TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

Approved June 2023

TIP • FISCAL YEARS 2023/2024 TO 2027/2028

2024–2028 TIP Transportation Planning Organization for the Miami Urbanized Areas

This document was prepared by the Transportation Planning Organization for the Miami Urbanized Area in collaboration with the Florida Department of Transportation; the Expressway Authority; Florida's Turnpike Enterprise; South Florida Regional Transportation Authority; Miami-Dade County Office of Strategic Business Management; Miami-Dade Department of Transportation and Public Works, Miami-Dade County Aviation Department; Miami-Dade Seaport Department; Miami-Dade League of Cities; Miami-Dade County Department of Regulatory and Economic Resources; and the Miami-Dade County Developmental Impact Committee.

The Miami-Dade TPO complies with the provisions of Title VI of the Civil Rights Act of 1964, which states: No person in the United States shall, on grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving federal financial assistance. It is also the policy of the Miami-Dade TPO to comply with all of the requirements of the Americans with Disabilities Act. For materials in accessible format please call (305) 375-4507.

The preparation of this report has been financed in part from the U.S. Department of Transportation (USDOT) through the Federal Highway Administration (FHWA) and/or the Federal Transit Administration (FTA), the State Planning and Research Program (Section 505 of Title 23, U.S. Code) and Miami-Dade County, Florida. The contents of this report do not necessarily reflect the official views or policy of the U.S. Department of Transportation.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)
EXECUTIVE SUMMARY

TIP • FISCAL YEARS 2023/2024 TO 2027/2028
EXECUTIVE SUMMARY

The Transportation Improvement Program (TIP), a major federally required document of the Transportation Planning Organization (TPO) for the Miami Urbanized Area, specifies proposed transportation improvements to be implemented in Miami-Dade County over the coming five years. The primary emphasis of the TIP is on the first three years of the program. As required by federal regulations, projects receiving federal funds during the October 1, 2023 to September 30, 2028 time period are to be drawn from those listed in this document. In addition, projects not using federal funds, but which are part of the area's program of improvements, are shown in the TIP. Projects shown for FY 2025 and beyond, regardless of their funding source, are included as proposed. While it is anticipated that most of these projects will be implemented as programmed, they will be periodically evaluated by the TPO as the TIP is updated or amended as necessary. The projects in the TIP are also shown for a five-year time period. While the emphasis is on the first three years, presenting a five-year span allows for a more systematic forecast of funding needs during a five-year planning cycle and provides a more comprehensive view of the program for public information purposes. Included in the TIP are Intermodal, Highway, Transit, Aviation, Seaport and Non-Motorized improvements costing \$11.702 billion.

EXECUTIVE SUMMARY

Included are the following categories:

Funding Summary - Fiscal Years 2024 - 2028: (\$s in millions rounded)

Highways - <u>State Roads:</u>			
Primary (FDOT).....	\$	5,099 --	43.6%
Turnpike.....	\$	771 --	6.6%
Miami-Dade Expressway Authority..	\$	161 --	1.4%
	\$	6,031	51.5%
<u>County Roads:</u>			
Secondary.....	\$	99 --	0.8%
Road Impact Fee.....	\$	518 --	4.4%
People's Transportation Plan.....	\$	20 --	0.2%
Private Sector.....		TBD --	N/A
	\$	637	5.4%
Local Option Gas Tax.....	\$	171 --	1.5%
Transit.....	\$	2,066 --	17.7%
Aviation.....	\$	432 --	3.7%
Seaport.....	\$	2,314 --	19.8%
SFRTA.....	\$	6 --	0.1%
Other.....	\$	45 --	0.4%
	\$	5,034	43.0%
TOTAL	\$	11,702	100.0%

The South Florida Regional Transportation Authority (SFRTA) 5-year funding for rail projects is allocated through FDOT District 4 (rail projects which are geographically located in Miami-Dade County are also included in this funding allocation).

The Secondary, Road Impact Fee, and the People’s Transportation Plan (PTP) Programs contain a number of key projects in the County Highway / Transit System costing \$637 million. Aviation improvements involve Miami International, Opa-Locka and Tamiami airports. Transit improvements involve a broad range of public transportation services and facilities. Seaport improvements consist of numerous new port facilities and major renovations and improvements to existing facilities. Funding for the implementation of several intermodal projects is also shown, as well as projects in the “non-motorized” category which includes improvements associated with pedestrian and bicycle facilities.

On June 22, 2023, the TPO Governing Board approved the Fiscal Years 2024-2028 TIP by Resolution #22-2023. The TPO concurrently produced the annual List of Priority Projects (LOPP) for TPO Governing Board approval in June 2022. The LOPP is compiled and submitted to FDOT early in order to maximize review and approval of funding in the tentative Work Program and inclusion in the future years’ TIP. The TPO, will continue to

EXECUTIVE SUMMARY

assess critical transportation needs and prioritize essential projects for the mobility of people and goods in Miami-Dade County. Projects included in the 2024-2028 Transportation Improvement Program are selected in a cooperative manner with transportation partners as per requirements of C.F.R. 450.332(b).

On December 4, 2015, President Obama signed into law the Fixing America's Surface Transportation Act, or "FAST Act". Overall, the FAST Act largely maintains MAP-21 program structures and funding shares between highways and transit. The FAST Act builds upon the performance requirements enacted under MAP-21 by establishing timelines for State Departments of Transportation (DOTs) and MPOs to comply with the performance requirements. In compliance, the Miami-Dade TPO developed the Performance Management Report (Pages: G-1 – G-86), as a stand-alone document. This report is also summarized in this FY 2024-2028 TIP Executive Summary (Pages A-4 – A-8).

The projects and priorities in this TIP are consistent with those in the adopted 2045 Transportation Plan. Because the 2045 Plan was found to conform to federal regulations and the Florida State Transportation Improvement Plan (STIP), the TPO has found this TIP to also conform to all relevant laws, regulations, and plans. Selected projects are from the prioritized projects found in the 2045 Miami-Dade Long Range Transportation (LRTP). The LRTP recommends phasing for surface transportation improvements classified into four categories:

Priority Period I — Priority improvements to be constructed and opened to traffic by the year 2025. Funds for most of these improvements are already programmed in this Transportation Improvement Program.

Priority Period II — Improvements where project development and funding efforts would take place between 2026 and 2030.

Priority Period III — Improvements to be made between the year 2031 and 2035. In many cases, project development activities would need to commence in the 2026 and 2030 period, due to the amount of lead-time required to plan and implement a project.

Priority Period IV — Improvements to be made in the latter part of the 25-year plan period (2036 to 2045). Includes projects responding to long-range mobility needs and roadway improvements constructed through the county and the Sub-division process, which may be earlier than the 25-year period of the 2045 LRTP Plan.

Note: All \$ values represented in this document are in Year of Expenditure (YOE) dollars, as required by [23 CFR 450.324\(h\)](#). "Project costs reported in the TIP are in Year of Expenditure (YOE) dollars, which takes into account the inflation rate over the five years covered by the TIP."

EXECUTIVE SUMMARY

PUBLIC INVOLVEMENT

Public involvement for the development of the TIP is received through regularly scheduled meetings of the TPO Governing Board and its advisory committees. A typical TIP Development cycle, in Miami-Dade County, follows the following timeline:

- The TIP process begins at the start of each federal fiscal year on October 1st. FDOT District 6 and Florida's Turnpike Enterprise presents to advisory committees a very Tentative Five-Year Work Program document.
- During the month of November, the Citizen's Transportation Advisory Committee (CTAC) and the TIP Development Committee endorse the Tentative Five Year Work Program. November public hearings are also scheduled for review and input to the FDOT District 6 Tentative Work Program in Miami-Dade and Monroe Counties.
- In December, the Transportation Planning Council (TPC) and the TPO Governing Board endorse the Tentative Five-Year Work Program.
- By mid- December, the Interactive TIP web tool opens to county transportation stakeholder agencies.
- During the months of January through March of each year, the TIP Development Committee meets weekly to advance, review and approve a Draft TIP. These meetings are open to the public.
- By Mid-March to early April of each year, a printed Draft TIP Program document is available for Public review and input at the TPO Office. The Draft TIP is posted prominently on the TPO website at: <http://www.interactip.com/> under TIP 2024 Documentation.
- By the end of April, a Citizen's TIP document is sent to CTAC and the TPC and a Draft TIP is posted to the TPO website for review and comment by the public. The Citizens' TIP is a citizen user-friendly color booklet that condenses the big picture projects of that year's TIP, provide pictures, renderings and maps and educates user as to what is the TIP and what projects are underway and which ones have been completed from the previous year's TIP. The current 2024 Citizen's TIP is prominently posted on the TPO website at: 2024 TIP Citizen's Version.
- Parallel to these efforts, the TPO has regularly scheduled meetings with the community where the Draft TIP is distributed. Favorable verbal comments have been received and citizens have expressed their excitement in having a Citizens' Version of the program.
- The Draft TIP is typically included as an information item on or around the May meeting agendas of the CTAC. This meeting is open to public for comments and input.
- CTAC initial review of the Draft FY 2024-2028 TIP took place this year at their May 3, 2023, meeting. TPC initially reviewed at their May 15, 2023, meeting.
- The TIP is advertised for public hearing.
- The Final Draft TIP is presented for approval on the May agendas of the CTAC and TPC committees, respectively. These meetings are open to the public.
- CTAC approved the FY 2024-2028 TIP at their May 31, 2023, meeting
- TPC approved the FY 2024-2028 TIP at their June 12, 2023, meeting

EXECUTIVE SUMMARY

- The TIP is regularly approved by the TPO Governing Board at either their May or June meeting. In Miami-Dade County, the TPO Governing Board approves the Program Priorities concurrently with the TIP. This early approval allows FDOT for an early review of TPO Program Priorities in the development of their Tentative Work Program cycle.
- TPO Governing Board approved the FY 2024-2028 TIP at their June 22, 2023, meeting.
- The Miami-Dade TIP was sent in June to funding agencies for their review and input.

PERFORMANCE MANAGEMENT

Performance management is a strategic approach to connect investment and policy decisions to help achieve performance goals. Performance measures are quantitative criteria used to evaluate progress. Performance measure targets are the benchmarks against which collected data is gauged. The Moving Ahead for Progress in the 21st Century Act (MAP-21) requires State DOTs and MPOs to conduct performance-based planning by choosing critical performance measures, setting quantitative targets, and programming projects to help achieve those targets. Performance-based planning ensures the most efficient investment of federal transportation funds by increasing accountability, transparency, and providing for better investment decisions that focus on seven areas: Safety, Pavement Condition, Bridge Condition, Highway Performance, Freight Movement, Traffic Congestion, and On-road Mobile Sources. The Traffic Congestion and On-road Mobile Sources measures do not apply to Florida. The Fixing America's Surface Transportation (FAST) Act supplemented the MAP-21 legislation by establishing timelines for State DOTs and MPOs to comply with the requirements of MAP-21. State DOTs establish statewide targets and MPOs have the option to support the statewide targets or adopt their own.

SAFETY PERFORMANCE MEASURES

The Highway Safety Improvement Program and Safety Performance Management Measures Rule (Safety PM Rule) was published in the Federal Register on March 15, 2016.

The rule requires that states establish targets for the following performance measures:

- Number of fatalities
- Number of serious injuries
- Number of nonmotorized fatalities and serious injuries
- Rate of fatalities per 100M vehicle miles traveled (VMT)
- Rate of serious injuries per 100M VMT

FDOT has adopted the "Vision Zero" target of zero for all the safety performance measures. The TPO approved Resolution #4-2023 establishing the FDOT "Vision Zero" targets for calendar year 2023 on January 26, 2023.

EXECUTIVE SUMMARY

The 2024 TIP has been developed to help move towards the safety target in the following ways:

1. The 2024 TIP is a subset of the 2045 Long Range Transportation Plan and is guided by the LRTP goals and objectives. LRTP Goal #2 is to “Increase the Safety of the Transportation System for All Users” and is supported by the following objectives:

- Improve the safety of the transportation system
- Promote projects in high crash locations
- Improve safety of the transportation system of the elderly and disabled
- Provide educational opportunities to older adults to learn about TNCs

2. The TPO’s 2024 TIP Development Committee included representatives from the major transportation agencies and coordinated the preparation of the document. During the development cycle presentations were made to educate the committee members about performance management, the new federal requirements and the TPO’s approach to incorporating performance management into the transportation planning process. The transportation agencies were asked to highlight the safety efforts that are included in their 2024-2028 programs.

In total, the 2024 TIP includes \$95M programmed within FY 2024-2028 on 82 projects that improve safety and to support the achievement of the established safety targets. A list of the projects is included in the TPO’s “Transportation Performance Management System Performance Report.”

EXECUTIVE SUMMARY

PAVEMENT CONDITION AND BRIDGE CONDITION

For the Second Performance Period (January 1, 2022, to December 31, 2025) FDOT established 2023 and 2025 targets for NHS bridge and pavement on December 16, 2022 (FHWA changed the due date from October 1, 2022, due to a technical issue with the reporting system). These targets are identical to those set for 2019 and 2021 respectively. Florida’s performance through 2021 exceeds the targets.

The TPO approved Resolution #20-2023 on April 20, 2023 establishing FDOT’s 2023 and 2025 Bridge and Pavement Targets.

PAVEMENT CONDITION PERFORMANCE MEASURES	2023 TARGET	2025 TARGET
Percent of Interstate Pavement in Good Condition	n/a	≥ 60%
Percent of Interstate Pavement in Poor Condition	n/a	≤ 5%
% Non-Interstate NHS Pavement in Good Condition	≥ 40%	≥ 40%
% Non-Interstate NHS Pavement in Poor Condition	≤ 5%	≤ 5%

BRIDGE CONDITION PERFORMANCE MEASURES	2023 TARGET	2025 TARGET
Percent in Good Condition by Deck Area	≥ 50%	≥ 50%
Percent in Poor Condition by Deck Area	≤ 10%	≤ 10%

The 2024 TIP includes \$375M programmed within FY 2024-2028 on 31 bridge improvement projects and \$286M on 116 pavement improvement projects to support the achievement of the established targets. A list of the projects is included in the TPO’s “Transportation Performance Management System Performance Report.”

EXECUTIVE SUMMARY

SYSTEM PERFORMANCE AND FREIGHT MOVEMENT PERFORMANCE MEASURES

For the Second Performance Period (January 1, 2022, to December 31, 2025) FDOT established 2023 and 2025 targets for NHS bridge and pavement on December 16, 2022 (FHWA changed the due date from October 1, 2022, due to a technical issue with the reporting system). These targets are identical to those set for 2019 and 2021 respectively. Florida’s performance through 2021 exceeds the targets.

The TPO approved Resolution #20-2023 on April 20, 2023, establishing FDOT’s 2023 and 2025 System Performance Measures Targets.

NHS AND FREIGHT MOBILITY PERFORMANCE MANAGEMENT MEASURES	2023 TARGET	2025 TARGET
Percent of person-miles traveled on the Interstate that are reliable	≥ 75%	≥ 70%
% of person-miles traveled on the non-Interstate NHS that are reliable	n/a	≥ 50%
Truck travel time reliability ratio (TTR) on the Interstate	≤ 1.75	≤ 2.00

The 2024 TIP includes \$1.9B programmed within FY 2024-2028 on 128 projects that will improve mobility on the system to support the achievement of the established targets for mobility improvement performance. Included in the list of NHS performance projects is \$193M programmed within FY 2024-2028 for 27 projects to improve mobility on the Interstate System.

The TPO’s “Transportation Performance Management System Performance Report” includes the list of all projects

EXECUTIVE SUMMARY

COORDINATION WITH STATE AND FEDERAL DOCUMENTS

As part of the continuing coordination process to implement the new performance management requirements, the following documents are referenced in the development of the 2023 TIP:

EXECUTIVE SUMMARY

NATIONAL PARK SERVICE FUNDING FOR EVERGLADES NATIONAL PARK IMPROVEMENTS

The following information is hereby included in this Fiscal Year 2024-2028 Transportation Improvement Program, in accordance with 23 CFR 450.324(e).

These projects are located in federally owned lands in the Eastern United States and are funded with federal funds, outside of the Federal Highway Trust Fund, and the funding will not pass through the Florida Department of Transportation. There is no fiscal impact to the 2023-2027 TIP. These projects are included here for informational purposes. These projects are funded outside of the Federal Highway Trust Fund and the funding will not pass through the Florida Department of Transportation.

AWARD FISCAL YEAR	PROJECT	APPLICANT	DESCRIPTION	COUNTY	PRIMARY FUND SOURCE	TOTAL PROGRAM AMOUNT
2021	EVER_196127	National Park Service, Everglades National Park	Main park road resurfacing and pavement preservation of visitor center parking areas	Miami-Dade	Funding source FLTP	\$8,196,106
2022	NP_BISC_10(2)	Biscayne National Park	Resurface entrance road and parking lot at Convoy Point	Miami-Dade	Funding source FLTP	\$1,099,382

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

RESOLUTION APPROVING FINAL TIP

TPO RESOLUTION #22-2023

RESOLUTION APPROVING THE FINAL DRAFT FISCAL YEARS 2024-2028
TRANSPORTATION IMPROVEMENT PROGRAM

WHEREAS, the Interlocal Agreement creating and establishing the Metropolitan Planning Organization (MPO) for the Miami Urbanized Area requires that the Miami-Dade Transportation Planning Organization (TPO), in its role as the MPO, provides a structure to evaluate the adequacy of the transportation planning and programming process; and

WHEREAS, the Transportation Planning Council (TPC) has been established and charged with the responsibility and duty of fulfilling the aforementioned functions; and

WHEREAS, the Transportation Improvement Program is a federally required document which is to be updated annually and amended, as needed; and

WHEREAS, the TPC has reviewed the Final Draft Fiscal Years 2024-2028 Transportation Improvement Program (TIP), made a part hereof, and finds it consistent with the goals and objectives of the Transportation Plan for the Miami Urbanized Area,

NOW, THEREFORE, BE IT RESOLVED BY THE GOVERNING BOARD OF THE TRANSPORTATION PLANNING ORGANIZATION IN ITS ROLE AS THE MPO FOR THE MIAMI URBANIZED AREA, that the attached Final Draft Fiscal Years 2024-2028 Transportation Improvement Program is hereby approved.

The adoption of the foregoing resolution was moved by Board Member Rodney Harris. The motion was seconded by Board Member Raquel A. Regalado, and upon being put to a vote, the vote was as follows:

Chairman Esteban Bovo, Jr. - Aye
Vice Chairman Oliver G. Gilbert III - Absent

Board Member Marleine Bastien	- Aye	Board Member Eileen Higgins	- Aye
Board Member Juan Carlos Bermudez	- Aye	Board Member Steven D. Losner	- Absent
Board Member Kevin M. Cabrera	- Absent	Board Member Roberto Martell	- Aye
Board Member Danielle Cohen Higgins	- Aye	Board Member Kionne L. McGhee	- Aye
Board Member Alix Desulme	- Aye	Board Member Raquel A. Regalado	- Aye
Board Member Christi Fraga	- Absent	Board Member David Richardson	- Aye
Board Member Rene Garcia	- Aye	Board Member Anthony Rodriguez	- Aye
Board Member Roberto Gonzalez	- Absent	Board Member Micky Steinberg	- Absent
Board Member Keon Hardemon	- Absent	Board Member Francis Suarez	- Absent
Board Member Rodney Harris	- Aye		

The Chairperson thereupon declared the resolution duly passed and approved this 22nd day of June 2023.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)
INTRODUCTION

TIP • FISCAL YEARS 2023/2024 TO 2027/2028

INTRODUCTION

PURPOSE

This document is prepared every year to fulfill Federal statutory requirements which provide that, as a condition to receive Federal funding, each urbanized area will have a continuing planning process that results in plans and programs consistent with the comprehensive development plan of the urbanized area. The purpose of this document is to provide a prioritization of projects covering a five-year period that is consistent with the LRTP, contains all transportation projects MPA funded with FHWA and FTA funds and regionally significant projects regardless of funding source. The priorities established by this document express the policy decision of the Transportation Planning Organization (TPO) as to the order in which transportation improvements will be advanced during the program period. This document also fulfills Federal requirements in that the included projects are derived from the area's 2045 Long-Range Transportation Plan (LRTP) for inclusion in the program and addresses program requirements relating to the federal transportation law passed in July, 2012 titled "Moving Ahead for Progress in the 21st Century Act (MAP-21)". On December 4, 2015, President Obama signed into law the Fixing America's Surface Transportation Act, or "FAST Act". Overall, the FAST Act largely maintained MAP-21 program structures and funding shares between highways and transit. It is a down-payment for building a 21st century transportation system. On November 15, 2021 President Biden signed the Infrastructure Investment and Jobs Act (IIJA) into law, creating a historic transportation investment that will be implemented during this 5-year TIP window. Access to a majority of the legacy infrastructure funding in place was authorized via Continuing Resolution for 2022.

The joint annual FDOT/TPO certification was completed in April 2023. The TIP and TIP process are also reviewed during the FHWA/FTA TPO quadrennial certification. The Miami-Dade TPO's quadrennial certification took place in April 2023. The next quadrennial certification is anticipated to take place in 2027. In addition to this TIP document, the TPO produces the TIP Citizens' Version, a user-friendly summary of projects in the TIP. The Citizens' Guide is available at: [DRAFT Citizen's 2024 TIP](#). Transportation Performance Management is fully integrated into the TPO planning process. As the Performance Management process advances, the effectiveness of progress towards achieving the targets will be evaluated. The 2022 federal obligations for FDOT District 6 projects are found listed in FDOT's Office of Work Program Annual Obligations Report at: [FDOT - OFFICE OF WORK PROGRAM - ANNUAL OBLIGATIONS REPORT](#)

INTRODUCTION

TRANSPORTATION PLAN

The Transportation Planning Organization Board adopted under TPO Resolution #48-19, on September 26, 2019, the 2045 Miami-Dade LRTP. Projects from the area's adopted TPO 2045 LRTP have been included for advancement during this program period. The next major update of the LRTP to the year 2050 is underway and scheduled for adoption by September 2024. Major activities included are: support facilities for Metrorail, express bus service, interstate highway projects, congestion management and non-motorized projects; express transit on managed lanes; arterial street improvements, aviation and seaport facilities, and additional bus transit and paratransit improvements, the construction of major intermodal facilities and the deployment of Intelligent Transportation System applications. The recommended improvement priorities of the adopted Long Range Transportation Plan provide the basis for preparing this document. The Plan presents the logical and systematically phased development of the area's transportation network and services to the year 2045. Transportation System Management (TSM) projects are proposed to be continued or expanded during Fiscal Years 2023/2024 through 2027/2028. The Miami-Dade Secondary Road Program and Road Impact Fee Program contain projects that are supportive of the areawide TSM effort. These included traffic flow improvements, provisions for preferential treatments of high occupancy vehicles where appropriate, improvements to intersection geometrics, lighting safety projects, and other related projects which provide for greater safety and better management of traffic flow and are supportive of on-going transportation demand management activities. TSM projects are consistently included in the preparation of project-adopted proposals in keeping with the TPO's commitment to fully develop TSM as a policy and investment strategy to continually enhance the mobility of the urban population. The Year 2045 Transportation Plan stresses the achievement of long-standing and fundamental planning objectives. In addition to land-use considerations, the Plan addresses related issues involving the quality of the environment and the conservation of limited natural resources. These concerns are particularly important as revisions to the Adopted Components of the Comprehensive Development Master Plan (CDMP) for Miami-Dade County are periodically considered. An extensive public participation process is conducted during all major stages of Plan preparation and adoption and during periods when Plan revisions are formally considered.

Citizens review activities are coordinated by the Citizens Transportation Advisory Committee (CTAC), a body appointed by the TPO Board to provide formal input in all pertinent transportation issues.

COMPREHENSIVE DEVELOPMENT MASTER PLAN

The Transportation Improvement Program (TIP), as set forth in this document, is generally consistent with the Adopted Components of the Comprehensive Development Master Plan (CDMP) for Miami-Dade County, Florida, as amended through November 16, 2022. The CDMP contains twelve Plan elements. The Transportation Element specifically provides for an integrated multimodal transportation system for the circulation of motorized and non-motorized traffic in Miami-Dade County. The goal of the Transportation Element is to develop and maintain an integrated multimodal transportation system to move people of all ages and abilities and goods in a manner consistent with overall Countywide land use and environmental protection goals, and integration of climate change considerations in the fiscal decision-making process, objectives and policies, and to provide a comprehensive approach to the transportation system needs of the County by addressing all modes of transportation – pedestrian and

INTRODUCTION

bicycles facilities, traffic circulation, mass transit, aviation and ports. The Transportation Element is divided into five subelements: Traffic Circulation, Mass Transit, Aviation, Port of Miami River, and PortMiami Sub elements. The Traffic Circulation Subelement addresses the needs of automobile traffic, bicyclists and pedestrians; the Mass Transit Subelement addresses the need to promote and expand the public mass transit system and to increase its role as a major component in the County's overall transportation system; the Aviation Subelement addresses the need for the expansion, development and redevelopment of the County's aviation facilities; and the Port of Miami River and PortMiami Subelements promote maritime business and traditional maritime related shoreline uses along the Miami River and PortMiami and their expansion needs. A key feature of the Traffic Circulation and Mass Transit Subelements is the establishment of level-of-service standards to ensure that adequate capacity will be available in all modes to service new development and redevelopment in Miami-Dade County. The ability to maintain the level-of-service standards has become a primary determinant for addressing relative priority among the various transportation improvement needs.

The County is striving to provide roadway, transit, sidewalks, and bicycle lane improvements along congested corridors in order to develop a multimodal transportation network designed to include bus turnout bays, bus shelters, managed lanes, pedestrian and bicycles facilities, and mass transit services.

One of the most significant and far-reaching provisions of Florida's "Community Planning Act (2011)" is the requirement that all local comprehensive plans contain a Capital Improvement Element (CIE). The intent of this requirement is to make the comprehensive plan fiscally feasible and to provide a schedule of capital improvements which includes any publicly funded federal, state, or local government projects, and may also include privately funded projects for which the local government has no fiscal responsibility. Projects which are necessary to ensure that any adopted level-of-service standards are achieved and maintained (sec. 163.3180(1)(b), F.S.) for the 5-year period must be identified as either funded or unfunded and given a level of priority for funding (sec. 163.3177(3)(a), F.S.). For this reason, the highway capacity-type of improvements on the County highway system, and the transit, aviation, and seaport projects, which are programmed in the TIP, are also included in the County's CDMP Capital Improvements Element's (CIE) 6-year capital improvements schedule. Additionally, CDMP Policy TE-1H requires transportation plans to take into consideration climate change adaptation and mitigation strategies through project review, design, and funding for all transportation projects.

Every seven years, the Comprehensive Development Master Plan (CDMP) is reviewed and updated as required per Chapter 163 of the Florida Statutes, a process known as an Evaluation and Appraisal Report (EAR). The EAR includes an evaluation of the progress the County has made in implementing the goals, objectives, policies, maps, and text of the CDMP and also recommends changes. The Department of Regulatory and Economic Resources (RER), Planning Division completed the EAR process in 2018 after an extensive public participation plan involving social media, advertising, a survey, and over six workshops held in June 2017. RER received over 420 public comments and over 1,100 survey responses. Information about the EAR process, presentations made, and public comments received, are posted on the Department's website at: <https://www.miamidade.gov/planning/ear-2018.asp>. Based on the EAR review recommendations, multiple CDMP amendments have already been processed and adopted with few more pending to be processed this year.

INTRODUCTION

PUBLIC INVOLVEMENT/PUBLIC HEARING

Reasonable opportunity for public comment was provided in accordance with the requirements of 450.316(b)(1) and, in maintenance TMAs, an opportunity for at least one formal public meeting during the TIP development process. This public meeting may be combined with the public meeting required under 450.322 (c). The TIP process begins at the start of each fiscal year. Correspondence is sent to all municipalities, involved agencies and private parties informing them that the process is to begin, providing them with the tentative scheduling and soliciting their input. The Citizens Transportation Advisory Committee (CTAC) provides a forum for citizens to evaluate the recommendations developed through the TPO's transportation planning and programming process. One of the main responsibilities of the CTAC is to ensure that proposed transportation projects are responsive to the community's perceived needs and goals. The TPO provides adequate public notices for public hearings so as to allow community citizens the opportunity to approve documents such as the TIP. The proposed TIP is published and made readily available for review and comment. Similarly, the approved TIP is published and made readily available for information purposes. The functional responsibilities of participating agencies are needed to insure the continuing development and operation of urban transportation system facilities. The 45-day public review period began on April 10, 2023, and concluded on May 25, 2023. All comments received during this period were collected, archived, and included in the final adoption agenda materials for the TPO Governing Board's review prior to approval.

PROGRAM FUNDING

The TIP categorizes all transportation improvements and identifies priorities, which establish multi-year fiscal programming. The biennial elements represent the list of projects, which are proposed for implementation during the first program phase and are viewed as the "Capital Improvements" budget for transportation facilities. This TIP document identifies all sources of funding which are known or are anticipated to be available during the program period. Program costs are consistent with current estimates of available revenue. Priorities in the program are identified by relative staging of projects for implementation during a particular year, consistent with funding availability and production constraints. Most Highway funding comes from gasoline taxes, motor vehicle fees, and other automobile-related "user fees". Major sources of existing and potential highway funding sources include: Federal Gas Tax, State Motor Fuel Tax, Local Option Gas Tax, Voter Gas Tax, Motor Vehicle Fees, Impact Fees and Tolls. Transit funding is derived from a host of Federal, State and local programs, including the 1/2 cent sales tax increase approved by voters in November 2002. For rail and bus projects, funding is mostly sought through Federal and State grants. Transit operating costs are supported largely through local revenue sources.

SUMMARY OF TIP PROJECTS

The projects in the FY 2024-2028 TIP have been grouped into major categories, with order of priority established within each category insofar as possible or applicable. The groupings are established primarily by virtue of funding source and implementing responsibility.

The thrust of Miami-Dade County's effort to enhance the mobility of the urban population, achieve a balanced transportation system, to meet resiliency goals, to improve air quality, as well as to preserve or enhance the physical and social environment of the community, is evident when it is

INTRODUCTION

noted that around 19.5% of the FY 2024-2028 program budget is devoted to public transit projects. It should be noted that Primary, Interstate and Turnpike categories combined constitute about 50% of the approximate \$11.701B in the FY 2024-2028 program budget.

PLAN PERIODS

The 2045 Miami-Dade Transportation Plan - Long Range Element, recommended phasing for highway capacity improvements is classified into four Plan Periods:

Plan Period I

Priority improvements to be constructed and opened to traffic by the year 2025. Includes those projects needed to respond to existing traffic problems. Funds for most of these improvements are already programmed in this Transportation Improvement Program.

Plan Period II

Improvements where project development and funding efforts would take place between 2026 and 2030.

Plan Period III

Improvements to be made between the year 2031 and 2035. In many cases, project development activities would need to commence in the 2031 and 2025 period, due to the amount of lead-time required to plan and implement a project.

Plan Period IV

Improvements to be made in the latter part of the 25-year plan period (2036 to 2045). Includes projects responding to long-range mobility needs and roadway improvements constructed through the county and the Sub-division process, which may be earlier than the 25-year period of the 2045 LRTP Plan.

Because of the uncertainties of funding availability and the time required to develop a detailed project, the specific time periods and dates indicated in the above priority listing should be considered only as guidelines for project implementation.

The LRTP Update to the Year 2045 was approved by TPO Governing Board at its September 26, 2019, meeting.

INTRODUCTION

AMENDMENTS

The TIP may be amended at any time during the program year through the same procedures required for developing and adopting this original program. The amendment(s) may be for the purpose of deleting projects, adding projects, revising the funding of a project, or modifying the scope or limits of a project. Detailed information of the amendment process is available from the Citizen's TIP, on pages 17 and 18 of the TPO Prospectus [prospectus-for-transportation-improvements-2022.pdf \(miamidadetpo.org\)](#) or from the TPO upon request.

WHAT IS A TIP AMENDMENT

An amendment is a revision to a TIP or STIP that involves a major change to a project in a TIP or STIP, including addition or deletion of a project, a major change in project cost, project phase initiation dates, or a major change in design concept or design scope (i.e., changing project termini or the number of through traffic lanes). [23 C.F.R. 450.104] An amendment requires public review and comment, demonstration of financial constraint, or a conformity determination, if applicable. Additionally, amendments to the TIP are available for public review at least fourteen (14) days prior to the scheduled public hearing. This information is also available to the public in the TPO Prospectus for Transportation Improvements at: [prospectus-for-transportation-improvements-2022.pdf \(miamidadetpo.org\)](#)

WHAT IS A TIP ADMINISTRATIVE MODIFICATION

An administrative modification is a minor revision to a TIP or STIP that includes minor changes to project/project phase costs, minor changes to funding sources of previously included projects, and minor changes to project/project phase initiation dates. An administrative modification does not require public review and comment, re-demonstration of fiscal constraint, or a conformity determination, if applicable. [23 C.F.R. 450.104]

ADMINISTRATIVE TIP AMENDMENT BETWEEN THE START OF THE STATE AND FEDERAL FISCAL YEARS

An administrative TIP Amendment is an amendment that does not have to go to the full TPO Board for approval. FHWA and FTA will allow an administrative TIP Amendment during the three-month gap between the start of the new State fiscal year and the end of the old Federal fiscal year (July 1 to September 30) for new projects that were added during the Tentative Work Program development cycle.

