 97th Avenue to the HEFT. This project provides additional connectivity to HEFT and I-75 from SR 924 and NW 138th Street; access to major activity and employment centers in NW Miami-Dade and it completes MDX's initial improvements to NW 138th Street. The total cost of this project is estimated at \$192.4 million.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)
PART 2: 5-YEAR PROJECT LISTING
SECONDARY GAS TAX PROGRAM

TIP • FISCAL YEARS 2022/2023 TO 2026/2027

SECONDARY GAS TAX

MIAMI-DADE COUNTY DEPARTMENT OF TRANSPORTATION AND PUBLIC WORKS (DTPW)

The program includes continuing projects that have fund allocations yearly.

CONTINUING PROGRAM PROJECTS

- Bridge Repair and Painting
- Guardrail Safety Improvements
- Railroad Crossing Improvements
- Street Lighting Maintenance
- Special Taxing District
- Pavement Markings Crew
- Capitalization of Traffic Signals and Signs Crew
- ADA Hotline Projects
- Secondary Gas-Road and Bridge Maintenance
- Beautification Improvements
- Pavement Markings Contract
- Maintenance of Roads and Bridges
- Traffic Control Devices (Equipment/Materials)
- Local Grant Match for TPO
- Traffic Signal Materials
- Road and Bridge Emergency Bridge Repairs/Improvements/Painting
- Right-of-Way Title Plant Rental

ROAD IMPACT FEE

MIAMI-DADE COUNTY DEPARTMENT OF TRANSPORTATION AND PUBLIC WORKS (DTPW)

On December 6, 1988, the Board of County Commissioners adopted Dade County Road Impact Fee Ordinance No. 88-112, which provides for the fair share assessment of road impact fees on new building construction in Miami-Dade County, including municipalities. The County has been divided into nine road impact fee benefit districts. Fees collected within each district will be expended for roadway capacity improvements within each district.

Each district program includes the following categories:

ROAD AND BRIDGE PROJECTS

Capacity improvements along arterials and collectors

CONTINUING PROGRAM PROJECTS

RESURFACING

Paving, widening, drainage, striping

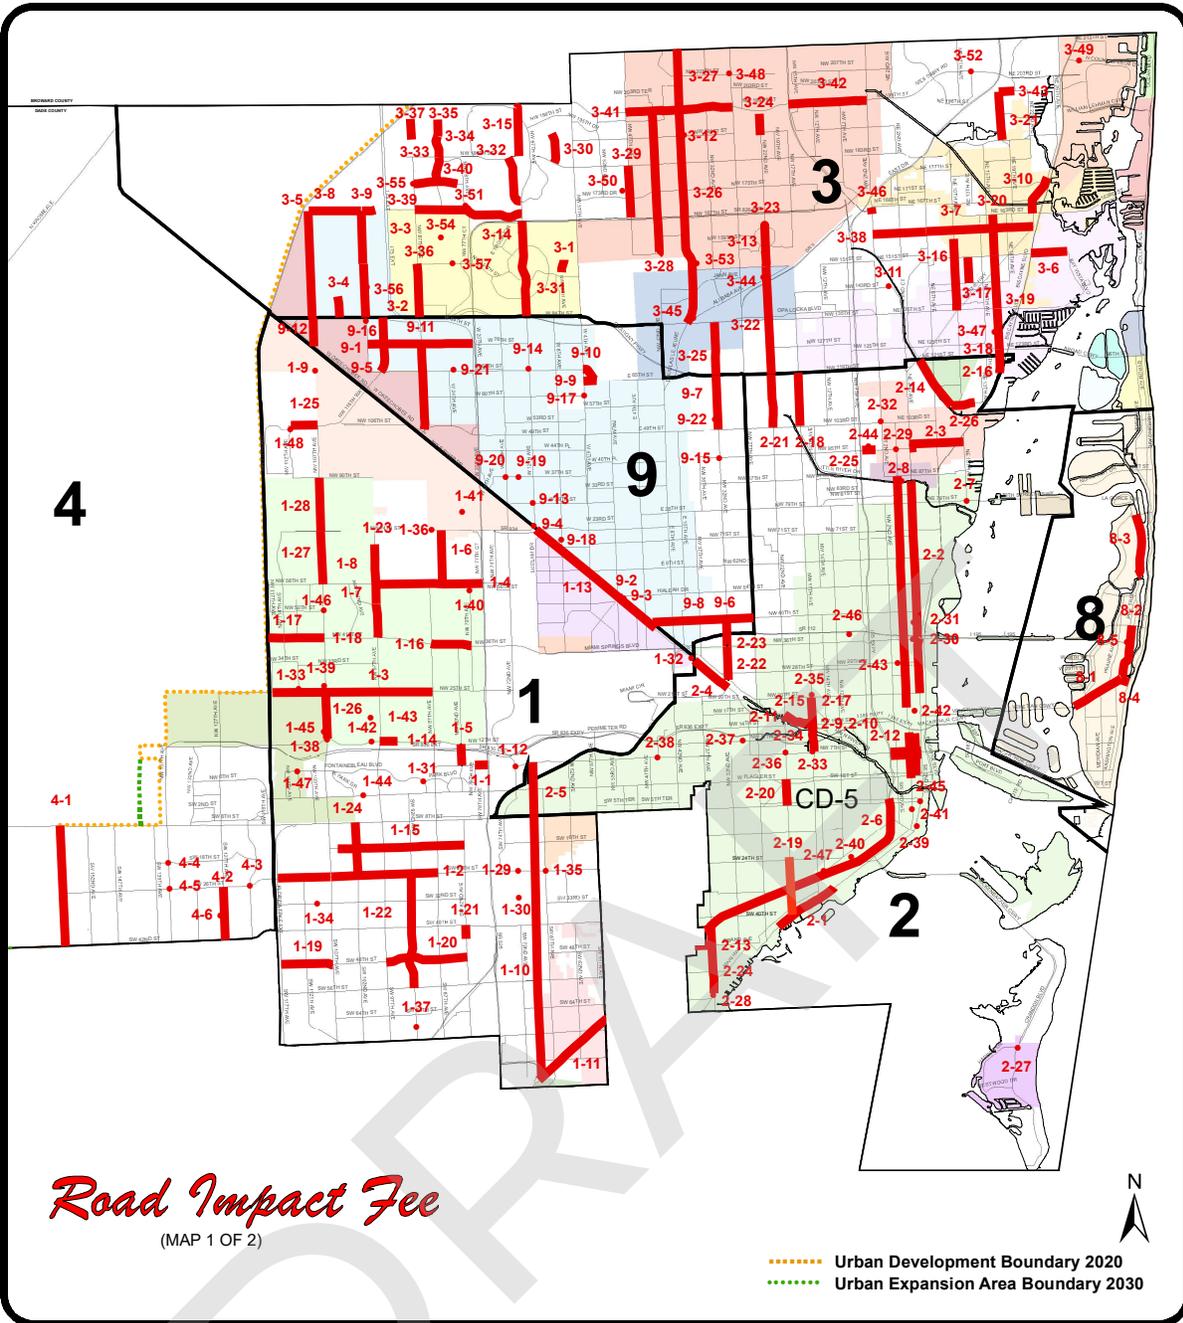

T.O.P.I.C.S.

(Traffic Operations Projects to Increase Capacity and Safety) Intersection Improvements

TRAFFIC CONTROL DEVICES

Signalization

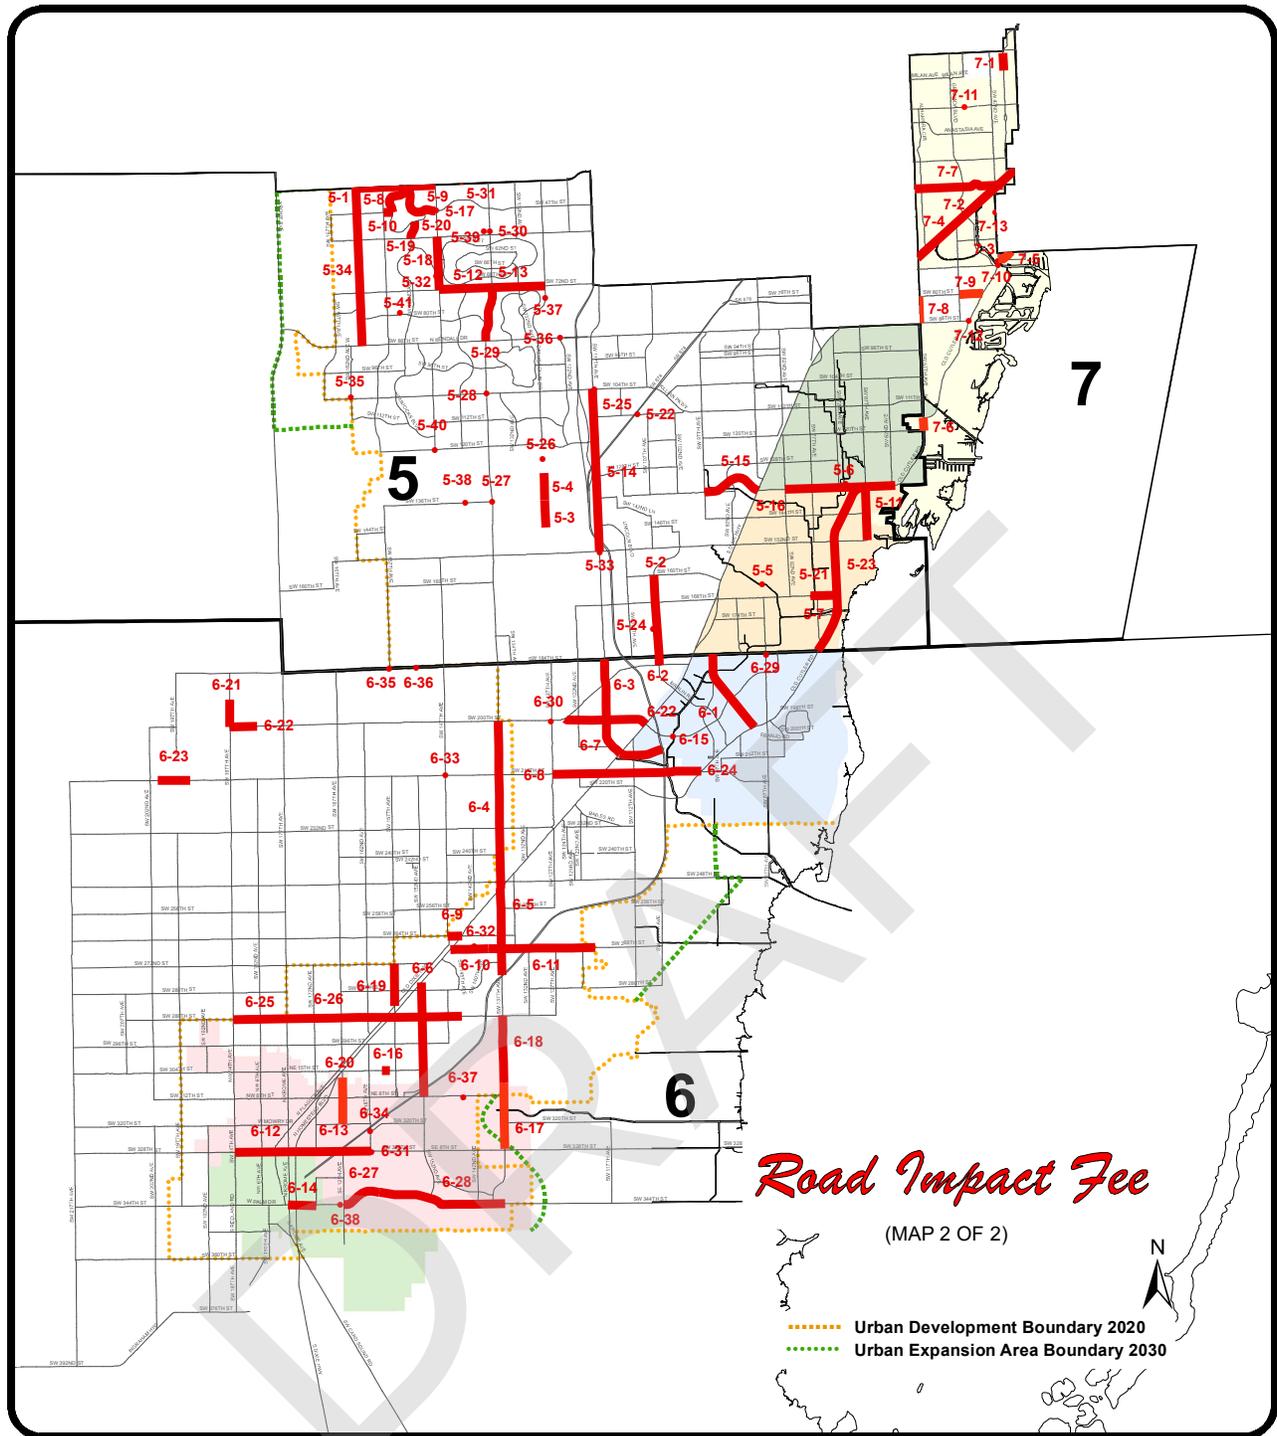

Road Impact Fee

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)
PART 2: 5-YEAR PROJECT LISTING
THREE-CENT LOCAL OPTION FUEL TAX

TIP • FISCAL YEARS 2022/2023 TO 2026/2027

THREE-CENT LOCAL OPTION FUEL TAX

INTRODUCTION

The Capital Improvement Local Option Fuel Gas Tax, authorized by Section 336.025 (1) (B), Florida Statutes became effective January 1, 1994. It was reduced from five cents to three cents on September 1, 1996. In accordance with state statute, proceeds of this tax have been programmed for transportation expenditures needed to meet the requirements of the capital improvement element of the adopted comprehensive plan.

FY 2022-23 PROJECTED MUNICIPAL DISTRIBUTION

The actual distribution to the municipalities for FY 2022-23 will be based on a weighted formula which accounts for percentage of population (statistics from the Bureau of Economic and Business Research, at the University of Florida) and the centerline mileage of municipal roadway for each incorporated area from the “2017 City/County Mileage Report” – Florida Department of Transportation prepared in the Spring of each year with data reported as of September 30, 2017. The figures contained herein were calculated using these same reports. This estimate for FY 2022-23 will be sent to the municipalities at the time the County files its official estimate with the Florida Department of Revenue in April 2022.

In FY 2022-23, the estimated net revenue for the Capital Improvement Local Option Gas Tax projected as of March 19, 2021 is \$26.324 million at 95 percent with \$6.844 million to be distributed to the municipalities and \$19.48 million to be distributed to the County (26 percent to the municipalities and 74 percent to the County according to the current

interlocal agreements). The State of Florida is allowed to impose a 7.3 percent administrative fee. The FY 2022-23 estimates, reflects a minor decrease from the current year in fuel tax revenues.

COUNTY LOCAL OPTION FUEL TAX TRANSPORTATION PROJECTS

The County reviews the Capital Improvement Local Option Fuel Tax distribution for the Department of Transportation and Public Works on an annual basis for the most effective use of this limited funding subject to legislative actions taken by the Board of County Commissioners and state statute (\$19.48 million).

DRAFT

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)
PART 2: 5-YEAR PROJECT LISTING
PEOPLE'S TRANSPORTATION PLAN IMPROVEMENTS

TIP • FISCAL YEARS 2022/2023 TO 2026/2027

PEOPLE'S TRANSPORTATION PLAN IMPROVEMENTS

MIAMI-DADE COUNTY DEPARTMENT OF TRANSPORTATION AND PUBLIC WORKS (DTPW)

On the November 5, 2002 ballot, voters approved the People's Transportation Plan (PTP), which provides for a half percent sales surtax to fund major transportation improvements.

The Citizens' Independent Transportation Trust (CITT), a group of citizens who function as an independent decision-making body, was created to oversee the construction and management of the PTP's transportation plan. The Department of Transportation and Public Works (DTPW) has worked closely with the CITT to provide a wide range of roadway and neighborhood improvements.

The plan includes the two categories from the PTP Ordinance that relate to the DTPW; major highway road improvements and neighborhood improvement projects.