In these instances, the TIP must be amended to include the project, but FHWA and FTA have agreed to allow the TPO Executive Director to process an Administrative TIP Amendment for these types of projects rather than having to go before the full Board. FHWA and FTA will allow this only under the following conditions:

- The amendment takes place between **July 1** and **September 30**
- The project must appear in the amendment exactly as it appears in the newly adopted TIP
- The TPO Executive Director has been authorized by the Board to approve administrative TIP Amendments

TIP • FISCAL YEARS 2023/2024 TO 2027/2028

BICYCLE ACCOMMODATIONS LEGEND

ABBREVIATION	NAME
Bike Lane	A bike lane is a portion of a roadway that is designated by signs and markings for preferential use by bicyclists.
Paved Shoulder	A paved shoulder is a portion of a roadway that has been delineated by edge line striping and may include bicycle lane pavement markings or signing.
Wide Curb Lane	A wide curb lane is a through lane that provides a minimum of 14 feet in width which allows most motor vehicles to pass cyclists safely within the travel lane.
Other Shared Use Path/Paved Trails	A paved path that is physically separated from the road and is designed to accommodate two-way bicycle and pedestrian traffic. Sidewalks do not meet the width and operational criteria for multi-use paths.
Sharrow	An optional pavement marking used to indicate a shared environment for bicycles and motor vehicles. Sharrows are used where it is not practical to provide a bicycle facility. Note that a sharrow is not a bicycle facility.

 Transportation Performance Management
SYSTEM PERFORMANCE REPORT

TIP • FISCAL YEARS 2023/2024 TO 2027/2028

TRANSPORTATION PERFORMANCE MANAGEMENT System Performance Report

This report documents the Miami-Dade TPO efforts to address federal and state requirements for Highway and Transit Performance Measurement and Concurrence with FAST Act.

INTRODUCTION

The Miami-Dade Transportation Planning Organization (TPO), formerly called the Metropolitan Planning Organization for the Miami Urbanized Area, guides the transportation planning process in Miami-Dade County. The TPO was created on March 2, 1977 as required under Section 163.01, Florida Statutes, and is established by an Interlocal Agreement between Miami-Dade County and the Florida Department of Transportation (FDOT).

A major role of the TPO is to ensure conformance with federal regulations requiring that highways, mass transit, and other transportation facilities and services are properly developed and deployed in relation to the overall plan of urban development and to approve plans for regional and state transportation network accessibility. In addition, federal guidelines require that the use of Federal Aid for transportation projects be consistent with TPO adopted plans and programs. Federal, state and local transportation planning funds are utilized on an ongoing basis to ensure the effectiveness of the TPO planning process.

The TPO's Long Range Transportation Plan (LRTP) is the plan for implementing transportation system improvements within Miami-Dade County. The LRTP is focused on providing safe mobility options, and is guided by a comprehensive vision to:

“Provide mobility options for Miami-Dade County residents and visitors and promote economic competitiveness by investing in the County’s transportation infrastructure while protecting the environment and maximizing the efficiency of the existing transportation system.”

WHAT IS PERFORMANCE MANAGEMENT?

Transportation Performance Management is a strategic approach that uses system information to make investment and policy decisions to achieve performance goals at the national, state, and local levels. In short, Transportation Performance Management:

- Is systematically applied on an ongoing basis;
- Provides key information to help decision makers understand the consequences of investment decisions across transportation assets or modes;
- Improves communication between decision makers, stakeholders, and the traveling public; and
- Ensures measures and targets are developed in a cooperative fashion and are based on objective data.

WHY IS PERFORMANCE MANAGEMENT REQUIRED?

The “Moving Ahead for Progress in the 21st Century” Act (MAP-21), signed into law on July 6, 2012 (Pub. L. No. 112-141) established requirements for States and MPOs to conduct performance-based planning by tracking performance measures and setting data-driven targets to measure performance. Performance-based planning ensures the most efficient investment of transportation funds by increasing accountability, transparency, and providing for better investment decisions that focus on key outcomes related to the seven Federal Highway Program performance goals (National Goals) established under MAP-21:

- **Safety** - To achieve a significant reduction in traffic fatalities and serious injuries on all public roads;
- **Infrastructure Condition** - To maintain the highway infrastructure asset system in a state of good repair;
- **Congestion Reduction** - To achieve a significant reduction in congestion on the National Highway System;
- **System Reliability** - To improve the efficiency of the surface transportation system;
- **Freight Movement and Economic Vitality** - To improve the national freight network, strengthen the ability of rural communities to access national and international trade markets, and support regional economic development;
- **Environmental Sustainability** - To enhance the performance of the transportation system while protecting and enhancing the natural environment; and
- **Reduced Project Delivery Delays** - To reduce project costs, promote jobs and the economy, and expedite the movement of people and goods by accelerating project completion through eliminating delays in the project development and delivery process, including reducing regulatory burdens and improving agencies’ work practices.
- [23 USC 150(b)]

Performance Management has been integrated into the transportation planning framework of the Federal Planning Factors, MAP-21 National Goals, and Federal Planning Emphasis Areas (see Figure 1: Federal and State Planning Requirements and Expectations). The “Fixing America’s Surface Transportation” Act (FAST Act), signed December 4, 2015 (Pub. L. No. 114-94) builds upon the performance requirements enacted under MAP-21 by establishing timelines for State Departments of Transportation (DOTs) and MPOs to comply with the performance requirements.

WHAT ARE THE NATIONAL PERFORMANCE MANAGEMENT MEASURES?

Performance measures are indicators of progress toward attaining a goal, objective, or target (a desired level of future performance). A series of Federal rulemakings have been issued by FHWA and FTA to establish National Performance Management Measures to address the performance requirements established in MAP-21 and the FAST Act. The National Performance Management Measures are:

- Highway Safety Improvement Program,
- Assessing Pavement Condition for the National Highway Performance Program and Bridge Condition for the National Highway Performance Program, and
- Assessing Performance of the National Highway System, Freight Movement on the Interstate System, and Congestion Mitigation and Air Quality Improvement Program.

For each category above, there are specific National Performance Management Measures that will be used to assess progress. Progress will be judged by how States and MPOs perform based on self-imposed targets, relative to baseline conditions. Performance measure targets are the benchmarks against which collected data is gauged. State DOTs will establish targets for the state, while MPOs will adopt targets that are appropriate for their urbanized areas. MPOs may adopt the state's targets or establish their own.

HOW ARE PERFORMANCE MEASURES USED?

Because Florida's transportation system improvement needs exceed available funding, resources are invested in the most strategic, effective and efficient ways possible. Performance measures provide useful "feedback" and are integrated into FDOT's business practices on three levels:

AT THE STRATEGIC LEVEL

Performance measures help to establish and inform goals, objectives, and strategies as well as to monitor FDOT Mission attainment. Performance measures also communicate progress toward achieving goals in transportation plans and programs such as the Florida Transportation Plan, the Strategic Highway Safety Plan, and the Freight Mobility and Trade Plan.

AT THE DECISION-MAKING LEVEL

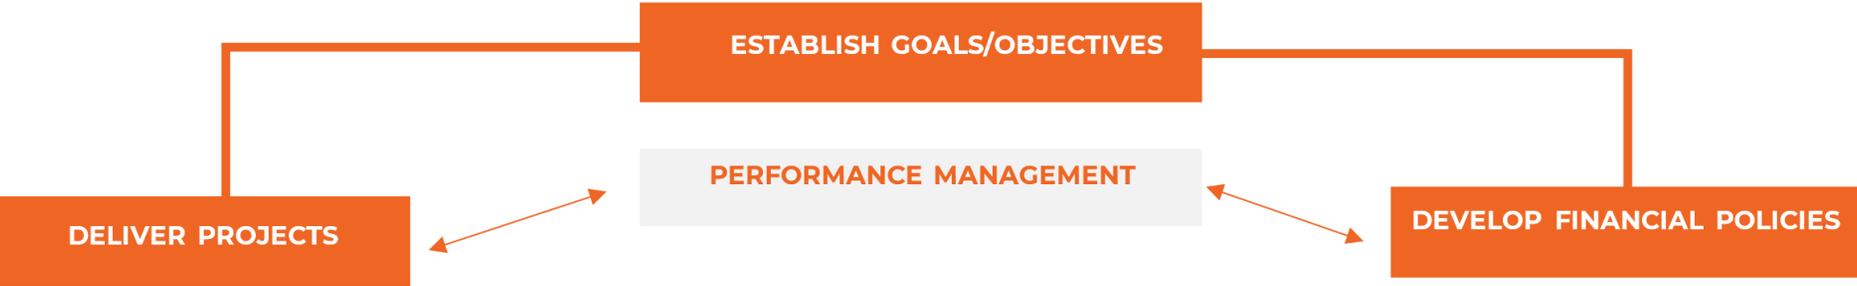

Performance measures are used to inform and assess the financial policies for allocating funds among programs such as highway preservation, system expansion, and public transportation. These programs are defined in the Program and Resource Plan. Decision makers also consider various trends impacting transportation system performance.

AT THE PROJECT DELIVERY LEVEL

After projects are selected, performance measures help to monitor the efficiency and effectiveness of projects and services in the Five-Year Work Program and in relation to FDOT's Transportation Asset Management Plan. The measures also support organizational and operational improvements.

SYSTEM PERFORMANCE REPORT

As shown in the **Performance-Based Planning and Programming Process** graphic below, performance management is at the heart of FDOT’s planning and programming process.

WHY DO WE USE THEM?

FDOT uses performance measures to:

- Assess how well Florida’s multimodal transportation system is functioning—including feedback from and collaboration with key stakeholder organizations
- Provide information to support and inform decision-making
- Assess how effectively and efficiently transportation programs, projects and services are being delivered
- Determine customer satisfaction levels
- Demonstrate transparency and accountability to Florida’s citizens and to foster collaboration with FDOT’s transportation system stakeholders

SYSTEM PERFORMANCE REPORT

WHAT IS MEASURED?

Each performance report is listed below along with some of the associated performance measures:

SAFETY

Fatal and serious injuries related to impaired driving, speeding and aggressive driving, distracted driving, at-risk drivers, vulnerable road users

PRESERVATION

Percent of pavement and bridges meeting condition standards, percent of maintenance activities that meet department standards, roadway clearance times due to incidents and crashes

MOBILITY

Vehicle miles traveled, transit ridership, freight tonnage, freight and port access, hours of delay, travel time reliability, travel that is heavily congested

ECONOMY

Return On Investment of FDOT programs, capacity funds for the SIS, Florida share of U.S. trade, Florida value of freight, construction projects completed on-time and within budget

ENVIRONMENT

Air quality, water quality, impacts to the physical, natural and cultural environment, vibrant and healthy communities, and customer satisfaction.

HOW IS TRANSPORTATION PERFORMANCE MANAGEMENT BEING IMPLEMENTED?

The Moving Ahead for Progress in the 21st Century Act (MAP-21) included several provisions that collectively are transforming the Federal surface transportation program to be focused on the achievement of performance outcomes.

The performance outcomes provisions, administered by different agencies within the U.S. Department of Transportation (USDOT), were implemented by rulemakings, including several under FHWA's purview. The provisions are organized by six performance management elements.

The Fixing America's Surface Transportation (FAST) Act, signed in 2015, built on the MAP-21 changes and provided long-term funding certainty for surface transportation infrastructure planning and investment.

TPM performance management outcomes are grouped into six elements to more effectively communicate the efforts under way to implement the statutory requirements.

- 1. National Goals:** Congressionally established goals or program purpose to focus the Federal-aid highway program into specific areas of performance.
- 2. Measures:** FHWA-established measures to assess performance/condition in carrying out performance-based Federal-aid highway programs.
- 3. Targets:** Targets established by Federal-aid highway funding recipients for the measures to document future performance expectations
- 4. Plans:** Development of strategic and/or tactical plans by Federal funding recipients to identify strategies and investments that address performance needs.
- 5. Reports:** Development of reports by Federal funding recipients that document progress toward target achievement, including the effectiveness of Federal-aid highway investments.
- 6. Accountability and Transparency:** FHWA-developed requirements for Federal funding recipients to use to achieve or make significant progress toward targets.

WHAT ARE THE FEDERAL PLANNING REQUIREMENTS?

Per 23 CFR §450.306 Scopes of the metropolitan transportation planning process, the metropolitan transportation planning process shall be continuous, cooperative, and comprehensive; consider the Federal Planning Factors (**See Figure 1: Federal Planning Requirements and Expectations**), and provide a performance-based approach to decision making. Performance-based planning requires MPOs to establish performance targets that address the performance measures or standards of the National Performance Management Measures, Public Transportation Safety Program, and Transit Asset Management. **Figure 2: FHWA Performance Measures Implementation Requirements in Florida** outlines the schedule for the incorporation of the National Performance Management Measures into the planning process. MPOs shall also “integrate into the metropolitan transportation planning processes, directly or by reference, the goals, objectives, performance measures, and targets described in other State transportation plans and processes as well as any plans developed under 49 USC chapter 53 by providers of public transportation, including:”

- State asset management plan and Transit Asset Management Plan;
- Appropriate portions of the Strategic Highway Safety Plan;
- Public Transportation Agency Safety Plan;
- Other safety and security planning and review processes, plans, and programs;
- The CMAQ Program Performance Plan, if applicable;
- Appropriate portions of the State Freight Plan;
- The congestion management process, if applicable; and
- Other State transportation plans and processes required as part of a performance-based program.

Per 23 CFR §450.324 Development and content of the metropolitan transportation plan, the MPO Long Range Transportation Plan (LRTP) shall include the following for the National Performance Management Measures:

- **A description of the National Performance Management Measures and established performance targets** used in assessing the performance of the transportation system
- **A System Performance Report** evaluating the condition and performance of the transportation system, including progress achieved by the MPO in meeting performance targets.
- MPOs that voluntarily elect to conduct scenario planning shall describe how the preferred scenario has “improved” performance of the transportation system. 23 CFR §450.324

Additionally, per 23 CFR §450.326 Development and content of the transportation improvement program (TIP), the Transportation Improvement Program (TIP) shall make progress toward achieving performance targets and include a **description of the anticipated effect of the TIP toward achieving the performance targets** identified by the MPO in the LRTP, linking investment priorities in the TIP to those performance targets.

SYSTEM PERFORMANCE REPORT

SYSTEM PERFORMANCE REPORT

On March 17, 2023, the FDOT Office of Policy Planning distributed in to the MPOs a simplified Transportation Performance Measures timeline with the key dates for the latter portion of CY 2022, along with those for CY 2023, which are illustrated at right:

Figure 3: FDOT 2022-2023 Transportation Performance Measures Timeline

LONG RANGE TRANSPORTATION PLAN (LRTP) AND TRANSPORTATION IMPROVEMENT PROGRAM (TIP) COMPLIANCE

The FDOT Highway Safety Plan, Highway Safety Improvement Program, Freight Mobility Plan, and Asset Management Plan have been incorporated, by reference, into the 2045 LRTP and 2020 TIP as part of LRTP and TIP amendments through Resolution #33-19 (June 20, 2019).

The Miami-Dade 2045 Long Range Transportation Plan was adopted on September 26, 2019 and the Miami-Dade 2022/2023 – 2026/2027 TIP was adopted on May 20, 2021. Per the Planning Rule, the System Performance Report for the Miami-Dade TPO is included for the required Highway Safety (PM1), Bridge and Pavement (PM2), System Performance (PM3), Transit Asset Management (TAM) and Public Transit Agency Safety Plan (PTASP).

TRANSPORTATION PERFORMANCE MEASURES CONSENSUS PLANNING DOCUMENT

The TPM Consensus Document has been cooperatively developed by the FDOT and Florida's 27 Metropolitan Planning Organizations through the Florida Metropolitan Planning Organization Advisory Council (MPOAC), and, by representation on the MPO and TPO boards and committees, and the providers of public transportation in the MPO and TPO planning areas. The purpose of the document is to outline the minimum roles of FDOT, the MPO/TPOs, and the providers of public transportation in the MPO/TPO planning area to ensure consistency to the maximum extent practicable in satisfying the transportation performance management requirements promulgated by the United States Department of Transportation.

The current Federal legislation requires state DOTs, MPO/TPOs, and transit agencies to conduct performance-based planning by setting data-driven performance targets for several transportation performance measures, and programming transportation investments that are expected to result in achievement of defined targets. The document describes the general processes through which FDOT, the MPO/TPOs, and the providers of public transportation in MPO/TPO planning areas will cooperatively develop and share information related to transportation performance management.

Based on a recent directive of the Federal Highway Administration and FDOT Office of Policy Planning, it was suggested to all TPO/MPO's in Florida to separately adopt this document to avoid the need to include it with each TIP on an annual basis. Once adopted as a stand-alone resource, the TPO does not need to continuously include the Consensus Planning Document in the TIP.

By Resolution 12-2022 on March 3, 2022 (illustrated on the below in **Figure 4: TPO Resolution**), the TPO Governing Board adopted the Transportation Performance Measures Consensus Planning Document.

Figure 4: TPO Resolution

<p style="text-align: right; margin-bottom: 0;">Agenda Item 6.A.7</p> <p style="text-align: center; margin-bottom: 10px;">TPO RESOLUTION #12-2022</p> <p style="text-align: center; margin-bottom: 10px;">RESOLUTION ADOPTING THE TRANSPORTATION PERFORMANCE MEASURES CONSENSUS PLANNING DOCUMENT</p> <p>WHEREAS, the Interlocal Agreement creating and establishing the Metropolitan Planning Organization (MPO) for the Miami Urbanized Area requires that the Miami-Dade Transportation Planning Organization (TPO), in its role as the MPO, provide a structure to evaluate the adequacy of the transportation planning and programming process; and</p> <p>WHEREAS, the TPO Governing Board is charged with making transportation planning decisions in the Miami Urbanized Area; and</p> <p>WHEREAS, the Transportation Planning Council (TPC) has been established and charged with the responsibility and duty of fulfilling the aforementioned functions; and</p> <p>WHEREAS, the Transportation Performance Measures Consensus Planning Document has been cooperatively developed by the Florida Department of Transportation (FDOT) and Florida's twenty-seven (27) Metropolitan Planning Organizations (MPOs) through the Florida Metropolitan Planning Organization Advisory Council; and</p> <p>WHEREAS, this document describes the general processes through which FDOT, the MPOs, and the providers of public transportation in MPO planning areas will cooperatively develop and share information related to transportation performance management; and</p> <p>WHEREAS, based on a recent directive from the Federal Highway Administration and the FDOT Office of Policy Planning, it was requested that all MPOs in Florida separately adopt this document to reduce redundancy with the annual publication of said document in the Transportation Improvement Program (TIP); and</p> <p>WHEREAS, the TPC has reviewed the Transportation Performance Measures Consensus Planning Document, made a part hereof, and finds it consistent with the goals and objectives of the Transportation Plan for the Miami Urbanized Area,</p> <p>NOW, THEREFORE, BE IT RESOLVED BY THE GOVERNING BOARD OF THE TRANSPORTATION PLANNING ORGANIZATION IN ITS ROLE AS THE MPO FOR THE MIAMI URBANIZED AREA, that this Board hereby adopts the attached Transportation Performance Measures Consensus Planning Document.</p> <p>The adoption of the foregoing resolution was moved by Board Member Rebeca Sosa. The motion was seconded by Board Member Eileen Higgins, and upon being put to a vote, the vote was as follows:</p> <p style="margin-left: 40px;">Chairman Oliver G. Transportation Performance Measures Consensus Planning Document

Purpose and Authority

This document has been cooperatively developed by the Florida Department of Transportation (FDOT) and Florida's 27 Metropolitan Planning Organizations (MPOs) through the Florida Metropolitan Planning Organization Advisory Council (MPOAC), and, by representation on the MPO boards and committees, the providers of public transportation in the MPO planning areas.

The purpose of the document is to outline the minimum roles of FDOT, the MPOs, and the providers of public transportation in the MPO planning areas to ensure consistency to the maximum extent practicable in satisfying the transportation performance management requirements promulgated by the United States Department of Transportation in Title 23 Parts 450, 490, 625, and 673 of the *Code of Federal Regulations* (23 CFR). Specifically:

- 23 CFR 450.314(h)(1) requires that "The MPO(s), State(s), and providers of public transportation shall jointly agree upon and develop specific written procedures for cooperatively developing and sharing information related to transportation performance data, the selection of performance targets, the reporting of performance targets, the reporting of performance to be used in tracking progress toward achievement of critical outcomes for the region of the MPO, and the collection of data for the State asset management plan for the National Highway System (NHS)."
- 23 CFR 450.314(h)(2) allows for these provisions to be "Documented in some other means outside the metropolitan planning agreements as determined cooperatively by the MPO(s), State(s), and providers of public transportation."

Section 339.175(11), Florida Statutes creates the MPOAC to "Assist MPOs in carrying out the urbanized area transportation planning process by serving as the principal forum for collective policy discussion pursuant to law" and to "Serve as a clearinghouse for review and comment by MPOs on the Florida Transportation Plan and on other issues required to comply with federal or state law in carrying out the urbanized transportation planning processes." The MPOAC Governing Board membership includes one representative of each MPO in Florida.

This document was developed, adopted, and subsequently updated by joint agreement of the FDOT Secretary and the MPOAC Governing Board. Each MPO will adopt this document by incorporation in its annual Transportation Improvement Program (TIP) or by separate board action as documented in a resolution or meeting minutes, which will serve as documentation of agreement by the MPO and the provider(s) of public transportation in the MPO planning area to carry out their roles and responsibilities as described in this general document.

Roles and Responsibilities

This document describes the general processes through which FDOT, the MPOs, and the providers of public transportation in MPO planning areas will cooperatively develop and share information related to transportation performance management.

Email communications will be considered written notice for all portions of this document. Communication with FDOT related to transportation performance management generally will occur through the Administrator for Metropolitan Planning in the Office of Policy Planning. Communications with the MPOAC related to transportation performance management generally will occur through the Executive Director of the MPOAC.

1. Transportation performance data:

- FDOT will collect and maintain data, perform calculations of performance metrics and measures, and provide to each MPO the results of the calculations used to develop statewide targets for all applicable federally required performance measures. FDOT also will provide to each MPO the results of calculations for each applicable performance measure for the MPO planning area, and the county or counties included in the MPO planning area.¹ FDOT and the MPOAC agree to use the National Performance Management Research Data Set as the source of travel time data and the defined reporting segments of the Interstate System and non-Interstate National Highway System for the purposes of calculating the travel time-based measures specified in 23 CFR 490.507, 490.607, and 490.707, as applicable.
- Each MPO will share with FDOT any locally generated data that pertains to the federally required performance measures, if applicable, such as any supplemental data the MPO uses to develop its own targets for any measure.
- Each provider of public transportation is responsible for collecting performance data in the MPO planning area for the transit asset management measures as specified in 49 CFR 625.43 and the public transportation safety measures as specified in the National Public Transportation Safety Plan. The providers of public transportation will provide to FDOT and the appropriate MPO(s) the transit performance data used to support these measures.

2. Selection of performance targets:

FDOT, the MPOs, and providers of public transportation will select their respective performance targets in coordination with one another. Selecting targets generally refers to the processes used to identify, evaluate, and make decisions about potential targets prior to action to formally establish the targets. Coordination will include as many of the following opportunities as deemed appropriate for each measure: in-person meetings, webinars, conferences calls, and email/written communication. Coordination will include timely

¹ When an MPO planning area covers portions of more than one state, as in the case of the Florida-Alabama TPO, FDOT will collect and provide data for the Florida portion of the planning area.

² If any Florida urbanized area becomes nonattainment for the National Ambient Air Quality Standards, FDOT also will provide appropriate data at the urbanized area level for the specific urbanized area that is designated.

sharing of information on proposed targets and opportunities to provide comment prior to establishing final comments for each measure.

The primary forum for coordination between FDOT and the MPOs on selecting performance targets and related policy issues is the regular meetings of the MPOAC. The primary forum for coordination between MPOs and providers of public transportation on selecting transit performance targets is the TIP development process.

Once targets are selected, each agency will take action to formally establish the targets in its area of responsibility.

- a) FDOT will select and establish a statewide target for each applicable federally required performance measure.
 - i. To the maximum extent practicable, FDOT will share proposed statewide targets at the MPOAC meeting scheduled in the calendar quarter prior to the dates required for establishing the target under federal rule. FDOT will work through the MPOAC to provide email communication on the proposed targets to the MPOs not in attendance at this meeting. The MPOAC as a whole, and individual MPOs as appropriate, will provide comments to FDOT on the proposed statewide targets within sixty (60) days of the MPOAC meeting. FDOT will provide an update to the MPOAC at its subsequent meeting on the final proposed targets, how the comments received from the MPOAC and any individual MPOs were considered, and the anticipated date when FDOT will establish final targets.
 - ii. FDOT will provide written notice to the MPOAC and individual MPOs within two (2) business days of when FDOT establishes final targets. This notice will provide the relevant targets and the date FDOT established the targets, which will begin the 180-day time-period during which each MPO must establish the corresponding performance targets for its planning area.
- b) Each MPO will select and establish a target for each applicable federally required performance measure. To the extent practicable, MPOs will propose, seek comment on, and establish their targets through existing processes such as the annual TIP update. For each performance measure, an MPO will have the option of either³:
 - i. Choosing to support the statewide target established by FDOT, and providing documentation (typically in the form of meeting minutes, a letter, a resolution, or incorporation in a document such as the TIP) to FDOT that the MPO agrees to plan and program projects so that they contribute toward the accomplishments of FDOT's statewide targets for that performance measure.
 - ii. Choosing to establish its own target, using a quantifiable methodology for its MPO planning area. If the MPO chooses to establish its own target, the MPO will coordinate with FDOT and, as applicable, providers of public transportation regarding the approach used to develop the target and the proposed target prior to

³ When an MPO planning area covers portions of more than one state, as in the case of the Florida-Alabama TPO, that MPO will be responsible for coordinating with each state DOT in setting and reporting targets and associated data.

establishment of a final target. The MPO will provide FDOT and, as applicable, providers of public transportation, documentation (typically in the form of meeting minutes, a letter, a resolution, or incorporation in a document such as the TIP) that includes the final targets and the date when the targets were established.

- c) The providers of public transportation in MPO planning areas will select and establish performance targets annually to meet the federal performance management requirements for transit asset management and transit safety under 49 U.S.C. 5326(c) and 49 U.S.C. 5329(d).
 - i. The Tier I providers of public transportation will establish performance targets to meet the federal performance management requirements for transit asset management. Each Tier I provider will provide written notice to the appropriate MPO and FDOT when it establishes targets. This notice will provide the final targets and the date when the targets were established, which will begin the 180-day period within which the MPO must establish its transit-related performance targets. MPOs may choose to update their targets when the Tier I provider(s) updates theirs, or when the MPO amends its long-range transportation plan by extending the horizon year in accordance with 23 CFR 450.324(c).
 - ii. FDOT is the sponsor of a Group Transit Asset Management plan for subrecipients of Section 5311 and 5310 grant funds. The Tier II providers of public transportation may choose to participate in FDOT's group plan or to establish their own targets. FDOT will notify MPOs and those participating Tier II providers following of establishment of transit-related targets. Each Tier II provider will provide written notice to the appropriate MPO and FDOT when it establishes targets. This notice will provide the final targets and the date the final targets were established, which will begin the 180-day period within which the MPO must establish its transit-related performance targets. MPOs may choose to update their targets when the Tier II provider(s) updates theirs, or when the MPO amends its long-range transportation plan by extending the horizon year in accordance with 23 CFR 450.324(c).
 - iii. FDOT will draft and certify a Public Transportation Agency Safety Plan for any small public transportation providers (defined as those who are recipients or subrecipients of federal financial assistance under 49 U.S.C. 5307, have one hundred (100) or fewer vehicles in peak revenue service, and do not operate a rail fixed guideway public transportation system). FDOT will coordinate with small public transportation providers on selecting statewide public transportation safety performance targets, with the exception of any small operator that notifies FDOT that it will draft its own plan.
 - iv. All other public transportation service providers that receive funding under 49 U.S. Code Chapter 53 (excluding sole recipients of sections 5310 and/or 5311 funds) will provide written notice to the appropriate MPO and FDOT when they establish public transportation safety performance targets. This notice will provide the final targets and the date the final targets were established, which will begin the 180-day period within which the MPO must establish its transit safety

performance targets. MPOs may choose to update their targets when the provider(s) updates theirs, or when the MPO amends its long-range transportation plan by extending the horizon year in accordance with 23 CFR 450.324(c).

- v. If the MPO chooses to support the asset management and safety targets established by the provider of public transportation, the MPO will provide to FDOT and the provider of public transportation documentation that the MPO agrees to plan and program MPO projects so that they contribute toward achievement of the statewide or public transportation provider targets. If the MPO chooses to establish its own targets, the MPO will develop the target in coordination with FDOT and the providers of public transportation. The MPO will provide FDOT and the providers of public transportation documentation (typically in the form of meeting minutes, a letter, a resolution, or incorporation in a document such as the TIP) that includes the final targets and the date the final targets were established. In cases where two or more providers operate in an MPO planning area and establish different targets for a given measure, the MPO has the options of coordinating with the providers to establish a single target for the MPO planning area, or establishing a set of targets for the MPO planning area.

3. Reporting performance targets:

- a) Reporting targets generally refers to the process used to report targets, progress achieved in meeting targets, and the linkage between targets and decision making processes FDOT will report its final statewide performance targets to the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) as mandated by the federal requirements.
 - i. FDOT will include in future updates or amendments of the statewide long-range transportation plan a description of all applicable performance measures and targets and a system performance report, including progress achieved in meeting the performance targets, in accordance with 23 CFR 450.216(f).
 - ii. FDOT will include in future updates or amendments of the statewide transportation improvement program a discussion of the anticipated effect of the program toward achieving the state's performance targets, linking investment priorities to those performance targets, in accordance with 23 CFR 450.218 (q).
 - iii. FDOT will report targets and performance data for each applicable highway performance measure to FHWA, in accordance with the reporting timelines and requirements established by 23 CFR 490; and for each applicable public transit measure to FTA, in accordance with the reporting timelines and requirements established by 49 CFR 625 and 40 CFR 673.
- b) Each MPO will report its final performance targets as mandated by federal requirements to FDOT. To the extent practicable, MPOs will report final targets through the TIP update or other existing documents.
 - i. Each MPO will include in future updates or amendments of its metropolitan long-range transportation plan a description of all applicable performance measures

and targets and a system performance report, including progress achieved by the MPO in meeting the performance targets, in accordance with 23 CFR 450.324(f)(3-4).

- ii. Each MPO will include in future updates or amendments of its TIP a discussion of the anticipated effect of the TIP toward achieving the applicable performance targets, linking investment priorities to those performance targets, in accordance with 23 CFR 450.326(d).
 - iii. Each MPO will report target-related status information to FDOT upon request to support FDOT's reporting requirements to FHWA.
- c) Providers of public transportation in MPO planning areas will report all established transit asset management targets to the FTA National Transit Database (NTD) consistent with FTA's deadlines based upon the provider's fiscal year and in accordance with 49 CFR Parts 625 and 630, and 49 CFR Part 673.
4. Reporting performance to be used in tracking progress toward attainment of performance targets for the MPO planning area:
- a) FDOT will report to FHWA or FTA as designated, and share with each MPO and provider of public transportation, transportation performance for the state showing the progress being made towards attainment of each target established by FDOT, in a format to be mutually agreed upon by FDOT and the MPOAC.
 - b) If an MPO establishes its own targets, the MPO will report to FDOT on an annual basis transportation performance for the MPO area showing the progress being made towards attainment of each target established by the MPO, in a format to be mutually agreed upon by FDOT and the MPOAC. To the extent practicable, MPOs will report progress through existing processes including, but not limited to, the annual TIP update.
 - c) Each provider of public transportation will report transit performance annually to the MPO(s) covering the provider's service area, showing the progress made toward attainment of each target established by the provider.
5. Collection of data for the State asset management plans for the National Highway System (NHS):
- a) FDOT will be responsible for collecting bridge and pavement condition data for the State asset management plan for the NHS. This includes NHS roads that are not on the State highway system but instead are under the ownership of local jurisdictions, if such roads exist.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)
 Transportation Performance Management
SYSTEM PERFORMANCE REPORT

Safety

PORTMIAMI

SAFETY PERFORMANCE MANAGEMENT MEASURES

Safety is the first national goal identified in MAP-21 and maintained in the FAST Act. In March of 2016, the Highway Safety Improvement Program (HSIP) Final Rule and National Performance Management Measures: Highway Safety Improvement Program Final Rule (known as the Safety Performance Management Measures (Safety PM) Final Rule) were published in the Federal Register [23 CFR 924, 23 CFR 490] with an effective date of April 14, 2016. The HSIP Final Rule was established to clarify requirements under the HSIP and address MAP-21 and the FAST Act for consistency. The objective of the HSIP is to “significantly reduce fatalities and serious injuries resulting from crashes on all public roads,” [23 CFR 924].

PERFORMANCE MANAGEMENT MEASURES

The Safety PM Final Rule was developed to support the HSIP and requires State DOTs and MPOs to set targets for the following Safety Performance Management Measures (which apply to all public roads) and to report on progress toward achieving those targets to the State DOT.

- Number of Fatalities
- Fatality Rate per 100 million Vehicle Miles Traveled (VMT)
- Number of Serious Injuries
- Serious Injury Rate per 100 million VMT
- Number of Combined Non-Motorized Fatalities and Serious Injuries

PERFORMANCE TARGETS

In 2012, Florida adopted “Driving Down Fatalities,” their version of the national traffic safety vision “Toward Zero Deaths.” Understanding that zero fatalities cannot be reached within the 2018 Highway Safety Plan (HSP), Florida developed data models to forecast the number of fatalities and serious injuries that are statistically expected to occur to drive down fatalities and serious injuries with an ultimate vision of zero. [Source: SHSP, HSP] (2017 Florida Highway Safety Improvement Program). FDOT firmly believes that every life counts and established a 2018 target of zero for each of the Safety Performance Management Measures in the 2017 Highway Safety Improvement Plan (HSIP).

The TPO, along with FDOT and other traffic safety partners, shares a high concern about the upward trending of traffic crashes, both statewide and nationally. As such, the Miami-Dade TPO supports FDOT’s statewide 2022 safety targets. The safety initiatives within this TIP are intended to contribute toward achieving these targets.

Annually in August, FDOT establishes and reports statewide safety performance targets in the HSIP Annual Report to FHWA. By February of the following year, the TPO will adopt FDOT’s targets or establish their own.

FDOT has continuously supported a target of zero for the Safety Performance Management Measures. The 2020 HSIP Annual Report continued to establish a target of zero for each of the five federal Safety Performance Management Measures for Calendar Year 2022. By adopting these targets

SYSTEM PERFORMANCE REPORT

(Per Resolution #4-2023) on January 26, 2023 as illustrated below in **Figure 5: TPO Resolution**, the Miami-Dade TPO will support achievement of the safety performance management targets by planning and programming projects in the TIP and LRTP that once implemented, are anticipated to make progress toward achieving accomplishment of the FDOT safety target of zero. The targets for the five Safety Performance Management Measures adopted by the TPO for 2023, shown in **Table 1: 2023 Safety Performance Management Measure Targets**, indicates the TPO is expressly supporting the statewide targets developed by FDOT.

TPO RESOLUTION #04-2023

AGENDA ITEM 7.B.2

RESOLUTION ESTABLISHING THE FLORIDA DEPARTMENT OF TRANSPORTATION'S "VISION ZERO" SAFETY PERFORMANCE MEASURES TARGETS FOR TRAFFIC FATALITIES AND INJURIES FOR CALENDAR YEAR 2023

WHEREAS, the Interlocal Agreement creating and establishing the Metropolitan Planning Organization (MPO) for the Miami Urbanized Area requires that the Miami-Dade Transportation Planning Organization (TPO), in its role as the MPO, provides a structure to evaluate the adequacy of the transportation planning and programming process; and

WHEREAS, the Moving Ahead for Progress in the 21st Century Act (MAP-21) required the United States Department of Transportation (USDOT) to establish mobility performance measures for fatalities and serious injuries, both number and rate per vehicle mile traveled, on all public roads; and

WHEREAS, federal rules developed to implement MAP-21 require that state DOTs establish statewide targets each year for the traffic safety performance measures: number of fatalities, rate of fatalities, number of serious injuries, rate of serious injuries and number of non-motorized fatalities and non-motorized serious injuries; and

WHEREAS, MPOs have the option to support the statewide performance measures targets or establish their own; and

WHEREAS, the 2022 Florida Highway Safety Improvement Program includes "Vision Zero" targets for federal safety performance measures for 2023; and

WHEREAS, the TPO has coordinated the establishment of "Vision Zero" performance measures targets with the Florida Department of Transportation (FDOT) through the statewide Metropolitan Planning Organization Advisory Council; and

WHEREAS, the attached FDOT's 2023 "Vision Zero" Performance Measures Targets for Traffic Fatalities and Injuries, are consistent with the goals and objectives of the Transportation Plan for the Miami Urbanized Area,

NOW, THEREFORE, BE IT RESOLVED BY THE GOVERNING BOARD OF THE TRANSPORTATION PLANNING ORGANIZATION IN ITS ROLE AS THE MPO FOR THE MIAMI URBANIZED AREA, that this Board hereby establishes the attached Florida Department of Transportation's "Vision Zero" Safety Performance Measures Targets for traffic fatalities and injuries for calendar year 2023.

The adoption of the foregoing resolution was moved by Board Member Rodney Harris. The motion was seconded by Board Member Roberto Martell, and upon being put to a vote, the vote was as follows:

Chairman Oliver G. Gilbert III - Aye
Vice Chairman-

SAFETY PERFORMANCE MEASURES TARGETS

FDOT's 2022 Highway Safety Improvement Program (HSIP) includes Vision Zero targets for each of the federal performance measures. The TPO has coordinated with FDOT through the MPOAC and is supporting the same targets. The five federal safety performance measures and FDOT targets for 2023 are:

Safety Performance Measures	2023 Target
Number of fatalities	0
Rate of fatalities (per 100 million VMT)	0
Number of serious injuries	0
Rate of serious injuries (per 100 million VMT)	0
Number of non-motorized fatalities and serious injuries	0

The safety performance measures are evaluated with a rolling five-year average of traffic crash data and daily vehicle miles travelled. The most recent safety statistics (2017-2021) for Florida and Miami-Dade County are:

Performance Measures	Florida	Miami-Dade
Fatalities (annual average)	3,306.4	310.4
Fatality Rate per 100M VMT	1.517	1.570
Serious Injuries (annual average)	18,029.8	1,442.6
Serious Injury Rate per 100M VMT	8.251	7.250
Ped/Bike Fatalities & Serious Injuries (annual average)	3,190.94	393.0

DATA SOURCES: fatality and serious injury counts from Florida Dept. of Transportation (FDOT) State Safety Office's Crash Analysis Reporting (CAR) database as of **January 10, 2023**; any figures that include the 2022 data are preliminary at this time and may change with future updates traffic volumes as published by the FDOT office of Transportation Data and Analytics at <http://www.fdot.gov/planning/statistics/mileage-rpts/>

SYSTEM PERFORMANCE REPORT

On August 31, 2022, FDOT established statewide performance targets for the safety measures for calendar year 2021. On January 26, 2023, the Miami-Dade TPO agreed to support FDOT’s statewide safety performance targets, thus agreeing to plan and program projects in the TIP that once implemented, are anticipated to make progress toward achieving the statewide targets:

TABLE 1: 2023 Safety Performance Management Measure Targets

SAFETY PERFORMANCE MEASURE	MIAMI-DADE TPO SAFETY TARGETS	2023 FDOT STATEWIDE SAFETY TARGETS
Number of Fatalities	0	0
Fatality Rate per 100 Million Vehicle Miles Traveled (VMT)	0	0
Number of Serious Injuries	0	0
Serious Injury Rate per 100M VMT	0	0
Number of Combined Non-Motorized Fatalities and Serious Injuries	0	0

SYSTEM PERFORMANCE REPORT

BASELINE CONDITIONS

Safety Performance Management Measures are evaluated using a 5-year rolling average of traffic crash data and vehicle miles traveled. Baseline safety performance conditions are established based on the 5-year rolling average ending in the calendar year prior to the establishment of the State’s target. FDOT established its target for Safety Performance Management Measures for 2023 in 2022. Therefore, the baseline year for Florida MPOs for Calendar Year 2023 is the rolling 5-year average for 2017-2021. The baseline performance for Florida and Miami-Dade County for CY 2023 is shown in Table 2: Baseline Safety Performance Management Measures.

TABLE 2: FDOT Baseline Safety Performance Measures (Data from 5-Year Rolling Average from 2017-2021)

PERFORMANCE MEASURE	FLORIDA	MIAMI-DADE
Number of Fatalities (Annual Average)	3,306.4	310.4
Fatality Rate per 100M VMT	1.517	1.570
Number of Serious Injuries (Annual Average)	18,029.8	1,442.6
Serious Injury Rate per 100M VMT	8.251	7.250
Number of Combined Non-Motorized Fatalities and Serious Injuries (Annual Average)	3,190.9	393.0

Single-county MPO/TPOs that encompass the entire limits of the county are calculated using the total county fatalities, serious injuries and traffic volumes as published. Multiple-county MPO/TPOs that encompass the entire limits of each of their included counties are calculated using the fatalities, serious injuries and traffic volumes summed for all of the included counties and are combined totals and rates calculated based on combined totals and combined traffic volumes. MPO/TPOs that do not encompass whole counties are not calculated at the MPO/TPO level but the county calculations for each included county are presented in the lower table.

DATA SOURCES: Fatality and serious injury counts from Florida Dept. of Transportation (FDOT) State Safety Office’s Crash Analysis Reporting (CAR) database as of January 10, 2023; any figures that include 2022 data are preliminary at this time and may change with future updates; traffic volumes as published by the FDOT office of Transportation Data and Analytics at <https://www.fdot.gov/statistics/mileage-rpts>

SYSTEM PERFORMANCE REPORT

TRENDS FOR MIAMI-DADE – STATISTICS

The TIP development process, consistent with the process used to develop the MPO’s Long-Range Transportation Plan, includes analysis of safety data trends, including the location and factors associated with crashes with emphasis on fatalities and serious injuries. These data are used to help identify regional safety issues and potential safety strategies for the LRTP and TIP.

The TPO uses crash data tracking fatalities and serious injuries in Miami-Dade County to analyze past trends and identify regional safety issues. Tracking these measures will help to estimate the effectiveness of future TPO transportation investment, as reflected in the TIP. The changes in Safety Performance Measures for the Miami-Dade TPO from 2017 through 2021 are shown in Table 3: Miami-Dade Safety Performance Management Measure Data. The measures shown in Table 3 were calculated by following the same methodology as that used to calculate the baseline conditions.

TABLE 3: Miami-Dade County Safety Performance Management Measure Data (FDOT Rolling 5-Year Average)

PERFORMANCE MEASURE	2013-2017	2014-2018	2015-2019	2016-2020	2017-2021
Number of Fatalities (Annual Average)	285.0	298.8	302.6	298.4	310.4
Fatality Rate per 100M VMT	1.453	1.502	1.507	1.507	1.570
Number of Serious Injuries (Annual Average)	1,807.4	1,747.6	1,664.4	1,518.0	1,442.6
Serious Injury Rate per 100 Million VMT	9.252	8.793	8.291	7.617	7.250
Number of Combined Non-Motorized Fatalities and Serious Injuries (Annual Average)	431.6	435.6	426.8	398.4	393.0
VMT (100M VMT)	195.795	199.092	200.995	198.566	198.251

DATA SOURCES: Fatality and serious injury counts from Florida Dept. of Transportation (FDOT) State Safety Office’s Crash Analysis Reporting (CAR) database as of January 10, 2023; traffic volumes as published by the FDOT office of Transportation Data and Analytics at <https://www.fdot.gov/statistics/mileage-rpts>.

ASSESSMENT OF SIGNIFICANT STATE PROGRESS

Florida's performance on meeting the Safety Performance Management Measures will be assessed by FHWA by determining if the state's target has been met or if significant progress toward meeting the target was made. "A State DOT is determined to have met or made significant progress toward meeting its targets when the targets for at least 4 out of the 5 safety performance targets are met or the outcome for a performance measure is better than its baseline." (<http://safety.fhwa.dot.gov>; Let's Talk Performance Webinar FAQs, Safety Performance Management Measures; page 5).

The first assessment of significant progress was conducted by FHWA in December 2019 to see if Florida met its 2014-2018 HSIP targets.. Subsequent assessments will be conducted in December of each year for the next rolling 5-year period for targets and baseline data (i.e.: the assessment in December 2021 will determine if the targets for 2016-2020 will be met or if significant progress is made toward the 2013-2017 baseline conditions).

COORDINATION WITH STATEWIDE SAFETY PLANS AND PROCESSES

The TPO recognizes the importance of linking goals, objectives, and investment priorities to established performance objectives, and that this link is critical to the achievement of national transportation goals and statewide and regional performance targets. As such, the Miami-Dade 2045 LRTP reflects the goals, objectives, performance measures, and targets as they are available and described in other state and public transportation plans and processes; specifically, the Florida Strategic Highway Safety Plan (SHSP), the Florida Highway Safety Improvement Program (HSIP), and the Florida Transportation Plan (FTP).

- The 2021 Florida Strategic Highway Safety Plan (SHSP) is the statewide plan focusing on how to accomplish the vision of eliminating fatalities and reducing serious injuries on all public roads. The SHSP was developed in coordination with Florida's 27 metropolitan planning organizations (MPOs) through Florida's Metropolitan Planning Organization Advisory Council (MPOAC). The SHSP guides FDOT, MPOs, and other safety partners in addressing safety and defines a framework for implementation activities to be carried out throughout the State.
- The FDOT HSIP process provides for a continuous and systematic process that identifies and reviews traffic safety issues around the state to identify locations with potential for improvement. The ultimate goal of the HSIP process is to reduce the number of crashes, injuries and fatalities by eliminating certain predominant types of crashes through the implementation of engineering solutions.
- Transportation projects are identified and prioritized with the MPOs and non-metropolitan local governments. Data are analyzed for each potential project, using traffic safety data and traffic demand modeling, among other data. The FDOT Project Development and Environment Manual requires the consideration of safety when preparing a proposed project's purpose and need, and defines several factors related to safety, including crash modification factor and safety performance factor, as part of the analysis of alternatives. MPOs and local governments consider safety data analysis when determining project priorities.

CONTRIBUTIONS TO ACHIEVING SAFETY PERFORMANCE TARGETS

The TPO and the Florida Department of Transportation (FDOT) are committed to making roadways safer in Miami-Dade County as a means to improve Florida's overall level of safety. The TPO has many programs, initiatives, and projects identified in the TIP and the LRTP to make transportation safer in Miami-Dade County. FDOT's key plan is its Work Program. The TPO and FDOT coordinate their plans and programs in order to improve the safety of the Miami-Dade transportation system, according to C.F.R. 450.332(b).

The TIP includes specific investment priorities that support all of the TPO's goals including safety, using a prioritization and project selection process established in the LRTP. The TPO has developed a TIP project selection process that identifies and prioritizes projects aimed at improving transportation safety. The ranking criteria are updated annually and are included in the appendices of the TIP. The current ranking criteria give the most point value to projects with the greatest anticipated fatality reduction. Going forward, the project evaluation and prioritization processes used in the LRTP and the TIP will continue to use a data-driven strategy that considers stakeholder input to evaluate projects that have an anticipated effect of reducing both fatal and injury crashes.

The program of projects identified through this process are anticipated to contribute toward achievement of the safety targets. The safety infrastructure investments are targeted at specific opportunities to improve safety. In addition to the specific safety programs included in the TIP, other programs also consider safety as a key factor. Safety impacts are considered in the evaluation of proposed preservation, capacity, and operations projects, including projects on Florida's Strategic Intermodal System as well as regionally significant facilities identified in the LRTP. All projects in this TIP inherently support progress towards achieving the safety performance targets, through their adherence to the TPOs policies, programs, and standards related to safety.

MIAMI-DADE TPO

TRANSPORTATION IMPROVEMENT PLAN — In total, the 2024-2028 TIP includes \$110M programmed within 2024-2028 on 67 projects that improve safety and to support the achievement of the established safety targets. The 2024-2028 TIP is located on the internet at: <http://www.interactip.com/>.

This includes Safe Routes to School projects, pedestrian safety projects, intersection safety projects and safety pushbutton projects. The Safety Performance Management Measures are incorporated into the 2024-2028 TIP to continue to advance transportation safety and link our investments to achieve our safety targets.

SYSTEM PERFORMANCE REPORT

Figure 6 shows a summary of the five Safety Performance Management Measures including: 2017 FDOT and Miami-Dade TPO baseline and 2022 FDOT and Miami-Dade TPO targets.

Figure 6: Summary of Safety Performance Management Measures

LONG RANGE TRANSPORTATION PLAN

The Miami-Dade 2045 LRTP increases the safety of the transportation system for motorized and non-motorized users as required. The LRTP aligns with the Florida SHSP and the FDOT HSIP with specific strategies to improve safety performance focused on prioritized safety projects, pedestrian and/or bicycle safety enhancements, and traffic operation improvements to address the goal to reduce fatalities and serious injuries. The TPO's commitment to safety is emphasized through the 2045 LRTP Goal to Increase the Safety of the Transportation System for All Users, which includes the following objectives:

- Improve the safety of the transportation system,
- Promote projects in high crash locations, and
- Improve safety of the transportation system of the elderly and disabled.

There are over 100 projects listed in the 2045 LRTP that will help improve safety of the Miami-Dade transportation system, including: capacity and operational improvements, redesigns of roadway segments, transportation systems management and operation (TSM&O), roadway and access improvements, adding truck lanes, and reconstruction projects. For a complete list of projects, please see Chapter 7 of the Miami-Dade 2045 LRTP; <https://miamidade2045lrtp.com/>.

The 2045 Miami-Dade Bicycle Pedestrian Master Plan serves as the non-motorized transportation element of the 2045 LRTP. The vision of the 2045 Miami-Dade Bicycle Pedestrian Master Plan is to enhance the accessibility, safety, public health, social equity, environment, and overall quality of life within Miami-Dade County by creating interconnected bicycle and pedestrian friendly communities throughout the county—with safety being a key component of the plan. A snapshot of the number of projects by Priority, improvement type, and funding allocation by priority and phase from the 2045 LRTP are summarized in Figure 7: Bicycle/Pedestrian Projects by Improvement Type and Priority and **Figure 8: Allocation of Bicycle/Pedestrian Funding by Priority and Phase (Thousands YOE \$)** on the next page. The 2045 Bicycle Pedestrian Master Plan can be located at: <http://miamidadetpo.org/library/plans/miami-dade-2045-bicycle-pedestrian-master-plan-2019-09.pdf>.

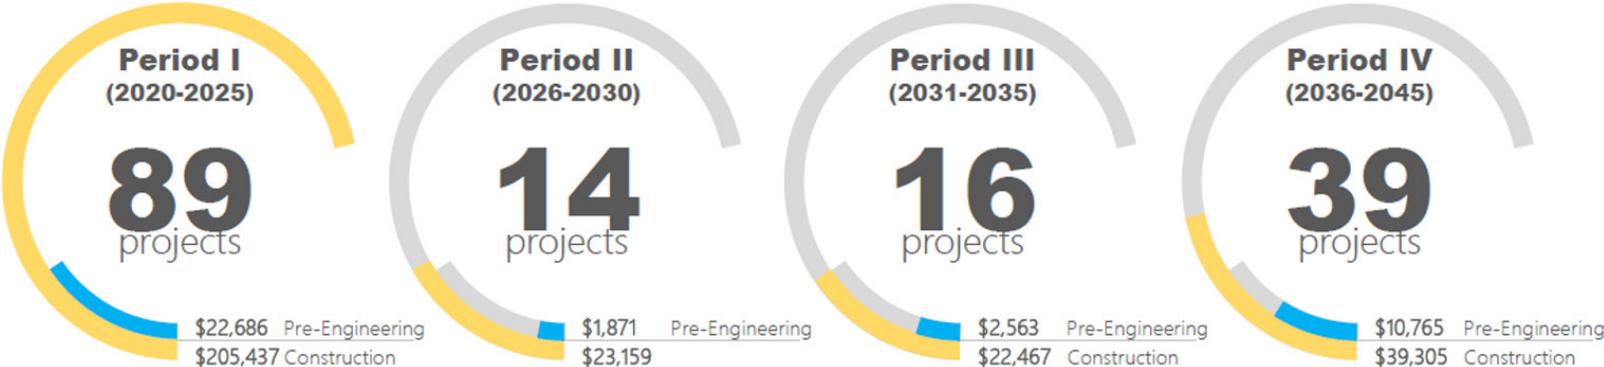

SYSTEM PERFORMANCE REPORT

For additional information on the Miami-Dade 2045 LRTP, please see the Miami-Dade 2045 Long Range Transportation Section of this report starting on page PM-80.

Figure 7: Bicycle/Pedestrian Projects per Priority Period and Improvement Type

Figure 8: Allocation of Bicycle/Pedestrian Funding by Priority Period and Phase (Thousands YOY \$)

UNIFIED PLANNING WORK PROGRAM (UPWP)

The Miami-Dade TPO Unified Planning Work Program (UPWP) for Transportation Planning Activities, Fiscal Years 2023/2024, outlines the planning projects the TPO will undertake to improve Miami-Dade County's multimodal transportation system. The UPWP identifies the planning projects budgets and activities that support the comprehensive and multimodal transportation improvement program approved for the metropolitan area in the 2045 LRTP. The planning efforts in the UPWP must implement the transportation priorities in the County Comprehensive Plan, which are based on the goals from the 2045 LRTP—inclusive of improving the safety of the transportation system for all users. Safety is addressed specifically in the Aging Road Users Strategic Safety Plan, Municipal Grant Program - South Miami Pedestrian Safety and Mobility Infrastructure Improvement Plan, and several Safe Routes to School tasks. Safety is also woven into many tasks that address safety improvements for trucking and goods movement and improving bicycle and pedestrian safety.

SMART MOVES PROGRAM: CONNECTING SMART IDEAS

The SMART Moves Program will be used by the TPO to prioritize and program planning studies in Miami-Dade that will support the delivery of projects including complete streets, first/last mile connections, connected and autonomous vehicles, and other priority projects that enhance connectivity, accessibility, and integration of the entire transportation system.

The SMART Moves Program can potentially utilize federal funding that is the responsibility of the TPO (such as Metropolitan Planning Funds (PL), Federal Transit Administration Section 5305(d) Funds, Congestion Mitigation for Air Quality (CMAQ), Surface Transportation Block Grant Program, etc.). This process will involve a once-a-year call for all local roadway, transit, freight, bicycle and pedestrian projects, and will result in an annual portfolio of projects in the UPWP.

The SMART Moves Program has two components:

1. Call for SMART Ideas: Connecting SMART Ideas to collect the public's input.
2. Application from Municipalities, which provides a mechanism to partner with local agencies for the implementation of projects.

PROGRAM OBJECTIVES

- Provide a mechanism for the TPO to partner with local agencies in the implementation of projects that will support complete streets, first/last mile connections, connected and autonomous vehicles and the SMART Plan.
- Develop a holistic approach for identifying and prioritizing highly effective transportation projects.
- Assist local agencies with delivery of multimodal projects that support transportation priorities in Miami-Dade County.
- Create a tracking system to monitor project status and expenditure of programmed funds.

VISION ZERO

The TPO's Vision Zero Plan was completed in June 2018 and is currently being implemented by DTPW. Vision Zero is a systematic approach to implementing safety countermeasures and policies to reduce, and ultimately eliminate fatalities and serious injuries related to mobility in Miami-Dade County. This Plan is based on a significant Data Collection effort to determine high-crash locations. Among the data collected are: Miami-Dade crashes for the years 2010-2014; traffic fatality data from the Florida Department of Health (DOH); and current vehicular volumes, bicycle and pedestrian counts, and transit ridership data. Crash data provide details on: location, crash type and contributing causes; vehicle information, such as mode, vehicle type and speed; and occupant information, such as numbers of fatalities and injuries, ages and impairment. Based on the data analyses, safety countermeasures were identified. The recommendations include short- and long-term, location-specific actions that address both crash prevention and injury reduction. A sub-set of priority projects has been identified for rapid implementation. The final report is saved here:

<http://www.miamidadetpo.org/library/studies/miami-dade-county-vision-zero-plan-2018-06.pdf>

FDOT

BICYCLE/PEDESTRIAN CORRIDOR IMPROVEMENTS

The bicycle/pedestrian network is a component of the overall transportation system. FDOT evaluates bicycle and pedestrian improvements in conjunction with capacity and resurfacing projects. Bicycle and pedestrian projects are also implemented by local agencies, who oversee construction and management. In addition, some projects are funded through the federally funded Transportation Alternatives Program (TAP) or the state funded Shared Use Non-motorized (SUN) Trail Program. FDOT is also in the process of developing a Bicycle Network Connectivity Assessment that is aimed to assess and inventory the Existing and Planned Bicycle Network and incorporate new potential corridors within a plan to improve the connectivity, accessibility, and safety of cyclists within Miami-Dade County. This assessment is placing a significant focus on the greenways and trails which will act as the centerpiece for which all other connections (existing, upcoming, previously planned, and new proposed projects determined through this process) will be viewed. The result of this assessment will be a detailed action plan containing proposed projects that will improve the safety and comfort of cycling throughout the County.

SAFE ROUTES TO SCHOOL

Florida's Safe Routes to School (SRTS) program is designed to help communities address school transportation safety needs and to encourage students to walk or ride their bicycle to school. The program encourages children to walk and bike to school by making walking and biking safe and appealing. The SRTS program integrates safety, traffic relief, health, environmental awareness and physical activity and fitness within a single program that is aimed at increasing walking and bicycling to school safely. The TPO annually works with Miami-Dade County Public Schools, Miami-Dade County Department of Transportation and Public Works and other agencies to submit applications to FDOT to obtain SRTS funding in future years. FDOT's commits \$7 million statewide annually to the SRTS program. From the 2017 to 2022 cycles, the TPO has participated in submitting applications for 50 schools.

COMPLETE STREETS PROJECTS

FDOT's Complete Streets Policy, adopted in September 2014, promotes safety, quality of life, and economic development. FDOT developed the Complete Streets Implementation Plan in partnership with the national not-for-profit organization Smart Growth America to guide FDOT's efforts to implement its Complete Streets Policy. The Plan recommended a five-part implementation framework for integrating a Complete Streets approach into FDOT's practices to ensure that future transportation decisions and investments address the needs of all users of the transportation system and is responsive to community goals and context. The Plan also proposed a two-year schedule for Complete Streets Implementation, including: (1) revising guidance, standards, manuals, policies, and other documents; (2) updating decision-making processes; (3) modifying approaches for measuring performance; (4) managing internal and external communication and collaboration during implementation; and (5) providing ongoing education and training.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)
 Transportation Performance Management
SYSTEM PERFORMANCE REPORT

**Infrastructure:
 Pavement and Bridge**

INFRASTRUCTURE (PAVEMENT & BRIDGE) PERFORMANCE MANAGEMENT MEASURES

Infrastructure Condition is the second national goal identified in MAP-21 and maintained in the FAST Act. In January 2017, the Federal Highway Administration published a Final Rule in the Federal Register entitled “National Performance Management Measures: Assessing Pavement Condition for the National Highway Performance Program and Bridge Condition for the National Highway Performance Program,” that included National Performance Management Measures to evaluate the pavement and bridge conditions on the National Highway System (NHS) [23 CFR § 490]. The Infrastructure Rule became effective on February 17, 2017.

PERFORMANCE MANAGEMENT MEASURES

The Infrastructure Rule requires State DOTs and MPOs to set targets for the following Infrastructure Performance Management Measures for the Interstate System and Non-Interstate NHS, and to report on progress toward achieving those targets. State DOTs report progress to FHWA, while MPOs report progress to their State DOT. FDOT’s 2017 Initial Transportation Asset Management Plan (TAMP) was released on April 30, 2018 and is the basis for setting the Transportation Performance Measure targets for pavement and bridge condition required by the performance management regulations in 23 CFR 490. The TAMP was later updated on June 28, 2019. [https://fdotwww.blob.core.windows.net/sitefinity/docs/default-source/planning/performance/fdot-transportation-asset-management-plan_\(june-28-2019\).pdf?sfvrsn=36c94a6b_2](https://fdotwww.blob.core.windows.net/sitefinity/docs/default-source/planning/performance/fdot-transportation-asset-management-plan_(june-28-2019).pdf?sfvrsn=36c94a6b_2)

In determining its approach to establishing performance targets for the federal pavement and bridge condition performance measures, FDOT considered many factors. To begin with, FDOT is mandated by Florida Statute 334.046 to preserve the state’s pavement and bridges to specific standards. To adhere to the statutory guidelines, FDOT prioritizes funding allocations to ensure the current transportation system is adequately preserved and maintained before funding is allocated for capacity improvements. These statutory guidelines envelope the statewide federal targets that have been established for pavements and bridges.

In addition, MAP-21 requires FDOT to develop a Transportation Asset Management Plan (TAMP) for all NHS pavements and bridges within the state. The TAMP must include investment strategies leading to a program of projects that would make progress toward achievement of the state DOT targets for asset condition and performance of the NHS. FDOT’s TAMP was updated to reflect MAP-21 requirements in 2018.

Further, the federal pavement condition measures require a new methodology that is a departure from the methods currently used by FDOT and uses different ratings and pavement segment lengths. For bridge condition, the performance is measured in deck area under the federal measure, while the FDOT programs its bridge repair or replacement work on a bridge by bridge basis. As such, the federal measures are not directly comparable to the methods that are most familiar to FDOT.

In consideration of these differences, as well as other unknowns and unfamiliarity associated with the new required processes, FDOT took a conservative approach when establishing its initial pavement and bridge condition targets. It is the intent of FDOT to meet or exceed the established performance targets.

SYSTEM PERFORMANCE REPORT

For the First Performance Period (January 1, 2018 to December 31, 2021) FDOT established the 2-year (end of calendar year 2019) and 4-year (end of calendar year 2021) performance targets for bridge and, pavement conditions on May 18, 2018.

For the Second Performance Period (January 1, 2022 to December 31, 2025) FDOT established 2023 and 2025 targets for NHS bridge and pavement on December 16, 2022 (FHWA changed the due date from October 1, 2022 due to a technical issue with the reporting system). These targets are identical to those set for 2019 and 2021 respectively. Florida's performance through 2021 exceeds the targets.

National Performance Management Measures to Assess Pavement Condition (23 CFR 490.307)

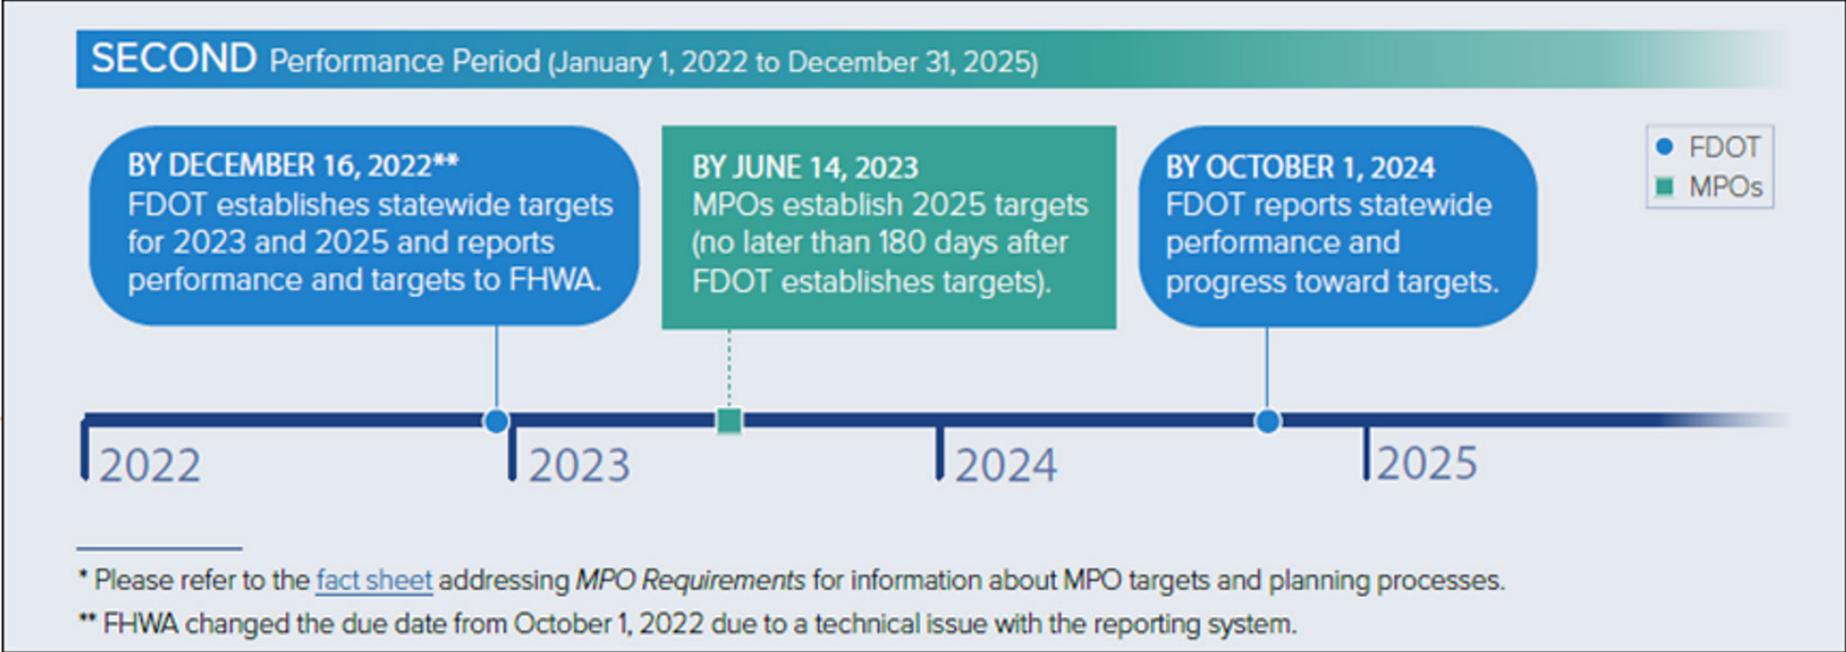

PERFORMANCE MEASURE	2023 TARGET	2025 TARGET
% of Interstate Pavements in Good Condition	n/a	≥ 60%
% of Interstate Pavements in Poor Condition	n/a	≤ 5%
% of Non-Interstate NHS Pavements in Good Condition	≥ 40%	≥ 40%
% of Non-Interstate NHS Pavements in Poor Condition	≥ 5%	≥ 5%

National Performance Management Measures to Assess Bridge Condition (23 CFR 490.407)

PERFORMANCE MEASURE	2023 TARGET	2025 TARGET
% of NHS Bridges Classified As in Good Condition by Deck Area	≥ 50%	≥ 50%
% of NHS Bridges Classified As in Poor Condition by Deck Area	≤ 10%	≤ 10%

SYSTEM PERFORMANCE REPORT

The timeline for the Second Performance Period is illustrated below (source FDOT):

MPOs must set 2025 targets by June 14, 2023 (within 180 days after FDOT set the statewide targets). MPOs have the option of supporting the statewide targets or establishing their own targets for the MPO planning area. The TIP must include the most recent reported performance and targets as well as a description of how the investments contribute to achieving the targets. The LRTP must include a System Performance Report that discusses performance and the progress achieved in meeting targets.