MAJOR HIGHWAY ROAD IMPROVEMENT PROJECTS

Major road and bridge projects under construction or scheduled to begin construction include, but are not limited to:

- NW 37 Avenue from North River Drive to NW 79 Street
- SW 137 Avenue from US-1 to SW 200 Street
- SW 137 Avenue from HEFT to US-1
- SW 216 Street from SW 127 Avenue to HEFT

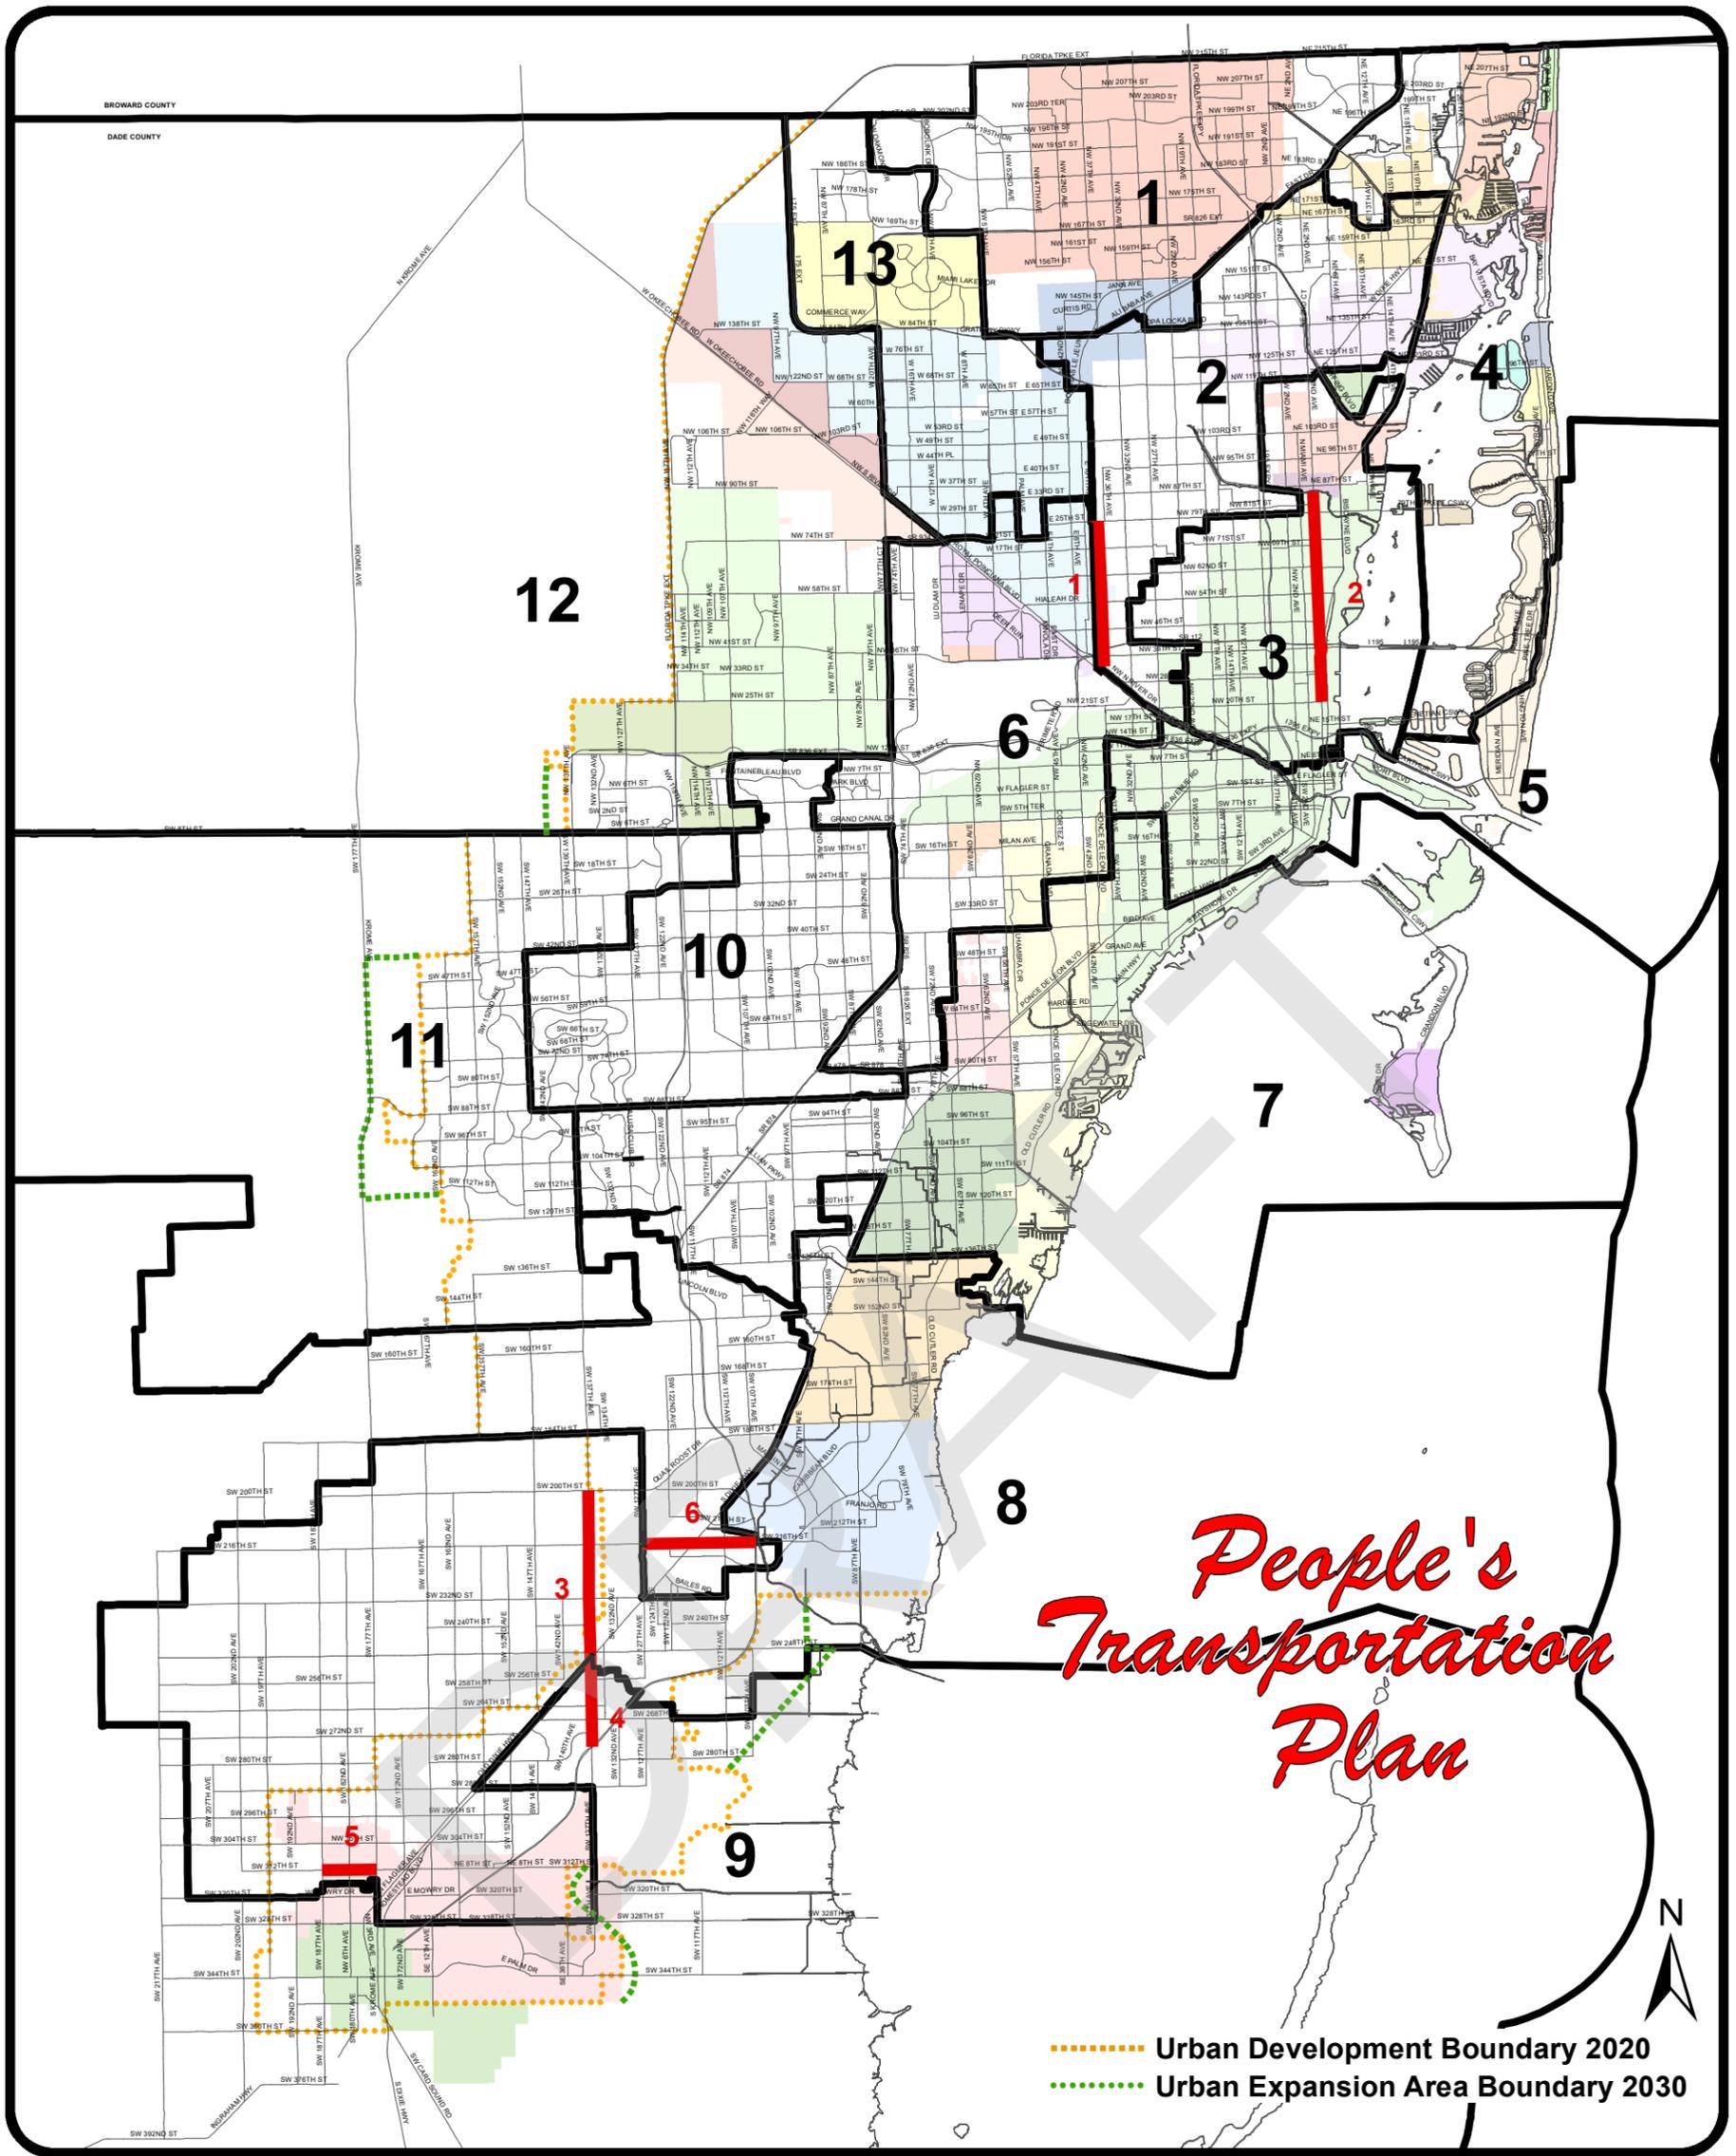

NEIGHBORHOOD IMPROVEMENT PROJECTS

The DTPW, as part of the PTP, has been tasked with coordinating and constructing various categories of Neighborhood Improvement Projects.

To address the various non-site specific categories discussed in the PTP Ordinance, the Department created “The Neighborhood Improvement Projects Formula” to allocate funds. The formula takes into account population in the Unincorporated Municipal Service Area for each commission district, the needs as reported to the Department, and the percentage of maintained arterial and collector lane miles. A portion is then evenly distributed to each district. PTP Neighborhood Improvements include modifications of intersections, resurfacing of local and arterial roads, installation / repairs of guardrails, installation of school flashing signals, enhancement of greenways and bikeways, A.D.A. curb cuts / repairs, pavement markings, roadway lighting, traffic calming, traffic signals, and traffic sign replacement / repair. Such improvements also include replacement / repair of sidewalks, repair / installation of drainage and landscape beautification (including community image enhancements) related to the development, construction, operation or maintenance of roads and bridges in the County or to the expansion, operation or maintenance of bus and fixed guideway system.

The Neighborhood Improvement Projects include:

- Site Specific Neighborhood Improvement Sites
- Non-Site Specific Neighborhood Improvement Sites
- Countywide Neighborhood Improvements
- School Flashing Signals Program

People's Transportation Plan

NOTE 1: *PTP NEIGHBORHOOD IMPROVEMENTS* Provided each Commission District with funds for Neighborhood Improvements in the categories listed below and according to an allocation formula based on population, reported needs and County-maintained road lane miles. DTPW continues to coordinate the Neighborhood Improvement Projects with County Commissioners' Offices based on their remaining allocation. Improvement categories include: modifications of intersections; resurfacing of local and arterial roads; installation / repairs of guardrails; installation of school flashing signals, enhancement of greenways and bikeways, A.D.A. curb cuts / repairs, pavement markings, roadway lighting, traffic calming, traffic signals, and traffic sign replacement / repair. Such improvements also include replacement / repair of sidewalks, repair / installation of drainage and landscape beautification (including community image enhancements) related to the development, construction, operation or maintenance of roads and bridges in the County.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)
PART 2: 5-YEAR PROJECT LISTING
PRIVATE SECTOR IMPROVEMENTS

TIP • FISCAL YEARS 2022/2023 TO 2026/2027
PRIVATE SECTOR IMPROVEMENTS

MIAMI-DADE COUNTY DEPARTMENT OF TRANSPORTATION AND PUBLIC WORKS (DTPW)

The Private Sector Improvements Program addresses road improvement commitments to be made by private developers during the regional and local development approval process.

The improvements listed are necessary to help mitigate traffic impacts of specific large development projects such as Developments of Regional Impact (DRI) and other zoning requests reviewed by the Miami-Dade County Development Impact Committee (DIC) and approved by the Community Zoning Appeals Board (CZAB) or the Board of County Commissioners (BCC). These road improvement commitments are contained in County Commission zoning resolutions and/or documents proffered by development interests to the Commission. In some cases, especially DRI development orders, sketch drawings of the improvements are attached to these legal documents. The last column of the table in this section contains either the Commission Resolution Number or the official record book/page number associated with each improvement.

Unlike other parts of the TIP, the construction of improvements in this section are normally not linked to specific dates, but instead, are usually dependent upon the construction schedule of a specific development project, which can vary considerably according to the market and other conditions.

This section addresses road improvement commitments to be made by private developers as part of the land development process.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)
PART 2: 5-YEAR PROJECT LISTING
AVIATION ON-SITE IMPROVEMENTS

TIP • FISCAL YEARS 2022/2023 TO 2026/2027
AVIATION ON-SITE IMPROVEMENTS
MIAMI-DADE COUNTY AVIATION DEPARTMENT

South Terminal Gate and Apron Expansion

The Miami-Dade County Transportation Improvement Program includes capital improvements for the Aviation Department for the continued development of Miami International Airport (MIA) and the General Aviation Airports (GAA) – Miami Opa-Locka Executive Airport (OPF), Miami Executive Airport (TMB), Miami Homestead General Aviation Airport (X51) & Dade-Collier Training and Transition Airport (TNT). The funding for this program is primarily from revenue generated by the Aviation Department and from Federal and State grants.