SYSTEM PERFORMANCE REPORT

PERFORMANCE TARGETS

By Resolution 44-18 on October 25, 2018 (illustrated in **Figure 9: TPO Resolution**), the TPO Governing Board agreed to support FDOT’s statewide pavement and bridge performance targets. By adopting these targets, the TPO will support achievement of the pavement and bridge targets by planning and programing projects in the TIP and LRTP that once implemented, are anticipated to make progress toward achieving the statewide targets.

Figure 9: TPO Resolution

Agenda Item 5.B.2

TPO RESOLUTION #44-18

RESOLUTION ESTABLISHING THE FLORIDA DEPARTMENT OF TRANSPORTATION'S PERFORMANCE MEASURE TARGETS FOR PAVEMENT CONDITION, BRIDGE CONDITION, NATIONAL HIGHWAY SYSTEM PERFORMANCE AND FREIGHT MOVEMENT

WHEREAS, the Interlocal Agreement creating and establishing the Miami-Dade Metropolitan Planning Organization (MPO), for the Miami Urbanized Area, now known as the Transportation Planning Organization (TPO), requires that the TPO provide a structure to evaluate the adequacy of the transportation planning and programming process; and

WHEREAS, the Transportation Planning Council (TPC) has been established and charged with the responsibility and duty of fulfilling the aforementioned functions; and

WHEREAS, the TPC has reviewed the Florida Department of Transportation’s performance measure targets, made a part hereof, and finds it consistent with the goals and objectives of the Transportation Plan for the Miami Urbanized Area,

NOW, THEREFORE, BE IT RESOLVED BY THE GOVERNING BOARD OF THE TRANSPORTATION PLANNING ORGANIZATION IN ITS ROLE AS THE MPO FOR THE MIAMI URBANIZED AREA, that the attached Florida Department of Transportation’s performance measure targets for pavement condition, bridge condition, national highway system performance and freight movement, are hereby established.

The adoption of the foregoing resolution was moved by Board Member Jose “Pepe” Diaz. The motion was seconded by Board Member Rebeca Sosa, and upon being put to a vote, the vote was as follows:

Chairman Esteban L. Bovo, Jr.-Aye		
Vice Chairman Francis Suarez-Absent		
Board Member Juan Carlos Bermudez -Aye	Board Member Vince Lago -Absent	
Board Member Jose “Pepe” Diaz -Aye	Board Member Daniella Levine Cava -Absent	
Board Member Audrey M. Edmonson -Aye	Board Member Roberto Martell -Aye	
Board Member Dan Gelber -Absent	Board Member Joe A. Martinez -Aye	
Board Member Oliver G. Gilbert, III -Aye	Board Member Jean Monestime -Absent	
Board Member Perla T. Hanftman -Absent	Board Member Dennis C. Moss -Aye	
Board Member Carlos Hernandez -Absent	Board Member Jeff Porter -Absent	
Board Member Sally A. Heyman -Absent	Board Member Shelly Smith Fano -Absent	
Board Member Eileen Higgins -Aye	Board Member Rebeca Sosa -Aye	
Board Member Barbara J. Jordan -Aye	Board Member Javier L. Souto -Aye	
Board Member Smith Joseph -Aye	Board Member Xavier L. Suarez -Aye	

The Chairperson thereupon declared the resolution duly passed and approved this 25th day of October, 2018.

Federal Performance Measures
FDOT Initial Targets for Pavement, Bridge and System Performance
May 18, 2018

Pavement Condition - National Highway System	2yr	4yr
Performance Measure	Target	Target
% of Interstate pavements in Good condition	n/a	≥ 60%
% of Interstate pavements in Poor condition	n/a	≤ 5%
% of non-Interstate NHS pavements in Good condition	≥ 40%	≥ 40%
% of non-Interstate NHS pavements in Poor condition	≤ 5%	≤ 5%

Bridge Condition - National Highway System	2yr	4yr
Performance Measure	Target	Target
% of NHS bridges classified as in Good condition by deck area	≥ 50%	≥ 50%
% of NHS bridges classified as in Poor condition by deck area	≤ 10%	≤ 10%

National Highway System and Freight Reliability	2yr	4yr
Performance Measure	Target	Target
% of person-miles traveled on the Interstate that are reliable	75%	70%
% of person-miles traveled on the non-Interstate NHS that are reliable	n/a	50%
Truck travel time reliability ratio (TRR) on the Interstate	1.75	2

SYSTEM PERFORMANCE REPORT

ASSESSING PAVEMENT CONDITION FOR THE NATIONAL HIGHWAY PERFORMANCE PROGRAM

State DOTs are required to collect performance measure data on the Interstate and Non-Interstate NHS and report it to the Highway Performance Monitoring System (HPMS). The Final Rule required State DOTs to submit a Data Quality Management Program plan to FHWA for approval by May 20, 2018. The Data Quality Management Program plan must include the State’s methods for identifying (i) how data collection equipment is calibrated and certified; (ii) how persons performing the data collection are certified; (iii) how quality control measures are implemented before, during and after the data is collected; (iv) how sampling, review and checking of the data is conducted; and (v) what procedures are used to resolve errors, along with criteria used to accept data [23 CFR § 490.319]. Once the State’s Data Quality Management Program has been approved by FHWA, State DOTs shall use the program to collect and report performance measure data to assess the State’s overall pavement condition.

For each pavement metric, a threshold is used to establish good, fair, or poor condition. Pavement condition is assessed for each 0.1-mile section of the through travel lanes of mainline highways on the Interstate or the non-Interstate NHS using these metrics and thresholds. A pavement section is rated as good if all three metric ratings are good, and poor if two or more metric ratings are poor. Sections that are not good or poor are considered fair.

The good/poor measures are expressed as a percentage and are determined by summing the total lane-miles of good or poor highway segments and dividing by the total lane-miles of all highway segments on the applicable system. Pavement in good condition suggests that no major investment is needed and should be considered for preservation treatment. Pavement in poor condition suggests major reconstruction investment is needed due to either ride quality or a structural deficiency.

The Pavement Condition Metrics used for the evaluation include:

- International Roughness Index (IRI) - an indicator of roughness; applicable to all asphalt and concrete pavements;
- Cracking percent - percentage of the pavement surface exhibiting cracking; applicable to all asphalt and concrete pavements;
- Rutting - extent of surface depressions; applicable to asphalt pavements;
- Faulting - vertical misalignment of pavement joints; applicable to certain types of concrete pavements; and
- Present Serviceability Rating (PSR) – a quality rating applicable only to certain lower speed roads (may be use on roadways with a posted speed limit of less than 40 Miles per Hour (MPH)).

Figure 10: Pavement Condition Metric Thresholds

Rating	Good	Fair	Poor
IRI <i>(inches/mile)</i>	<95	95-170	>170
PSR* <i>(0.0-5.0 value)</i>	≥4.0	2.0-4.0	≤2.0
Cracking Percent <i>(%)</i>	<5	<i>CRCP: 5-10</i> <i>Jointed: 5-15</i> <i>Asphalt: 5-20</i>	<i>>10</i> <i>>15</i> <i>>20</i>
Rutting <i>(inches)</i>	<0.20	0.20-0.40	>0.40
Faulting <i>(inches)</i>	< 0.10	0.10-0.15	>0.15

*PSR may be used only on routes with posted speed limit < 40mph.

Source: FHWA

SYSTEM PERFORMANCE REPORT

“These metrics collectively provide a way to quantify pavement condition in terms of roughness and cracking for all pavement types, rutting for asphalt pavement surfaces, and faulting (misalignment between concrete slabs) for jointed concrete pavement surfaces,” [23 CFR § 490]. The Pavement Condition Metric Thresholds can be seen in **Figure 10: Pavement Condition Metric Thresholds**.

Pavement condition is assessed for each 0.1-mile section of the through travel lanes of mainline highways on the Interstate or the non-Interstate NHS using these metrics and thresholds. A pavement section is rated as good if all three metric ratings are good, and poor if two or more metric ratings are poor. Sections that are not good or poor are considered fair.

The good/poor measures are expressed as a percentage and are determined by summing the total lane-miles of good or poor highway segments and dividing by the total lane-miles of all highway segments on the applicable system. Pavement in good condition suggests that no major investment is needed and should be considered for preservation treatment. Pavement in poor condition suggests major reconstruction investment is needed due to either ride quality or a structural deficiency.

INTERSTATE SYSTEM PAVEMENT PERFORMANCE — State DOTs began collecting data for Interstate pavement condition on January 1, 2018. State DOTs must submit their Interstate performance data, consistent with the requirements established under the Final Rule by April 15, 2019, and annually thereafter every April 15th to the Highway Performance Monitoring System (HPMS).

If a state has greater than 5 percent of pavement lane miles in poor condition for a given year, the state must obligate funds from their National Highway Performance Program (NHPP) funds and transfer a portion of it to their Surface Transportation Program (STP) funds in order to improve their Interstate pavement condition.

NON-INTERSTATE NHS PAVEMENT PERFORMANCE — Starting January 1, 2020, State DOTs will begin collecting performance data for Non-Interstate NHS pavement condition. State DOTs are required to submit their Non-Interstate NHS pavement condition data by June 15, 2021, and annually thereafter every June 15th to the Highway Performance Monitoring System (HPMS).

ASSESSING BRIDGE CONDITION FOR THE NATIONAL HIGHWAY PERFORMANCE PROGRAM

State DOTs, Federal agencies, and Tribal Governments are required to annually submit bridge inventory data to FHWA using the National Bridge Inspection Standards (NBIS). The data is reported in the National Bridge Inventory (NBI) Database, and includes data on bridge Deck, Superstructure, Substructure, and Culverts. State DOTs are required to submit their most recent NBI data by March 15th of each year. Under the Infrastructure National Performance Management Measures Final Rule, these metrics will be used to assess overall bridge condition. The Final Rule applies to all bridges on the NHS, including bridge on-ramps and off-ramps that are connected to the NHS. The condition metric thresholds used to evaluate bridges can be seen in **Figure 11: Bridge Condition Metric Thresholds**.

SYSTEM PERFORMANCE REPORT

If any of the metrics are less than or equal to 4 on the NBI rating scale, the bridge is considered structurally deficient. A bridge in good condition suggest that no major investment is needed. A bridge in poor condition is safe to drive on however, it is nearing a point where substantial reconstruction or replacement is needed. “FHWA shall calculate a ratio of the total deck area of all bridges classified as Structurally Deficient to the total deck area of all applicable bridges for each state,” [23 CFR § 490]. If 10 percent or less of the total deck area of bridges in the state are classified as structurally deficient, then the state has met the minimum condition level. If the state does not meet the minimum condition level for a period of 3 consecutive years, they must dedicate NHPP funds to eligible NHS bridge projects¹

BASELINE CONDITIONS — For the First Performance Period (January 1, 2018, to December 31, 2021) FDOT established the 2-year (end of calendar year 2019) and 4-year (end of calendar year 2021) performance targets for bridge and, pavement conditions on May 18, 2018.

For the Second Performance Period (January 1, 2022, to December 31, 2025) FDOT established 2023 and 2025 targets for NHS bridge and pavement on December 16, 2022 (FHWA changed the due date from October 1, 2022, due to a technical issue with the reporting system). These targets are identical to those set for 2019 and 2021 respectively. Florida’s performance through 2021 exceeds the targets.

The baseline conditions for pavement condition for Florida and for Miami-Dade County are shown in **Table 4 Baseline Pavement Condition Performance Management Measures 2017, 2019, and 2021**. The baseline conditions for bridge condition are shown in **Table 5: Baseline Bridge Condition Performance Management Measures 2018, 2019, and 2020**.

Figure 11: Bridge Condition Metric Thresholds

NBI Rating Scale <i>(from 0 – 9)</i>	9	8	7	6	5	4	3	2	1	0
	Good			Fair		Poor				
Deck <i>(Item 58)</i>	≥ 7			5 or 6		≤ 4				
Superstructure <i>(Item 59)</i>	≥ 7			5 or 6		≤ 4				
Substructure <i>(Item 60)</i>	≥ 7			5 or 6		≤ 4				
Culvert <i>(Item 62)</i>	≥ 7			5 or 6		≤ 4

% of NHS bridges classified as in Good Condition by deck area	66.6%	84.0%	66.2%	81.6%	65.5%	80.3%
% of NHS bridges classified as in Poor Condition by deck area	1.2%	0.4%	1.2%	0.2%	0.5%	0.2%

Source: FDOT

SYSTEM PERFORMANCE REPORT

For the First Performance Period (January 1, 2018, to December 31, 2021) FDOT established the 2-year (end of calendar year 2019) and 4-year (end of calendar year 2021) performance targets for bridge and, pavement conditions on May 18, 2018.

For the Second Performance Period (January 1, 2022, to December 31, 2025) FDOT established 2023 and 2025 targets for NHS bridge and pavement on December 16, 2022 (FHWA changed the due date from October 1, 2022 due to a technical issue with the reporting system). These targets are identical to those set for 2019 and 2021 respectively. Florida's performance through 2021 exceeds the targets.

ASSESSMENT OF SIGNIFICANT STATE PROGRESS — FHWA will determine if FDOT has made significant progress toward the achievement of each 2-year or 4-year statewide target if either:

- The actual condition/performance level is better than the baseline performance; or
- The actual performance level is equal to or better than the established target.

FHWA's determination of significant progress toward the 2021 bridge and pavement targets is anticipated in March 2023.. FHWA will not assess MPO target achievement. However, FHWA and FTA will review MPO adherence to performance management requirements as part of periodic transportation planning process reviews.

MINIMUM CONDITIONS — Every year, FHWA will assess if FDOT is meeting federal minimum condition standards for NHS bridges and Interstate pavements. If it is not, FDOT must obligate a specified percentage of available funds for maintenance of these facilities.

FDOT is on track to meet Minimum Condition Standards.

- Bridge: No more than 10 percent of total deck area of NHS bridges classified as Structurally Deficient (Poor condition) for three consecutive years.
- Pavement: No more than 5 percent of the Interstate System in Poor condition for most recent year.

COORDINATION WITH STATEWIDE PLANS AND PROCESSES

The TPO recognizes the importance of linking goals, objectives, and investment priorities to established performance objectives, and that this link is critical to the achievement of national transportation goals and statewide and regional performance targets. As such, the Miami-Dade 2045 LRTP reflects the goals, objectives, performance measures, and targets as they are described in other state and public transportation plans and processes, including the Florida Transportation Plan (FTP) and the Florida Transportation Asset Management Plan.

- The FTP is the single overarching statewide plan guiding Florida's transportation future. It defines the state's long-range transportation vision, goals, and objectives and establishes the policy framework for the expenditure of state and federal funds flowing through FDOT's work program. One of the seven goals defined in the FTP is Agile, Resilient, and Quality infrastructure.

SYSTEM PERFORMANCE REPORT

- The Florida Transportation Asset Management Plan (TAMP) explains the processes and policies affecting pavement and bridge condition and performance in the state. It presents a strategic and systematic process of operating, maintaining, and improving these assets effectively throughout their life cycle.

CONTRIBUTIONS TO ACHIEVING PAVEMENT & BRIDGE PERFORMANCE TARGETS

The TPO and FDOT are committed to ensuring the pavement and bridge condition in Miami-Dade County achieves the identified targets. The TPO has many programs, initiatives, and projects identified in the TIP and the LRTP to address pavement and bridge condition in Miami-Dade County. FDOT’s key plan is its Work Program. The TPO and FDOT coordinate their plans and programs to maintain an acceptable pavement and bridge condition of the Miami-Dade transportation system.

“The TIP shall reflect the investment priorities established in the current metropolitan transportation plan . . .” (23 CFR 450.326). The transportation plan (LRTP) “shall include both long-range strategies/actions that provide for the development of an integrated multimodal system...” (23 CFR 450.24). The TIP considers potential projects that fall into specific investment priorities established by the TPO in the LRTP including the goal to Improve and Preserve the Existing Transportation System. This process evaluates projects that have an anticipated effect on improving pavement and bridge conditions.

MIAMI-DADE TPO

TRANSPORTATION IMPROVEMENT PLAN — A preliminary review of the FY 2023/2024 to FY 2027/2028 TIP includes 95 projects totaling \$298M in Pavement and 34 projects totaling \$513M in Bridge Improvement Projects. The FY 2023/2024 to FY 2027/2028 TIP is located on the internet at: <http://www.interactip.com/>

This includes Safe Routes to School projects, pedestrian safety projects, intersection safety projects and safety pushbutton projects. The Pavement and Bridge Performance Management Measures are incorporated into the 2023/2024 to 2027/2028 TIP to continue to assess and preserve infrastructure investments to achieve our pavement and bridge targets. The projects identified as contributing to the achievement of Miami-Dade County’s pavement and bridge performance targets are listed in the table below:

LONG RANGE TRANSPORTATION PLAN — The Miami-Dade 2045 L RTP seeks to address system preservation, identifies infrastructure needs within the metropolitan planning area, and provides funding for targeted improvements. The TPOs commitment to Pavement and Bridge Performance is emphasized through the 2045 L RTP Goal to Improve and Preserve the Existing Transportation System, which includes the following objectives:

- Improve the resiliency/reliability of the transportation system,
- Reduce the vulnerability and increase the resilience of critical infrastructure to the impacts and events.
- Preserve infrastructure (sustainability and resilience), and
- Site and design new transportation infrastructure to minimize exposure to sea level rise within the infrastructure life span, based on the Southeast Florida Regional Climate Change Compact’s 2015 Unified Seal Level Rise Projection.

SYSTEM PERFORMANCE REPORT

Projects listed in the 2045 LRTP that contribute to pavement and bridge improvements are incorporated with capacity improvement projects. For a complete list of projects, please see Chapter 7 of the Miami-Dade 2045 LRTP; <https://miamidade2045lrtp.com/>.

For additional information on the Miami-Dade 2045 LRTP, please see the Miami-Dade 2045 Long Range Transportation Section of this report starting on page G-78.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)
 Transportation Performance Management
SYSTEM PERFORMANCE REPORT

System & Freight

SYSTEM & FREIGHT PERFORMANCE MANAGEMENT MEASURES

Congestion Reduction, System Reliability, and Freight Movement and Economic Vitality are three of the seven national goals identified in MAP-21 and maintained in the FAST Act. In January 2017, FHWA issued a Final Rule for system performance/freight/Congestion Mitigation Air Quality (CMAQ), entitled “National Performance Management Measures; Assessing Performance of the National Highway System, Freight Movement on the Interstate System, and Congestion Mitigation and Air Quality Improvement Program,” [23 CFR § 490]. The Rule went into effect on May 20, 2017, except for certain components of the greenhouse gas (GHG) measure, which went into effect as of September 28, 2017. Subsequently, FHWA repealed this performance management measure that assessed the percent change in tailpipe carbon dioxide (CO₂) (Greenhouse Gas) emissions on the NHS Compared to the Calendar Year 2017, effective July 2, 2018.

PERFORMANCE MANAGEMENT MEASURES

The Final Rule addresses the three areas as its name implies: performance, freight movement, and congestion/air quality. The Performance Management Measures under this rule will “assess the performance of the Interstate and non-Interstate National Highway System (NHS) for the purpose of carrying out the National Highway Performance Program (NHPP);” “freight movement on the Interstate System;” and “traffic congestion and on-road mobile source emissions for the purpose of carrying out the Congestion Mitigation and Air Quality (CMAQ) Program [23 CFR § 490]. State DOTs and MPOs are required to set targets for the Interstate System and Non-Interstate NHS, and to report on progress toward achieving those targets. State DOTs report progress to FHWA, while MPOs report progress to their State DOT. The CMAQ measures are limited to urbanized areas that that are a part of a nonattainment or maintenance area for ozone, carbon monoxide, or particulate matter. Since Miami-Dade County and all of Florida is attainment for these three pollutants, the CMAQ Performance Management Measures do not apply.

For the First Performance Period (January 1, 2018, to December 31, 2021) FDOT established the 2-year (end of calendar year 2019) and 4-year (end of calendar year 2021) performance targets for, National Highway System performance and freight mobility on May 18, 2018.

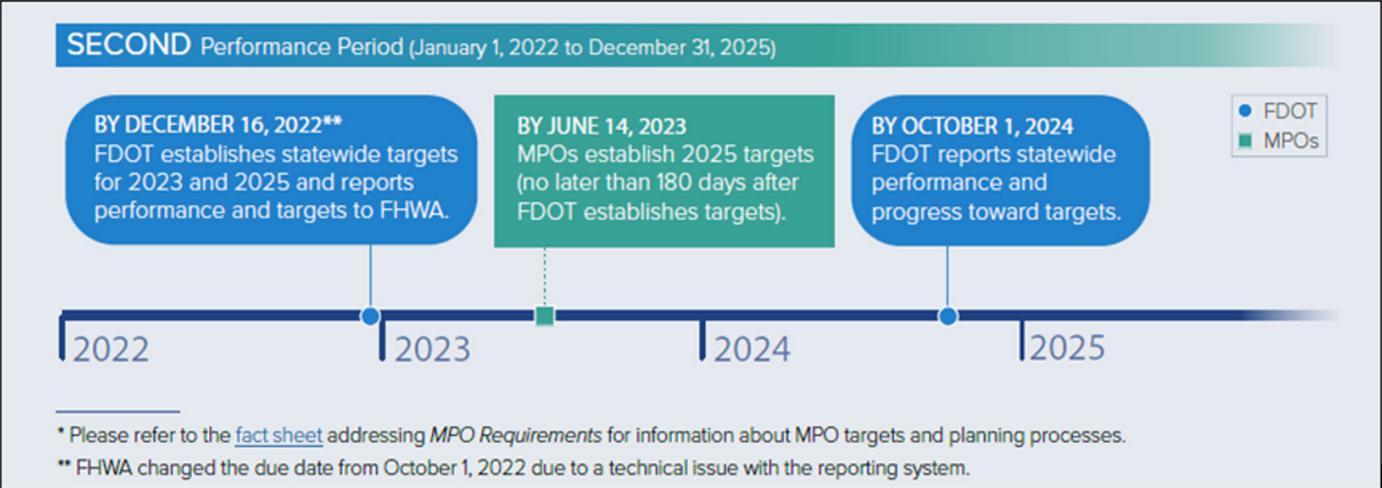

SYSTEM PERFORMANCE REPORT

For the Second Performance Period (January 1, 2022, to December 31, 2025) FDOT established 2023 and 2025 targets for NHS bridge and pavement on December 16, 2022 (FHWA changed the due date from October 1, 2022, due to a technical issue with the reporting system). These targets are identical to those set for 2019 and 2021 respectively. Florida’s performance through 2021 exceeds the targets.

National Performance Management Measures to Assess Performance of the NHS and Freight (23 CFR 490.507 and 490.607)

PERFORMANCE MEASURE	2023 TARGET	2025 TARGET
% of Person-Miles Traveled on the Interstate That Are Reliable	75%	70%
% of Person-Miles Traveled on the Non-Interstate That Are Reliable	n/a	50%
Truck Travel Time Reliability Ratio (TTR) on the Interstate	1.75	2.0

The timeline for the Second Performance Period is illustrated below (source FDOT):

MPOs must set 2025 targets by June 14, 2023 (within 180 days after FDOT set the statewide targets). MPOs have the option of supporting the statewide targets or establishing their own targets for the MPO planning area. The TIP must include the most recent reported performance and targets as well as a description of how the investments contribute to achieving the targets. The LRTP must include a System Performance Report that discusses performance and the progress achieved in meeting targets.

SYSTEM PERFORMANCE REPORT

PERFORMANCE TARGETS

The TPO Governing Board established the FDOT performance targets for National Highway System performance and freight mobility by Resolution 44-18 on October 25, 2018 (illustrated below in Figure 12 TPO Resolution). By adopting these targets, the TPO will support achievement of the NHS performance and freight mobility targets by planning and programming projects in the TIP and LRTP that once implemented, are anticipated to make progress toward achieving the statewide targets.

Agenda Item 5.B.2

TPO RESOLUTION #44-18

RESOLUTION ESTABLISHING THE FLORIDA DEPARTMENT OF TRANSPORTATION'S PERFORMANCE MEASURE TARGETS FOR PAVEMENT CONDITION, BRIDGE CONDITION, NATIONAL HIGHWAY SYSTEM PERFORMANCE AND FREIGHT MOVEMENT

WHEREAS, the Interlocal Agreement creating and establishing the Miami-Dade Metropolitan Planning Organization (MPO), for the Miami Urbanized Area, now known as the Transportation Planning Organization (TPO), requires that the TPO provide a structure to evaluate the adequacy of the transportation planning and programming process; and

WHEREAS, the Transportation Planning Council (TPC) has been established and charged with the responsibility and duty of fulfilling the aforementioned functions; and

WHEREAS, the TPC has reviewed the Florida Department of Transportation's performance measure targets, made a part hereof, and finds it consistent with the goals and objectives of the Transportation Plan for the Miami Urbanized Area,

NOW, THEREFORE, BE IT RESOLVED BY THE GOVERNING BOARD OF THE TRANSPORTATION PLANNING ORGANIZATION IN ITS ROLE AS THE MPO FOR THE MIAMI URBANIZED AREA, that the attached Florida Department of Transportation's performance measure targets for pavement condition, bridge condition, national highway system performance and freight movement, are hereby established.

The adoption of the foregoing resolution was moved by Board Member Jose "Pepe" Diaz. The motion was seconded by Board Member Rebeca Sosa, and upon being put to a vote, the vote was as follows:

Chairman Esteban L. Bovo, Jr. -Aye			
Vice Chairman Francis Suarez -Absent			
Board Member Juan Carlos Bermudez	-Aye	Board Member Vince Lago	-Absent
Board Member Jose "Pepe" Diaz	-Aye	Board Member Daniella Levine Cava	-Absent

SYSTEM PERFORMANCE REPORT

ASSESSING PERFORMANCE OF THE NATIONAL HIGHWAY SYSTEM

Travel Time Reliability is used to report the percent of person-miles traveled that are reliable on the Interstate and Non-Interstate NHS. “Data to reflect the users can include bus, auto, and truck occupancy levels.”ⁱⁱ The Level of Travel Time Reliability (LOTTR) is defined as:

$$\frac{\text{Longer Travel Time (80th)}}{\text{Normal Travel Time (50th)}} = \frac{\# \text{ seconds}}{\# \text{ seconds}} = \text{Level of Travel Time Reliability Ratio}$$

Data for the LOTT metric is collected in 15-minute increments during four time periods for each reporting segment: ⁱⁱⁱ

- Monday - Friday
 - 6:00 AM – 10:00 AM
 - 10:00 AM – 4:00 PM
 - 4:00 PM – 8:00 PM
- 6:00 AM Saturday – 8:00 PM Sunday

States and MPOs in coordination will define the reporting segments, and they must be continuous on the mainline highway. Starting in 2018, State DOTs are required to report the “LOTTR metrics and the corresponding 80th and 50th percentile times for each time period and directional AADT for each reporting segment by June 15th of each year, for the previous year’s measures,” ⁱⁱⁱ to the Highway Performance Monitoring System (HPMS). The LOTTR ratio for each segment must be below a 1.50 during all four time periods, otherwise the segment is not considered reliable. ⁱⁱⁱ

The Interstate Travel Time Reliability and Non-Interstate NHS Travel Time Reliability are reported to the nearest tenth of a percent. The formula for calculating Travel Time Reliability is:

$$100 \times \frac{\sum_{i=1}^R SL_i \times AV_i \times OF_j}{\sum_{i=1}^T SL_i \times AV_i \times OF_j}$$

Where:
R = total number of Interstate (Non-Interstate NHS) System reporting segments that are exhibiting an LOTTR below 1.50 during all of the time periods identified in § 490.511(b)(1)(i) through (iv);
I = Interstate (Non-Interstate NHS) System reporting segment “i”;
SL_i = length, to the nearest thousandth of a mile, of Interstate (Non-Interstate NHS) System reporting segment “i”;
AV_i = total annual traffic volume to the nearest single vehicle, of the Interstate (Non-Interstate) System reporting segment “i”;
J = geographic area in which the reporting segment “i” is located where a unique occupancy factor has been determined;
OF_i = occupancy factor for vehicles on the NHS within a specified geographic area within the State/Metropolitan planning area; and
T = total number of Interstate (Non-Interstate NHS) System reporting segments.

SYSTEM PERFORMANCE REPORT

ASSESSING FREIGHT MOVEMENT ON THE INTERSTATE SYSTEM

Freight movement on the Interstate is assessed using the Truck Travel Time Reliability (TTTR) Index also known as the Freight Reliability Measure. The TTTR Index metric is defined as:

$$\frac{\text{Longer Truck Travel Time (95th)}}{\text{Normal Truck Travel Time (50th)}} = \frac{\text{\# seconds}}{\text{\# seconds}} = \text{Truck Travel Time Reliability (TTTR) Ratio}$$

Data for the Truck Travel Time Reliability (TTTR) metric is collected during five time periods for each reporting section:

- Monday - Friday
 - Morning peak (6:00 AM -10:00 AM)
 - Midday (10:00 AM – 4:00 PM)
 - Afternoon peak (4:00 PM – 8:00 PM)
- Weekends (6:00 AM – 8:00 PM)
- Overnights for all days (8:00 PM – 6:00 AM)

Starting in 2018, State DOTs are required to report the “TTTR metrics and the corresponding 95th and 50th percentile times for each time period and each reporting segment by June 15th of each year, for the previous year’s measures,” iii to the HPMS. The Truck Travel Time Reliability is reported to the nearest hundredth. The formula for calculating Truck Travel Time Reliability is:

$$\frac{\sum_{i=1}^T (SL_i \times \max TTTR_i)}{\sum_{i=1}^T (SL_i)}$$

Where:

i = An Interstate System reporting segment;

maxTTTR_i = The maximum TTTR of the five time periods in paragraphs (a)(1)(i) through (v) of § 490.611, to the nearest hundredth, of Interstate System reporting segment “i”;

SL_i = Segment length, to the nearest thousandth of a mile, of Interstate System reporting segment “i”; and

T = A total number of Interstate System reporting segments.

SYSTEM PERFORMANCE REPORT

BASELINE CONDITIONS

On January 1, 2018, the first 4-year performance period for the System & Freight National Performance Management Measures began.

FDOT established the following 2023 and 2025 targets on December 16, 2022. These targets are identical to those set for 2019 and 2021, respectively. Florida's performance through 2021 exceeds the targets.

MPOs must set 2025 targets by June 14, 2023 (within 180 days after FDOT set the statewide targets). MPOs have the

option of supporting the statewide targets or establishing their own targets for the MPO planning area. The TIP must include the most recent reported performance and targets as well as a description of how the investments contribute to achieving the targets. The LRTP must include a System Performance Report that discusses performance and the progress achieved in meeting targets.

The baseline conditions for NHS and freight mobility for Florida and Miami-Dade County are shown in Table 6: Baseline NHS and Freight Mobility Performance Management Measures 2017, 2019 and 2021.

Table 6: Baseline NHS and Freight Mobility Performance Management Measures 2017, 2019 and 2021

NHS AND FREIGHT MOBILITY PERFORMANCE MANAGEMENT MEASURES								
PERFORMANCE MEASURES	2017 (Baseline)		2019		2020		2021	
	Florida	Miami-Dade	Florida	Miami-Dade	Florida	Miami-Dade	Florida	Miami-Dade
% of person-miles traveled on the Interstate that are reliable	82%	57%	84%	57%	92%	65%	88%	68%
% of person-miles traveled on the non-Interstate that are reliable	84%	59%	87%	62%	94%	82%	93%	77%
Truck travel time reliability ratio (TTR) on the Interstate	1.43	2.98	14.45	3.08	1.34	2.87	1.38	2.46

Source: FDOT

SYSTEM PERFORMANCE REPORT

ASSESSMENT OF SIGNIFICANT STATE PROGRESS

FHWA will determine if FDOT has made significant progress toward the achievement of each 2-year or 4-year statewide target if either:

- The actual condition/performance level is better than the baseline performance; or
- The actual performance level is equal to or better than the established target.

FHWA's determination of significant progress toward the 2021 interstate reliability and truck reliability targets is anticipated in March 2023. If FDOT does not make significant progress toward achieving a reliability target, it must document the actions it will take to achieve the target. For the truck reliability measure, it must provide additional freight congestion analysis and documentation.

FHWA will not assess MPO target achievement. However, FHWA and FTA will review MPO adherence to performance management requirements as part of periodic transportation planning process reviews.

COORDINATION WITH STATEWIDE PLANS AND PROCESSES

The TPO recognizes the importance of linking goals, objectives, and investment priorities to established performance objectives, and that this link is critical to the achievement of national transportation goals and statewide and regional performance targets. As such, the Miami-Dade 2045 LRTP reflects the goals, objectives, performance measures, and targets as they are described in other state and public transportation plans and processes, including the Florida Transportation Plan (FTP) and the Florida Freight Mobility and Trade Plan.

- The FTP is the single overarching statewide plan guiding Florida's transportation future. It defines the state's long-range transportation vision, goals, and objectives and establishes the policy framework for the expenditure of state and federal funds flowing through FDOT's work program. One of the seven goals of the FTP is Efficient and Reliable Mobility for People and Freight.
- The Florida Freight Mobility and Trade Plan presents a comprehensive overview of the conditions of the freight system in the state, identifies key challenges and goals, provides project needs, and identifies funding sources. Truck reliability is specifically called forth in this plan, both as a need as well as a goal.

CONTRIBUTIONS TO ACHIEVING SYSTEM & FREIGHT PERFORMANCE TARGETS

The TPO and FDOT are committed to ensuring the System and Freight performance in Miami-Dade County achieves the identified targets. The TPO has many programs, initiatives, and projects identified in the TIP and the LRTP to address system and freight performance in Miami-Dade County. FDOT's key plan is its Work Program. The TPO and FDOT coordinate their plans and programs to improve the reliability of the Miami-Dade transportation system, according to C.F.R. 450.332(b).

"The TIP shall reflect the investment priorities established in the current metropolitan transportation plan . . ." (23 CFR 450.326). The transportation plan (LRTP) "shall include both long-range strategies/actions that provide for the development of an integrated multimodal system..." (23 CFR 450.24). The TIP considers potential projects that fall into specific investment priorities established by the TPO in the LRTP. The TIP includes specific investment priorities that support the TPOs goals including improving system and travel, using a prioritization and project selection process established in the LRTP. This process evaluates projects that have an anticipated effect on improving the reliability of the NHS, Non-Interstate NHS, and truck travel time in Miami-Dade County.

SYSTEM PERFORMANCE REPORT

MIAMI-DADE TPO

TRANSPORTATION IMPROVEMENT PLAN — A preliminary review of the FY 2023/2024 to FY 2027/2028 TIP includes 106 projects totaling \$2,258M in projects that improve travel reliability. The FY 2023/2024 to FY 2027/2028 TIP is located on the internet at: <http://www.interactip.com/>. This includes capacity improvement and operational projects. The Pavement and Bridge Performance Management Measures are incorporated into the 2023/2024 to 2027/2028 TIP to continue to assess and preserve infrastructure investments to achieve our pavement and bridge targets.

The projects identified as contributing to the achievement of Miami-Dade County's system and freight performance targets are listed in the table below:

LONG RANGE TRANSPORTATION PLAN — The Miami-Dade 2045 LRTP seeks to address system reliability and congestion mitigation through various means, including capacity expansion and operational improvements. The TPO’s commitment to System and Freight Performance is emphasized through the 2045 LRTP Goal to Maximize Mobility Choices Systemwide, which includes the following objectives:

- Provide a comprehensive transportation network for dependable and reliable transportation options,
- Reduce congestion,
- Promote system reliability, and
- Increase mobility choices throughout the county.

There are over 60 projects listed in the 2045 LRTP that will help improve the system reliability of the Miami-Dade transportation system, including: implementation of the SMART Plan, other transit projects, and roadway capacity projects (widening and extensions) projects. For a complete list of projects, please see Chapter 7 of the Miami-Dade 2045 LRTP; <https://miamidade2045lrtp.com/>.

For additional information on the Miami-Dade 2045 LRTP, please see the Miami-Dade 2045 Long Range Transportation Section of this report starting on page G-78.

Transit Asset Management

SYSTEM PERFORMANCE REPORT

TRANSIT ASSET MANAGEMENT

In July of 2016, FTA published the “Transit Asset Management; National Transit Database” Final Rule. The Transit Asset Management (TAM) Final Rule requires grant recipients of FTA funds to develop asset management plans to inventory their public transportation assets. These assets include equipment, rolling stock, infrastructure, and facilities. The Final Rule also establishes performance measures and annual reporting requirements, and defines “state of good repair” (SGR).ⁱ The Rule went into effect as of October 1, 2016. [49 CFR § 625, 630].

SGR PERFORMANCE MEASURES

The TAM Final Rule required “transit providers and group TAM plan sponsors” to set initial SGR performance targets of the following measures by January 1, 2017. The transit providers and group TAM plan sponsors must coordinate with the State DOTs and MPOs to establish regional TAM performance targets. The transit providers and group TAM plan sponsors were required to provide the TAM targets to the MPO by June 30, 2017.ⁱⁱ

ASSETS (ONLY THOSE FOR WHICH THE AGENCY HAS CAPITAL RESPONSIBILITY)	SGR PERFORMANCE MEASURE
Equipment: Non-revenue support -service and maintenance vehicles	Percentage of non-revenue vehicles met or exceeded Useful Life Benchmark
Rolling Stock: Revenue vehicles by mode	Percentage of revenue vehicles met or exceeded Useful Life Benchmark
Infrastructure: Only rail fixed-guideway, track, signals, and systems	Percentage of track segments with performance restrictions
Facilities: Maintenance and administrative facilities; and passenger stations (buildings) and parking facilities	Percentage of assets with condition rating below 3.0 on FTA TERM Scale

Source: [49 CFR § 625, 630]

For equipment and rolling stock classes, useful life benchmark (ULB) is defined as the expected lifecycle of a capital asset, or the acceptable period of use in service, for a particular transit provider’s operating environment. ULB considers a provider’s unique operating environment such as geography and service frequency and is not the same as an asset’s useful life.

SYSTEM PERFORMANCE REPORT

The TAM rule defines two tiers of public transportation providers based on size parameters. Tier I providers are those that operate rail service or more than 100 vehicles in all fixed route modes, or more than 100 vehicles or more in one non-fixed route mode. Tier II providers are those that are a subrecipient of FTA 5311 funds, or an American Indian Tribe, or have 100 or less vehicles across all fixed route modes or have 100 vehicles or less in one non-fixed route mode. A Tier I provider must establish its own transit asset management targets, as well as report performance and other data to FTA. A Tier II provider has the option to establish its own targets or to participate in a group plan with other Tier II providers whereby targets are established by a plan sponsor, typically a state DOT, for the entire group.

There are two Tier I transit agencies that serve Miami-Dade County and include:

- Miami-Dade Department of Transportation and Public Works (DTPW) – Transit
- South Florida Reginal Transportation Authority (SFRTA)

MIAMI-DADE DEPARTMENT OF TRANSPORTATION AND PUBLIC WORKS (DTPW) - TRANSIT PERFORMANCE TARGETS

Public transportation agencies are required to establish and report transit asset management targets annually for the following fiscal year. Each public transit provider or its sponsors must share its targets, TAM, and asset condition information with each MPO in which the transit provider's projects and services are programmed in the MPO's TIP.

MPOs are required to establish initial transit asset management targets within 180 days of the date that public transportation providers establish initial targets. However, MPOs are not required to establish transit asset management targets annually each time the transit provider establishes targets. Instead, subsequent MPO targets must be established when the MPO updates the TIP or LRTP.

The Miami-Dade DTPW 2018 Transit Asset Management Plan was presented to the TPO Governing Board on July 19, 2018. The Miami-Dade TPO originally adopted the Miami-Dade Department of Transportation and Public Works SGR targets for Calendar Year 2018 per Resolution 06-18 on January 25, 2018. The Miami-Dade Department of Transportation and Public Works SGR targets were updated for Calendar Year 2021 and were adopted by the Miami-Dade TPO (Per Resolution #16-2021 on March 18, 2021, which establishes the relationship between performance, plans, and programs, and provides the basis and foundation for this performance framework. Beginning in 2022, the TPO will adopt the SGR targets annually as part of its TIP and will no longer utilize a separate resolution.

The Miami-Dade DTPW has established the following SGR performance targets for Fiscal Year 2020/2021:

SYSTEM PERFORMANCE REPORT

Asset Category: Rolling Stock

ASSET CATEGORY	ASSET CLASS / ASSET TYPE	FLEET SIZE	FLEET AGE	USEFUL LIFE (ULB)	FY20 TARGET	FY 20 PERFORMANCE METRIC (% Exceeding ULB)	FY 21 TARGET
REVENUE VEHICLES	Minibus (MB)	3	8.3	10	0%	0%	0%
	Over-The-Road (BU)	11	14.4	14	21.8%	100%	0%
	40 Foot Bus (BU)	710	5.39	14		30.6%	10.3%
	Articulated Bus (BU)	89	5.89	14		0%	0%
	Metrorail (HR)	220	15.61	31	22%	40.9%	22.7%
	Metromover (AG)	30	10.41	20	0%	.03%	0%

Paratransit and Contingency vehicles are not calculated in the performance metric based on SGR Reporting requirements. See TAM/NTD Crosswalk table for clarification.

Performance Metric Variance / Forecasted Changes

- a) **Minibus / Cutaway (Small Buses)** – A sale of small buses have adjusted the overall fleet age, performance metrics target and forecasted target. In addition, it is important to note that there are additional small vehicles used for passenger service which are owned and operated by a 3rd party contractor.
- b) **Large Bus Fleet** – The sale of many of the vehicles and anticipated receipt of one hundred and forty (140) Compressed Natural Gas (CNG) vehicles, projected addition of seventeen (17) Electric vehicles; the performance metrics will decrease. In addition, it is important to note that there are additional commuter vehicles used for passenger service which are owned and operated by a 3rd party contractors.
- c) **Metrorail (Heavy Railcars)** – Addition of thirty-eight (38) vehicles as of 9/30/18, fifty-eight (58) as of 9/30/19, thirty-four (34) as of 9/30/20, projection of the remaining six (6) vehicles prior to 9/30/21 and sale of fifty (50) legacy vehicles; the anticipated performance target is not expected to decrease.
- d) **Metromover (Automated Guideway)** – Useful Life Benchmark (ULB) adjustment from 31yrs to 20yrs per vendor signed contract.

SYSTEM PERFORMANCE REPORT

Asset Category: Non-Revenue Vehicles (Equipment)

ASSET CATEGORY	ASSET CLASS / ASSET TYPE	FLEET SIZE	FLEET AGE	USEFUL LIFE (ULB)	FY 20 TARGET	FY 20 PERFORMANCE METRIC (% Exceeding ULB)	FY 21 TARGET
Equipment	Automobile	82	8.48	8	40%	28%	25%
	Steel Wheel Vehicles	8	24.64	25	57%	50%	50%
	Trucks & Other Rubber Tire Vehicles	225	10.23	14	40%	37.3%	33.3%

Equipment with an acquisition value that exceeds \$50,000.00 such as construction and maintenance equipment (cranes, prime mover, fork lifts, solar panels battery packs and generators) are not calculated in the performance metric based on SGR Reporting requirements.

Performance Metric Variance / Forecasted Changes

- a) **Automobiles** – The sale and replacement of vehicles has decreased the fleet age and performance metric. Additional vehicle replacements are projected for the next fiscal year; therefore, the target is expected to decrease. Note: Many vehicles are put in service after the initial model year.
- b) **Steel Wheel Vehicles** – The sale and replacement of vehicles has decreased the fleet age and performance metric. However, the performance metrics is not expected to decrease as no replacement vehicles are requisitioned for next fiscal year.
- c) **Trucks & Other Rubber Tire Vehicles** – The addition of fifty (50) vehicles in conjunction with sale and replacement of decommissioned vehicles has resulted with a decreased fleet age. The forecasted performance target is a result of anticipated vehicle sales and no replacement vehicles within the next fiscal year.

SYSTEM PERFORMANCE REPORT

Asset Category: Infrastructure

ASSET CATEGORY	ASSET CLASS	SYSTEM (TRACK FEET)	TOTAL PERFORMANCE RESTRICTIONS	FY 20 TARGET	FY 20 PERFORMANCE METRIC (% Performance Restrictions)	FY 21 TARGET
Infrastructure	Rail Fixed Guideway	298,957	136	0%	6.36%	0%
	Mover Automated Guideway	46,464	0	0%	0%	0%

Infrastructure performance restrictions are being developed to capture the data as outlined by the revised definition. Currently the data is captured and reported at the highest level.

Guideway Performance Restrictions Requirements

- a) A performance restriction is defined to exist on a segment of rail fixed guideway when the maximum permissible speed of transit vehicles is set to a value that is below the guideway’s full service speed. This does not include the operationally modified design speed.
- b) The length of track miles under restrictions each month and must be calculated separately for each combination of rail fixed guideway modes and service types (Metrorail and Metromover).
- c) All restrictions are documented to the specific segment of track (except system-wide restrictions due to inclement weather, for example) are required to be included in the calculation, regardless of cause or duration, including temporary speed restrictions placed due to maintenance activity.
- d) An annual value for the length of track miles under performance restrictions to FTA by averaging the values calculated each month over the course of the year (DTPW reports on a fiscal year October to September).

SYSTEM PERFORMANCE REPORT

Asset Category: Facilities

ASSET CATEGORY	ASSET CLASS	ASSET CLASS / ASSET TYPE	NUMBER OF REPORTABLE FACILITIES	TOTAL FACILITIES ASSESSED	FY 20 PERFORMANCE METRIC (< 3 on TERM Scale)	FY 21 TARGET
Facilities	Maintenance & Administrative	Service & Inspection	3*	3	0%	0%
		Heavy Maintenance & Overhaul	1	1		
		Administrative / Sales Offices	2	6		
		Vehicle Washing	5	5		
		Revenue Collection	4	4		
		Combined Administrative & Maintenance	2	4		
		Vehicle Testing	1	1		
		Vehicle Blow-Down	2*	2		
		Vehicle Fueling	4	4		
		General Purpose Maintenance Facility/Depot	4	4		
	Other	15*	15			
	Passenger & Parking	Bus Transfer Center	25*	25	0%	0%
		Elevated Fixed Guideway Station	44	44		
		Parking Structure	9	9		
		Surface Parking Lot	24*	24		
Other		6	6			

*Total number of facility locations were revised by definition. Software is under development to capture and store future assessments.

SYSTEM PERFORMANCE REPORT

MIAMI-DADE 2023/24 – 2027/28 TIP CONTRIBUTIONS TO ACHIEVING TAM PERFORMANCE TARGETS

Projects in the 2023/24-2027/28 TIP that contribute to achieving the TAM performance targets include:

TPO PROJECT NO	FACILITY/PROJECT NAME	PROJECT DESCRIPTION
TA000106	MDT-Bus Purchase	Purchase of Vehicles/Equipment
TA11	FTA Section 5337 Federal Formula Funding	FTA Sec 5337 State of Good Repair Metromover/Metrorail
TA18	MDT Additional Elevators @ Dadeland North Metrorail Station	Construction of additional elevators at Dadeland North Metrorail Station
TA0000022	Rail Vehicle Replacement	Rail vehicle replacement of 136 car fleet
TA0000034	Metrorail and Metromover Fixed Guideway Bridge Inspection	Capital maintenance of existing guideway
TA0000006	Capitalization of Preventative Maintenance	Bus systems including security and emergency facilities and equipment
TA7	Bus Replacement	Replacement of buses to maintain the bus fleet replacement plan
TA0000076	Metromover Brickell Extension Guideway Painting	Painting and restoration of 1.1 miles of the existing rusted steel girders of the Metromover's Brickell extension
TA0000078	Metrorail Escalators Replacement and Elevators Refurbishment	Replace escalators and elevators at 22 Metrorail stations, and may also include bus garages and maintenance facilities
TA0000093	Track & Guideway Rehabilitation	Rehabilitate existing track and guideway equipment and fixtures
TA0000097	MDT Infrastructure Renewal Program	Replace and upgrade physical assets according to normal replacement cycles; program focuses on bus overhauls, rehabilitation of bus and rail facilities and system equipment
TAMDT290	Metromover Escalator Replacement and Elevator Refurbishment	Replace escalators and elevators at the 21 Metromover stations, and may also include bus garages and maintenance facilities

SYSTEM PERFORMANCE REPORT

SOUTH FLORIDA REGIONAL TRANSPORTATION AUTHORITY (SFRTA)

PERFORMANCE TARGETS

The South Florida Regional Transportation Authority (SFRTA) 2018 Transit Asset Management Plan was submitted to the TPO on September 28, 2018. The Miami-Dade TPO adopted the SFRTA SGR targets for Fiscal Year 2018 Per Resolution #19-19 on February 21, 2019, which established the relationship between performance, plans, and programs, and provides the basis and foundation for this performance framework. The SFRTA SGR targets were updated for Calendar Year 2022 and beginning in 2022, the TPO will adopt the SFRTA targets annually as part of its TIP, and will no longer utilize a separate resolution.

The South Florida Regional Transit Authority (SFRTA) has established the following SGR performance targets for Calendar Year 2023:

FTA Asset Classes	Performance Measure	2021 Performance	2022 Performance	2023 Target
Rolling Stock (Revenue Vehicles)	39 Year Useful Life	26.32%	30%	30%
Infrastructure (Rail fixed-guideway track)	Performance Restrictions (slow orders)	2.12%	0.15%	3.50%
Facilities (Stations, Maintenance Facilities and Operations Center)	1-5 Scale	5%	33%	5%
Equipment (Non-revenue support-service and maintenance vehicles)	8 Year Useful Life	50.00%	62.50%	50.00%

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)
 Transportation Performance Management
SYSTEM PERFORMANCE REPORT

Transit Safety Performance

SYSTEM PERFORMANCE REPORT

FTA published a final Public Transportation Agency Safety Plan (PTASP) rule and related performance measures as authorized by Section 20021 of the Moving Ahead for Progress in the 21st Century Act (MAP- 21). The PTASP rule requires operators of public transportation systems that receive federal financial assistance under 49 U.S.C. Chapter 53 to develop and implement a PTASP based on a safety management systems approach. Development and implementation of PTASPs is anticipated to help ensure that public transportation systems are safe nationwide.

The rule applies to all operators of public transportation that are a recipient or sub-recipient of FTA Urbanized Area Formula Grant Program funds under 49 U.S.C. Section 5307, or that operate a rail transit system that is subject to FTA's State Safety Oversight Program. The rule does not apply to certain modes of transit service that are subject to the safety jurisdiction of another federal agency, including passenger ferry operations that are regulated by the United States Coast Guard, and commuter rail operations that are regulated by the Federal Railroad Administration.

The PTASP rule was published on July 19, 2018 with an effective date of July 19, 2019. Transit operators subject to the rule must have a PTASP and safety targets in place by July 20, 2020. Due to the COVID-19 pandemic, this date was extended to December 31, 2020 and later extended again to July 20, 2021. MPOs must then establish transit safety targets no later than 180 days after the transit operators establishes its targets. Transit operators are required to review, update, and certify their PTASP annually.

The transit agency sets targets for the Transit Safety Performance Measures in the PTASP based on the safety performance measures established in the National Public Transportation Safety Plan (NPTSP). The DTPW established safety performance targets (SPTs) for the FTA National Transit Database (NTD) are illustrated in **Figure 13: Safety Performance Targets**.

SYSTEM PERFORMANCE REPORT

Figure 13: DTPW Safety Performance Targets 2023

SAFETY PERFORMANCE TARGETS	METRORAIL	METROMOVER	METROBUS
1. Total NTD Reportable Fatalities	3	2	5
2. Total NTD Reportable Fatality Rate per 1 Million Vehicle Revenue Miles	0.33	1.67	0.18
3. Total NTD Number of Reportable Injuries	7	2	41
4. Total NTD Rate of Reportable Injuries per Total Vehicle Revenue Miles	0.78	1.64	1.45
5. Total NTD Number of Reportable Safety Events	14	3	27
6. Total NTD Rate of Reportable Events per Total Vehicle Revenue Miles	1.56	2.46	0.96
7. System Reliability - Mean distance in miles between major mechanical failures	39,000 (Service Disruptions)	6,000 (Failures)	4,000 (Failures)

The initial Miami-Dade DTPW PTASP was presented to the TPO Governing Board on March 18, 2021 and were adopted by the Miami-Dade TPO (Per Resolution #14-2021) which establishes the relationship between performance, plans, and programs, and provides the basis and foundation for this performance framework. Beginning in 2022, the TPO will adopt the DTPW PTASP targets annually as part of its TIP, and will no longer utilize a separate resolution. With the PTASP approved by Board of County Commissioners Resolution R-1166-22 on December 6, 2022, DTPW established the 2023 Safety Performance Targets as illustrated above in Figure 13 which remain unchanged from 2021 and 2022.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)
 Transportation Performance Management
SYSTEM PERFORMANCE REPORT

**2045 Miami-Dade Long
 Range Transportation Plan**

SYSTEM PERFORMANCE REPORT

The Miami-Dade 2045 LRTP was adopted by the Miami-Dade TPO Governing Board on September 26, 2019. The 2045 LRTP guides citizens, businesses, and elected officials in fostering an innovative vision for the future of the transportation system over the next 26 years. The plan serves as a mechanism for the implementation of improvements to the transportation network through the identification and prioritization of transportation projects to address current and future needs.

The existing transportation system was analyzed with the projected increased population in 2045 to identify deficiencies in the transportation system for the 26-year period from 2020 to 2045. Over 300 improvement projects were identified to meet the desired mobility conditions.

These projects were reviewed and evaluated to develop the 2045 Cost Feasible Plan based on the projected available revenue of \$19.3 billion YOY dollars for new capital and new Operating and Maintenance (O&M).

- The development of the 2045 LRTP highlights the changes in transportation over the last five years, from focus areas and policy changes, to innovative and emerging technologies including: the implementation of the SMART Plan, Bus Express Rapid Transit (BERT), and rapid transit corridors; a standardized built environment classification system to help identify criteria for roadway design elements; the use of rideshare services, scooters and mobile applications to increase mobility and connectivity; and the emergence of connected, autonomous and electric vehicles.
- Miami-Dade County's population is projected to grow from 2.7 million in 2019 to 3.5 million people in 2045, representing a growth rate of 34 percent. The employment is projected to grow from 1.3 million to 1.8 million for the same time period, representing a 38 percent growth rate.

TRANSPORTATION PERFORMANCE MANAGEMENT

The 2045 Plan was developed through a performance-driven, outcome-based approach considering all modes of transportation. The Federal Highway Administration (FHWA) issued rules establishing required performance management measures for safety, pavement, bridges, system and freight, which are illustrated in the plan. FHWA defines Transportation Performance Management as a strategic approach that uses system information to make investment and policy decisions to achieve national performance goals. Transportation Performance Management is systematically applied, provides key information to understand investment decisions, and improves communications between decision makers, stakeholders, and the traveling public.

SCENARIO PLANNING

The 2045 LRTP implemented a scenario planning process to better understand the effect proposed strategies with different sets of transportation projects will have on the transportation system. Various multimodal transportation improvement and land use combinations including the SMART Plan, highway, transit, multimodal improvements, and new technologies were evaluated. Scenario Planning is an analytical framework that informs decision makers about the implications of various investments and policies on the transportation system and performance. The results of the SMART Plan land use planning process were incorporated into the scenario planning assessment. The TPO developed a tiered approach, with six scenarios, which aligned with the three scenarios used in the regional transportation plan, include the following:

Existing + Committed Network (Base Network)

The E+C Network represents the baseline conditions which consists of all existing transportation facilities plus projects that have construction funds committed through 2024.

Scenario 1 – 2040 Cost Feasible Plan

Scenario 1 consists of projects in the E+C Network and highway projects in the 2040 Cost Feasible Plan.

Scenario 2 – SMART Plan Transit

Scenario 2 consists of Scenario 1 projects plus all associated with the SMART Plan.

Scenario 3 – Highway Projects

Scenario 3 consists of Scenario 2 projects, adds additional highway projects in transportation agency master plans (FDOT, FTE, MDX, DTPW - Roadway), plus highway projects identified by stakeholders and public input to address deficiencies.

Scenario 4 – Beyond SMART Plan Transit Projects

Scenario 4 consists of Scenario 3, adds additional transit projects from past studies, plus transit projects beyond the SMART Plan identified by stakeholders and the public to address deficiencies.

Scenario 5 – Alternative Land Use

Scenario 5 consists of Scenario 4 projects with an alternate Land Use of the projected 2045 population and employment, shifting population growth along the SMART Plan rapid transit corridors; and

Scenario 6 – Technologies

Scenario 6 is the technologies scenario, which represents the implementation of future technologies identified, and their anticipated effect on the transportation system.

SYSTEM PERFORMANCE REPORT

Projects in each scenario were listed, mapped, modeled in the travel demand model (Southeast Florida Regional Planning Model - SERPM 8). Since this is a tiered scenario approach that is additive, the scenarios were modeled in numerical order. Scenario 6 Technologies was not modeled since the effects of technologies on transportation systems are not proven at this time. SERPM 8 is also being used for the development of the Southeast Florida Regional Transportation Plan (RTP) (for Miami-Dade, Broward, and Palm Beach Counties) for adoption in June 2020. The RTP is testing three scenarios including:

The scenarios analyzed for the Miami-Dade LRTP were tested corresponding to the regional scenarios as identified below:

MIAMI-DADE SCENARIOS	1	2	3	4	5
REGIONAL PLAN SCENARIOS	1	2	2	2	3

SYSTEMS PERFORMANCE — System measures assess the performance of the County’s transportation system as an integrated multimodal system. These measures were used to evaluate the scenarios. The scenarios, which represent a group of systemwide projects, were evaluated at the systems level to identify how each scenario compared to the baseline (E+C network) and to each previous scenario in the tiered approach. The criteria selected for evaluation came from the SERPM 8 and included:

- Transit Route Miles
- Vehicle Hours Traveled
- Vehicle Miles Traveled
- Lane Miles
- Peak Period Speed (MPH)
- Transit Boardings
- Vehicle Trips

SYSTEM PERFORMANCE REPORT

The results of the Scenario testing are shown in the table below **Table 7**. The scenarios analyzed for the Miami-Dade 2045 LRTP were tested corresponding to the regional scenarios as identified below:

Table 7 Scenario Results

SCENARIO	TRANSIT ROUTE MILES	VEHICLE HOURS TRAVELED	VEHICLE MILES TRAVELED	LANE MILES	PEAK PERIOD SPEED (MPH) (CONGESTED)	PERCENT LANE MILES WITH V/C > 1.0 (AM PEAK)	WORK TRIP LENGTH (MILES) (FROM COUNTY)	TRANSIT BOARDINGS	TOTAL NUMBER VEHICLE TRIPS
Existing + Committed Network	3,429.3	3,229,753	59,910,810	6,336.5	18.5	12.3%	14.5	528,116	9,327,652
1. 2040 Cost Feasible Plan	3,416.4	2,803,522	60,089,935	6,542.1	21.4	11.0%	14.6	545,829	9,332,792
2. SMART Plan Transit	4,043.4	2,700,914	58,803,508	6,500.9	21.8	10.7%	14.7	817,691	9,140,544
3. Highway	4,028.9	2,624,261	60,140,875	6,983.9	22.9	8.1%	14.8	783,792	9,214,728
4. Beyond SMART Plan	6,207.3	2,573,450	59,277,677	6,900.7	23.0	7.8%	14.8	965,672	9,085,476
5. Alternative Land Use	6,207.3	2,562,543	58,600,863	6,900.7	22.9	7.7%	14.7	1,005,772	9,026,204

* Scenario 6 was not analyzed at the same level due to unknown requirements and influences/impacts at this time.

The scenarios were also evaluated based on how each scenario contributes to meeting the targets of the National Performance Management Measures on the systemwide level. **Table 8** shows these results using a color scale to depict incremental anticipated improvements from the baseline (E+C network) by scenario and is based on:

- Transit projects provide additional mobility options, increases safety, and improves system reliability by eliminating vehicles on roadways,
- Roadway projects provide additional capacity, improve system reliability,
- Resurfacing, restoration, and rehabilitation projects improve pavement and bridge conditions, and
- Operational and intersection projects improve safety.

SYSTEM PERFORMANCE REPORT

Table 8: Performance Measure Scenario Results

SCENARIO/PLAN	SAFETY	PAVEMENT/ BRIDGE	SYSTEMS/ FREIGHT
Existing + Committed Network	BASELINE	BASELINE	BASELINE
1. 2040 Cost Feasible Plan	■	■	■
2. SMART Plan Transit	■	■	■
3. Highway	■	■	■
4. Beyond SMART Plan	■	■	■
5. Alternative Land Use	■	■	■
Cost Feasible Plan	■	■	■

- Scenario provides some improvement over the baseline
- Scenario provides more improvement over the baseline
- Scenario provides the most improvement over the baseline

PROJECT PRIORITIZATION — All projects identified as part of the scenario planning effort were evaluated in developing the Cost Feasible Plan. These projects represent a comprehensive and multimodal network of transportation projects to meet forecasted system-wide travel demands of Miami-Dade County. Scenario 5 (Alternative Land Use) is being addressed through separate initiatives that support the rapid transit corridors prioritized in this 2045 LRTP. Scenario 6 (Future Technologies) were highlighted in the 2045 LRTP, under Chapter 9, as to their potential impact on the future transportation network. Projects prioritization was based on scenario planning analysis,

TPO Governing Board resolutions, agency project priorities, and the 2045 LRTP Goals and Objectives. The combined results were used to develop the Cost Feasible Plan, which is constrained by available resources, as reflected in Chapter 7 of the Miami-Dade 2045 LRTP.

SYSTEM PERFORMANCE REPORT

Projects in the Cost Feasible Plan contributing to meeting the TPO and FDOT targets for the National Performance Management Measures are identified in the project tables by the primary performance measure addressed:

- PM1 Safety
- PM2 Pavement/Bridge
- PM 3 System/Freight

SYSTEMS PERFORMANCE

The TPO recognizes the importance of linking goals, objectives, and investment priorities to established performance objectives, and that the link is critical to the achievement of the national transportation goals and statewide and regional performance targets. As such, the Miami-Dade 2045 LRTP reflects the goals, objectives, performance measures, and targets as they are available and described in other state and public transportation plans and processes; specifically the Florida Strategic Highway Safety Plan (SHSP), the Florida Highway Safety Improvement Program (HSIP), the Florida Transportation Plan (FTP), the Florida Transportation Asset Management Plan, the Florida Freight Mobility and Trade Plan, and other public transportation plans and process.

SAFETY PERFORMANCE

The Miami-Dade 2045 LRTP increases the safety of the transportation system for motorized and non-motorized users as required. The LRTP aligns with the Florida SHSP and the FDOT HSIP with specific strategies to improve safety performance focused on prioritized safety projects, pedestrian and/or bicycle safety enhancements, and traffic operation improvements to address the goal to reduce fatalities and serious injuries.

The TPO's commitment to safety is emphasized through the 2045 LRTP Goal to Increase the Safety of the Transportation System for All Users, which includes the following objectives:

- Improve the safety of the transportation system,
- Promote projects in high crash locations, and
- Improve safety of the transportation system of the elderly and disabled.

The TPO will provide information from the FDOT HSIP annual reports to track the progress made toward the statewide safety performance targets. The TPO will document the progress on safety performance targets established by the TPO for its planning area.

SYSTEM PERFORMANCE REPORT

The Miami-Dade 2045 LRTP identifies safety needs within the metropolitan planning area and provides funding for targeted safety improvements. There are many projects listed in the LRTP that will help improve safety of the Miami-Dade transportation system, including: capacity and operational improvements, redesigns of roadway segments, transportation systems management and operation (TSM&O), roadway and access improvements, adding truck lanes, and reconstruction projects. In addition, a financial set-aside was established for bicycle and pedestrian, congestion management, and freight projects to ensure funding for these important projects that can improve safety of the Miami-Dade transportation system. For a complete list of projects, please see project listings (**pages 07-06 to 07-141 of the Miami-Dade 2045 LRTP**).

PERFORMANCE AND BRIDGE PERFORMANCE

The Miami-Dade 2045 LRTP seeks to address system preservation, identifies infrastructure needs within the metropolitan planning area, and provides funding for targeted improvements. The TPOs commitment to Pavement and Bridge Performance is emphasized through the 2045 LRTP Goal to Improve and Preserve the Existing Transportation System, which includes the following objectives:

- Improve the resiliency/reliability of the transportation system,
- Reduce the vulnerability and increase the resilience of critical infrastructure to the impacts and events. Preserve infrastructure (sustainability and resilience), and
- Site and design new transportation infrastructure to minimize exposure to sea level rise within the infrastructure life span, based on the Southeast Florida Regional Climate Change Compact's 2015 Unified Sea Level Rise Projection.