MIAMI-DADE COUNTY AVIATION DEPARTMENT - AVIATION ON-SITE IMPROVEMENTS

Major projects at Miami-Dade County's airports include phases of the following:

	DOLLARS IN MILLIONS (FUNDED)
MIA - Perimeter Road Widening Realignment & Bridge Replacement	\$27.54
MIA - Terminal Wide Re-Roofing, Drains and Scuppers	\$119.70
MIA - Central Terminal Phase 1 (E Thru F Connector and Cc F Infill)	\$55.72
MIA - South Terminal Expansion East Phase 1 (New Gates)	\$55.86
MIA - South Terminal Apron & Utilities Modification/Expansion & GSE Facility	\$50.44
MIA - Employee Parking Garage	\$102.95
MIA - New Fuel Storage - (4 th Tank)	\$19.75
MIA - New Concourse F	\$634.54
MIA - Concourse G Demolition	\$30.07
MIA - Central Base Apron and Utilities Modification and Expansion (Phase 1 & 2)	\$108.48
MIA - Airport Operations Center (AOC)	\$24.49
MIA - Runway 9-27 Rehabilitation	\$53.36
MIA- North and Central Terminal Passenger Boarding Bridges - Phase 1	\$70.05
MIA- Central Base AOA Gate	\$10.44
MIA - North Terminal Gate Optimization Phase 1 & 2	\$29.94
MIA- Concourse H Glazing, Curtain Wall Assessment and Corrective Action	\$36.47
MIA- Security Checkpoint Equipment Replacement	\$30.00
MIA- Lower Concourse E 400 Hz Upgrades	\$1.06
MIA Central Terminal Ticket Counters Replacement	\$37.99
MIA - Concourse F refurbishment Phase 2	\$42.21
GAA - X51 Security Enhancements and Upgrades	\$2.70
GAA - OPF Taxiways / Apron Rehabilitation and Repair	\$1.25

	DOLLARS IN MILLIONS (FUNDED)
GAA - OPF Upgrade Runway 9/27 Rehabilitation	\$33.35
GAA - OPF Engine Run-Up Pad	\$7.59
GAA - TMB RIM HS1 with Taxiway H West Extension to Threshold	\$18.55
GAA - TMB South Apron Expansion & New Taxi Lane	\$17.76
GAA - TMB Pave Shoulders for Runway 9L/27R	\$2.00
TOTAL	\$1,624.26

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)
PART 2: 5-YEAR PROJECT LISTING
MULTIMODAL SEASPORT DEVELOPMENT

TRANSPORTATION IMPROVEMENT PROGRAM STRATEGY

PortMiami, among the nation's busiest ports, contributes approximately \$43 billion and more than 334,000 jobs annually to Florida's economy. Its sustained performance propels Miami to be recognized as the Cruise Capital of the World and Global Cargo Gateway.

CRUISE

In 2018-19, prior to the COVID-19 pandemic, PortMiami, known as the Cruise Capital of the World, processed more than 6.8 million passengers annually with 22 cruise lines berthing 55 ships. In 2021-2022, the port transitioned back to cruising and continues to grow the cruise operations as demand drives growth.

CARGO

As a cargo gateway center, the Port handles more than one million twenty-foot equivalent units (TEU's) annually. For the seventh consecutive year, PortMiami has surpassed the 1 million TEU mark and this past year hit a new record of just over the 1.25 million TEU mark. The total value of the economic impact created by cargo containers moving via PortMiami is estimated at \$35 billion dollars to the State of Florida.

RESILIENCE PLAN

All PortMiami's projects are inherently committed to improving its robust climate adaptation, carbon mitigation, and resilience. PortMiami has adopted proactive policies that enhance its sustainability and ensure environmentally friendly port operations.

The Port's goal is to continue to provide sustainable services by carefully balancing environmental, social, and economic factors that frame its resilience plan.

This plan carefully balances near- and long-range environmental, capital, and economic factors into its resiliency planning. The Port carefully plans and evaluates the cost, benefits, and feasibility of each project to optimize its environmental and economic outcome in accordance with these planning objectives. The following sections provide the framework of PortMiami's Resiliency Plan that represents its continued trajectory toward a more sustainable seaport:

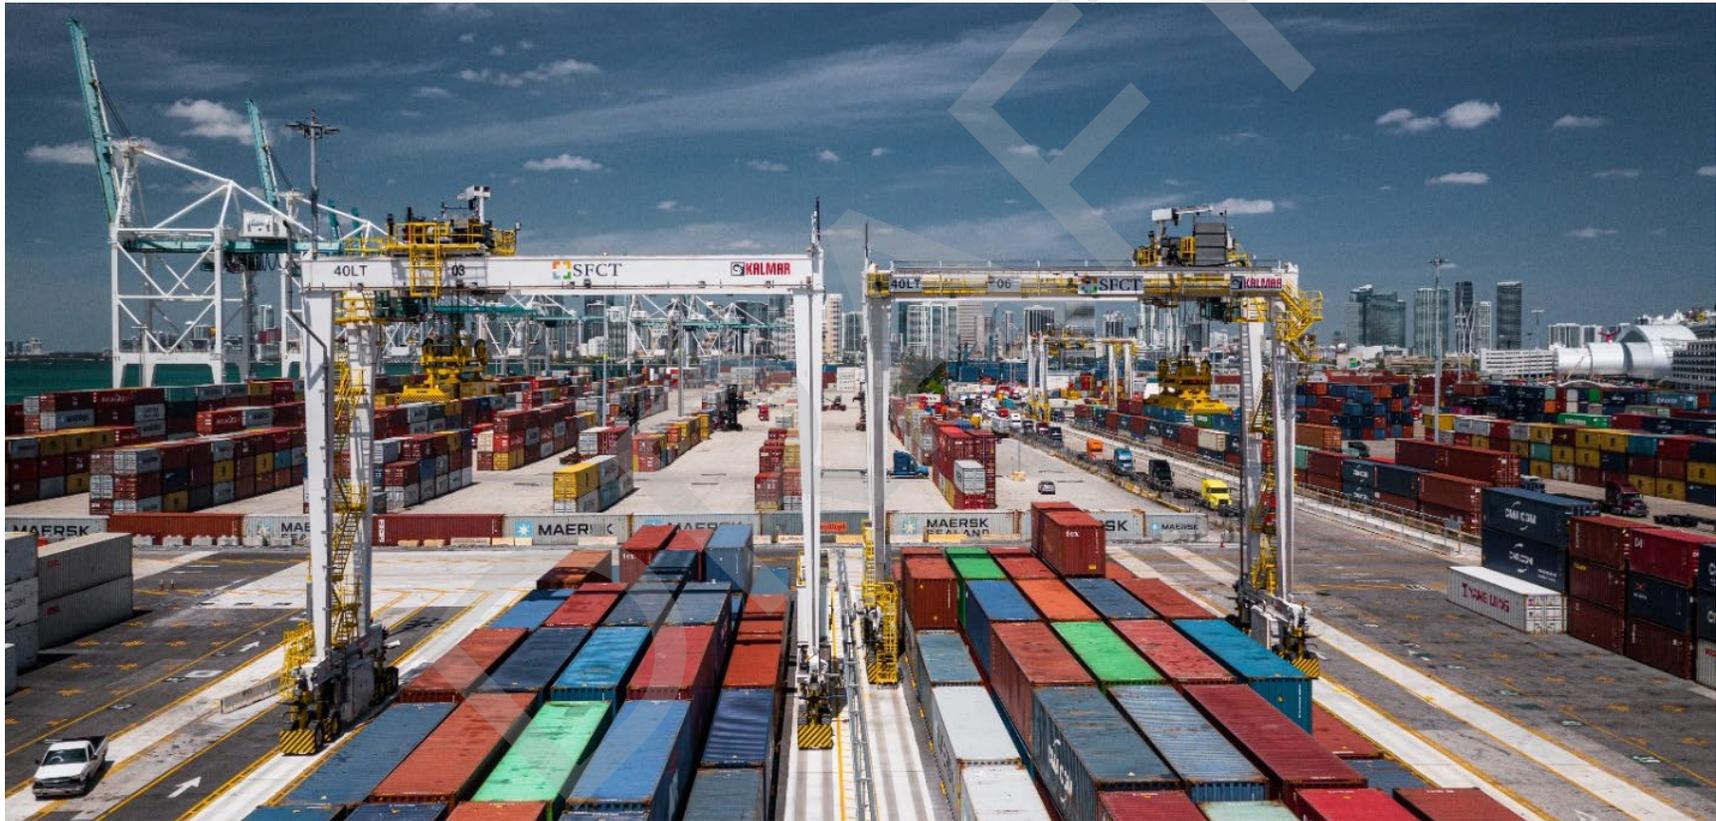

- A. Sustainable Design
- B. Sea Level Rise
- C. Emission Reduction
- D. Resource Mitigation

NET ZERO

PortMiami has embarked on the development of a visionary and transformational Net Zero program to develop the nation's first end-to-end net zero carbon emission supply chain in line with the County's goal of a 50% reduction in emissions by 2030. The program addresses unprecedented supply chain disruptions and congestion and is a significant step forward for the County's economic development goals.

The program began with electrification of key elements of the supply chain, including conversion to electric cargo handling equipment and transportation, and the provision of shore power for ships at port. In addition, PortMiami proposes an expansion of rail infrastructure and operations, eliminating fossil fuel-burning trucks from the road.

The Net Zero plan seeks to optimize the current supply-chain system using carbon-based energy by improving efficiencies, eliminating fossil fuels, reducing point-to-point transport while at the same time creating infrastructure in areas that will benefit from job creation and economic impact. Finally, the NetZero plan contemplates additional programs to support the plan, including the development of a workforce training program for new technologies, additional resiliency elements such as a solar farm at the inland port and electric vehicle charging, and infrastructure improvements to key roadways.

TRANSPORTATION

The Port's Transportation Improvement Program (TIP) is comprised of a total of approximately \$1.8 billion in funded projects over the next five years; and reflects the Port's aggressive strategy for optimizing land use and enhancing throughput capacity to meet the demands of the cargo and cruise industries.

As part of the Capital Development Program, the Port is dedicated to meet and exceed industry demands by supporting the following Capital Improvement Projects:

- Construction of Terminals and Parking Garages
- Roadway project for new Cruise Terminals
- Modernization of Cargo Terminals
- Additional Gantry Cranes
- Bulkhead Improvements
- Fumigation and Cold Chain Processing Facility
- Inland Port
- FPL Substation Expansion and new duct-banks to service different projects
- Projects promoting Technological Improvements to reduce delays, emissions, and improve safety and efficiencies
- Projects promoting Sustainability and Resiliency

The Port continues to assertively seek grant funding from local, state, and federal sources. The TIP reflects participation from the Florida Department of Transportation (FDOT) with \$32.7 million in support of roadways, cargo improvements and other infrastructure projects. This agency and the Port's partners continue to be part of the established goals to support the program and accommodate growth.

PORTMIAMI ACCOMPLISHMENTS

CRUISE

CRUISE TERMINAL B

Completed in 2021, PortMiami has achieved LEED Gold Certification at Cruise Terminal B to support Norwegian Cruise Line's expanding operations.

CRUISE TERMINAL V

PortMiami has received Temporary Certification of Occupancy on February 11, 2022, for a new cruise terminal to support Virgin Voyage's growing operations. The project received LEED Gold Certification.

CARGO

INFRASTRUCTURE IMPROVEMENTS – SOUTH FLORIDA CONTAINER TERMINAL (SFCT) – ERTG PHASE 1

Improved the infrastructure within South Florida Container Terminal's cargo yard to transition from diesel power cargo handlers to electrically powered rubber-tired gantries (eRTGs). Each eRTG replaces approximately two diesel top loaders, and this first phase reduces carbon dioxide emissions by 20%.

CARGO GATES PHASE 1 FOR SFCT

PortMiami completed construction of the South Florida Container Terminal's security gates upgrades the technology and operational services which result in a decrease in truck idling times and expected to reduce total metric tons of carbon dioxide equivalent by 44% within the yard.

INFRASTRUCTURE

NORTH CRUISE BLVD EXTENSION PHASE 2B

Roadway improvements were completed that extends North Cruise Boulevard in response to operational demands and optimize transportation efficiencies.

FPL SUBSTATION EXPANSION UTILITIES RELOCATION

FPL has completed the relocation of its utilities in preparation the next phase – expanding its substation.

PORTMIAMI CURRENT PROJECTS

CRUISE

CRUISE TERMINAL F EXPANSION

PortMiami is expanding Cruise Terminal F to support Carnival Cruise Line's expanding operations. The project has achieved LEED Silver Certification.

CRUISE TERMINAL F & G CHILLER UPGRADES/MODERNIZATION/REPLACEMENTS

PortMiami is upgrading its Cruise Terminal F and G Chiller to introduce innovative technology that improves energy efficiency and cost savings while addressing resiliency.

SHARED TERMINAL

PortMiami has partnered with MSC Cruise Line with the design and construction two new cruise berths and a shared “state of the art” multi-vessel Cruise Terminal and Parking Garage Complex. The terminal will be equipped with shower power and LEED Silver Certified.

CRUISE TERMINALS A & AA ROADWAYS

Construct a new road to address the new terminals at A and AA.

BERTH 10

PortMiami is developing an additional berth to supply berthing space for the Cruise Terminal AA and AAA (Shared Terminal) and introduce a more resilient bulkhead system capable of addressing future sea level rise.

CRUISE TERMINALS A & AA ROADWAYS

PortMiami is constructing a roadway flyover in response to cruise growth and to optimize Cruise Terminal access and circulation and minimize traffic congestion and delays.

CRUISE TERMINAL C

PortMiami is improving Cruise Terminal C (CT-C) to improve efficiencies and respond to cruise growth.

CRUISE TERMINAL B

PortMiami is improving Cruise Terminal B (CT-B) traffic circulation to improve efficiencies and safety and reduce congestion and traffic delays.

SHORE POWER PHASE I

As part of PortMiami's Net Zero goals the port is commencing with the first phase of provisioning shore power for vessels at the port to reduce emissions and improve resiliency. The PortMiami Shore Power Program will eliminate the use of vessel diesel generators while the vessels are at berth.

The port will also be providing shore power capability at five terminals, with enough power for three vessels to utilize shore power at the same time.

RCCL CAMPUS

Royal Caribbean Cruise Line is expanding its headquarters to double the capacity of its current campus from 2,200 to 4,200 employees. The design will be LEED Certified and provides various sustainable design features, including more green space and built-in sustainability features such as electric car chargers, a green roof, photovoltaic cells, and rainwater collectors.

PASSENGER BOARDING BRIDGES (PBBS)

PortMiami is purchasing passenger boarding bridges for various terminals in response to new cruise terminal construction and increased demand.

D & E PROVISIONING BUILDING

The purpose of the CT D&E Provisioning building project is to address near- and long-term needs for Cruise Terminals D and E. The design will be LEED Silver Certified and include photovoltaic cells.

BRIGHTLINE

Build a train station for passengers and employees at a location that reduces congestion and emissions by optimizing access to terminals and employment destinations.

CRUISE TERMINAL J

Upgrade and remodel Terminal J to attract luxury cruise operations.

CRUISE TERMINAL V

Design and construct a new cruise terminal to establish Virgin Voyages' first home terminal.

CARGO

INLAND PORT DEVELOPMENT

As part of the Net Zero program an inland port will increase PortMiami's cargo capacity and volume, leading to new business opportunities and access to the burgeoning Orlando and Tampa markets. Preliminary estimates indicate that a new inland port could provide approximately 50% increase in container volume annually, increasing Miami Dade County's economic competitiveness at various scales.

SFCT GARAGE

As part of the Port's east end improvements, the Port is constructing a parking structure within the SFCT cargo yard area to optimize its limited island real estate and consolidate parking demands to free space for operations. The garage will include sustainable features such as electric vehicle charging stations.

SFCT/TLM E-RTG PHASE II

PortMiami and SFCT have partnered to continue to improve the drainage in the SFCT's cargo yard and construct infrastructure improvements to support electric Rubber Tired Gantry Cranes (eRTGs), which in turn increases capacity with the cargo yard. This continued effort meets the port's Net Zero goals by replacing diesel toploaders with eRTGs to reduce emissions.

ELECTRIC CARGO GANTRY CRANES

As PortMiami receives more deeper draft vessels, the Port will add up to six new post-panamax gantry cranes, which will bring the total number of cranes to 19. The gantry cranes will improve resiliency and support expanding operations, reduce energy costs by significantly reducing maintenance and repair.

COLD CHAIN PROCESSING & FUMIGATION FACILITY

The new facility is a state-of-the-art cold chain processing and fumigation facility that will provide a more efficient inspection and fumigation process for the Port's perishable goods. The facility will become the port's central location to serve various markets and reduce truck travel times and traffic accidents.

CARGO GATE MODIFICATIONS 2-5

PortMiami is constructing the Cargo Gates Modifications and Traffic Improvements to include improvements to the existing pre-arrival main gate complex, improvements to the existing POMTOC gate complex, cargo traffic circle and roadways, pavement markings and new signage, and new communications and electrical conduits for the outbound main complex.

INFRASTRUCTURE IMPROVEMENTS – CONTAINER YARD (SEABOARD)

Provide drainage improvements and various other resiliency improvements in Seaboard's container yard area. The project will increase capacity, modernize the cargo gate and electric reefer racks for refrigerated cargo.

INFRASTRUCTURE

CONTAINER YARD (SEABOARD)

Provide drainage improvements and various other resiliency improvements in Seaboard's container yard area.

CAPITALIZED GLAZING, ROOFING, HEATING, VENTILATION, AND AIR CONDITIONING (HVAC)

PortMiami is improving its roofing, paving, glazing, and HVAC to reduce urban heat island effect, improve stormwater runoff and treatment, extend roof life, and save energy. Transitioning to more energy efficient systems throughout the port increases resiliency by reducing ambient temperatures radiating from roofs, increase operating life, and reduce the burden on cost to operate and maintain.

WAYFINDING

PortMiami is undergoing a comprehensive improvement of its wayfinding and signage program to improve visitor experience and safety, reduce emissions, and minimize delays.

LED HIGH-MAST LIGHTS

As part of the Net Zero goals PortMiami is transitioning its cargo yard high-mast lights to low-emitting diode (LED) lights to reduce energy consumption and cost and improve service life.

NORTH BULKHEAD REPLACEMENT

PortMiami is continuing bulkheads, expected to add at least 75 years of life to the Port, improve resiliency, and raises the bulkhead in preparation for sea level rise. This infrastructure project is seeking Envision Certification.

FEDERAL INSPECTION FACILITY (FIF)

PortMiami is planning to build new facility for US Custom Border Patrol (CBP).

STORMWATER IMPROVEMENTS

PortMiami is upgrading its drainage address growth, capture more stormwater on -port, and resiliency preparedness.

PORT-WIDE INFRASTRUCTURE CAPITALIZED MAINTENANCE/MODERNIZATION/UPGRADES

PortMiami is undergoing infrastructure improvements in various areas of the port including drainage, port beautification projects, etc. The upgrades improve visitor experience, promote innovative technology that increases safety and operational efficiencies, improves energy efficiency and cost savings, and addresses resiliency.

CT-J SEAWALL

PortMiami is continuing to replace bulkheads, expected to add at least 30 years of life to the Port, to address upkeep, address sea level rise, and improve resiliency.

INFRASTRUCTURE IMPROVEMENTS – BERTH REDEVELOPMENT (BAYS 165-177 AND 148-150)

PortMiami is improving the bulkheads along part of Seaboard Marine's cargo yards to address sea level rise and improve PortMiami's resiliency. The Port's infrastructure will be strengthened and the berthing capacities increased by fixing the grade elevation, strengthening the wharf, and removing two existing roll-/roll-off ramps, which increase the overall linear length of the berth to allow multiple ships.

INFRASTRUCTURE IMPROVEMENTS - SOUTH FLORIDA CONTAINER TERMINAL

Provide drainage improvements to address sea level rise and resiliency, and conduct various cargo yard projects in the South Florida container Terminal.

INFRASTRUCTURE IMPROVEMENTS - WATER & SEWER UPGRADES

Upgrade the Port's water and sewer system for new services that improve the seaport's resiliency.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)
PART 2: 5-YEAR PROJECT LISTING
PUBLIC TRANSPORTATION IMPROVEMENTS

TIP • FISCAL YEARS 2022/2023 TO 2026/2027

PUBLIC TRANSPORTATION IMPROVEMENTS

MIAMI-DADE COUNTY DEPARTMENT OF TRANSPORTATION AND PUBLIC WORKS (DTPW)

SPECIFIC ASPECTS OF THE PROGRAM

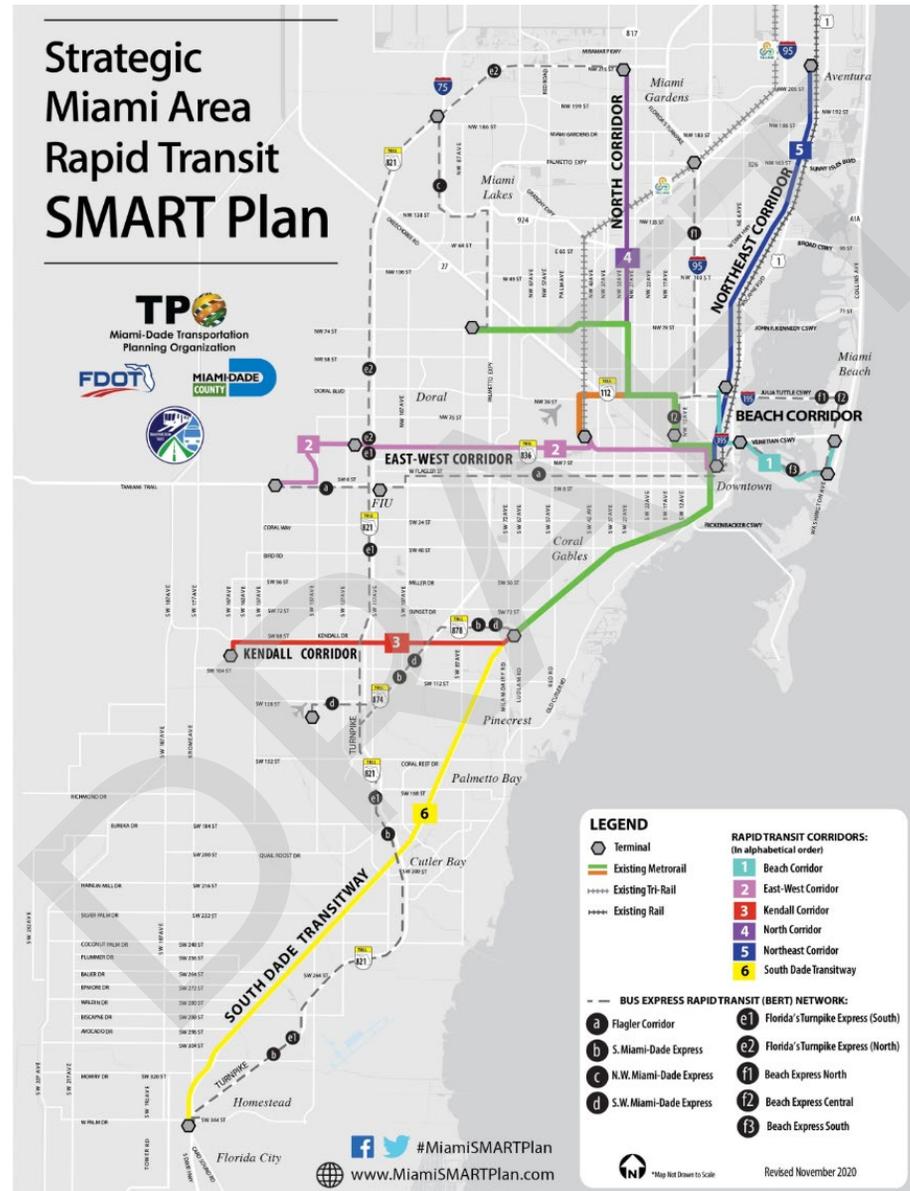

The FY 2023 Transportation Improvement Program includes funding over the next five years for the following projects:

ONGOING PROJECTS

URBAN CORRIDOR DEVELOPMENT

State Transit Corridor Program operation assistance funds will be used for the continuation of several successful South Miami-Dade Transitway routes, the Flagler MAX route, the Kendall Cruiser and various 95 Express routes.

SUMMARY HIGHLIGHTS OF SMART PLAN CORRIDORS

The Strategic Miami Area Rapid Transit (SMART) Plan will expand the existing fixed guideway system, comprised of a 25-mile Metrorail and downtown Metromover, with six rapid transit corridors that add over 70 miles of rapid transit network and link major local and regional activity centers. The SMART Plan is funded through a 40-year proforma which is pivotal for allowing projects to move forward in parallel.

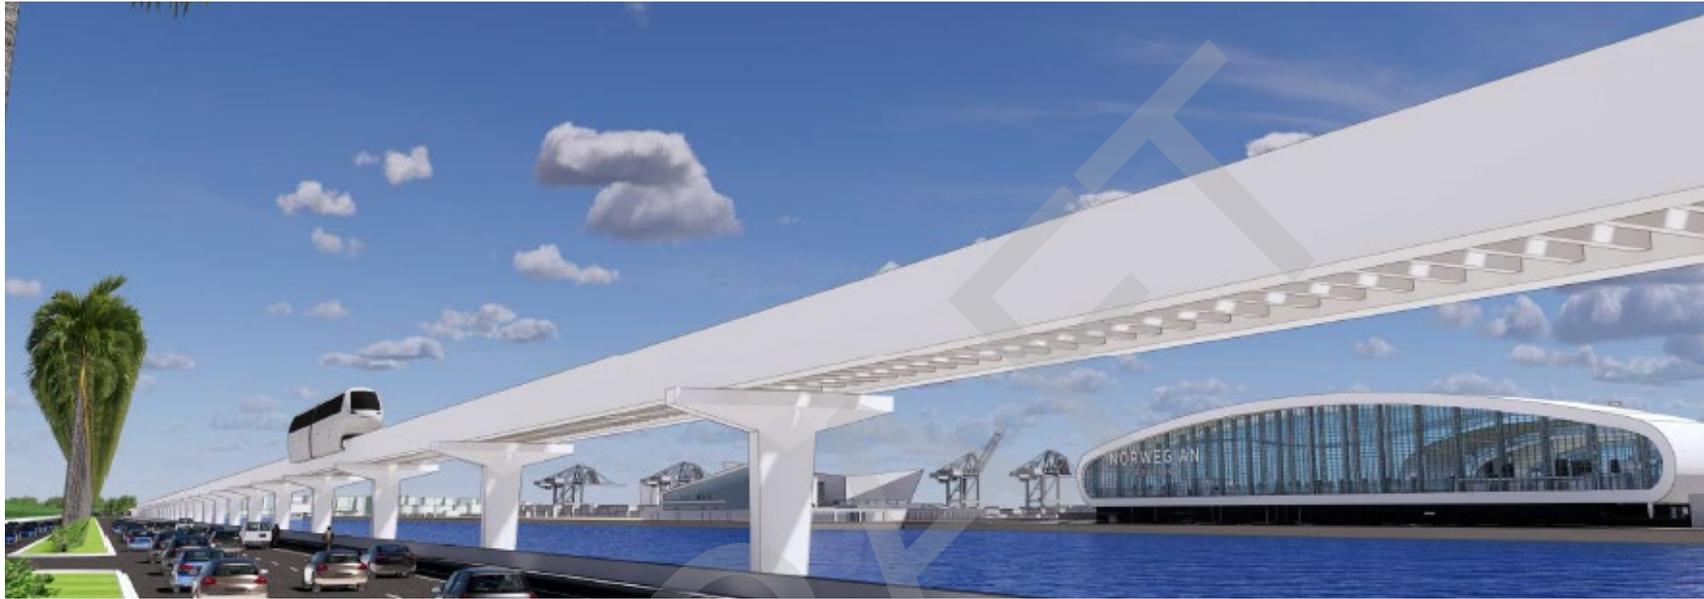

The SMART Plan represents a bold infrastructure program of projects that significantly improve transportation mobility, promote economic growth, and job creation, and increase region's international competitiveness. Below is a summary of the corridors.

BEACH CORRIDOR

The Beach corridor is being studied as part of the SMART Plan, which identifies the development of six rapid transit corridors that directly support the mobility of our future population and employment growth. The Beach Corridor project will serve the cities of Miami and Miami Beach along a 9.7-mile corridor, crossing Biscayne Bay to link Downtown Miami to Miami Beach. The Beach Corridor area is an epicenter for population and economic growth and a major employment center and tourist destination in the region. As a result, the roadways between Miami and Miami Beach are typically heavily congested. This high bus transit ridership corridor has been identified as a candidate for consideration for premium transit over the past two decades as part of a strategy to address east-west directional travel demands.

In May 2017, the Department of Transportation and Public Works (DTPW) initiated a Project Development & Environment (PD&E) Study to evaluate proposed transportation solutions between Downtown Miami and the City of Miami Beach via I-395 and I-195. In January 2020, the Miami-Dade Transportation Planning Organization (TPO) selected elevated automated rail transit for the trunk line, automated people mover for the Midtown/Design District and Bus/Trolley in dedicated lanes on Miami Beach as the locally preferred alternative (LPA), as recommended by the PD&E. In October 2020, the Board of County Commissioners (BCC) approved the contract award for the Interim Agreement (IA) for the Beach Corridor Trunk Line. The IA became effective on Oct 31, 2020. DTPW is currently working with the selected team to complete pre-development work and negotiation of the Project Agreement. The project received an Environmental Assessment (EA) as the National Environmental Policy Act (NEPA) Class of Action (COA) for

the Beach Corridor Trunkline from the United States Coast Guard (USCG) and is expecting to finalize the EA document in Summer 2022.

EAST-WEST CORRIDOR

The East-West Corridor project is being studied as part of the SMART Plan that directly supports the mobility of our County and its future growth. The East-West Corridor project will run approximately 14 miles from the Miami Intermodal Center (MIC) at the Miami International Airport (MIA), west along the SR-836/Dolphin Expressway, to the Tamiami Terminal Station at SW 8 Street and SW 147 Avenue. It provides multimodal solutions for severe traffic congestion along SR-836, the only east-west expressway in central Miami-Dade County. This project will also serve major activity centers including Miami International Airport, the Miami Intermodal Center (MIC), and Downtown Miami while transporting riders to and from major employment areas (Sweetwater, Doral, Health District, Central Business District, Brickell, etc.).

In April 2017, DTPW initiated a PD&E Study to evaluate proposed transportation solutions along the SR-836/Dolphin Expressway. On October 22, 2020, the TPO Governing Board selected the LPA as Bus Rapid Transit (BRT). The LPA

includes BRT routes operating within dedicated transit-only lanes, along SW 8th Street from the Tamiami Terminal to SW 137th Avenue and along SW 137th Avenue to the SR 836 Extension, and on the SR 836 Extension shoulders. Further east, the BRT routes would use dedicated lanes in the inside shoulders of SR 836, and along NW 7th Street to NW 62nd Avenue, on route to the MIC and Downtown Miami. The East-West BRT routes would be in addition to and complement the 836 Express Services which already began operating in the Corridor in early 2020. In August 2021, the County submitted to the Federal Transit Administration (FTA) a letter requesting entry into the Project Development (PD) phase under the FTA Capital Investment Grants (CIG) Small Starts program for the East-West Corridor Rapid Transit Phase 1 Project. The project was accepted into the PD phase by FTA on October 26, 2021. DTPW is currently working on the NEPA documents, development of 30% plans, and all activities required for the Small Starts Application.

DRAFT

EAST-WEST CORRIDOR TRANSIT-ORIENTED DEVELOPMENT (TOD) PROJECT

In June 2016, DTPW submitted a grant application, which was awarded by the FTA under the TOD Planning Pilot Program. This TOD planning study will develop a corridor-wide TOD plan and station area plans at selected station locations. This study is scheduled for completion in 2022.

KENDALL CORRIDOR

The Kendall Corridor project extends 10 miles from the Dadeland North Metrorail Station west along SR 94/Kendall Drive/SW 88th Street to approximately SW 162nd Avenue. This project provides multimodal solutions for severe traffic congestion along Kendall Drive, one of the most congested east-west arterial roadways in Miami-Dade County. The project facilitates the highest demand movement of passengers to and from West Kendall to Downtown Miami.

In 2016, the Florida Department of Transportation (FDOT), District Six, initiated a PD&E Study to evaluate proposed transportation solutions for Kendall Drive. The Kendall corridor is being studied as part of the SMART Plan. A project kick-off meeting was held in late 2016. In November 2019, Curbside BRT was identified as the recommended alternative for the Kendall corridor and was presented at the Public Workshops in December 2019. In February 2020, the TPO requested FDOT to further analyze the implementation of reversible lanes along the Kendall Corridor. Additional analysis on reversible lanes was completed in November 2020. Results of the reversible lanes analysis demonstrate that reversible lanes are not feasible on the Kendall Corridor.