The cost to operate and maintain the existing and future transportation system were accounted for in the development of the Cost Feasible Plan. Operating and maintenance (O&M) cost for DTPW transit and roadways and for Districtwide SHS Existing Facilities are identified in Chapter 6. For FTE and MDX the cost to operate and maintain their existing facilities were identified in the process of developing the forecasted revenues. FTE also assumed the O&M for future projects through this process.

On or before October 1, 2020, FDOT will provide FHWA and the TPO a detailed report of pavement and bridge condition performance covering the period of January 1, 2018 to December 31, 2019. FDOT and the TPO also will have the opportunity at that time to revisit the four-year targets. Miami-Dade County currently achieves the established targets for Pavement and Bridge.

There are many projects listed in the Miami-Dade 2045 LRTP that will improve pavement and bridge conditions as a secondary benefit to widening and reconstruction projects. For a complete list of projects, please see project listings.

SYSTEM PERFORMANCE REPORT

TRANSIT ASSET MANAGEMENT

A total of \$27,900 million is identified to support progress towards TAM performance targets, transit investment, and maintenance funding in the Miami-Dade 2045 LRTP. This includes \$5,195 million for new transit capital and new O&M (27% of the available funds for new capital and new O&M (\$19.318), or 12% of the total LRTP revenue (\$43,745)). Also, DTPW – Transit has \$22,705 million of reoccurring obligations which includes \$905 million (2% of the total LRTP revenue (\$43,745 million)) for bus replacement and \$14,754 million (34% of the total LRTP revenue (\$43,745 million)) for O&M of the existing system. Improving the State of Good Repair (SGR) of capital assets is an overarching goal of this process.

SUMMARY

Projects contributing to meeting the TPO and FDOT targets for the National Performance Management Measures are identified in the project listings by the primary performance measure (PM number) addressed by the project. A summary of projects contributing to the performance management targets and are summarized by agency in Table 9.

Table 9: Number of Projects by Agency Contributing to PM Targets

AGENCY/MODE	PM1 SAFETY	PM2* PAVEMENT/BRIDGE	PM3* SYSTEMS/FREIGHT

Purpose, Contents and Concluding Statements

TIP • FISCAL YEARS 2023/2024 TO 2027/2028

PART 1: 4-YEAR FEDERALLY FUNDED PROJECTS

PURPOSE OF THIS SECTION

On December 4, 2015, President Obama signed into law the Fixing America's Surface Transportation Act, or "FAST Act". The FAST Act authorizes \$305 billion over fiscal years 2016 through 2020 for the Department's highway, highway and motor vehicle safety, public transportation, motor carrier safety, hazardous materials safety, rail, and research, technology and statistics programs. Overall, the FAST Act largely maintains current MAP-21 program structures and funding shares between highways and transit. It is a down-payment for building a 21st century transportation system. On September 30, 2020, the Senate passed a one-year extension of the FAST Act through Continuing Resolution. This extension also added \$13.6B to the Highway Trust Fund.

The intention of this section of Miami-Dade County's FY 2023/2024-2027/2028 TIP is to illustrate how the TPO's priorities are to be funded, by Federal funding category, and by fiscal year. Specifically, this section addresses the requirements for TIP development as cited in Title 23 USC Section 134 (subsections (h) 2 and (i) 4).

CONTENTS OF THIS SECTION

This section contains the project listings by major funding category. Projects are identified by Work Program Item Numbers and show the corresponding project description, type of work and funding for each of the first four (4) years of the TIP.

CONCLUDING STATEMENTS

- This section is presented in order to fulfill federal requirements as noted in Section 134 of Title 23, United States Code (ISTEA).
- Only major categories of federal funds are highlighted in this section.
- Only the first four years of the TIP (FY 2023/2024, 2024/2025, 2025/2026 and 2026/2027) are included in this section.
- The projects shown in this section are consistent with the FDOT District VI Adopted Work Program.
- Federal funds can reasonably be expected to be made available for all projects included in this section.

All information contained in this section is consistent with the adopted TIP attached hereto.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)
PART 2: 5-YEAR PROJECT LISTINGS

**State Transportation System
 and Major Projects**

TIP • FISCAL YEARS 2023/2024 TO 2027/2028

PART 2: 5-YEAR PROJECT LISTING **State Transportation System and Major Projects**

Florida Department of Transportation, District 6 (FDOT, D6)

This section of the Transportation Improvement Program (TIP) focuses on the State Transportation System and Major Projects located within Miami-Dade County. The projects listed include improvements to highways, transit, aviation, rail, seaport, freight, and bicycle/pedestrian modes over the next five fiscal years.

The FDOT, District Six, section provides an overview of the following topics:

- The FDOT Five Year Work Program
- The Work Program Cycle
- Programs and Funding
- Strategic Intermodal System (SIS) Projects
- Other Major Corridor Improvements
- Intelligent Transportation System (ITS) Program
- Bicycle/Pedestrian Corridor Improvements
- Freight Projects
- Public Transportation Projects
- SMART Plan Projects

THE FLORIDA DEPARTMENT OF TRANSPORTATION'S FIVE-YEAR WORK PROGRAM

The FDOT District Six Work Program is a major component of the Miami-Dade Transportation Planning Organization's (TPO) TIP. The Work Program, which is updated annually, is a project specific list of transportation activities and improvements that the FDOT will undertake during the next five-years. It is developed by the District in cooperation with the Miami-Dade TPO and is consistent with the 2045 Long Range Transportation Plan (LRTP), and TPO priorities. The projects must also meet the objectives of the Florida Transportation Plan (FTP). The first three years of the Adopted Work Program represent a commitment that local governments may rely on for planning purposes, and for the development of capital improvement elements of the local government comprehensive plans.

*All renderings used in this report are subject to change as they continue through the project phase and may not denote the final product

THE WORK PROGRAM CYCLE

In the summer of 2022, FDOT began the new cycle to develop the Tentative Work Program for Fiscal Years (FY) 2024 - 2028. The Department coordinates development of the Work Program with the TPO TIP Committee process and input is received through public hearings. The Tentative Work Program is then sent to the Governor's Office, Legislature, Florida Transportation Commission and the Department of Economic Opportunity for review and it will become effective as the Adopted Work Program on July 1, 2023.

PROGRAMS AND FUNDING

Program Descriptions — For budgeting purposes, the FDOT's Work Program comprises of eight budget categories. Programs are listed below:

- Safety Enhancements Initiatives
- Resurfacing
- Bridge Repair & Replacement
- State Highway System & Other Roads Construction
- Right of Way Land
- Product Support Consultants
- Operations & Maintenance Consultants/Contracts
- Modal Development

FDOT, D6 – STATE TRANSPORTATION SYSTEM AND MAJOR PROJECTS

FUNDING OVERVIEW

The Department’s funds are allocated among seven Districts statewide and the Florida Turnpike Enterprise. In Miami-Dade, the Department in consultation with the TPO, determines the best use of Miami-Dade’s share of funding. The Department’s resources are primarily from federal and state dedicated sources. The State Transportation Trust Fund and the Federal Highway Trust Fund receive revenue from specific tax sources for transportation purposes. Additional funding for Work Program projects comes from local and discretionary sources. By statute, the Department must develop a program that is balanced to cash and revenue forecasts.

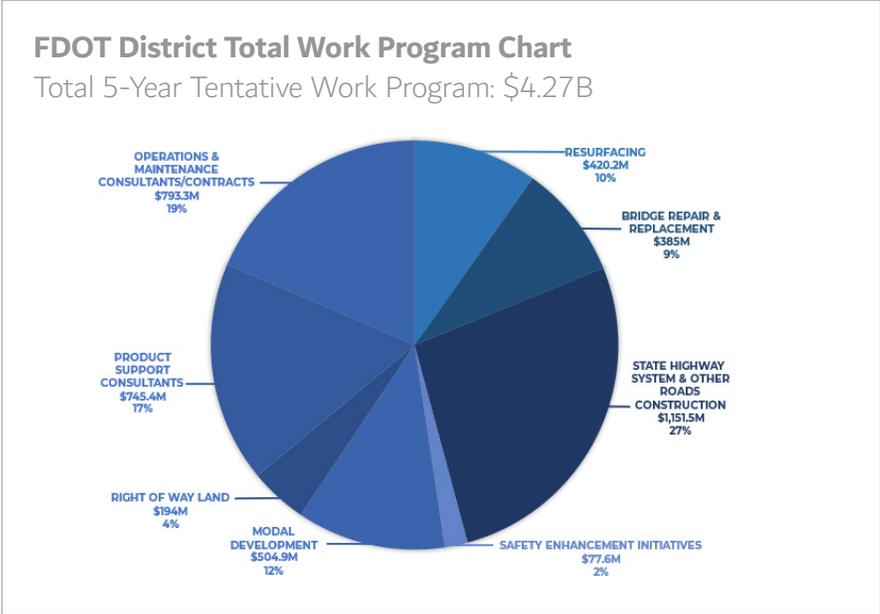

FDOT District 6, Total Budget Breakdown, Tentative Five-Year Work Program, Fiscal Years 2024–2028 — As shown in the Total Budget Breakdown chart to the right, the majority of the Department’s \$4.27 billion budget is applied to the state highway system and other roads construction budget in the amount of \$1.15 billion.

STRATEGIC INTERMODAL SYSTEM (SIS) PROJECTS

The Florida Legislature established the Strategic Intermodal System (SIS) to enhance Florida’s transportation mobility and economic competitiveness. The SIS consists of a network of high-priority transportation facilities which includes commercial airports, spaceports, deep water seaports, freight rail terminals, passenger rail, intercity bus terminals, rail corridors, waterways, and highways. These facilities represent the state’s primary means for moving people and freight between Florida’s diverse regions, between states and nations. The following are major SIS improvement projects in Miami-Dade County:

SR 826/PALMETTO EXPRESSWAY CAPACITY IMPROVEMENTS

This project consists of capacity improvements along the SR 826/Palmetto Expressway from North of NW 154 St to US 1/SR 5/Dixie Highway. The full project is approximately 17 miles in length. It is expected to improve mobility, relieve congestion, accommodate future growth and development in the region, enhance emergency evacuation, and improve connectivity with SR 826/Palmetto Expressway, I-75, SR 924/Gratigny Parkway, Florida’s Turnpike, I-595, and the SR 869/Sawgrass Expressway. The project is divided into two (2) major segments:

1. SR 826 / Palmetto Expressway Capacity Improvements — In February 2020 FDOT announced proposed improvements to this segment of the Palmetto express lanes to further address congestion. The planned improvements include:

The Department recently completed phase 1 improvements in the Northbound direction which included the following:

- Relocate the existing ingress north of NW 36 Street to the Okeechobee Road ingress to provide additional general purpose lanes capacity.
- Relocate the existing ingress north of Okeechobee Road to south of the northbound Okeechobee Road on- ramp to eliminate lane diving.
- Remove the exiting ingress at NW 36 Street.
- Relocate the existing egress south of NW 154 Street to south of NW 103 Street which creates a single express lane from NW 103 Street to NW 154 Street to provide additional general-purpose lanes capacity.

Improvements were completed and operations began September 2020.

Phase 2 of the Palmetto Expressway Capacity Improvements project from South of NW 36 Street to North of NW 154 Street is currently under construction. Phase 2 consists of improvements in both northbound and southbound as follows:

In the Northbound direction the improvement consists of the following:

- Widen as well as mill and resurface the mainline to provide full width inside and outside shoulders for improvements recently completed.

In the Southbound direction the improvement consists of the following:

- Modifying the NW 103 Street westbound to southbound flyover ramp pier along the outside general-purpose lane and subsequently widen the SR 826 mainline bridge and walls to create an additional general-purpose lane through NW 103 Street.
- Extend auxiliary lane between the Okeechobee Road and NW 74 Street interchanges to better facilitate weaving and improve capacity in the general-purpose lanes.
- Widen the bridge over NW 74 Street and Metrorail to better facilitate weaving and improve capacity in the general-purpose lanes.
- Relocate express lane ingress access at NW 154 Street to NW 103 Street to allow access to the express lane from NW 154 Street and NW 122 Street. This will convert an existing express lane to general-purpose lane from NW 154 Street to I-75.

Phase 2 is anticipated to be completed by Summer of 2024.

2. SR 826 / Palmetto Expressway South — The project on SR 826/Palmetto Expressway from US 1/SR 5/Dixie Highway to SR 836/Dolphin Expressway, approximately seven miles, is proposing corridor improvements that are expected to add highway and interchange capacity with the implementation of capacity and interchange improvements to meet future transportation demand, improve travel time reliability and provide long-term mobility options.

The project includes improvements to 10 interchanges, operational improvements to the Palmetto general purpose lanes and a direct connection to the Busway at the southern end of the project. This project will also include a new drainage system, lighting system and ITS system. Signalized intersections will be upgraded to current standards.

The project is in the Project Development and Environment (PD&E) phase.

For more information related to this project, visit <http://www.fdotmiamidade.com/826expresssouth.html>

For more information on these Palmetto Expressway projects visit: www.palmettoexpresslanes.com

GOLDEN GLADES INTERCHANGE RECONSTRUCTION

The Florida Department of Transportation (FDOT) District Six and Florida's Turnpike Enterprise are developing the design of several roadway projects within the Golden Glades Interchange (GGI) in Miami-Dade County. The proposed enhancements to the GGI Interchange include several miles of roadway and ramps. The overall project will help increase the regional connectivity to this major interchange. The project area consists of the following five major facilities: State Road (SR) 9A/I- 95, SR 826/Palmetto Expressway, Florida's Turnpike, SR 9, and SR 7/US 441/NW 7 Avenue. The scope of the project includes the following:

- Milling and resurfacing the Palmetto Expressway between NW 17 Avenue and the GGI
- Providing a direct connection flyover ramp from eastbound Palmetto Expressway to northbound I-95
- Relocating NW 12 Avenue entrance ramp to I-95
- Rebuilding and realigning various ramps throughout the interchange to meet current standards
- Rebuilding and widening northbound and southbound I-95 from the GGI to Miami Gardens Drive to accommodate future express lanes Rebuilding Florida's Turnpike Connector at the intersection of NW 2 Avenue and NW 167 Street
- Widening the southbound lanes of the Turnpike Connector to accommodate two lanes from Florida's Turnpike and three lanes from eastbound Palmetto Expressway to southbound I-95
- Providing a direct express lane connection from Florida's Turnpike to the southbound I-95 Express Lanes
- Relocating the SR 7 exit ramp from southbound I-95
- Rebuilding the westbound Palmetto Expressway bridge and entrance ramp to enhance access from Florida's Turnpike
- Widening southbound I-95 from Biscayne Canal to NW 135 Street to accommodate an additional lane for the southbound Turnpike Connector
- Rebuilding the pedestrian bridge at NW 147 Street to enhance pedestrian safety for Thomas Jefferson Middle School, Biscayne Gardens Elementary and the surrounding communities
- Rebuilding toll gantry
- Rebuilding and widening I-95 to provide a direct connection from northbound I- 95 Express Lanes to Florida's Turnpike
- Rebuilding ramp connections to meet current standards

The construction of the GGI projects will let in August of 2023, and the design and right-of-way phases are ongoing.

For more information on the project, please visit: <http://www.fdotmiamidade.com/design-projects/expressways/golden-glades-interchange-enhancement-projects.html>

The project video will provide a better visualization of this complex project.

FDOT, D6 – STATE TRANSPORTATION SYSTEM AND MAJOR PROJECTS

SR 25/US 27/OKEECHOBEE ROAD IMPROVEMENTS

A Project Development and Environment (PD&E) study was completed for SR 25/US 27/Okeechobee Road from SR 997/Krome Avenue to NW 79 Avenue in 2016. The following corridor improvements on SR 25/Okeechobee Road include:

SEGMENT LIMITS	IMPROVEMENTS	CONSTRUCTION YEAR
Broward County Line to East of the HEFT	Widening, capacity improvements, milling and resurfacing, as well as improving the frontage road on the north side of the said limits.	Construction Started February 2022
West of HEFT to West of NW 138 Street	Widening, milling, and resurfacing the roadway, including reconstruction of Frontage Road, storm sewer, Miami Canal dredging, signing and pavement marking, signalization, lighting, and intelligent transportation systems updates. Project Managed by Florida Turnpike Enterprise.	Construction Started March 2020
West of NW 138 Street to East of NW 107 Avenue	Reconstruct and widen roadway and widen the bridge over the Miami Canal at NW 138 St and NW 107 Avenue to provide a wider turning radius for large trucks. Improve the intersection of SR 25 at NW 107 Avenue and NW 138 St by adding new turn lanes and signals. Project is managed by Florida Turnpike Enterprise.	Construction Started March 2020
East of NW 107 Avenue to East of NW 116 Way	Full reconstruction to provide concrete and rigid pavement, replacement of bridges at NW 121 Avenue and NW 116 Way over Miami (C-6) Canal, design of two braided ramps under SR 25/Okeechobee Road to connect the mainline with the Frontage Road.	Construction Started March 2022
East of NW 116 Way to East of NW 87 Avenue	Full reconstruction to provide rigid pavement, grade separation of bridges over 87 Avenue, design of left turn lanes flyover bridges from Southbound NW 87 Avenue to Eastbound Okeechobee Road and from Northbound NW 87 Avenue to Westbound Okeechobee Road, a construction of a new bridge at NW 106 Street over the Miami (C-6) Canal, and the realignment of NW 103 Street and the frontage road within the project limits.	Early 2026
East of NW 87 Avenue to NW 79 Avenue	Road reconstruction using rigid pavement, widening Okeechobee Road, modify the intersection of NW 95 Street and Frontage Road, widen NW 79 Avenue bridge of Miami (C-6) Canal, and provide new access from Frontage Road to Westbound Okeechobee Road.	Late 2024
Interchange with SR 826/ Palmetto Expressway	Three new flyover ramps, the addition of turn lanes at the ramp intersections, and improvements to the Okeechobee Road and W 18 Avenue intersection.	Late 2024

For more information visit: <https://www.fdotmiamidade.com/okeechobee>

PROJECT DEVELOPMENT AND ENVIRONMENTAL STUDIES (PD&E)

The following are major PD&E projects in Miami-Dade County:

SR 9A/I-95 FROM SOUTH OF MIAMI GARDENS DRIVE TO NORTH OF BROWARD COUNTY LINE

PD&E Study for SR 9A/I-95 from Miami Gardens Drive to the north of Broward County Line will evaluate potentially providing additional express and/or general use lanes on SR 9A/I-95 from south of SR 860/Miami Gardens Drive to the north of Broward County Line and implementing interchange improvements at SR 860/Miami Gardens Drive and CR 854/Ives Dairy Road within Miami-Dade County.

Overall, the project will offer enhanced mobility options for motorists and transit users as it will provide additional capacity along the SR 9A/I-95 corridor throughout northern Miami-Dade County. Consistent with the existing managed lanes system on SR 9A/I-95, the additional express lanes are anticipated to operate using variable toll pricing based on congestion to optimize traffic flow.

The PD&E Study has the following project objectives:

- Address the deficient operational capacity and relieve existing/future congestion along the SR 9A/I-95 corridor.
- Preserve the operational integrity and regional functionality of SR 9A/I-95 (and, therefore, the regional transportation network) by complementing similar corridor improvements throughout Miami-Dade, Broward, and Palm Beach Counties.
- Enhance emergency evacuation and response times.

For information related to the project, visit: <http://www.fdotmiamidade.com/i95northPDE.html>

RESURFACING PROJECTS

The following are major resurfacing projects in Miami-Dade County:

SR 953/LEJEUNE ROAD/E 8 AVE FROM NW 79 STREET/E 25 TO NW 103 STREET/E 49 ST

The design for this project is underway. The project entails repaving and restriping SR 953/Lejeune Road/E 8 Avenue from NW 79 Street/E 25 Street to NW 103 Street/E 49 Street. This project will also be upgrade all pedestrian signals, signs, and curb ramps; relocate the midblock crossing at Flamingo Elementary School; upgrade signage and pavement markings; and add an emergency traffic light at SR 953/Lejeune Rd and E 42 St.

This project is anticipated to begin construction in late 2023 and will cost approximately \$3.6 million. For information about the construction schedule or related information, visit: <https://www.fdotmiamidade.com/design-projects/north-miami-dade/sr-953lejeune-rde-8-ave-from-nw-79-ste-25-st-to-nw-103-ste-49-st-1.html>

FDOT, D6 – STATE TRANSPORTATION SYSTEM AND MAJOR PROJECTS

SR 9336/SW 192 AVE (SW 376 ST TO SW 344 ST) AND SR 9336/SW 344 ST/PALM DR (SW 192 AVE TO SR 5/US 1)

The project entails repaving and restriping the roadways of SR 9336/SW 192 Ave from SW 376 Street to SW 344 Street and SW 344 Street from SW 192 Ave to SR 5/US 1. The design for this project is underway and divided into two segments. Specific improvements for each segment are listed below. The projects are anticipated to begin construction in Fall of 2023 and will cost approximately \$4.8 million combined.

For information about the construction schedule or related information, visit: <https://www.fdotmiamidade.com/design-projects/south-miami-dade/sr-9336sw-192-ave-sw-376-st-to-sw-344-st-and-sr-9336sw-344-stpalm-dr-sw-192-ave-to-sr-5us-1.html>

SEGMENT LIMITS	IMPROVEMENTS
SR 9336/SW 192 Avenue from SW 376 Street to SW 344 Street	<ul style="list-style-type: none">• Widening the road to provide 12-foot-wide travel lanes• Upgrading drainage• Providing five-foot shoulders, which will function as bicycle facilities, where feasible• Upgrading signs and pavement markings• Trimming trees• Installing speed feedback signs
SR 9336/SW 344 Street/Palm Drive from SW 192 Avenue to SR 5/US 1	<ul style="list-style-type: none">• Constructing a 12' wide shared-use path from SW 188 avenue to NW/SW 6 avenue• Widening N leg of the intersection of NW/SW 6 avenue along with safety improvements• Widening of sidewalk between NW/SW 6 avenue and SR 5/US1• Providing sod at unpaved shoulder• Repairing damaged sidewalks• Relocating or trimming landscaping• Upgraded lighting• Upgrading signs and pavement markings• Widening the shoulder at NW/SW 6 Avenue• Upgrading pedestrian signs, signals, and ramps

OTHER MAJOR PROJECTS

The following are major projects in Miami-Dade County:

SR 90/US 41/SW 8 ST AT SW 109 AVE PEDESTRIAN BRIDGE

This project is currently in the Design phase, which entails installing a pedestrian bridge over SW 8 street and the C-4 Canal west of SW 109 Avenue. Providing pedestrian plazas with elevator and stairs on the north-end and south-end of the pedestrian bridge. Installing decorative LED street lighting, street signage, sidewalk, hardscaping and landscaping along SW 109 Avenue between SW 7 Terrace and SW 6 Street. Upgrading pedestrian signals at SW 8 Street and SW 109 Avenue intersection. Providing a mid-block crosswalk on the north end of SW 7 Terrace and SW 109 Avenue intersection.

The project is anticipated to begin construction in mid-2023; will last about two years and will cost approximately \$21.59 million. For information about the construction schedule or related information, visit: <http://www.fdotmiamidade.com/design-projects/south-miami-dade/sr-90us-41sw-8-st-at-sw-109-ave-pedestrian-bridge-replacement.html>

SR 934/NE/NW 79 STREET

The Florida Department of Transportation (FDOT) District VI has conducted a Pedestrian Safety Study along SR 934 / NW 79th Street from NW 25th Avenue to NW 1st Place in Miami-Dade County in 2020. This study was initiated after a review of the 2015 Pedestrian High Crash List Locations. The intersections of SR 934 / NW 79th Street and NW 17th, 22nd, and 25th Ave. were added to the scope in 2021.

The objective of this study is to review pedestrian and bicycle crash patterns, identify their probable causes, and identify, develop, and evaluate cost-effective improvements targeted at mitigating these crashes. A benefit-to-cost ratio analysis was performed to evaluate the economic viability of the recommended improvements by converting the crash reduction into monetary value and estimating the total cost of the improvements in terms of construction, preliminary design, maintenance, right-of-way, and contingency costs.

Improvements along the SR 934 corridor are intended to provide safer transportation of pedestrians and mitigate the amount of pedestrian and bicycle crash patterns. The safety improvements involve adding midblock crossings at various locations in addition to moving existing crossings within intersections to safely allow pedestrians crossing opportunities. Additionally, signalization, signing and pavement marking, and lighting improvement are included to facilitate and improve these crossings.

The project is currently in the Design Phase which anticipated to be completed in 2025.

SR 907/ALTON ROAD FROM MICHIGAN AVENUE TO 43 STREET

This project is currently in the Design phase, and it generally entails roadway reconstruction on Alton Road from Michigan Avenue to 43 Street. The design of this project includes elevating the roadway profile, adding a two-way protected bicycle facility from Michigan to Chase, upgrading roadway lighting to LED, upgrading pedestrian ramps and sidewalks to current standards, replacing signal mast arms, and providing signing and pavement markings. The project will also provide drainage improvements by designing and constructing a new roadway drainage system, including two pump stations, with one outfall to the Intracoastal Waterway.

The project is anticipated to begin construction in Spring 2025 and end Fall 2027 and will cost approximately \$46 million. For information about the construction schedule or related information, visit: <http://www.fdotmiamidade.com/design-projects/beaches/sr-907alton-road-from-michigan-avenue-to-43-street-1.html>

SR 860/MIAMI GARDENS DRIVE FROM EAST OF I-75 TO NW 79 PLACE

This project is currently in the Design phase. The primary purpose of this project is to improve safety and relieve congestion along Miami Gardens Drive from east of I-75 to NW 79 Place by providing access management modifications to various median openings and increasing vehicular capacity. The proposed design widens the roadway from a four-lane facility to a six-lane facility, provides additional turn lanes at major intersections, and proposes a bicycle lane in each direction. Further improvements include milling and resurfacing of the existing pavement, replacing signal mast arms, lighting, upgrading pedestrian ramps and sidewalks to current standards, drainage improvements, and upgrades to the signing and pavement markings. Additional right-of-way acquisition is anticipated for this project.

The project is anticipated to begin construction in Spring 2025 and end Spring 2027 and will cost approximately \$10 million. For information related to this project, visit: <https://www.fdotmiamidade.com/design-projects/north-miami-dade/sr-860miami-gardens-drnw-186183-st-from-sr-93i-75-to-sr-823nw-57-ave.html>

BICYCLE/PEDESTRIAN CORRIDOR IMPROVEMENTS

The bicycle/pedestrian network is a component of the overall transportation system. The Department evaluates bicycle and pedestrian improvements in conjunction with all capacity and resurfacing projects.

Systemwide Bicycle/Pedestrian Improvements on Resurfacing Projects:

- New ADA-complaint pedestrian signal pushbuttons
- Pedestrian traffic signals at all signalized crosswalks
- Installation of missing crosswalks at signalized intersections where feasible
- Adding bicycle lanes by narrowing travel lanes where feasible
- Adding buffers/wider buffers to existing bicycle lanes where feasible

FDOT, D6 – STATE TRANSPORTATION SYSTEM AND MAJOR PROJECTS

FDOT D6 BICYCLE/PEDESTRIAN IMPROVEMENTS:

LOCATION	IMPROVEMENTS
SR 90/SW 8 St from West of SW 74 Ct to West of SW 57 Ave	Signalized midblock crossings at ten locations
SR 972/Coral Way at SR 933/SW 12 Ave and SW Ave	Installation of special emphasis pavement markings and improvements to address ADA compliance
SR 953/Lejeune Rd from Greco Ave to Granello Ave	Midblock pedestrian crosswalk
SR 860/Miami Gardens Dr/NW 183 St from NW 49 Ave to NW 48 Pl	Relocate west crosswalk (located between NW 52nd Avenue and NW 49th Avenue)
SR A1A /Harding Ave at 89 St	Upgrade uncontrolled crossings to signalized pedestrian crossing with pedestrian signal control, signal heads, and ramps
SR 90/SW 7 St from SW 27 Ave to Brickell Ave	Three new signalized midblock pedestrian crossings
SR A1A/Harding Ave at 90 St	Midblock pedestrian crossing with rectangular rapid-flashing beacons (RRFB)
SR 90/SW 8 St East of SW 29 Ave	Signalized midblock pedestrian crossing with countdown signal heads, curb ramps, signing and pavement markings and lighting
SR 90/SW 8 St from SW 56 Ave and Lisbon St + SR 90/SW 8 St from Capri St and Monterrey St	Signalized midblock pedestrian crossing with countdown signal heads, curb ramps, signing and pavement markings and lighting
SR 90/SW 8 St from SW 65 Ave and SW 64 Ct + SR 90/SW 8 St from SW 64 Ave and SW 63 Ave	Signalized midblock pedestrian crossing with countdown signal heads, curb ramps, signing and pavement markings and lighting

Bicycle & pedestrian projects are also implemented by local agencies, who oversee construction and management. In addition, some projects are funded through the federally funded Transportation Alternatives Program (TAP), or state funded Shared Use Non-motorized (SUN) Trail Program. The Safe Routes to Schools (SRTS) program integrates safety, traffic relief, health, environmental awareness, physical activity and fitness under one program focusing on school zones. Table below shows some of the upcoming improvements by local agencies.

FDOT, D6 – STATE TRANSPORTATION SYSTEM AND MAJOR PROJECTS

LOCAL AGENCY BICYCLE/PEDESTRIAN IMPROVEMENTS:

PROJECT AGENCY/PROGRAM	PROJECT TYPE	PROJECT AREA
City of Miami Beach	Bike Lane/Sidewalk	17 Street Bicycle Lane Project
City of Miami Gardens	Bike Path/Trail	NW 199 St/Betty Ferguson Recreation Complex
Safe Routes to School Infrastructure	Pedestrian Safety Improvements	Homestead Middle School, North Miami Beach Senior High School, Miami Jackson Senior High School, and Ruben Dario Middle School
Miami-Dade County	Bike Path/Trail	GGF to Industrial Park – Bike-Ped Bridge and Kiss-Ride Terminal
City of Miami	Sidewalk	Miami River Greenway Curtis Park East
Miami-Dade County	Bike Path/Trail	Bike Boulevard Demo Project – along NW 21 Ave from NW 41 St to NW 83 St

As part of the on-going effort to assess and improve the bicycle & pedestrian infrastructure the District conducts planning level feasibility assessments that explore potential improvements to roadways to improve the bicycle/pedestrian network.

FDOT, D6 – STATE TRANSPORTATION SYSTEM AND MAJOR PROJECTS

FDOT D6 BICYCLE/PEDESTRIAN FEASIBILITY ASSESSMENTS:

NAME	LIMITS	STATUS
SR 856/Lehman Causeway Feasibility Analysis & Conceptual Plans	From US-1/Biscayne Blvd to SR A1A/Collins Ave	Completed
SR 90/SW 8th Street Protected Shared Use Path Feasibility Analysis	From SR 997/Krome Ave to SW 137 Ave	Completed
SR-94 Kendall Dr. Shared-Use Path Feasibility Study	From SR 997/Krome Ave/SW 177 Ave to SW 162 Ave	Completed
SR 972/SW 13th Street Feasibility Analysis	From SR 972/SW 3rd Ave to SW 15 Road	Completed
Little Havana Area to Brickell & Underline Route Options Assessment and Feasibility Analysis	From SR 9/NW 27 Ave to Underline	In Progress
SR 976 Bird Road Multimodal Gap Assessment	From SR 959/SW 57 St/Red Road to SR 5/US-1/S Dixie Highway	In Progress
SR 913/SW 26th Road Bicycle and Pedestrian Improvement Feasibility Analysis	From Underline to Rickenbacker Causeway	In Progress
SR 9336/SW 344 St Feasibility Study	From SW 192 Ave to SW 182 Ave	In Progress
SR 826 Frontage Rd Separated Bicycle Facilities	From NW 154th St to NW 57th Ave/Red Road	In Progress

INTELLIGENT TRANSPORTATION SYSTEM (ITS) PROGRAM 9336

The Florida Department of Transportation's District Six Transportation Systems Management and Operations (TSM&O) Program Office focuses on implementing multi-modal traffic management strategies to optimize the safety and people-moving capacity of our regional roadway system.

The Office uses a series of innovative services and technologies to provide transportation solutions that meet traffic demand. These services include incident management, traveler information, managed lanes, transit, and others. The combination of these strategies provides our roadways with a multi-pronged approach to congestion management to benefit all users. The SunGuide Transportation Management Center (TMC) houses the District's TSM&O Program and serves as the main traffic hub for the southeast Florida region. TSM&O staff located at the TMC uses Intelligent Transportation System (ITS) devices such as closed-circuit television cameras and roadway detectors to manage traffic 24 hours per day, 7 days per week. They monitor the roadways to provide real-time traffic management services and identify potential improvements. The goal is to optimize current operations while expanding the program to meet future demand. The Office has remained committed to this goal and recently implemented adaptive signal control technologies and infrastructure to vehicle strategies in Miami-Dade County. It is working on launching its first connected and automated vehicle project in Monroe County.