Based on recent coordination with partner agencies, FDOT will be requesting to put a hold on the Kendall Corridor PD&E study to allow for the Flagler Demonstration Project (described under Flagler Corridor) to be implemented and monitored so that the data obtained from the Flagler Demonstration Project can be used to inform the Department's recommended alternative for the Kendall Corridor.

NORTH (NW 27TH AVENUE PREMIUM TRANSIT) CORRIDOR

A PD&E study was conducted to evaluate the implementation of a premium transit service Bus Rapid Transit (BRT), Heavy Rail Transit (Metrorail), and appropriate variation of Heavy Rail Transit Rail (At-Grade) along NW 27th Avenue from NW 215th Street (Countyline Road) to approximately NW 38th Street and from the Miami Intermodal Center (MIC) (at Miami International Airport) to NW 27th Avenue via SR 112 (Miami Airport Expressway). The study focused on the implementation of a premium transit service and infrastructure along SR 9/SR 817/NW 27th Avenue. The study also included public on-street transit stations/stops as well as public and/or private facilities located adjacent to or off-corridor where potential park-and-ride and/or transit terminals (including the Miami Dade College North Campus) were considered.

Three viable alternatives were developed and presented to the public. Each of the alternatives represents the three modes running within the existing roadway. BRT would operate in the curb lanes. Heavy rail whether at-grade or elevated would run over the centerline of the roadway. The study developed detailed engineering criteria and evaluated the environmental impacts that would result from implementation. Cost estimating, ridership forecasting, and traffic impacts were evaluated. On December 6, 2018, the TPO Governing Board adopted as the LPA an elevated fixed guideway transit system. Following this action, Miami-Dade County requested that FDOT evaluate three alternative technologies: 1.) Monorail; 2.) Automated People Mover; and 3.) Maglev.

In October 2019, the Miami-Dade TPO selected elevated heavy rail transit as the LPA for the North Corridor. On April 23, 2020, the TPO Governing Board accepted a report by DTPW on alternative transit technologies for NW 27th Avenue and directed DTPW to issue a request for proposals to identify whether transit technologies, other than heavy rail are viable for the corridor. FDOT has placed its North Corridor PD&E study on hold after consulting with the FTA until the outcome of the DTPW RFP process is known and a final decision on the transit technology and alignment for NW 27th Avenue is made by the TPO Governing Board.

NORTHEAST CORRIDOR

The Northeast Corridor project is roughly defined as U.S. Route 1 from the Downtown Miami area to the Aventura Mall near the Miami-Dade/Broward Countyline and is one of the busiest transit corridors in the region. It extends approximately 14 miles through the historic core of the County developed along the Florida East Coast (FEC) railroad and links Aventura, North Miami, North Miami Beach, and Miami Shores with the County's Central Business District located in Downtown Miami. Regional passenger rail service to the West Aventura Station is considered the first phase of the Northeast Corridor. In 2019, the County approved using PTP funds to design and construct the West Aventura Station. Brightline has committed to providing regional passenger rail service to the West Aventura Station by 2022. In June 2020, the County began its effort in advancing the implementation of the Northeast Corridor. In March 2021, the TPO Governing Board adopted commuter/passenger rail as the LPA for the Northeast Corridor. In August 2021, the County submitted to FTA a letter requesting entry into the Project Development (PD) phase under the FTA Capital Investment Grants (CIG) New Starts program for the Northeast Corridor Rapid Transit Project. The project was accepted into the PD phase by FTA on October 26, 2021. The commuter rail service plan is 30-minute peak headway and 60-minute off-peak headway for both directions during weekdays and 60-minute headway during weekends. DTPW is working on completing NEPA and all required activities for the PD phase and advancing into the Engineering phase of the New Starts program.

SOUTH CORRIDOR

The South Corridor Project will run approximately 20 miles from the Dadeland South Metrorail Station along the existing Transitway (formerly known as Busway) to the SW 344th Street Park-and-Ride/Transit Terminal Facility. It will connect Florida City, City of Homestead, Town of Cutler Bay, Village of Palmetto Bay, and Village of Pinecrest, which represent the fastest population growth in Miami-Dade County. This project facilitates the highest demand movement of passengers to and from southern Miami-Dade to Downtown Miami.

DTPW initiated a PD&E Study to evaluate premium transit solutions in this corridor in April 2017. The TPO Governing Board selected the LPA on August 30, 2018, as Bus Rapid Transit (BRT). The project was advertised on June 7, 2019, and Notice to Proceed (NTP) to the Design-Build Firm was issued on February 2, 2021. The estimated total project capital cost is \$300 million. Miami Dade County and FDOT have both committed \$100 million each to fund design and construction, while the project team successfully secured \$100 million from the FTA Small Starts Grant program. BRT is scheduled to begin operation by Winter 2023-24.

Once completed, BRT will provide rail-like travel time, iconic stations, level boarding through all doors, and pre-paid fares for speedy access. BRT will also provide enhanced safety features and other upgrades along dedicated lanes with multi-layered service lines on the Transitway.

BUS EXPRESS RAPID TRANSIT (BERT) NETWORK AND OTHER EXPRESS SERVICE

**Not all elements, shown for purpose of clarity.
- Rendering from Indicative Concept Plans.*

OVERALL STATUS UPDATE FOR SMART PLAN BERT NETWORK IMPLEMENTATION

Subsequent to the adoption of the SMART Plan, FDOT and DTPW staff started the planning activities for the implementation of Bus Express Rapid Transit (BERT) network. DTPW staff has begun assessing the cost-effectiveness of the BERT routes and the infrastructure needs such as new transit terminals, improvement to or expansion of existing terminals, and new direct roadway/ramp connections, etc., with close coordination between DTPW and other transportation agencies such as FDOT, Florida's Turnpike Enterprise (FTE) and Miami-Dade Expressway Authority (MDX) to ensure transit access to roadways are supported.

Among the BERT routes, some are further advanced than others. Service for Route c began in November 2019.

To advance the implementation of Route f1, DTPW partnered with the FDOT and implemented a pilot route, Route 241 "Tuttle Limited", in December 2021. The pilot service will be implemented for six months to test the Bus-on-Shoulder (BOS) operation using the outside shoulder of the Julia Tuttle Causeway/I-195 to bypass congestion. Other transit routes that operate along the Causeway are also allowed to use the shoulders. The BOS operation will be discontinued in October 2022, when the inside shoulder improvement project led by FDOT begins. Ultimately, Route f1 (Beach Express North) and other DTPW routes will be able to use the inside shoulder to bypass congestion.

FLAGLER CORRIDOR

A PD&E study is being conducted to evaluate the implementation of rapid transit along SR 968/Flagler Street. This study focuses on multimodal street improvements to accommodate rapid transit service along Flagler Street from SW/NW 107 Avenue to the Government Center with branches along SW 8 Street and NW 12 Street. Viable alternatives analyzed as part of this study include Bus Rapid Transit (BRT) along curbside lanes, BRT along curb lanes with a center reversible auto lane and BRT along the centerline of the roadway. In April 2019, the Curbside Business Access and Transit (BAT) Lanes alternative was identified as the recommended alternative for the Flagler corridor. FDOT has conducted a series of meetings with elected officials, stakeholders and communities along the corridor and presented the recommended alternative to the TPO Governing Board on July 18, 2019. A workshop with TPO Board members was held on January 30, 2020, where FDOT was directed to further analyze the implementation of reversible auto lanes along the Flagler corridor. FDOT conducted a study on the implementation of reversible auto lanes along segments of the corridor as a traffic mitigation measure. The additional analysis on reversible lanes was completed in January 2021 and the results of the analysis demonstrated that reversible lanes are not feasible in the Flagler Corridor.

On January 28, 2021, the TPO Governing Board adopted Resolution No. 07-2021 supporting FDOT's Alternative -1 Curbside Bus Rapid Transit Lanes with the exception that the PD&E study shall not consider the reduction of vehicular traffic lanes for any portion of Flagler Street west of 24 Avenue. Throughout 2021, the PD&E team developed a hybrid solution as directed by the TPO Governing Board that includes BAT lanes east of 24 Avenue and Corridor Bus Rapid Transit (BRT) improvements (without lane repurposing) along the remaining segments of the corridor.

Based on tri-agency collaboration, recent discussions with DTPW resulted in a recommendation for the implementation of a demonstration project to provide additional data for the continuation of the Tier 3 analysis. FDOT and DTPW, in consultation with staff from the Miami-Dade TPO, recommends placing the Flagler PD&E Study in abeyance while implementing a Flagler Street SMART Demonstration project along the corridor. The limits of the Flagler BERT Demonstration project would be from 27th Avenue to 6th Avenue along Flagler Street and from SW 27th Avenue to SW 6th Avenue along SW 1st Street (starting westward of the one-way pair). The demonstration project would consist of repurposing the outside lanes into BAT lanes and applying appropriate pavement markings including red surface treatments on the lanes. FDOT, in coordination with DTPW, will also incorporate signage to inform the public of the enhanced, dedicated bus infrastructure. The operation of the demonstration project would be monitored

over a one-year period, with the results and benefits evaluated. The data collected from the demonstration project will then be used to finalize and present the PD&E Tier 3 Recommended Alternative to the TPO Board for approval as the LPA.

FDOT anticipates presenting a joint agency recommendation to implement a demonstration project for BAT lanes on Flagler Street from 27th Avenue to 6th Avenue prior to continue advancing the PD&E study at the upcoming March 3rd TPO Governing Board Meeting. If approved, construction of the Flagler Street SMART Demonstration Project is anticipated to begin in 2023.

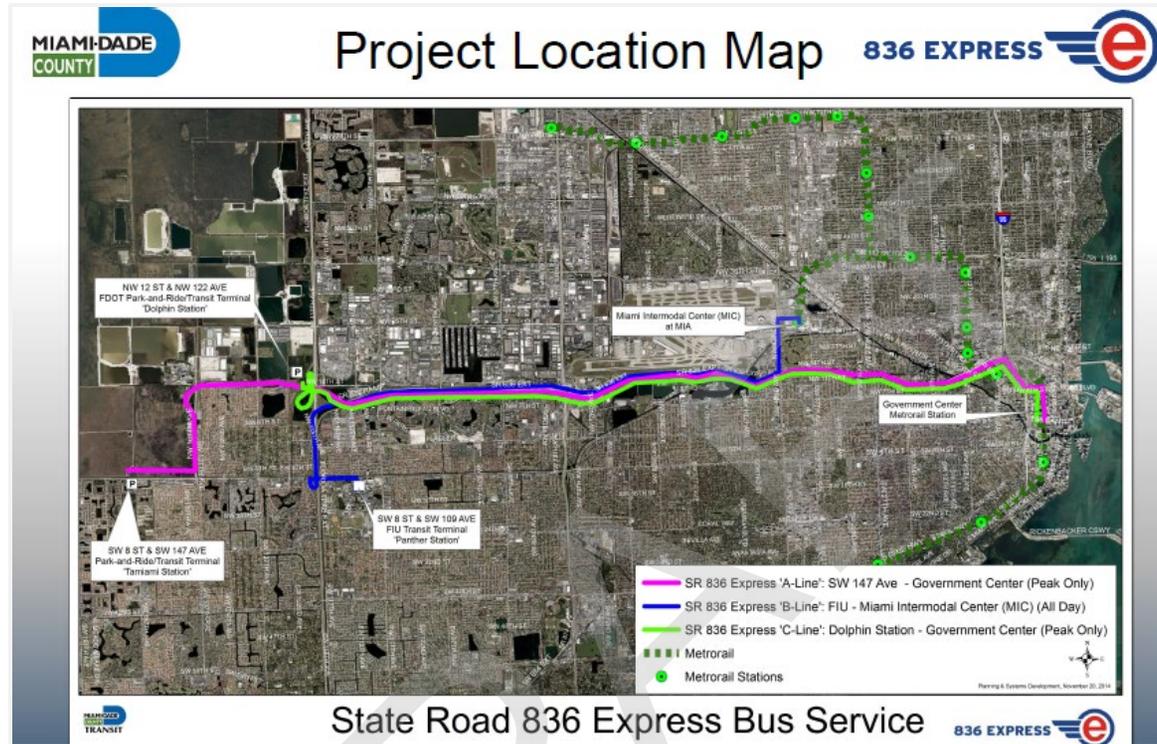

SR 836 EXPRESS BUS SERVICE

This project would provide premium express transit service along SR 836 from west Miami-Dade County Tamiami Station (SW 8th Street and SW 147th Avenue) to the Miami Intermodal Center (MIC) and Downtown Miami via SW 137th Avenue/SR 836 Extension as well as via the Homestead Extension of the Florida Turnpike (HEFT). This project will feature three routes:

The first route (Line A) will provide premium express transit service from the proposed Tamiami Station (park-and-ride/transit terminal facility located at SW 8th Street and SW 147th Avenue) to Downtown Miami via SW 8th Street, SW 137th Avenue and SR 836. Service headways will be 10 minutes during the AM/PM peak-hour. The planned long-term improvements for this route are anticipated to be completed in Spring 2022, the service will use 16 new 60-foot alternative fuel buses.

The second route (Line B) will provide premium express transit service from the proposed Panther Station at Florida International University's Modesto A. Maidique Campus (MMC) to the MIC via SW 8th Street, SR 821/HEFT and SR 836. This route will operate all day with 20-minute headways. The planned long-term improvements for this route are anticipated to be completed in 2024, the service will use 5 new 60-foot alternative fuel buses.

The third route (Line C) will provide premium express transit service from the proposed Dolphin Station (NW 12th Street and HEFT) to Downtown Miami via SR 836. The Dolphin Station was completed in 2019. This route began service in March 2020 after SR 836 inside shoulder for the use of bus operations were completed. Service headways was 10 minutes during the AM/PM peak-hour. It was suspended temporarily in 2020 due to the Covid-19 pandemic. It is now in operations again with less frequency.

NW 12TH ST BUS ONLY LANE

The project consists of widening and resurfacing of NW 12th Street from the Dolphin Park and Ride Facility to NW 114th Avenue. The project will increase capacity for existing left turn and right turn lanes as well as provide new left turn and right turn lanes along NW 12th Street. Exit ramps from the Florida Turnpike, and the right turn lane exit from the Dolphin Mall at NW 114th Ave will be improved. The project will also add new Bus Only lanes to service the new Dolphin Park and Ride facility. The project will include new storm drainage system, pavement markings and signage, intersection and signalization improvements, roadway lighting, permitting, culvert extension, and construction administration services. The project length is approximately 0.65 miles. The project is currently in the design phase (60% Plan). The 60% Plan phase is to be completed in February 2022.

OTHER DTPW PROJECTS – MULTI-USE TRAILS AND WATERBORNE TRANSPORTATION

THE UNDERLINE PHASE I - BRICKELL BACKYARD PROJECT

The future 10-mile Underline Corridor, running below the Metrorail from the Miami River to Dadeland South Metrorail Station, will create a linear mobility corridor that will enhance connectivity, increase mobility, and improve pedestrian and biking safety for residents and visitors. In 2015, Friends of The Underline selected a design consultant to develop the Vision and Master Plan for this project. Currently, the project is structured in three phases for development. The Underline Phase I is known as the Brickell Backyard and extends from the Miami River to SW 13th Street, approximately a ½ mile long. The off-road dedicated bicycle path is located along the Metrorail structure from the Miami River to SW 13th Street. This project was completed in the summer of 2021.

THE UNDERLINE PHASE II - HAMMOCK TRAIL

The future 10-mile Underline Corridor, running below the Metrorail from the Miami River to Dadeland South Station, will create a linear mobility corridor that will enhance connectivity, increase mobility, and improve pedestrian and biking safety for residents and visitors. Phase II is approximately 2.14 miles in length and extends the pedestrian and bicycle paths further south from SW 13th Street to SW 19th Avenue. This phase is under construction and should be completed by mid- 2023.

THE UNDERLINE PHASE III

This segment is the longest of all the Underline Phases. It extends 7.36 miles extending from SW 19th Avenue to Dadeland South Kiss and Ride Facility. The phase will traverse thru the Cities of Miami, Coral Gables, and South Miami and end at Unincorporated Miami-Dade County. The Design Criteria package was completed in 2021. The project is currently in the procurement phase and under the cone of silence. Final construction completion is expected by December 2025.

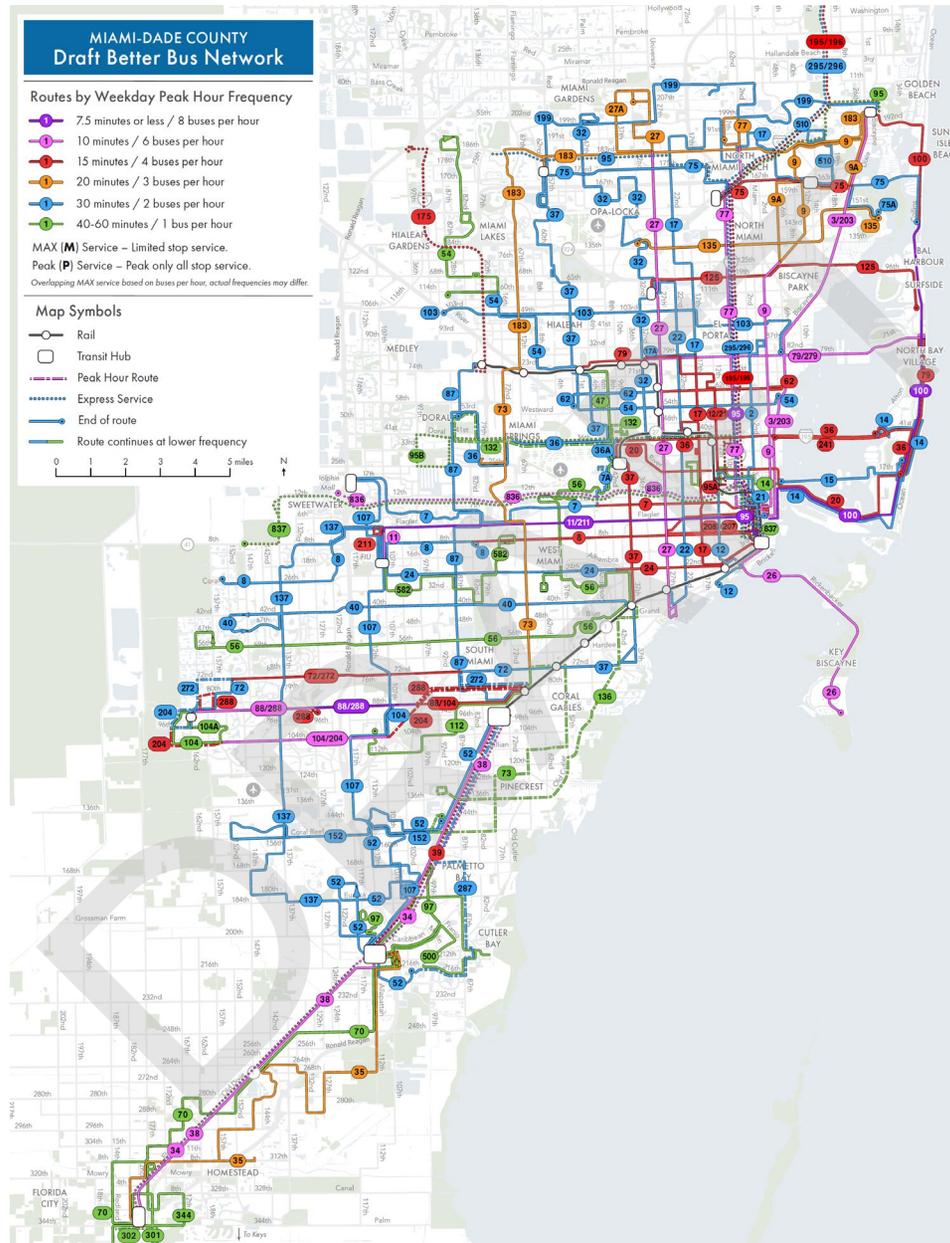

WATERBORNE TRANSPORTATION AS A COMMUTER SERVICE

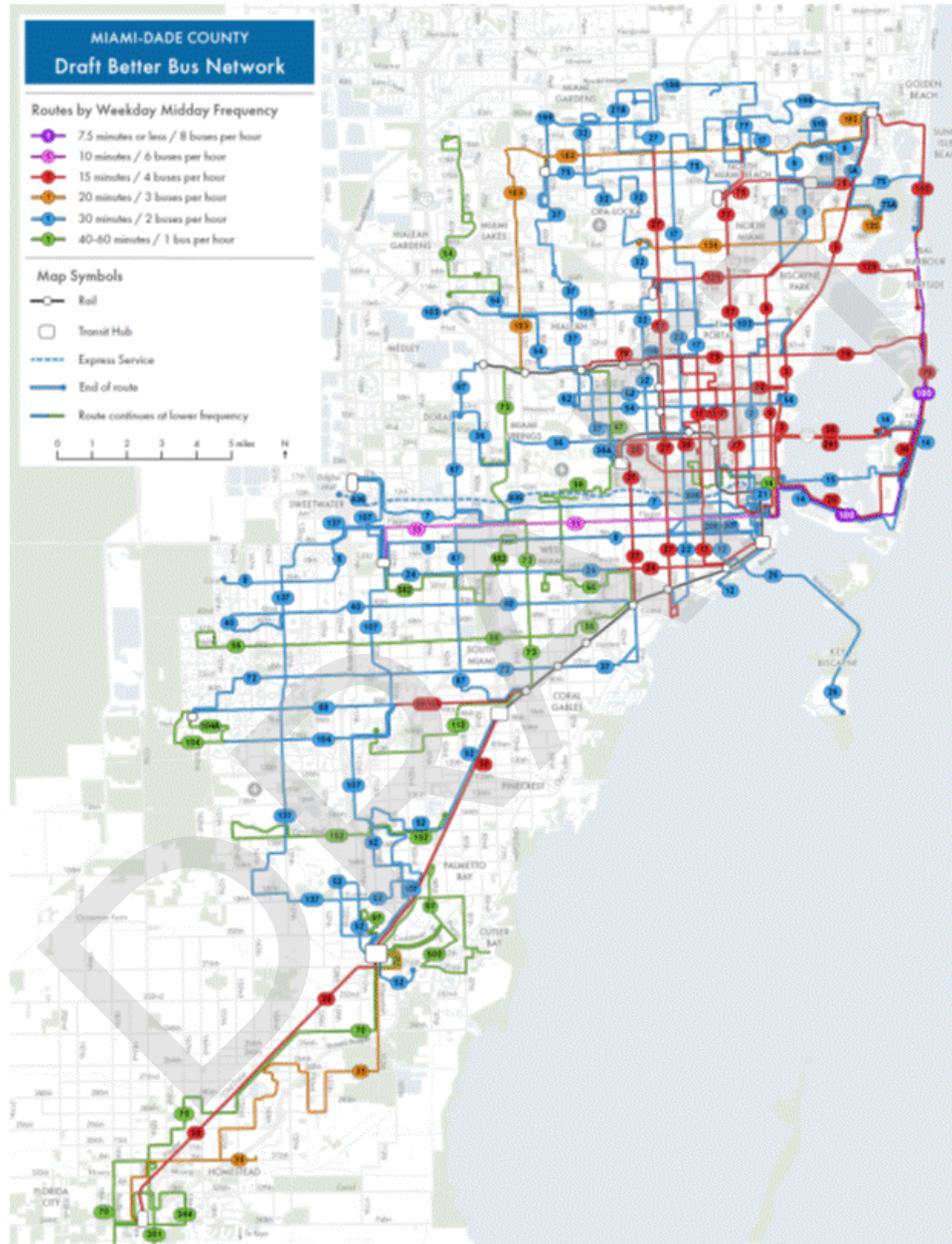

This initiative is another mobility solution that will assist in reducing traffic congestion along those municipalities near Biscayne Bay. For the last two years, DTPW has been working to determine the best approach for the deployment of these services. Earlier last year, a resolution by the Miami-Dade County Board of Commissioners authorized DTPW to negotiate on behalf of the County for an East-West route aimed at decongesting traffic between the Cities of Miami and Miami Beach, during the construction of I-395. A brand-new service started operations in November 2020 between the James L. Knight Center/Hyatt Regency in the Miami River (City of Miami) and the Bentley Bay Marina, directly North of I-395 (City of Miami Beach). This service is 100% private and is not receiving subsidies from governmental agencies. The new service will act as a commuter service between 6:00 am and 7:00 pm – Monday through Friday. During commuter service times, residents with a valid ID will be able to travel across the bay for a fare of \$3.00 one way. This fare is comparable with Metrobus fares at \$2.65. A second route is getting ready for deployment between the James L. Knight Center and Dinner Key Marina in Coconut Grove. The operator is currently working with the City of Miami.

OTHER DTPW PROJECTS – BUS NETWORK REDESIGN

BETTER BUS PROJECT

Miami-Dade County partnered with local public transportation advocacy group Transit Alliance to launch the Better Bus Project with the goal of designing a new bus network that will connect more people to more places. The Board of County Commissioners accepted the report presented in October 2020. A full revamping of the necessary routes was presented to the Board in 2021 and has been adopted by the Board.

OTHER DTPW PROJECTS – TERMINALS AND PARK & RIDES

AVENTURA STATION

In an effort to advance the implementation of the SMART Plan Northeast Corridor, Miami-Dade County Commissioners approved an agreement with Brightline Trains Florida, LLC (Formerly Virgin Trains USA Florida, LLC) to provide high-speed rail service between the Aventura Mall and the company's downtown train station. The County approved \$76.7 million toward the project, which will run high-speed trains every half hour during the morning and afternoon rush hours utilizing the FECR rail corridor. The County will own the land planned for the new Aventura Station, while Brightline will be responsible for all operation and maintenance costs. The Aventura Station project will include an 860-foot platform located inside the Florida East Coast Railway/Brightline right-of-way and the construction of a new pedestrian bridge over the railroad right-of-way and Biscayne Boulevard. The station also includes a Park-and-Ride facility with 240 parking spaces, a bus drop-off/pick-up for Miami-Dade Transit passengers, and newly landscaped and hardscape areas. The project also features a platform design that can accommodate Tri-Rail or other commuter trains in the future. Construction of the Aventura Station is expected to be completed by the Summer of 2022.

SW 8TH STREET AND SW 147TH AVENUE (TAMIAMI STATION)

An 8-acre vacant parcel of land on the Southwest corner of the intersection at SW 8th Street and SW 147th Avenue has been identified as a strategic park-and-ride/transit terminal facility for the SR 836 Express Bus Service project. The proposed facility will accommodate approximately 450 parking spaces, which would serve as the western most station for the new premium bus service in the corridor as well as other local bus routes. As of February 2022, construction completion/ready for revenue service is scheduled for Spring 2022.

PANTHERSTATION AT FLORIDA INTERNATIONAL UNIVERSITY

Florida International University (FIU) constructed a parking garage along SW 8th Street with ground floor space reserved for a future transit terminal. The location of the new parking garage, between SW 112th Avenue and SW 109th Avenue, presents an access challenge that requires roadway widening to construct bus-only lanes and traffic signal improvements to provide bus signal priority at the two intersections along this roadway segment. The new transit terminal would provide 8 bus bays. Five (5) of the eight (8) bays are to accommodate the relocation of the existing DTPW routes from the current bus terminal located near SW107th Avenue/SW 17th Street and provide capacity for future routes such as the SR-836 Express Bus, the Flagler Street Bus Rapid Transit (BRT) and express routes operating on the Homestead Extension of the Florida Turnpike (HEFT). The remaining three (3) bus bays will accommodate circulators/trolleys operated by FIU and adjacent municipalities. As of February 2022, construction completion and revenue service are scheduled for late 2024.

PARK-AND-RIDE/TRANSIT TERMINAL FACILITY AT SOUTH DADE TRANSITWAY (FORMERLY KNOWN AS BUSWAY) AND SW 112TH AVENUE

DTPW was leasing approximately 450 parking spaces on an existing surface lot located at approximately SW 112th Avenue and the South Miami-Dade Transitway to provide enhanced passenger amenities, bus terminals, and additional parking spaces. As of February 2021, the acquisition of the site has been completed.

DTPW will be conducting a rehabilitation of the Park-and-Ride to include milling and resurfacing, signing and pavement markings upgrades, lighting upgrades, sidewalk repairs, adding bicycle racks, improving ADA accessibility, improving, and adding wayfinding signage, and improving connectivity to the Bus Station. The improvements are scheduled for completion in the Summer of 2023.

PARK-AND-RIDE/TRANSIT TERMINAL FACILITY AT SOUTH DADE TRANSITWAY (FORMERLY KNOWN AS BUSWAY) AND SW 168TH STREET

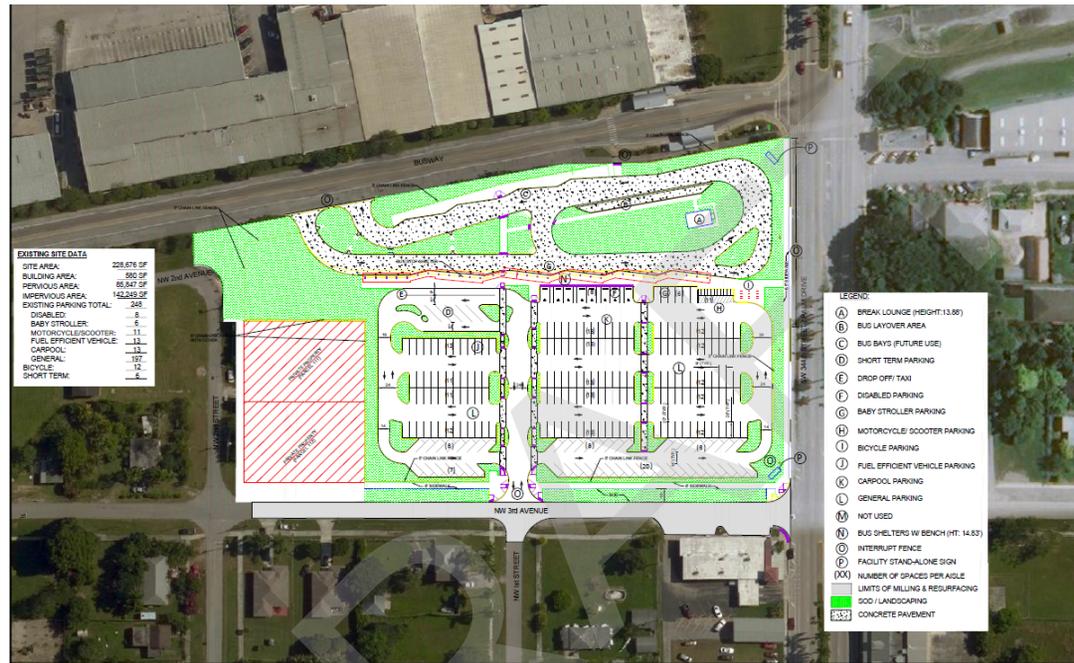

The existing surface parking lot is at 100% utilization. DTPW received the BUILD grant in 2018 to construct a modernized parking garage with enhanced amenities at this site. Due to the restriction at the SW 152nd Street park-and-ride, DTPW has worked with FTA to move the BUILD grant fund to the SW 168th Street park-and-ride and increase the capacity from the originally proposed 450 spaces capacity to over 630 spaces. In addition, the park-and-ride garage will provide direct access to the Transitway station at SW 168th Street. This project is part of the South Corridor project. The project is anticipated to be completed in Spring 2024.

PARK-AND-RIDE/TRANSIT TERMINAL FACILITY AT SOUTH DADE TRANSITWAY (FORMERLY KNOWN AS BUSWAY) AND SW 344TH STREET

The existing surface terminal facility of the Transitway is at South Dade Transitway and SW 344th Street. The County plans to acquire two additional parcels located on the north side of the existing terminal facility and add premium passenger amenities, such as restrooms, an enhanced kiss-and-ride area, and provide electric and veteran parking spaces. DPTW is acquiring two parcels in order to build the facility. DTPW has completed the acquisition and relocation phase as of January 2022.

OTHER DTPW PROJECTS – MAINTENANCE, MODERNIZATION AND SAFETY

DTPW ADDITIONAL ELEVATORS AT DADELAND NORTH METRORAIL STATION

Since its completion in 1984, the Dadeland North Metrorail Station's use has increased dramatically through the years. Because of increasing ridership at the Dadeland North Metrorail Station, the existing bank of elevators (four elevators) does not provide an acceptable level of service during peak hours. Peak passenger flows create congestion and long waiting periods for Metrorail passengers waiting for the elevators, generating complaints from existing customers. DTPW is adding two (2) elevators to the existing parking facility. The two (2) proposed (new) elevators will be built at the Northern end of the existing Parking Garage. DTPW is currently in the Design-Builder selection process for design-build services. As of February 2022, the estimated project is anticipated to be completed in late 2025.