The District Six TSM&O program is committed to improving safety, enhancing mobility, and inspiring innovation through the implementation of proven traffic management strategies and technologies. For more information, please visit www.sunguide.info

FREIGHT, LOGISTICS AND PASSENGER OPERATIONS

The FDOT Freight, Logistics, and Passenger Operations (FLP); commonly known as Modal Development Office; encompasses a level of modal representation and industry engagement unlike any other DOT organization within the state of Florida. FLP acts as a tool to better connect, develop, and implement a freight planning process that maximizes the use of existing facilities while integrating and coordinating the various modes of transportation, including the combined utilization of both government owned and privately-owned resources.

Rail

- Passenger and Freight Rail Safety Projects
- Railroad Crossing Surface Rehabilitation Projects
- Grade Separation on NE 203 Street
- SR 826 / Palmetto Expressway (SB) Bridge Widening over the FEC
- I-395 Signature Bridge over the Florida East Coast Railway (FEC)

Seaport

- Port of Miami Passenger Boarding Bridges
- Port of Miami Cruise Terminal Improvements
- Port of Miami Upland Cargo Improvements
- Port of Miami Inland Cargo and Container Distribution Center

Aviation

- MIA Perimeter Road Widening and Realignment
- MIA Fuel Tanker Parking Facility
- MIA Central Base Pavement Rehabilitation
- MIA Airport Operations and Communication Center (AOCC)
- MIA Surface Management System (Aerobahn System)
- Miami-Opa Locka Executive Airports Custom Building Expansion
- Miami Executive Airports Taxiway D Connector and Rehabilitation
- Dade-Collier Training and Transition Airport CCTV
- Miami-Homestead General CCTV Camera Installation
- MIA Federal Inspection Station Refurbishment

Annually, FLP allocates funds toward transportation infrastructure improvements in all the modes. Working together collaboratively, FLP leads Florida's multimodal transportation initiatives through work with federal and local government partners in planning, coordination, financing, grant management, ridership, and regional analysis. The Modal Development Office includes Aviation, Rail, Freight, Seaports, and Transit.

STATE TRANSIT BLOCK GRANT TO DTPW FOR OPERATING COSTS

This grant provides operating assistance for the Miami-Dade Department of Transportation and Public Works (DTPW) Fixed Route Bus Service. The Metrobus fixed route bus service is run by Miami-Dade DTPW and operates seven days a week, 24 hours per day. A total of 73 routes – Miami-Dade DTPW directly operates a regular bus service structure which is served by a total fleet of 767 buses and 30 contracted routes with 194 contractor-owned buses. Two of these Contract Routes are Express Bus Service in Monroe County with 11 buses. Metrobus includes local, feeder, circulator, limited-stop, express, and Bus Rapid Transit (BRT) Arterial Busway services. The FDOT provides 50% State Participation Rate for this program.

FREIGHT OVERVIEW

From agriculture and heavy equipment to daily consumables, freight movement impacts every aspect of our daily lives. It is crucial for the nation's economy to maintain a safe and reliable transportation system that moves goods efficiently. Freight transportation has been a driving force for economic productivity, global competitiveness, and job creation. Every economic sector depends on a reliable, safe, and cost-effective network to move goods and services. As a leading international hub, this statement is very relevant to the state of Florida. With goods worth approximately hundreds of billions of dollars flowing through Florida's airports and seaports, it is critical for the State to maintain and improve its extensive multimodal freight infrastructure. Today, Miami International Airport (MIA) is the nation's top handler of international air cargo. Similarly, PortMiami is the world's top processor of cruise passengers and is the State's fourth highest port for total trade tonnage and highest in cargo value. It is known as a Global Cargo Gateway. These major freight hubs, along with a booming construction industry, growing population and strong local economy indicate Miami-Dade County is vital for the movement of freight throughout Florida and beyond its borders.

FDOT District Six is home to many diverse communities with unique transportation freight mobility and transportation needs. These needs can be traced back to some of the State's leading freight facilities and international trade gateways such as MIA and PortMiami. With significant investments made to these facilities to compete globally for new cargo opportunities stemming from the expansion of the Panama Canal, increased use of the Suez Canal, and growing North/South trade, these facilities are expected to increase demand for regional warehouses, distribution centers, cold treatment facilities, foreign trade zones, and truck parking facilities. With an anticipated doubling in cargo activity handled at PortMiami, Port Everglades, and MIA; these investments will be critical to the overall freight network. Hence, it is essential that District 6 and its industrial based communities identify and invest in infrastructure improvements to position themselves for economic development and growth in cargo. Key developments and tools should be incorporated such as ITS/technologies, truck parking needs, economic impact analyses, innovative funding programs, and land use and redevelopment opportunities-helping market these industrial based communities as competitive global logistics service centers.

District 6 has identified a strategy to help advance its freight and logistics system focused on partnering with local communities to develop subarea freight plans; these freight focused plans help identify freight mobility strategies at the project level. The Town of Medley, one of the leading freight hubs in Miami-Dade County and South Florida, is the first area scrutinized through this process due to its long history as a leader in the industrial sector; providing services to PortMiami, Port Everglades, MIA, Florida East Coast Railway, and the South Florida business community. With access to SR 826, I-75, Florida's Turnpike, US 27, and connections with the region's major freight activity centers, Medley is accessible to local, regional, and state markets.

These planning level studies will assess freight accessibility to and from each sub-area and develop strategies to enhance access and improve freight mobility. The following table lists all the sub-area freight planning efforts currently completed and programed by District 6. The Miami River Freight Improvement Plan is unique amongst the sub-area freight planning efforts as it does not focus on a specific town or city. Instead, this study developed viable options to improve intermodal freight movement and assess the potential of short sea shipping along the Miami River.

FDOT, D6 – STATE TRANSPORTATION SYSTEM AND MAJOR PROJECTS

FDOT D6 SUB-AREA FREIGHT PLANNING EFFORTS:

NAME	STATUS
Town of Medley Freight Improvement Plan	Completed
Opa-Locka Freight Improvement Plan	Completed
Miami River Freight Improvement Plan	Completed
Doral Freight Improvement Plan	Completed
Miami Gardens Freight Improvement Plan	Completed
Hialeah Freight Improvement Plan	In Progress
Homestead Freight Improvement Plan	In Progress
Freight Village Analysis Study	To be Executed in 2023

STRATEGIC MIAMI AREA RAPID TRANSIT (SMART) PLAN

The Strategic Miami Area Rapid Transit (SMART) Plan is an infrastructure investment program of projects developed to improve transportation mobility and create a transit system that will support economic growth and competitiveness in the global arena.

As highlighted below, the SMART Plan is expected to expand transit options in Miami-Dade County along six critical corridors that are linked to local, regional, national, and global economic markets. Another critical component of the SMART Plan will be a network of Express Buses, known as Bus Express Rapid Transit (BERT), which is intended to expand South Florida’s Express Lanes network with the implementation of six identified BERT express lane concepts. This innovative approach effectively expands the reach of transit in Miami-Dade County and beyond.

BEACH CORRIDOR

Highest tourist demand in the region with major employment centers.

EAST-WEST CORRIDOR

Heaviest commuter travel for international, state, and local businesses.

FDOT, D6 – STATE TRANSPORTATION SYSTEM AND MAJOR PROJECTS

Kendall Corridor – One of the most congested arterial roadways with the highest demand.

North Corridor – Key regional mobility linkage for access to jobs, the stadium, and educational facilities.

Northeast Corridor – High transit demand and part of a critical regional corridor stretching to Palm Beach County.

South Corridor – Experiencing the fastest population growth in Miami-Dade County.

FDOT is conducting the Project Development and Environmental (PD&E) study for the following three SMART & BERT corridors:

NW 27 AVENUE PREMIUM TRANSIT CORRIDOR

A PD&E study is being conducted to evaluate the implementation of a premium transit service (Bus Rapid Transit (BRT), Heavy Rail Transit (Metrorail), and appropriate variation of Heavy Rail Transit (Rail At-Grade) along NW 27 Avenue from NW 215 Street (Countyline Road) to approximately NW 38 Street and from the Miami Intermodal Center (at Miami International Airport) to NW 27 Avenue via SR 112 Expressway. The study focused on the implementation of a premium transit service and infrastructure along SR 9/SR 817/NW 27 Avenue. The study included public on-street transit stations/stops as well as public and/or private facilities located adjacent to or off-corridor where potential park-and-ride and/or transit terminals (including the Miami Dade College North Campus) will be considered. The study considered public and private station/stop facilities, new or upgraded park-and-ride locations, and transit terminals.

Three viable alternatives were developed and presented to the public. Each of these represents the three modes running within the existing roadway. BRT would operate in the curb lanes. Heavy rail whether at-grade or elevated would run over the centerline of the roadway. The study developed detailed engineering criteria and evaluated the environmental impacts that would result from implementation. Cost estimating, ridership forecasting, and traffic impacts were evaluated. On December 6, 2018, the Miami-Dade Transportation Planning Organization (TPO) Governing Board adopted as the Locally Preferred Alternative (LPA) an elevated fixed guideway transit system. Following this action, Miami-Dade County has requested that FDOT evaluate three alternative technologies: 1.) Monorail; 2.) Automated Peoplemover; and 3.) Maglev.

In October 2019, the Miami-Dade TPO selected elevated heavy rail transit as the Preferred Technology for the North Corridor. On April 23, 2020, the TPO Governing Board accepted a report by Miami-Dade County's Department of Transportation and Public Works (DTPW) on alternative transit technologies for NW 27 Avenue and directed DTPW to issue a request for proposals to identify whether transit technologies, other than heavy rail are viable for the corridor. FDOT has placed its North Corridor PD&E study on hold after the consulting with the Federal Transit Administration (FTA) until the outcome of the DTPW Request for Proposals (RFP) process is known and a final decision on the transit technology and alignment for NW 27 Avenue is made by the TPO Governing Board. On November 15, 2022, the Board of County Commissioners (BCC) passed a motion to terminate the

FDOT, D6 – STATE TRANSPORTATION SYSTEM AND MAJOR PROJECTS

development of the DTPW Request for Proposals (RFP) and to accelerate the implementation of the North Corridor as an elevated fixed guideway as the LPA previously selected.

FDOT is currently coordinating with Miami-Dade County's Department of Transportation and Public Works (DTPW) on the next steps to restart the PD&E study and discuss project delivery.

FLAGLER STREET PREMIUM TRANSIT CORRIDOR

A PD&E study is being conducted to evaluate the implementation of rapid transit along SR 968/Flagler Street. This study focuses on multimodal street improvements to accommodate rapid transit service along Flagler from SW/NW 107 Avenue to the Government Center with branches along SW 8 Street and NW 12 Street.

Viable alternatives analyzed as part of this study includes Bus Rapid Transit (BRT) along curbside lanes, BRT along curb lanes with a center reversible auto lane.

In April 2019, the Curbside Business Access and Transit (BAT) Lanes alternative was identified as the recommended alternative for the Flagler corridor. FDOT has conducted a series of meetings with elected officials, stakeholders and communities on the corridor and presented the recommended alternative to the TPO Governing Board on July 18, 2019. A workshop with TPO Board members was held on January 30, 2020; where FDOT was asked to further analyze the implementation of reversible auto lanes along the Flagler corridor.

FDOT conducted a study on the implementation of reversible lanes along segments of the corridor as a traffic mitigation measure. The additional analysis on reversible lanes was completed in January 2021 and the results of the analysis demonstrated that reversible lanes are not feasible on the Flagler Corridor. On January 28, 2021, the TPO Governing Board adopted Resolution No. 07-2021 supporting FDOT's Alternative-1 Curbside Bus Rapid Transit Lanes with the exception that the PD&E study shall not consider the reduction of vehicular traffic lanes for any portion of Flagler Street west of NW 24 Avenue.

On March 3, 2022, the TPO adopted resolution No. 13-2022 supporting a joint-agency recommendation by FDOT and Miami-Dade County's Department of Transportation and Public Works (DTPW) to place the Flagler PD&E study in hold in order to implement a Flagler Street SMART Demonstration Project from NW 27th Ave to SW 6th Ave along Flagler Street and SW 1st Street.

FLAGLER STREET SMART DEMONSTRATION PROJECT

The Flagler Street SMART Demonstration Project consists of implementing Business Access Transit (BAT) Lanes by repurposing an existing travel lane along SR 968 Flagler Street (westbound) and SW 1 Street (eastbound) between SW 27 Avenue and SW 6 Avenue. As part of the Flagler Demonstration Project, traffic analysis, monitoring plan and design plans for implementation of dedicated transit lane will be developed. On November 18, 2022, FDOT issued Notice to Proceed (NTP) for the design of the Flagler Street SMART Demonstration Project.

Construction is estimated to begin in Summer 2024. Once the project has been completed, FDOT will conduct before and after studies to evaluate the performance of the implementation of the business access transit lanes. The data collected will allow FDOT, the TPO and DTPW to jointly evaluate and determine the feasibility of a dedicated curbside rapid transit lane concept.

KENDALL DRIVE PREMIUM TRANSIT CORRIDOR

A PD&E study is being conducted to evaluate implementation of a premium transit service (BRT, Light Rail Transit, and other appropriate transit technologies) along SR 94/Kendall Drive/SW 88 Street from approximately SR 997/Krome Avenue/SW 177 Avenue to the Dadeland North Metrorail Station (at approximately US 1/SR 5). The study will also consider connecting with another segment running along SR 874 and SR 878 from Kendall Drive to the Dadeland North Metrorail Station, and potentially north along the HEFT from Kendall Drive to FIU (at the proposed Panther Station) and/or to the proposed Dolphin Station (at SR 836).

This study focuses on multimodal street improvements to accommodate rapid transit service, as well as walking and bicycle trips, along Kendall Drive. The study will evaluate various options for transit service - mode, station stop locations, signalization for transit, use of exclusive lanes, etc. Kendall Drive will serve as the primary premium transit running way via exclusive arterial transit lines but will also include other roadways and expressways connecting to Kendall Drive for accommodating branched transit routes. The study will also include public on-street transit stations located along various running ways as well as potential park-and-ride and/or transit terminal locations.

Three alternatives were initially identified as viable alternatives: BRT running in the curb lanes, median lanes, and heavy rail at-grade. At the request of the TPO, a concept that includes BRT in the curb lanes and a reversible center auto lane to supplement peak direction traffic was added to the scope of work. In response to public interest, an elevated rail alternative was also added to the scope.

In November 2019, Curbside BRT was identified as the recommended alternative for the Kendall corridor and was presented at a series of Public Workshops in December 2019. In February 2020, the TPO requested for FDOT to further analyze the implementation of reversible lanes along the Kendall Corridor. This additional analysis on reversible lanes was completed in November 2020. Results of the reversible lanes analysis demonstrate that reversible lanes are not feasible on the Kendall Corridor.

On March 2022, FDOT placed the Kendall PD&E study on hold awaiting completion and outcome of the Flagler Street SMART Demonstration Project. The data collected from the Flagler Street SMART Demonstration Project will inform the study team on an effective multi-modal transportation solution to improve transit along the Kendall Corridor.

**Florida's Turnpike
 Enterprise**

TIP • FISCAL YEARS 2023/2024 TO 2027/2028

FLORIDA'S TURNPIKE ENTERPRISE

Florida's Turnpike

Florida's Turnpike Enterprise is an agency of the Florida Department of Transportation and currently owns and operates over 511 miles of toll facilities and 148 interchanges in the State of Florida. The Turnpike Mainline / SR 91 extends from North Miami to a junction with Interstate 75 in north central Florida. It extends through the counties of Miami-Dade, Broward, Palm Beach, Martin, St. Lucie, Indian River, Okeechobee, Osceola, Orange, Lake, and Sumter. The Turnpike System includes the 47-mile Turnpike Mainline / SR 821 located in Miami-Dade and Broward Counties, among other facilities statewide.

The Turnpike is a user-financed system that uses toll revenues, service plaza sales revenue, and bonds to pay for new construction and maintenance of the entire system. It does not receive traditional gas tax revenue.

MIAMI-DADE COUNTY TURNPIKE PLANNED MAJOR PROJECTS

WIDENING PROJECTS

#	PROJECT NAME	FPN	LIMITS
1	Turnpike Mainline / SR 91 Widening (widen from 6 to 8 lanes)	423373-5	MP 0.4X (Golden Glades Plaza) to MP 3.3X (Miami-Dade/Broward County Line) Includes interchange improvements at MP 2X (NW 199 Street)
2	Turnpike Mainline / SR 821 Widening (widen from 4 to 6 lanes)	444111-1	MP 3 (North of SW 312th Street / Campbell Drive) to MP 7 (North of SW 137th Avenue) Includes interchange improvements at MP 5 (SW 288th Street / Biscayne Drive)

FLORIDA'S TURNPIKE ENTERPRISE

INTERCHANGE PROJECTS

#	PROJECT NAME	FPN	LIMITS
1	Turnpike Mainline / SR 91 Interchange Improvements (Partnership Project)	437053-1,-2,-3,-4,-5	MP 0X (I-95 / US 441 / SR 826 – Golden Glades)
2	Turnpike Mainline / SR 821 Interchange Improvements	437211-1	MP 11 (SW 216th Street) and MP 12 (SW 211th Street / Caribbean Boulevard)

OTHER PROJECTS

#	PROJECT NAME	FPN	LIMITS
1	Service Plaza Improvements along Turnpike Mainline/SR 821	442620-1	MP 19 (Snapper Creek Service Plaza General Improvements)

TIP • FISCAL YEARS 2023/2024 TO 2027/2028

MOVING MIAMI-DADE

Expressway Authority

This section of the TIP focuses on the major mobility improvement projects programmed by the Expressway Authority for the next five years. The Expressway Authority is an agency of the State enabled by the Florida Legislature.

THE EXPRESSWAY AUTHORITY SYSTEM

The Expressway Authority System includes five (5) of the busiest and most important State Roads in Miami-Dade County: Airport Expressway (SR 112); Dolphin Expressway (SR 836); Don Shula Expressway (SR 874); Snapper Creek Expressway (SR 878); Gratigny Parkway (SR 924) as well as NW 138th Street from US-27 to just east of NW 97th Avenue and the LeJeune Frontage Roads from SR 836 to Central Boulevard.

PROJECT FUNDING

The Expressway Authority's primary source of revenue is the tolls collected on its five expressways, which are reinvested in Miami-Dade County to improve mobility and offer transportation choices within the county. The Expressway Authority borrows money to fund its projects by selling bonds and uses the toll revenues as collateral. Like a mortgage loan where the collateral is offered to the bank to secure the loan until fully paid, the Expressway Authority offers the projected revenues as assurance that the bond's principal and interest will be paid. The Expressway Authority does not receive any gas tax, property tax, sales tax, or any other source of revenue.

FY 2024–2028 TIP

Major projects included in the Expressway Authority FY 2024 - 2028 TIP are highlighted within the following pages. The projects have been organized by the following categories: Existing System Improvements and System Expansion.

EXISTING SYSTEM IMPROVEMENT PROJECTS

The following projects are categorized as Existing System Improvements in the current Five-Year TIP and include widening or reconstruction within an existing roadway segment:

Project 83611 – SR 836 / I-95 Interchange Improvements — The Expressway Authority has partnered with FDOT to acquire right-of-way, design, and build the SR 836 improvements from NW 17th Avenue to I-95 in conjunction with the FDOT’s I-95/I-395 project. Improvements to SR 836 include both eastbound and westbound widening for operational optimization between NW 17th Avenue to I-95. Additionally, a new viaduct consisting of an elevated 4 lane structure to bypass traffic on the lower level of SR 836 will be provided to improve mobility to and from Downtown Miami and Miami Beach.

Furthermore, the project will improve access to the Health District by providing better connections to the area from I-95 and SR 836. The design-build contract was executed in July 2018 and completion is anticipated by FY 2024. The total cost for the Expressway Authority project is estimated at \$267.6 million.

Project 83634 – SR 836 New Homestead Extension of Florida’s Turnpike (Heft) Ramp Connections

— This project consists of new ramps from eastbound SR 836 to northbound HEFT and from southbound HEFT to westbound SR 836. Additionally, SR 836 ramp connections are being provided to access the Dolphin Station Park-and-Ride site. Construction of this project is underway with an estimated completion date at the end of FY 2024. The total cost is estimated at \$57.0 million.

SYSTEM EXPANSION PROJECTS

The following projects are categorized as System Expansions in the current Five-Year TIP and include all construction of new roadway segments on new alignments adjacent to the existing system that will increase the total centerline miles of the system:

Project 83618 – SR 836 Southwest Extension/ Kendall Parkway — This 14-mile multimodal corridor will extend SR 836 from NW 137th Avenue to SW 136th Street and provide the residents in the southwestern portion of the County another transportation option. The project is envisioned to include: Express bus service and park & ride facilities in the vicinity of SW 88th Street and SW 136th Street; a multi-use recreational trail for non-motorized transportation including walking and biking; a minimum of 1,000 acres of land for wetland preservation and creation that will be held in perpetuity; widening of SR 836 Eastbound from 107th Avenue to 97th Avenue; as well as improvements to 137th Avenue, 157th Avenue, SW 88th Street and SW 104th Street to facilitate access. The improvements to local streets and portions of ramp connections will be contributions to Miami-Dade County. The Expressway Authority is continuing to work on the environmental permitting, right-of-way acquisition and transfer of government parcels for the mainline and trail alignment. Additionally, the Expressway Authority is advancing the final design and construction of various components of the Kendall Parkway project such as the widening of SW 137th Avenue from SW 8th Street to SW 26th Street at an estimated total cost of \$11.2 million; and the SR 836 Eastbound and Westbound mainline widening from 107th Avenue to 97th Avenue at a total cost of \$25.0 million. The final design for the 137th Avenue widening has begun; and the final design of the SR 836 widening is scheduled to begin in early FY 2024.

The start date for final design and construction for the mainline extension, multi-use recreational trail and transit stations is yet to be determined pending funding availability. Total cost is estimated for all projects within the Kendall Parkway program is estimated at over \$1 billion.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)
PART 2: 5-YEAR PROJECT LISTINGS

**Three-Cent Local Option
 Gas Tax**

TIP • FISCAL YEARS 2023/2024 TO 2027/2028

PART 2: 5-YEAR PROJECT LISTING

Three-Cent Local Option Gas Tax

Miami-Dade County

INTRODUCTION

The Capital Improvement Local Option Fuel Gas Tax, authorized by Section 336.025 (1) (B), Florida Statutes became effective January 1, 1994. It was reduced from five cents to three cents on September 1, 1996. In accordance with state statute, proceeds of this tax have been programmed for transportation expenditures needed to meet the requirements of the capital improvement element of the adopted comprehensive plan.

FY 2023-24 PROJECTED MUNICIPAL DISTRIBUTION

The actual distribution to the municipalities for FY 2023-24 will be based on a weighted formula which accounts for percentage of population (statistics from the Bureau of Economic and Business Research, at the University of Florida) and the centerline mileage of municipal roadway for each incorporated area from the “2017 City/County Mileage Report” – Florida Department of Transportation prepared in the Spring of each year with data reported as of September 30, 2017. The figures contained herein were calculated using these same reports. This estimate for FY 2023-24 will be sent to the municipalities at the time the County files its official estimate with the Florida Department of Revenue in April 2023.

In FY 2023-24, the estimated net revenue for the Capital Improvement Local Option Gas Tax projected as of December 2022 is \$27.632 million at 95 percent with \$7.184 million to be distributed to the municipalities and \$20.45 million to be distributed to the County (26 percent to the municipalities and 74 percent to the County according to the current interlocal agreements). The State of Florida is allowed to impose a 7.3 percent administrative fee. The FY 2023-24 estimates, reflects a minor increase from the current year in fuel tax revenues.

COUNTY LOCAL OPTION FUEL TAX TRANSPORTATION PROJECTS

The County reviews the Capital Improvement Local Option Fuel Tax distribution for the Department of Transportation and Public Works on an annual basis for the most effective use of this limited funding subject to legislative actions taken by the Board of County Commissioners and state statute (\$20.45 million).

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

PART 2: 5-YEAR PROJECT LISTINGS

**Aviation On-Site
 Improvements**

TIP • FISCAL YEARS 2023/2024 TO 2027/2028

PART 2: 5-YEAR PROJECT LISTING

Aviation On-Site Improvements

Miami-Dade County Aviation Department

The Miami-Dade County Transportation Improvement Program includes Capital Improvements for the Miami-Dade Aviation Department for the continued development of Miami International Airport (MIA) and the General Aviation Airports (GAA) – Miami-Opa Locka Executive Airport (OPF), Miami Executive Airport (TMB), Miami Homestead General Aviation Airport (X51) & Dade-Collier Training and Transition Airport (TNT). The funding for this program is primarily from revenue generated by the Aviation Department and from Federal and State grants.

In 2019, with the conclusion of the Strategic Master Plan Supplemental Study, MDAD developed its new Capital Improvement Program (CIP) and presented it to the County Board of Commissioners, which approved the \$5 billion program in May 2019. The new CIP focuses on:

- Modernization and optimization of existing assets
- Airside and terminal facility maintenance projects
- Development of a flexible implementation plans capable of responding to
- Emerging/near-term needs
- Strategic acquisition or leasing of available commercial land to enable long-term expansion.

A press release issued by MIA Communications on February 2, 2023, highlighted the 2022 achievement accomplished by MIA, in serving more than 50.6 million passengers shattering its record of 45.9 million set in 2019 by nearly 10 percent and surpassing Orlando International Airport's (MCO) 2022 total of 50.1 million travelers last year by half a million.

MIA welcomed a record 29.3 million domestic travelers last year compared to 23.5 million in 2019 while also serving 21.3 million international passengers in 2022, which was one million less than in 2019 but 8.3 million more than in 2021. Compared to the airport's total of 37.3 million passengers in 2021, when the aviation industry was still recovering from the pandemic, MIA served 13.3 million more passengers in 2022 for a giant leap of 35 percent year over year. In 2022, MIA also matched its record of 2.7 million tons of freight set in 2021, by handling 2.2 million tons of international freight and 500,000 tons of domestic shipments.

MIAMI-DADE COUNTY – AVIATION ON-SITE IMPROVEMENTS

In addition to MIA leading our community’s successful economic recovery from the pandemic, it is again leading the way for the state of Florida as well! Congratulations to the MIA team and partners on surpassing 50 million passengers for the first time in its history. Passenger growth represents tourism revenue, job creation, and expanded opportunities in Miami-Dade County – making all county residents proud.

— **Miami-Dade County Mayor Daniella Levine Cava**

Contributing to MIA’s rebound from the pandemic were hub carrier American Airlines and its subsidiary Envoy, serving 31.8 million passengers at MIA in 2022, which was 63 percent of the airport’s total and an increase of one million passengers over 2019 for the airline. Since 2019, MIA has also welcomed low-cost carriers Spirit Airlines, Southwest Airlines, and JetBlue Airways, which now rank as the airport’s second, fourth, and eighth-busiest passenger airlines in seat capacity, respectively. Additionally, MIA’s record-breaking year in 2022 included the addition of 15 international routes: six in the Caribbean (Camaguey, Holguin, Santa Clara, Santiago de Cuba, and Varadero, Cuba; and San Salvador, Bahamas); five in South America (Brasilia, Fortaleza and Manaus, Brazil; and Bucaramanga and Santa Marta, Colombia); three in Europe (Dublin, Ireland; Paris, France; and Rome, Italy); and Vancouver, Canada.

Lastly, MIA ended 2022 with its busiest winter holiday travel period from December 21 to January 6, when 2.6 million passengers traveled through the airport – a 2.4 percent increase over its previous record during the same 17-day period in 2021.

“We are honored to once again serve not only as Florida’s busiest airport for international visitors but as its busiest gateway overall. This renewed role and our new record of nearly 51 million annual passengers would not be possible without the hard work and dedication of the Miami-Dade Aviation Department and our partner airlines, federal agencies, concessionaires, and service companies. Thanks to their commitment to the Miami market, we expect continued success at MIA in 2023.”

— **Ralph Cutié, MIA Director and CEO**

MIA’s record-breaking year follows its highest rankings ever among airports in the U.S. and worldwide in 2022, according to Airports Council International’s annual report:

- #1 U.S. airport for international passengers and international freight
- #4 U.S. airport for total freight
- #10 U.S. airport for total passengers
- #9 global airport for international freight and total flight operations
- #10 global airport for total freight
- #11 global airport for international passengers
- #12 global airport for total passengers

MIAMI-DADE COUNTY – AVIATION ON-SITE IMPROVEMENTS

Major projects at Miami-Dade County's airports include phases of the following:

PROJECT	DOLLARS IN MILLIONS (FUNDED)
MIA - Perimeter Road Widening Realignment & Bridge Replacement	\$27.54
MIA - Terminal Wide Re-Roofing, Drains and Scuppers	\$119.70
MIA - Central Terminal Phase 1 (E Thru F Connector and Cc F Infill)	\$55.72
MIA - South Terminal Apron & Utilities Modification/Expansion & GSE Facility	\$809.61
MIA - Employee Parking Garage	\$102.95
MIA - New Fuel Storage Facility Expansion Phase 1	\$39.23
MIA - New Concourse F	\$896.02
MIA - Concourse G Demolition	\$35.97
MIA - Central Base Apron and Utilities Modification and Expansion (Phase 1 & 2)	\$108.48
MIA - Airport Operations Center (AOC)	\$24.49
MIA - Runway 9-27 Rehabilitation	\$53.36
MIA - North and Central Terminal Passenger Boarding Bridges - Phase 1	\$70.05
MIA - Central Base AOA Gate	\$12.38
MIA - North Terminal Gate Optimization Phase 1 & 2	\$29.94
MIA - Concourse H Glazing, Curtain Wall Assessment and Corrective Action	\$36.47
MIA - Security Checkpoint Equipment Replacement	\$30.00

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

PART 2: 5-YEAR PROJECT LISTINGS

**Multimodal Seaport
 Development**

PART 2: 5-YEAR PROJECT LISTING

Multimodal Seaport Development

The Dante B. Fascell Port of Miami-Dade (PORTMIAMI)

TRANSPORTATION IMPROVEMENT PROGRAM STRATEGY

PortMiami, among the nation's busiest ports, contributes approximately \$43 billion and more than 334,000 jobs annually to Florida's economy. Its sustained performance propels Miami to be recognized as the Cruise Capital of the World and Cargo Gateway of the Americas.

CRUISE

In 2018-19, prior to the COVID-19 pandemic, PortMiami, known as the Cruise Capital of the World, processed more than 6.8 million passengers annually with 22 cruise lines berthing 55 ships. In 2022-2023, the port transitioned back to cruising with over 4 million cruise passengers and continues to grow the cruise operations as demand increases.

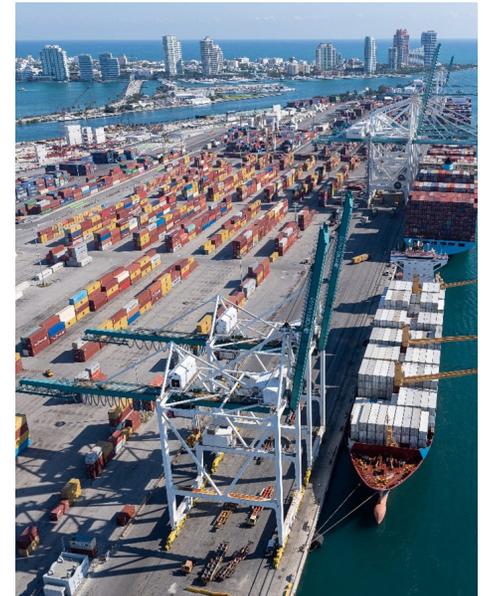

CARGO

As Florida's busiest international port, the PortMiami handles more than one million twenty-foot equivalent units (TEU's) annually. For the seventh consecutive year, PortMiami has surpassed the 1 million TEU mark and, in 2021, hit a new record of just over the 1.25 million TEU mark. The total value of the economic impact created by cargo containers moving via PortMiami is estimated at \$35 billion dollars to the State of Florida.

RESILIENCE PLAN AND NET ZERO

All PortMiami's projects are inherently committed to improving its robust climate adaptation, carbon mitigation, and resilience. PortMiami has adopted proactive policies that enhance its sustainability and ensure environmentally friendly port operations.

With this in mind, PortMiami has embarked on a visionary and transformational Net

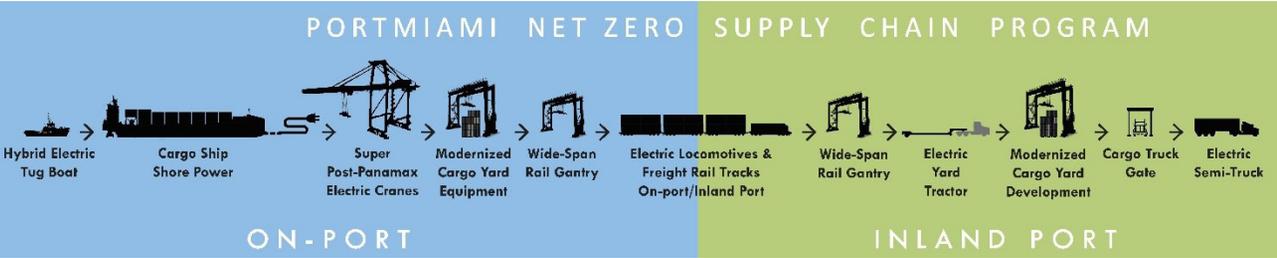

PORTMIAMI – MULTIMODAL SEAPORT DEVELOPMENT

Zero program. This will be the nation’s first end-to-end net zero carbon emission supply chain in line with the County’s goal of a 25% (according to the County’s CAP) reduction in emissions by 2030 for PortMiami, in accordance with the 2021 Miami-Dade Climate Action Strategy. The program addresses supply chain disruptions and congestion and is a significant step forward for the County’s economic development goals.