METRORAIL NEW VEHICLE REPLACEMENT

The Miami-Dade Board of County Commissioners (BCC) and the Citizens' Independent Transportation Trust (CITT) in March 2008 approved the \$380 million procurement of 136 new rail vehicles for replacing the existing fleet. The new vehicles, which were manufactured at the Hitachi Manufacturing Facility in Medley, feature the latest technological advances which significantly improved passenger comfort, efficient maintenance and operations. The first vehicles were put into revenue service in November 2017. The entire Metrorail fleet of 136 train cars has been replaced with Hitachi rail cars now.

BUS NEW VEHICLE REPLACEMENT

DTPW continues to implement its bus replacement program. Funding for this program is provided through various sources including the PTP, FDOT and Federal funding sources. DTPW's bus fleet is continuously aging, therefore, an aggressive bus replacement plan is in place to ensure compliance with FTA's bus retirement criteria. After examining various alternative fuels, DTPW decided to migrate its bus fleet to clean-burning, compressed natural gas (CNG). The purchase of alternative fuel buses for replacements and enhancements is not only an improvement to transit, but also promotes the county's long-term initiative towards a state of good repair, economic competitiveness, livability, sustainability, safety, job creation, and economic stimulus.

In addition to CNG, DTPW will have received its first Proterra pilot 40-foot electric-powered, zero-emission bus on Aug 13, 2021. The remaining 74 Proterra electric buses will be delivered from July 2022 to January 2023. These vehicles will be the first of their kind in Miami-Dade County's Metrobus Fleet and complement the ongoing modernization of the fleet. DTPW will also purchase 65 articulated 60-foot Battery-Electric zero-emission buses. DTPW has an option to purchase up to an additional 35 articulated 60-foot Battery-Electric zero-emission buses. These articulated electric buses are currently under procurement and are slated to be in service between 2023 and 2024.

SOUTH DADE BUS MAINTENANCE FACILITY

With the implementation of the SMART plan, the County inventoried the availability of garages located within the south Miami-Dade area of the County for bus maintenance facilities and determined that the closest maintenance facility to the South Miami-Dade area is the Coral Way facility; which has reached its capacity and is approximately 30-miles away from the southern county line of Miami-Dade. A new facility in this area is necessary. This new maintenance facility will improve Transit's operational efficiency by decreasing the turnaround time for placing buses back in revenue service. As of February 2022, the site selection process is being finalized.

PARKING SPACE COUNTERS AT METRORAIL PARKING GARAGES

The purpose of this project is to furnish and install real-time parking space counting systems at five (5) parking garages located at Dadeland South, Dadeland North, South Miami, Earlington Heights and Okeechobee Metrorail Stations. The available parking space counting systems will allow Metrorail customers to check real-time parking availability over the Internet using personal electronic devices including Smart phones, Personal Digital Assistants (PDAs), Tablets, etc., and by Electronic Signs located at the entrances to each of the five (5) garages. The system shall display "Lot Full" when all spaces are occupied. In 2017, parking space counters were successfully installed at all five (5) parking garages. Since that time, the project has been extended. A new Parking Space Counter System will be installed at the Santa Clara and North Side Metrorail Stations under a new contract. This new project is slated to be completed by February 2022 and will provide similar functionality to the existing Parking Space Counter system.

ELECTRIC SIGNAGE AT METRORAIL AND METROMOVER STATIONS

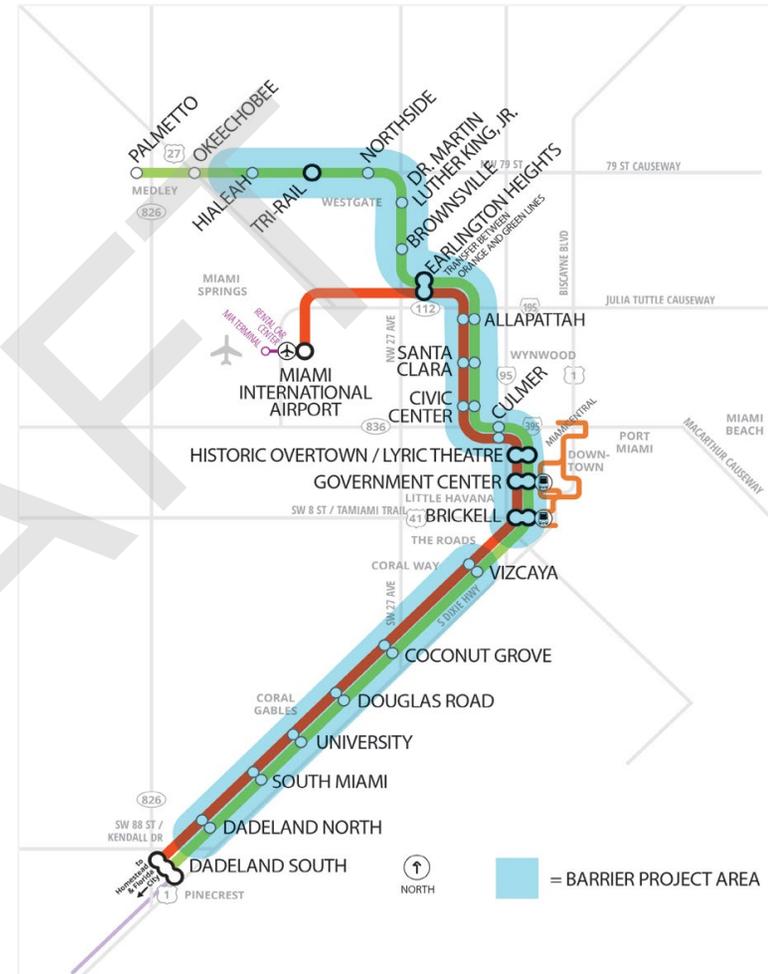

DTPW will add new electronic signage to Metromover and Metrorail stations. These signs will provide train arrival information and public service announcements to transit patrons on the platform levels in all Mover and Rail stations. This will occur beginning in Summer 2022.

METROMOVER WAYSIDE SYSTEM OVERHAUL

The Metromover began passenger service in April 1986. Throughout the Metromover's 35-year history, the system has expanded, and the vehicle fleet has been replaced, however, many major subsystems that makeup the system have not been replaced or refurbished and have now reached the end of their design life. These subsystems include the Automatic Train Control (ATC) System, Data Transmission System (DTS) with Supervisory Control and Data Acquisition (SCADA), several Power Distribution System (PDS) elements (e.g. low voltage breakers, protective relays, ground switches, etc.), guideway switch equipment and the Central Control equipment. To maintain good equipment reliability and an overall high Metromover System service availability, these major subsystems need to be replaced or refurbished. This project will include the design, supply manufacture, installation, testing and commissioning of the APM System into a fully functional, safe and reliable Metromover System. The project will also address reverse flow operations with switches that will help have an improved travel time for the Beach Corridor from Government Center. The project was awarded to Alstom (formerly Bombardier) and is currently in the design phase. Construction is scheduled to begin in the third quarter of 2022.

METRO RAIL ACOUSTICAL BARRIER REPLACEMENT

The Metrorail Acoustical Barrier Replacement Program consists of the installation of acoustical barriers with associated hardware along the Metrorail system where Type “B” concrete barriers have been removed. The new barriers are intended to abate sound/noise produced by passing trains, ultimately, avoiding its propagation to adjacent properties. In 2019, the Department of Transportation and Public Works (DTPW) launched a three-phase acoustical barrier replacement program. Currently, phases 1 and 2 have been complete. The first two phases of the program involved the removal of Type B barrier. On January 4, 2021, DTPW entered phase 3 of the program which entails the replacement of the acoustical barriers in the areas where the Type “B” panels were previously removed. Currently, the program is well underway as new acoustical barriers are being installed along the Metrorail system, except for the Airport and Palmetto extension as well as a half-mile area between the Brickell and Vizcaya Metrorail stations. To minimize service impacts, most of the work is taking place during overnight and weekend hours. The \$82 million program investment is due for completion in December 2022.

SAFETY AND SECURITY

DTPW has programmed funding to purchase security equipment to upgrade and install closed-circuit camera television (CCTV) systems and their respective software components, and to continue the replacement of fire detection and reporting systems. DTPW's commitment to the safety and security of the DTPW system, patrons, and employees is of the highest priority. In an effort to further complement its existing security infrastructure, DTPW continues to aggressively add state-of-the-art technology to both reduce crime and to aid law enforcement in proactively securing and safeguarding the transit system. FDOT Rule 14-15.017(2.2.1), however, prevents DTPW from disclosing these improvements/installations in greater detail.

DTPW will continue to enhance existing security equipment with the addition of 4K technology to the CCTV Systems in Metrorail and Metromover. The second phase of the CCTV project is slated to be complete by October 2021. Metromover will also have a new fire detection and reporting system installed in all Metromover stations and at the Stephen P. Clark Metromover Control Center. This new fire detection and reporting system are slated to be completed by January 2023.

POST-COVID 19 TRANSIT OPERATIONS

The COVID-19 crisis necessitated the rapid implementation of solutions to address safety, disinfection requirements, social distancing, and other needs as they arose. DTPW is working to develop strategies to attract riders back to the system. As the pandemic began, fares were suspended to allow for rear-door boarding, clear polycarbonate doors were added to the bus operators' compartments, all vehicles are disinfected several times a day and 120 supplemental vehicles were added to accommodate passengers with social distancing and improve frequencies on the most heavily traveled routes. Metrobus has incorporated the daily cleaning and sanitizing of every bus in service into as a standard operational procedure. As the pandemic started to ramp down in 2021, front door boarding restarted on Feb 15, 2021 and fare collection was reinstated on June 1, 2021. Supplemental routes were discontinued in phases. The last group was discontinued on Nov 29, 2021. As the pandemic has not ended, the DTPW continues to disinfect all vehicles. It is important to maintain improved frequencies and disinfecting practices into the future to ensure that the public feel safe returning to our system.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

PART 2: 5-YEAR PROJECT LISTING

SOUTH FLORIDA REGIONAL TRANSPORTATION AUTHORITY (SFRTA)

PORTMIAMI

Private Sector

TPO
Miami-Dade Transportation
Planning Organization

TIP • FISCAL YEARS 2022/2023 TO 2026/2027

SOUTH FLORIDA REGIONAL TRANSPORTATION AUTHORITY (SFRTA)

The South Florida Regional Transportation Authority's (SFRTA) mission is to provide greater mobility in South Florida, thus improving the economic viability and the quality of the Community, Region and State. SFRTA operates the Tri-Rail Commuter Rail System. SFRTA, per its legislation, is charged with the responsibility of having the overall authority to coordinate, develop and operate a regional transportation system within the area served. The following projects are included in SFRTA's Capital Budget and Five-Year Plan in Fiscal Year 2023 thru 2027.

THE TRI-RAIL DOWNTOWN MIAMI LINK (TRDML)

The SFRTA, in coordination with multiple partners, is extending Tri-Rail's commuter rail service to provide new direct service from Tri-Rail's northern most station at Mangonia Park in Palm Beach County to its southern most station in Miami Dade County at the "MiamiCentral Station" in Downtown Miami. The 9.05-mile extension, known as Tri-Rail Downtown Miami Link (TRDML), will provide a new one-seat ride passenger service link from the South Florida Rail Corridor (SFRC) at Tri-Rail Metrorail Transfer Station to the Florida East Coast (FEC) railway corridor, into Downtown Miami. TRDML service is expected to begin in late 2022, with first day ridership estimates of approximately 2,000 trips per day. The MiamiCentral Station will serve as Downtown Miami's multimodal hub, providing connections to Brightline, Tri-Rail, the existing Miami Dade county bus system, Metrorail, and Metromover.

TRDML will provide a cost effective and strategic transit solution for Miami-Dade County. The new service will leverage Brightline express train service and station investment, together with the recent SFRC connections to the FEC railway corridor; quiet zone funds provided by the Miami-Dade Transportation Planning Organization (TPO); and the region's previous investment in the Tri-Rail system. The key to this leveraging is a local investment of \$70 million for incremental construction costs by the public partners for the MiamiCentral Station, to accommodate Tri-Rail trains and new rail infrastructure to support the extension into Downtown Miami.

ROLLING STOCK

Procurement of new Tri-Rail Rolling stock will enable SFRTA to both maintain and provide additional passenger service operations on the existing South Florida Rail Corridor (SFRC). New rolling stock will also allow for increased ridership capacity, operational and train scheduling flexibility and for future service expansion onto the Florida East Coast Railway (FEC).

TRI-RAIL REAL-TIME PASSENGER INFORMATION SYSTEM (RTPIS), INCLUDING SMART PHONE APPLICATION

SFRTA 's RTPIS will provide train locations and predicted arrival times at each station via the internet, smartphone app, telephone, text message, and LCD displays location on the station platforms. The system will include onboard signage and an audio system on train cars to display and announce next station arrival and destination information. The train-tracking component is expected to be available via internet and smartphone app.

SAFETY AND SECURITY CAMERAS, PHASE 2

The purpose of the proposed project is to fund installation of surveillance camera hardware and monitoring technology at all Tri-Rail Stations. Cameras will be installed in parking lots, stairwells, pedestrian walkways and bridges, and locations within stations that require safety monitoring. The Phase 1 project currently underway focused on installing surveillance cameras on Tri-Rail station platforms.

These cameras and technology allow the SFRTA Public Safety Coordination Center (PSCC) to monitor/detect suspicious and/or unlawful activities in real time for quick detection and response. Activities are recorded for reference, training, system improvement, and/or as video evidence when further law enforcement is needed.

MIAMI RIVER-MIAMI INTERMODAL CENTER CAPACITY IMPROVEMENT

The MR-MICCI Project will provide an additional mainline track within the South Florida Rail Corridor from just north of the Tri-Rail Hialeah Market Station to the Tri-Rail Miami Airport Station within the Miami Intermodal Center. The project will increase capacity and improved track connections across the Miami River, including bridge, track, and signal upgrades. SFRTA has finalized the Project Development and Environment (PD&E) Study and completed 30% design for this project. The final design and construction will be completed by the Florida Department of Transportation, District Four.

PLANNING AND CAPITAL DEVELOPMENT

SFRTA's short- and long-term planning efforts and activities conducted by the Planning Department are included in this line item. This item facilitates the performance of planning and capital development studies such as the major update of the Transit Development Plan (TDP), Transit Oriented Development (TOD) station area plans, Bicycle and Pedestrian Studies and Passenger Surveys, along with other significant regional projects.

PROGRAM OF PROJECTS

SFRTA receives annual Federal Appropriations Sections 5307 and 5337 funding from the Federal Transit Administration (FTA). This funding is programmed in SFRTA's Capital Budget to include preventive maintenance expenditures such as rolling stock maintenance and station maintenance; along with other capital projects and initiatives that the Agency plans to undertake, which are allowable expenditures of funds under FTA guidelines.

DRAFT

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)
PART 2: 5-YEAR PROJECT LISTING
NON-MOTORIZED COMPONENT

TIP • FISCAL YEARS 2022/2023 TO 2026/2027
NON-MOTORIZED COMPONENT

The development of safe facilities for people who walk or use a bicycle is guided by the Comprehensive Development Master Plan (CDMP) and the 2045 Long Range Transportation Plan (LRTP).

CDMP Transportation Element Objective TE-2 states: "In furtherance of pedestrianism and other non-motorized modes of transportation in the planned urban area, Miami-Dade County shall enhance its transportation plans, programs and development regulations as necessary to accommodate the safe and convenient movement of pedestrians, non-motorized vehicles and motorized vehicles."

The 2045 LRTP lists the following goals and objectives, related to non-motorized projects/programs:

LRTP GOAL 1: MAXIMIZE MOBILITY CHOICES SYSTEMWIDE

- Objective: Provide a comprehensive transportation network for dependable and reliable transportation options.
- Objective: Increase mobility choices throughout the county

LRTP GOAL 2: INCREASE THE SAFETY OF THE TRANSPORTATION SYSTEM FOR ALL USERS

- Objective: Improve the safety of the transportation system
- Objective: Promote projects in high crash locations – (locations with the highest number of crashes)
- Objective: Improve safety of the transportation system for the elderly and disabled

Bicycle and pedestrian projects in the 2023 Transportation Improvement Program are taken from the non-motorized section of the 2045 LRTP, the Transportation Alternatives Program application cycle and through agency coordination for other transportation projects. Projects are presented to the Miami-Dade Bicycle Pedestrian Advisory Committee (BPAC) for public information and comment.

The Miami-Dade 2045 Bicycle Pedestrian Master Plan assesses opportunities amongst the SMART Plan transit hubs and stations to expand the reach of bicycle and pedestrian trip distances to the entire county, with the help of transit connections. This plan's primary focus is on the daily commuter trip and aims to incentivize projects that safely connect the largest number of people, that need it the most, to the most places, on a daily basis. This plan also looks at other pedestrian and bicycle trip destinations such as educational facilities, major medical centers, high employment areas, and outdoor recreational locations. Realizing these opportunities will help manage the ever-present issue of traffic any metropolitan area deals with and further encourages healthy and sustainable communities within the County. This plan serves as the Bicycle and Pedestrian element of the 2045 Long Range Transportation Plan (LRTP).

More information on the TPO's Bicycle Pedestrian Program is available from the TPO website at:

<http://miamidadetpo.org/bicycle-pedestrian-program.asp>.

DRAFT

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)
PART 2: 5-YEAR PROJECT LISTING
INTELLIGENT TRANSPORTATION SYSTEMS (ITS)

TIP • FISCAL YEARS 2022/2023 TO 2026/2027

INTELLIGENT TRANSPORTATION SYSTEMS (ITS)

An Intelligent Transportation Systems (ITS) is a combination of leading-edge applications and communication technologies used to improve transportation safety, efficiency, and sustainability of surface transportation system. ITS technologies enable the users to be better informed and make smarter use of the network in our region. ITS encompasses a broad range of advanced and traditional communications-based information and electronic technologies to:

- Improve safety by increasing information to the driver and augmenting driver control of the vehicle. Features include warning systems that activate when cars get too close to another vehicle or the edge of the road and enhanced traffic control systems that decrease stops and speed variations, reducing the number of crashes.
- Reduce congestion and improve accessibility through rapid detection and clearing of incidents that cause delays; enhanced public transit systems can reduce highway traffic; and real-time traffic control systems can adapt automatically to changing conditions and improve the flow of traffic.
- Improve energy efficiency and environmental quality by providing travelers with information to support decisions that can reduce highway demand and travel time and vehicle emissions by providing mobility options to use high occupancy vehicles or public transit or on demand services to mitigate congestion.
- Enhance economic productivity by improving the transportation system efficiency through better routing of vehicles, automated toll collection, safety enhancements and streamlining commercial vehicle regulatory enforcement and compliance.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)
PART 2: 5-YEAR PROJECT LISTING
TRANSPORTATION DISADVANTAGED SECTION (ADA)

TIP • FISCAL YEARS 2022/2023 TO 2026/2027

TRANSPORTATION DISADVANTAGED SECTION (ADA)

Section 427.015, Florida Statutes, requires that the Metropolitan Planning Organization, as part of its Transportation Improvement Program "shall... identify transportation improvements that will be advanced with [transportation disabled] funds during the program period." This requirement is reiterated in section 3(f)2.g of the Florida Department of Transportation directive 525-010-012-c ("Transportation Improvement Program Development and Review"). The purpose of this section is to meet these requirements, and to reference, in a user-friendly format, transportation improvements to assist the safe and efficient transport of those citizens who need special services and facilities to obtain access to life-sustaining activities.

EXPLANATION

The projects listed in this section do show funding amounts but no construction schedules. This is because the same projects are also listed in other sections of this document grouping projects by funding category. The items listed are referenced by the page number in which they appear in other TIP sections.

In addition, this section includes pedestrian facilities and sidewalks and some transit passenger amenities which, once completed, could enhance and facilitate usage by not only disadvantaged passengers but the public in general. This section does not include relevant improvements associated with larger transportation projects. Examples would include curb cuts and tactile surface treatments added onto sidewalks as part of an intersection widening and reconstruction, or wheelchair ramps and elevators included within the design of major facilities, as required by the 1991 Americans with Disabilities Act.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)
PART 2: 5-YEAR PROJECT LISTING
CONGESTION MANAGEMENT PROCESS

TIP • FISCAL YEARS 2022/2023 TO 2026/2027
CONGESTION MANAGEMENT PROCESS

Congestion Management is an integral part of the planning process, and the Congestion Management Process (CMP) is required to be developed and implemented pursuant to Title 23 U.S. Code 134 – Metropolitan Transportation Planning in Transportation Management Areas (TMAs). The congestion management process in Miami-Dade is being developed cooperatively with FDOT and is being implemented on a Countywide basis. The application of CMP strategies will improve transportation system performance and reliability by reducing the adverse impacts of congestion on the movement of people and goods through demand reduction and operational improvements.

The FAST Act retained the requirement for a congestion management process for MPOs that serve a Transportation Management Area (TMA), the law also allows an MPO that serves a TMA to develop a congestion management plan (distinct from the congestion management process) that will be considered in the MPO's transportation improvement program. The Miami-Dade 2045 LRTP, adopted September 2019, included such Congestion Management Plan. The plan identifies proposed projects and programs to reduce congestion and increase job access opportunities.

The Miami-Dade County 2019 Congestion Management Plan Update improved upon the 2014 Miami-Dade Congestion Management Process. The CMP was developed based on the 8-step process outlined in the FHWA CMP Guidebook. CMP objectives were drawn from the Miami-Dade County's 2045 Long Range Transportation Plan (LRTP) goals and objectives and serve as one of the primary points of connection between the CMP and LRTP and define the direction for development of CMP Performance Measures. Similar to the 2014 CMP update process, transit, freight, and non-motorized modes are evaluated through the 2045 LRTP update process as a separate effort, thus are not included in the CMP update process. To avoid duplication with significant transportation investments committed to by the TPO, the CMP list eliminated congested locations which coincided with the cost feasible plan (CFP) projects or with SMART

Plan Corridors including the BERT network. The observed congestion at these locations were assumed to be addressed by the cost feasible plan and Smart Plan investments.

The project list which follows is based on the adopted 2045 LRTP which incorporated the 2019 Congestion Management Process Update. The process and projects are further detailed on pages 7-126 through 7-133 of the 2045 LRTP document.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)
PART 2: 5-YEAR PROJECT LISTING
FREIGHT RELATED TRANSPORTATION IMPROVEMENTS

TIP • FISCAL YEARS 2022/2023 TO 2026/2027

FREIGHT RELATED TRANSPORTATION IMPROVEMENTS

On November 15, 2021, President Biden signed into law the \$1.2 trillion Infrastructure Investment and Jobs Act (IIJA), a bipartisan bill committed to a five-year plan over fiscal years 2022 through 2026 that will impact every aspect of the nation's transportation system. In brief, it will finance the rebuilding and rehabilitation of thousands of decaying bridges, tens of thousands of miles of roadway, improvements in railroad infrastructure in addition to increasing the capacity and resilience of the nation's airports, seaports and waterways. The IIJA funding represents an increase of \$273.9 billion over the Fixing America's Surface Transportation (FAST) Act baseline.

SIGNIFICANT FREIGHT PROVISIONS

The IIJA includes a number of provisions to improve the condition and performance of the national freight network and support investment in freight-related surface transportation projects. Specifically, the Freight Provisions over the next five years (along with the funding amounts) are as follows:

- **Office of Multimodal Freight Infrastructure and Policy:** USDOT will establish a Freight Office led by an Assistant Secretary for Multimodal Freight. The Office will oversee national and state freight planning and policy as well as implement and administer multimodal freight grant programs
- **INFRA Grant Program – Nationally Significant Freight and Highway Projects:** Freight-specific competitive grant program with broad applicant eligibility that provides funding for large highway and bridge projects, as well as port, rail, intermodal, and rail-highway at-grade crossing and grade separation projects. A maximum of 30 percent of annual INFRA funding may go toward non-highway freight projects (\$8 billion).

- **Freight Formula Program – National Highway Freight Program:** Freight-specific formula program for statewide projects. A maximum of 30 percent of annual freight formula funding may go toward non-highway freight projects (\$7.15 billion).
- **National Infrastructure Project Assistance Program:** Fully multimodal competitive grant program available to a wide variety of large transportation infrastructure projects. 50 percent of funding will go toward projects that have a total cost of at least \$500 million and 50 percent will be set aside for projects with a total cost between \$100-\$500 million (\$5 billion).
- **TIGER/BUILD/RAISE Grant Program – Local and Regional Project Assistance:** Codifies the TIGER/BUILD/RAISE grant program, previously subject to annual appropriations, into reauthorization law for the first time. The program is fully multimodal and open to a broad range of eligible transportation projects (\$7.5 billion).
- **Railroad Crossing Elimination Program:** Discretionary grant program for highway-rail or pathway-rail grade crossing improvement projects, including: grade separations or closures; track relocations; installation of related protective devices, signals or signs; and related planning or environmental reviews (\$3 billion).
- **Consolidated Rail Infrastructure and Safety Improvements Program:** Discretionary grant program for passenger and freight rail safety, efficiency, and reliability improvement projects. Eligible projects include: the deployment of railroad safety technology (including positive train control); capital rail projects to address congestion and safety challenges affecting rail service; highway-rail grade crossing improvement projects; projects to improve short-line or regional railroad infrastructure; and projects to enhance multimodal connections or facilitate service integration between rail service and other modes (\$5 billion).
- **Port Infrastructure Development Program:** Multi-year direct appropriations for the PIDP grant program, which provides grants to improve facilities, operations, and intermodal connections near or within seaports, inland ports, and Great Lakes ports. This program is typically subject to annual appropriations. While it still remains separate from surface transportation reauthorizations within the IIJA, this provision ensures consistent funding for the PIDP program over the next five years (\$2.25 billion).
- **Bridge Program – Formula:** Creates a bridge replacement, rehabilitation, preservation, protection, and construction program. Funding is distributed by formula based on a state's share of bridges in "poor" and "fair" condition (\$27.5 billion).
- **Bridge Investment Program – Discretionary:** Establishes a competitive grant program for projects to replace, rehabilitate, preserve, or protect bridges on the National Bridge Inventory (\$12.5 billion).

The Florida Strategic Intermodal System (SIS) program also has freight-emphasis. The SIS was established to ensure that transportation dollars were invested in areas that supported the local economic generators such as the seaport and the airport and the roadway facilities that connect them. The 2045 Miami-Dade Long Range Transportation Plan (LRTP) Update embraced freight movement with the inclusion of a freight element that includes projects that focus on improving freight movement along major corridors, and specifically, in to and out of Miami International Airport (MIA) and Port Miami. Miami-Dade County is committed to providing a transportation system that enhances the efficiency of freight movement. .

The Freight Transportation Advisory Committee (FTAC), that includes representatives from the freight, logistics, warehousing and intermodal industries in addition to consultants and a municipality (Town of Medley) is the industry's advisory panel to the TPO Governing Board on freight movement and truck traffic needs. Aside from advising the TPO, the FTAC considers the types of improvements that should be made with regard to safety and freight efficiency in the county including:

- Improving the turning radii for trucks
- Enhancing access to freight trucks
- Increasing capacity through select road widening projects
- Determining logistics for truck parking/staging
- Modifying access to both seaport cargo and cruise operations in the Port of Miami
- Promoting regular communication among freight businesses, elected officials, and appointed officials

MIAMI-DADE COUNTY FREIGHT PLAN

The county is home to a well-established and expanding freight transportation system. This system serves as the cornerstone of the region's economy, providing goods and services to Florida's largest consumption market as well as connecting the region to the global economy through major sea and air gateways, taking into account emerging and future technologies. The Freight Plan was recently updated in June 2018.

PLANNED FREIGHT-RELATED TRANSPORTATION IMPROVEMENTS

Taking advantage of existing freight provisions, multiple freight-related projects have been planned to prepare Miami-Dade County for the future. For starters, a network of Connected and Autonomous Vehicles (CAV) corridors is planned to modernize the county's freight infrastructure. Starting with SR 821/Homestead Extension of the Florida's Turnpike (HEFT) from SR 836/Dolphin Expressway to NW 106th Street, and followed by SR 826/Palmetto Expressway to/from SR 836/Dolphin Expressway to US 27/SR 25/Okeechobee Road, CAV technology will be researched, tested, and implemented on dedicated lanes. Moreover, the county is in the process of developing its first full-service truck travel center at the Golden Glades Interchange, known as the The GGTTTC will be the only full-service truck parking facility in Miami-Dade County and is located approximately 22-miles south from the nearest comparable facility for truckers travelling to PortMiami. The GGTTTC will inform truckers on the highway of parking availability through an intelligent network of digital signs called Truck Parking Availability System (TPAS).

With trucks moving more than 75% of the county's annual freight tonnage, traffic operation and signal improvements are planned for SR 969/NW 72nd Avenue/Milam Dairy Road at SR 934/SW 74th Street/Hialeah Expressway and US 27/SR 25/Okeechobee Road from SR 821/HEFT to NW 74th Street. Aside from these projects, other large improvements are ongoing or have been planned such as SR 924/Gratigny Expressway west extension, new SR 821/HEFT interchanges at NW 170th Street and I-75, new direct ramps at SR 821/HEFT and NW 12th Street, new direct ramps at SR 948/NW 36th Street and US 27/SR 25/Okeechobee Road, and capacity improvements along US 27/SR 25/Okeechobee Road, I-395/SR 836/Dolphin Expressway and at the Golden Glades Interchange. The TPO, along with FDOT District 6, annual submits freight related projects to the MPOAC Freight Priorities Program in an effort to obtain and advance additional funding for locally significant freight projects.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)
PART 2: 5-YEAR PROJECT LISTING
REGIONALLY SIGNIFICANT TRANSPORTATION IMPROVEMENTS

TIP • FISCAL YEARS 2022/2023 TO 2026/2027
**REGIONALLY SIGNIFICANT
TRANSPORTATION IMPROVEMENTS**

The Southeast Florida region comprised of Palm Beach, Broward, and Miami-Dade Counties has a 2020 population of over 6.1 million, as of April 1, 2020. Miami-Dade County's 2020 total population is 2.7 million.

Hundreds of facilities make up our region's transportation network; facilities that carry freight, auto, and transit traffic. To develop this network, the region critically looked at the intended uses and functionalities of the existing and future facilities to determine what is regional.

This assessment considered technical components as well as the Long Range Transportation Plan's goals and objectives to ensure compatibility and consistency. Ultimately, four criteria were utilized to guide the regional corridor network development: covering roadway, rail and hub. The four criteria definitions and sources are described in detail below.

PRINCIPAL ARTERIALS

Definition: Interstate, Freeway/Expressway and all other Principal Arterials

Source: Draft 2010 Functional Classification for FDOT Districts 4 and 6, May 9, 2013

PLANNED PHYSICAL EXTENSIONS OF PRINCIPAL ARTERIALS

Definition: Interstate, Freeway/Expressway and all other Principal Arterials that are in the adopted LRTP Cost Feasible Plans for future expansion

Source: 2045 LRTP Cost Feasible Plan for Broward, Miami-Dade and Palm Beach County MPOs

STRATEGIC INTERMODAL SYSTEM (SIS) NETWORK

Definition: SIS and Emerging SIS Corridors, Hubs, Connectors, Railways and Waterways

Source: FDOT Central Office SIS facilities, April 2013

PRINCIPAL ARTERIAL CONNECTIONS

Definition: (1) Minor Arterials connecting to Freeways/Expressways, and/or SIS Corridors; (2) extensions of Principal Arterials that cross the intercostal for evacuation purposes; (3) key connections of “gaps” in the network; (4) Non-principal Arterials carrying 50,000 AADT or greater; and (5) extensions of facilities carrying 50,000 AADT or greater to complete a regional network connection.

Source: Draft 2010 Functional Classification for FDOT Districts 4 and 6, May 9, 2013; FDOT Central Office SIS facilities, April 2013; and Adopted Countywide Evacuation Routes – Broward, Miami-Dade and Palm Beach County.

The following project list reflects regional projects of major significance based upon:

- A. Within the regional network
- B. Capacity projects identified for construction phases
- C. Over \$5,000,000 total construction allocations