The program began with electrification of key elements of the supply chain, including conversion to electric cargo handling equipment, conversion of all ship to shore gantry cranes, and the provision of shore power for cruise ships at port. In addition, PortMiami is working with our cargo partners to plan the next series of projects, which include expansion of rail infrastructure and operations, eliminating fossil fuel-burning trucks from the road, modernizing the cargo gates to minimize truck idling, stormwater and paving improvements for cargo yard efficiencies, etc.

The Net Zero plan seeks to optimize the current supply-chain system using carbon- based energy by improving efficiencies, eliminating fossil fuels, reducing point-to- point transport while at the same time creating infrastructure in off-port areas that will benefit from job creation and economic impact. Finally, the NetZero plan contemplates additional programs to support the plan, including the development of a workforce training program for new technologies, additional resiliency elements such as a solar farm at the inland port, electric vehicle charging, and infrastructure improvements to key roadways.

TRANSPORTATION

The Port’s Transportation Improvement Program (TIP) is comprised of a total of approximately \$2 billion in funded projects over the next five years; and reflects the Port’s aggressive strategy for optimizing land use and enhancing throughput capacity to meet the demands of the cargo and cruise industries. As part of the Capital Development Program, the Port is dedicated to meet and exceed industry demands by supporting the following Capital Improvement Projects:

- Construction of Cruise Terminals and Parking Garages
- Roadway projects for new Cruise Terminals and efficient cargo movements
- Modernization of Cargo Yard Terminals

PORTMIAMI – MULTIMODAL SEAPORT DEVELOPMENT

- Additional Ship-to-Shore Gantry Cranes
- Bulkhead Improvements
- Fumigation and Cold Chain Processing Facility
- Inland Ports
- FPL Substation Expansion and new duct-banks to service different projects
- Projects promoting Technological Improvements to reduce delays, emissions, and improve safety and efficiencies
- Projects promoting Sustainability and Resiliency
- Intermodal Railway Expansion
- State-of-the-Art Gates
- Yard Densification with both hybrid electrically powered rubber-tired gantries (eRTGs)
- Shorepower program at 5 cruise berths

The Port continues to assertively seek grant funding from local, state, and federal sources. The TIP reflects participation from the Florida Department of Transportation (FDOT) with \$32.7 million in support of roadways, cargo improvements and other infrastructure projects. This agency and the Port's partners continue to be part of the established goals to support the program and accommodate growth.

PORTMIAMI – MULTIMODAL SEAPORT DEVELOPMENT

PORTMIAMI ACCOMPLISHMENTS

CRUISE

Cruise Terminal B — Completed in 2021, PortMiami has achieved LEED Gold Certification at Cruise Terminal B to support Norwegian Cruise Line's expanding operations.

Cruise Terminal V — PortMiami opened Cruise Terminal V on February 11, 2022, to support Virgin Voyage's growing operations. The project received LEED Gold Certification.

Cruise Terminal F Expansion (Phase 2) — PortMiami completed Cruise Terminal F in 2022 to support Carnival Cruise Line's expanding operations. The project has achieved LEED Silver Certification.

CARGO

Infrastructure Improvements – South Florida Container Terminal (SFCT) – eRTG Phase 1 — Improved the infrastructure within South Florida Container Terminal's cargo yard to transition from diesel power cargo handlers to eRTGs. Each eRTG replaces approximately two diesel top loaders, and this first phase reduces carbon dioxide emissions by 20%.

INFRASTRUCTURE (ELECTRIC)

FPL Substation Expansion Utilities Relocation — FPL has completed the relocation of its utilities in preparation the next phase – expanding its substation. The completion of the FPL substation expansion is anticipated to be May 2023.

PORTMIAMI CURRENT PROJECTS

CRUISE

Cruise Terminal G — PortMiami is expanding Cruise Terminal G to support cruise line's expanding operations. The project will achieve a minimum of LEED Silver Certification, and include solar panels, a multimodal parking garage, and roadway improvements.

Berth 10 — PortMiami is developing an additional berth to supply berthing space for Cruise Terminal AA (Shared Terminal) and introduces a resilient bulkhead system capable of addressing future sea level rise.

Cruise Terminals A & AA Roadways — PortMiami is constructing a roadway flyover and associated roadway and stormwater improvements, in response to cruise growth and to optimize Cruise Terminal access and circulation, minimize traffic congestion and reduce delays.

Cruise Terminals AA (Shared Terminal) — PortMiami has partnered with MSC Cruise Line with the design and construction of two new cruise berths, a shared "state of the art" multi-vessel Cruise Terminal, and Parking Garage Complex. The LEED Silver Certified terminal will be equipped with shore power.

Shore Power — As part of PortMiami's Net Zero goals the port will provide shore power to cruise terminals which will allow ships to turn off their primary engines while docked, resulting in reduced air emissions.

Phase 1 will be completed at the end of 2023 and provides shore power capability at five terminals, with enough power for three vessels to utilize shore power at the same time.

Brightline Train Station — Build a train station for passengers and employees at a location that reduces congestion and emissions by optimizing access to terminals and employment destinations.

Cruise Terminal K — Design and construct a new cruise terminal to support expanding operations.

CARGO

Netzero Cargo Program — PortMiami is embarking on a visionary and transformational program to develop the nation's first end-to-end net zero carbon emission supply chain in line with Miami-Dade County's goal of reducing 25% of its emissions by 2030. Transformational endeavors include, but are not limited to, electric tugboats, shore power for cargo vessels, electric gantry cranes, rail expansion, improved cargo gates, cargo yard's operational efficiencies, infrastructure improvements to support both electric and hybrid electric cargo yard equipment.

As part of the program, PortMiami will construct additional rail capacity and increase the cargo gate optimization to reduce traffic congestion at the Port and lower carbon emissions.

PORTMIAMI – MULTIMODAL SEAPORT DEVELOPMENT

Netzero Cargo Supply Chain Program – Inland Port Logistics Center — This is a key logistics and export consolidations center serving Florida via rail and roadway; Includes eRTGs, reefer and plug accessories, electric generators, LED high-mast, solar farm, and connectivity, charging stations, etc.

Inland Port Development — As part of the Net Zero program, an inland port will increase PortMiami’s cargo capacity and volume, leading to new business opportunities and access to the burgeoning Orlando and Tampa markets. Preliminary estimates indicate that a new inland port could provide approximately 50% increase in container volume annually, increasing Miami Dade County’s economic competitiveness at various scales. The program will include a variety of projects, including a solar farm over the CBP Inspection Facility truck parking, export consolidation, electric trucking, eRTGs, and rail shuttles, etc.

Electric Cargo Gantry Cranes — As PortMiami receives more deeper draft vessels, the Port will add a minimum of four and up to six super post-panamax gantry cranes. The gantry cranes will improve productivity and support expanding operations, reduce energy costs by significantly reducing maintenance and repair.

Inspection & Fumigation Facility — The new facility will be a state-of-the-art cold chain processing and fumigation center that will provide a more efficient inspection, cold chain processing, and phytosanitary services for the Port’s perishable goods. The facility will become the port’s central location to serve various markets and reduce truck travel times and traffic accidents.

Hybrid Tugboats — As part of the NetZero Program introduce hybrid harbortugboats to the seaport’s end-to-end services.

Cargo Yard Terminal Equipment & RTGS — As part of the NetZero Program, upgrade of cargo yard equipment, including hybrid RTG, to lower emissions.

INFRASTRUCTURE

Infrastructure Improvements – Cruise Campus — Infrastructure improvements including, but not limited to, road work, stormwater, landscape, and other emission-reduction projects, ev charging stations, solar panels, and relocations for future buildings.

Infrastructure Improvements – Passenger Boarding Bridges (PBBS) — PortMiami is purchasing passenger boarding bridges for various terminals in response to new cruise terminal construction, increased demand, and north bulkhead rehabilitation project.

Infrastructure Improvements – Container Yard (Seaboard) — Provide drainage improvements and various other resiliency improvements in Seaboard’s container yard area. The projects will increase capacity, modernize the cargo gate, improve cargo yard pavement to handle hybrid electric cargo handling equipment, LED high mast lighting retrofits, and electric reefer racks for refrigerated cargo.

PORTMIAMI – MULTIMODAL SEAPORT DEVELOPMENT

Infrastructure Improvements – Container Yard (POMTOC) — Provide drainage improvements and various other improvements in the container yard area to increase capacity, and improve stormwater management, modernize cargo yard operations, security gates, charging stations, and similar NetZero projects.

Infrastructure Improvements – South Florida Container Terminal (SFCT) – Phase 2 — PortMiami and SFCT have partnered to continue to improve the drainage in the SFCT’s cargo yard, construct infrastructure improvements to support electric Rubber Tired Gantry Cranes (eRTGs) and construct a parking garage which in turn increases capacity with the cargo yard. This continued effort addresses sea level rise and meets the port’s Net Zero goals by replacing diesel toploaders with 12 eRTGs to reduce emissions in 2023.

Infrastructure Improvements – Portwide Security Enhancements — Purchase marine vessels for the Harbor patrol Unit of the Miami-Dade Police Department to provide Security Zone enforcement for cruise ships , new Command, Control, and Communications (C3) facility, and other security enhancements.

Infrastructure Improvements – North Bulkhead Rehabilitation — PortMiami will rehabilitate six bulkheads along cruise berths over six years to add at least 75 years of life to the Port, improve resiliency, and raises the bulkhead in preparation for sea level rise. Other projects include shore power, water upgrades, fenders, and mooring improvements. This infrastructure project is seeking Envision Certification.

Infrastructure Improvements – South Bulkhead Rehabilitation — PortMiami is providing repairs and improvements to the Port’s south bulkhead.

Infrastructure Improvements – Federal Inspection Facility (FIF) — PortMiami is planning to build a new facility for US Custom Border Patrol (CBP).

Infrastructure Improvements – Water & Sewer Upgrades — Upgrade the Port’s water and sewer system for new services that improve the seaport’s resiliency.

Infrastructure Improvements – Portwide — PortMiami is undergoing infrastructure improvements in various areas of the port. Portwide infrastructure improvements include beautification, drainage, dredging, road improvements, photovoltaics, generators, batteries, electric connectivity & charging stations, BMS upgrades, wayfinding, landscape, lighting, HVAC, sidewalks, etc. Additionally, the Port is partnering with the United States Army Corp of Engineers (US ACE) on the Miami Harbor Channel Improvement Feasibility Study. The upgrades promote innovative technology that increases safety and operational efficiencies, improves energy efficiency, cost savings, and resiliency.

Infrastructure Improvements – CTJ Seawall — PortMiami is continuing to replace bulkheads, expected to add at least 30 years of life to the Port, to address upkeep, address sea level rise, and improve resiliency.

PORTMIAMI – MULTIMODAL SEAPORT DEVELOPMENT

Infrastructure Improvements – Berth Redevelopment (Bays 165-177 And 148-150) — PortMiami is improving the bulkheads along part of Seaboard Marine’s cargo yards to address sea level rise and improve PortMiami’s resiliency. The Port’s infrastructure will be strengthened, and the berthing capacities increased by fixing the grade elevation, providing stormwater improvements, strengthening the wharf, and removing two existing roll-/roll-off ramps, which increase the overall linear length of the berth to allow multiple ships.

Infrastructure Improvements – Channel Modifications — PortMiami is undergoing a safety and navigation improvements program with the US Army Corps of Engineers.

Infrastructure Improvements – Inland Port Logistics Support Yard — PortMiami is undergoing an Inland Port development of the container storage and transfer staging areas, including truck parking, workforce training center, solar farm, security gates, sustainable infrastructure for eRTGs, charging stations, reefer racks, etc.

Infrastructure Improvements – North Cruise Boulevard Extension — Extend and improve North Cruise Boulevard and ancillary roadways for added operations, including stormwater improvements.

Portwide Utilities Master Planning & Implementation — Stormwater master Plan, and Decarbonization and Electrification Master Plan; Implement projects to reduce emissions through electrification and stormwater management projects throughout all seaport operations for a more resilient PortMiami.

Infrastructure Improvements – Cargo Gate Modifications — Purchase and install security systems for new gateway as required.

Infrastructure Improvements – Roadway Realignment — Implementation of projects based on the PortMiami Transportation Master Plan to improve connectivity and congestion for cargo and cruise operations.

Infrastructure Compliance — Rehabilitation, upgrades, and various infrastructure improvements, and berths and shoreline improvements throughout the seaport.

Track Extension — Expand railroad track along US27 to connect to the Inland Port and Logistics Center.

New Parking Garages — Parking garages for both cargo and cruise operations.

Port Operations and Administration — New PortMiami Administrations and Operations Facility; includes police, safety, and security headquarters.

Expand Water Service Capacity — Water service to accommodate future growth, including along the cruise berths.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

PART 2: 5-YEAR PROJECT LISTINGS

**County Transportation
 System and Major Projects**

TIP • FISCAL YEARS 2023/2024 TO 2027/2028

PART 2: 5-YEAR PROJECT LISTING

County Transportation System and Major Projects

Miami-Dade Department of Transportation and Public Works (DTPW)

This section of the Transportation Improvement Program (TIP) focuses on Major Projects from Miami-Dade's Department of Transportation and Public Works (DTPW). The DTPW's goal is to enhance the quality of life of Miami-Dade County residents, businesses and visitors by providing high-quality, safe, clean, efficient, and connected public transportation infrastructure services.

SHIFT305 is an initiative to revitalize Miami-Dade's Transportation System by 2025 which encompasses four objectives:

The projects listed are the tactical execution of the SHIFT 305 strategy and include improvements to highways, transit, and bicycle/pedestrian modes over the next five (5) fiscal years.

The DTPW section provides an overview of the following topics:

- Funding Overview
- Smart Program
- Better Bus Network
- Terminals & Park-and-Rides
- Metrorail & Metromover
- Transit Maintenance and Modernization
- Pedestrian & Bicycle
- Safety & Vision Zero
- Major Highway and Bridge Improvement Projects
- Neighborhood Improvement Projects

DPTW – PUBLIC TRANSPORTATION IMPROVEMENTS

FUNDING OVERVIEW

DPTW uses a mix of funding sources to plan for, construct and maintain transportation projects, including but not limited to:

- Local General Funds
- Secondary Gas Tax (SGT)
- Roadway Impact Fees (RIF)
- People's Transportation Plan (PTP)
- Federal and State Grants
- Private Sector
- Municipal Partners

SMART PROGRAM

The Strategic Miami Area Rapid Transit (SMART) Program is advancing six rapid transit corridors of the PTP to create an expanded mass transit network in Miami-Dade County. It is the implementation of a vision for our region that is both strategic and far-reaching, creating a system of multiple transportation options by leveraging existing infrastructure and integrating technology at the highest levels.

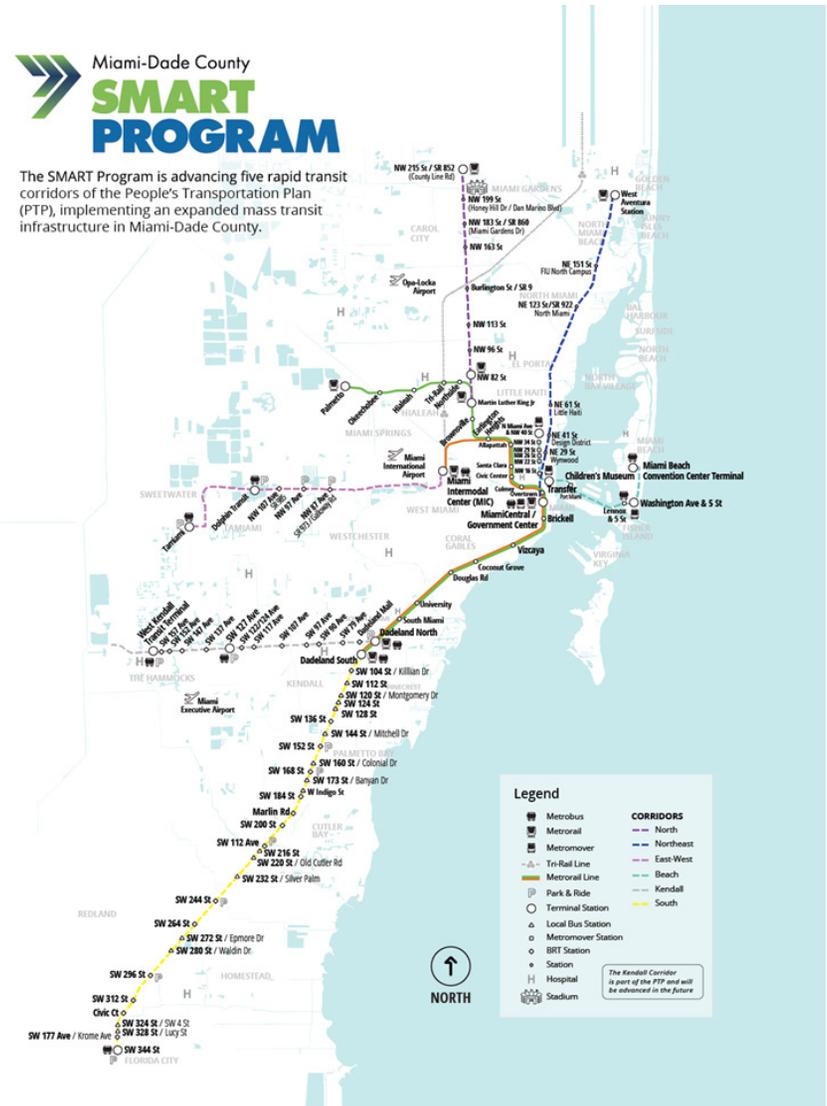

The program is comprehensive, proactive and supports the future population and employment growth anticipated in our region.

BEACH CORRIDOR

The Beach Corridor project will serve the cities of Miami and Miami Beach along a 9.7-mile corridor, crossing Biscayne Bay to link Downtown Miami to Miami Beach. The Beach Corridor area is an epicenter for population and economic growth and a major employment center and tourist destination in the region. As a result, the roadways between Miami and Miami Beach are typically heavily congested. This high bus transit ridership corridor has been identified as a candidate for consideration for premium transit over the past two decades as part of a strategy to address east-west directional travel demands.

The SMART Program is advancing five rapid transit corridors of the People's Transportation Plan (PTP), implementing an expanded mass transit infrastructure in Miami-Dade County.

DPTW – PUBLIC TRANSPORTATION IMPROVEMENTS

In May 2017, DTPW initiated a Project Development & Environment (PD&E) Study to evaluate proposed transportation solutions between Downtown Miami and the City of Miami Beach via I-395 and I-195. In January 2020, the Miami-Dade Transportation Planning Organization (TPO) selected elevated automated rail transit for the Trunk Line, automated people mover for the Midtown/Design District and Bus/Trolley in dedicated lanes on Miami Beach as the locally preferred alternative (LPA), as recommended by the PD&E. The project received an Environmental Assessment (EA) as the National Environmental Policy Act (NEPA) Class of Action (COA) for the Beach Corridor Trunkline from the United States Coast Guard (USCG) and published the Draft EA document for public review and comment in Summer 2022.

Negotiations to develop and maintain a monorail system for the Beach Corridor Trunk Line ended in November of 2022 without an agreement due to significant increases in the project cost over the course of the negotiating period. DTPW is working to advertise, evaluate, and negotiate a new solution for the Trunk Line project with the County’s preference being a seamless extension of the existing Metromover system.

	Along a 9.7-mile corridor, crossing Biscayne Bay linking Downtown Miami to Miami Beach	 STRATEGIC TARGETS
	Various premium transit modes	 Project Development, NEPA for Trunk Line
		

EAST-WEST CORRIDOR

The East-West Corridor project will run approximately 14 miles from the Miami Intermodal Center (MIC) at the Miami International Airport (MIA), west along the SR-836/Dolphin Expressway, to the Tamiami Terminal Station at SW 8 Street and SW 147 Avenue. It provides multimodal solutions for severe traffic congestion along SR-836, the only east-west expressway in central Miami-Dade County. This project will also serve major activity centers including Miami International Airport, the Miami Intermodal Center (MIC), and Downtown Miami while transporting riders to and from major employment areas (Sweetwater, Doral, Health District, Central Business District, Brickell, etc.).

In April 2017, DTPW initiated a PD&E Study to evaluate proposed transportation solutions along the SR-836/Dolphin Expressway. On October 22, 2020, the TPO Governing Board selected the LPA as Bus Rapid Transit (BRT). The LPA includes BRT routes operating within dedicated transit-only lanes, including reversible transit-only lanes along SW 8th Street from the Tamiami Terminal to SW 137th Avenue and along SW 137th Avenue to the SR 836 Extension. Further east, the BRT routes would use dedicated lanes in the inside shoulders of SR 836 on route to the MIC and Downtown Miami. The East-West BRT routes would be in addition to and complement the SR-836 Express Services which already began operating in the Corridor in early 2020. In August 2021, the County submitted a letter to the Federal Transit Administration (FTA) requesting entry into the Project Development (PD) phase under the FTA Capital Investment Grants (CIG) Small Starts program for the East-West Corridor Rapid Transit Phase One

DPTW – PUBLIC TRANSPORTATION IMPROVEMENTS

(1) Project which was granted entry into the program by FTA on October 26, 2021. The project is anticipated to receive a Documented Categorical Exclusion for the NEPA COA. DPTW is currently working on the NEPA documents, development of 30% plans, and all activities required for the Small Starts Application.

 14-mile Corridor along SR-836/Dolphin Expressway from Tamiami Terminal Station to the Miami Intermodal Center (MIC) at Miami International Airport (MIA)		 STRATEGIC TARGETS    
 Bus Rapid Transit (BRT)	 FTA Review & NEPA	

KENDALL CORRIDOR

The Kendall Corridor consists of implementing a premium transit service (Bus Rapid Transit (BRT), Light Rail Transit, or other appropriate transit technologies) along SR 94/Kendall Drive/SW 88 Street. The project also considers a connection with another segment running along SR 874 and SR 878 from Kendall Drive to the Dadeland North Metrorail Station, and potentially north along the HEFT from Kendall Drive to FIU (at the proposed Panther Station) and/or to the proposed Dolphin Station (at SR 836). In November 2019, Curbside BRT was identified as the recommended alternative for the Kendall Corridor. In March 2022, a joint-agency recommendation by the Florida Department of Transportation (FDOT) and DPTW to place the Kendall PD&E study on hold was approved by the TPO Governing Board. The Kendall Corridor PD&E Study will remain on hold until the outcome of the Flagler Demonstration Project is assessed. The data collected from the Flagler Demonstration Project will inform the study team on an effective multi-modal transportation solution to improve transit along the Kendall Corridor.

 SR 997/Krome Avenue/SW 177 Avenue to the Dadeland North Metrorail Station (at approximately US 1/SR 5) along SR 94/Kendall Drive/SW 88 Street		 STRATEGIC TARGETS    
 Bus Rapid Transit (BRT) Curbside	 FDOT PD&E on Hold	

DPTW – PUBLIC TRANSPORTATION IMPROVEMENTS

NORTH CORRIDOR

The North Corridor is part of the Southeast Florida Region which includes Palm Beach and Broward Counties. The North Corridor consists of implementing a premium transit service Heavy Rail Transit (Metrorail) along NW 27 Avenue. The envisioned transit corridor will include public on-street transit stations located along a dedicated running way. These stations can include public or private facilities located adjacent to the corridor where potential park-and-ride or transit terminals will be considered. In October 2019, the Miami-Dade TPO selected elevated heavy rail transit as the Locally Preferred Alternative (LPA) for the North Corridor. On November 15, 2022, the Board of County Commissioners (BCC) passed a motion to terminate the development of the DTPW’s RFP and to accelerate the implementation of the North Corridor as an elevated fixed guideway.

 From NW 215 Street (Countyline Road) to approximately NW 38 Street and from the Miami Intermodal Center (at Miami International Airport) to NW 27 Avenue via SR 112 Expressway		 STRATEGIC TARGETS    
 Heavy Rail (Metrorail)	 FDOT PD&E Restart	

DPTW – PUBLIC TRANSPORTATION IMPROVEMENTS

NORTHEAST CORRIDOR

The Northeast Corridor is roughly defined as U.S. Route 1 from the Downtown Miami area to the Aventura Mall near the Miami-Dade/Broward County line and is one of the busiest transit corridors in the region. It extends approximately 14 miles through the historic core of the County developed along the Florida East Coast (FEC) railroad and links Aventura, North Miami, North Miami Beach, and Miami Shores with the County’s Central Business District located in Downtown Miami. Regional passenger rail service to the West Aventura Station, which began in December 2022, is considered the first phase of the Northeast Corridor.

In June 2020, the County began its effort in advancing the implementation of the Northeast Corridor. In March 2021, the TPO Governing Board adopted commuter/passenger rail as the LPA for the Northeast Corridor. In August 2021, the County submitted to FTA a letter requesting entry into the Project Development (PD) phase under the FTA Capital Investment Grants (CIG) New Starts program for the Northeast Corridor Rapid Transit Project. The project was accepted into the PD phase by FTA on October 26, 2021. The Northeast Corridor Rapid Transit Project is the Miami-Dade portion of the Coastal Link commuter rail corridor. The commuter rail service plan is 30-minute peak headway and 60-minute off-peak headway for both directions during weekdays and 60-minute headway during weekends. DPTW is working on completing NEPA and all required activities for the PD phase and advancing into the Engineering phase of the New Starts program.

 Downtown Miami to the City of Aventura, along the existing Florida East Coast (FEC) railway tracks (13.5 miles)	 STRATEGIC TARGETS    
 Commuter Rail	

DPTW – PUBLIC TRANSPORTATION IMPROVEMENTS

SOUTH CORRIDOR

The station is along the existing Transitway (formerly known as Busway) to the SW 344th Street Park-and-Ride/Transit Terminal Facility. It will connect Florida City, City of Homestead, Town of Cutler Bay, Village of Palmetto Bay, and Village of Pinecrest, which represent the fastest population growth in Miami-Dade County. This project facilitates the highest demand movement of passengers to and from southern Miami-Dade to Downtown Miami.

DTPW initiated a PD&E Study to evaluate premium transit solutions in this corridor in April 2017. The TPO Governing Board selected the LPA on August 30, 2018, as Bus Rapid Transit (BRT). The project was advertised on June 7, 2019 and Notice to Proceed (NTP) to the Design-Build Firm was issued on February 2, 2021. The estimated total project capital cost is \$300 million. Miami Dade County and FDOT have both committed \$100 million each to fund design and construction, while the project team successfully secured \$100 million from the FTA Small Starts Grant program.

Once completed, BRT will provide rail-like travel time, iconic stations, level boarding through all doors, and pre-paid fares for speedy access. BRT will also provide enhanced safety features and other upgrades along dedicated lanes with multi-layered service lines on the Transitway Station along the existing Transitway (formerly known as Busway) to the SW 344th Street Park-and-Ride/Transit Terminal Facility. It will connect Florida City, City of Homestead, Town of Cutler Bay, Village of Palmetto Bay, and Village of Pinecrest, which represent the fastest population growth in Miami-Dade County. This project facilitates the highest demand movement of passengers to and from southern Miami-Dade to Downtown Miami. Project Completion is anticipated by Summer 2024.

DPTW – PUBLIC TRANSPORTATION IMPROVEMENTS

BUS EXPRESS RAPID TRANSIT (BERT)

Flagler Corridor PD&E — The Flagler Corridor is one of the Bus Express Rapid Transit (BERT) Corridors. The Flagler Corridor consists of implementing a rapid transit service along SR 968/Flagler Street. This includes multimodal street improvements to accommodate rapid transit service along Flagler Street. On January 28, 2021, the Miami-Dade TPO selected Curbside Bus Access Transit (BAT) Lanes as the recommended alternative with the exception that the PD&E study shall not consider the reduction of vehicular traffic lanes for any portion of Flagler Street west of NW 24 Avenue. On March 3, 2022, the TPO adopted a resolution to place the Flagler PD&E study on hold to implement a Flagler Street SMART Demonstration Project.

 SR 968/Flagler Street and SW 1st Street from SR 985/NW 107th Avenue to SR 5/US 1/ Biscayne Boulevard with branches extending to Tamiami Station and Dolphin Station		 STRATEGIC TARGETS    
 Bus Access Lanes (BAT)	 FDOT PD&E on Hold	

Flagler Demonstration Project — The Flagler Demonstration Project is a short-term roadway project used to pilot one of the BERT Corridors, the Flagler Corridor. The project consists of implementing Business Access Transit (BAT) Lanes by repurposing an existing travel lane along SR 968 Flagler Street (westbound) and SW 1 Street (eastbound) between SW 27 Avenue and SW 6 Avenue. As part of the Flagler Demonstration Project, traffic analysis, monitoring plan and design plans for implementation of dedicated transit lane will be developed. FDOT will conduct before and after studies to evaluate the performance of the implementation of the curbside of the BAT lanes. The data collected will allow FDOT, the TPO and DTPW to jointly evaluate and determine the feasibility of a dedicated curbside rapid transit lane concept throughout the corridor.

 SR 968/Flagler Street and SW 1st Street from SW 27th Avenue to SW 6th Avenue		 STRATEGIC TARGETS    
 Bus Access Lanes (BAT)	 Design Phase	

DPTW – PUBLIC TRANSPORTATION IMPROVEMENTS

Beach Express North (Route F1) Julia Tuttle Causeway — The Beach Express North (Route F1) Julia Tuttle Causeway is one of the one of the routes that make up the SMART Program’s Bus Express Rapid Transit (BERT) Network. This proposed route includes Bus-on-Shoulder (BOS) service on the inside shoulder of SR 112/I-195/Julia Tuttle Causeway. The primary goal of the I-195 Bus on Shoulder (BOS) project is to provide reliable transit travel times across Biscayne Bay between the mainland and Miami Beach as well as to improve travel times for transit passengers.

 Along SR 112/I-195/Julia Tuttle Causeway		 STRATEGIC TARGETS	
 Bus on Shoulder (BOS)	 Implementation Completed Annual BOS Operation Evaluation Ongoing	   	

DPTW – PUBLIC TRANSPORTATION IMPROVEMENTS

BETTER BUS NETWORK

Miami-Dade County partnered with local public transportation advocacy group Transit Alliance to launch the Better Bus Project with the goal of designing a new bus network that will connect more people to more places. The Board of County Commissioners accepted the report presented in October 2020. A full revamping of the necessary routes was presented to the Board in 2021 and has been adopted by the Board.

The redesigned bus network for Miami-Dade County is based on community input and a data-driven process. The new proposed network is designed to be more useful for more people by increasing frequent service, creating easier connections, and improving evening and weekend bus service. Today there are only five (5) bus routes in the County that arrive every 15 minutes or less throughout the day. Most bus routes arrive every 30, 45, or 60 minutes. When buses don't arrive frequently, riders are burdened by longer wait time and difficulties making connections to other routes. The Better Bus Network creates a new network with 19 frequent routes that allow people to reach more places more quickly.

- Over 350,000 additional residents in Miami-Dade County will have access to a bus route that arrives every 15 minutes or less within a ¼ mile or a 5-minute walk or less (From 10% of County residents to nearly a quarter).
- Increases the percentage of jobs near frequent service from 20% to 36%, bringing frequent service closer to 175,000 additional jobs.
- The average resident in Miami-Dade County will have access to over 30% more opportunities (jobs and services) in 60 minutes by walking and transit.

 Countywide		 STRATEGIC TARGETS   
 Commuter Service	 DTPW currently re-evaluating the plan using reduced operator numbers. A revised plan will be phased out through 2023 and beyond.

DPTW – PUBLIC TRANSPORTATION IMPROVEMENTS

BUS PASSENGER SHELTER PROGRAM

The Bus Passenger Shelter Program is part of the department's strategic vision to operate and grow a safer, cleaner, quicker, and more connected transit system. The program consists of the installation of new bus passenger shelters, new trash containers, new bicycle racks, improved pedestrian accessibility to and from bus shelters, and a complete renovation of the existing bus passenger shelters inventory installed within Miami-Dade County's Metrobus service area.

The program will ensure that all bus passenger shelters either new or existing ones, trash containers and bicycle racks are well maintained, safe, clean, well illuminated, and have an attractive appearance. As of February 2023, 270 bus shelters, 266 trash containers, 246 new bus shelter illuminations systems and 310 bicycle racks have been installed. These new transit amenities and accessibility improvements will be completed by summer of 2023.

TERMINALS & PARK-AND-RIDES

AVENTURA STATION

In an effort to advance the implementation of the SMART Program Northeast Corridor, Miami-Dade County Commissioners approved an agreement with Brightline Trains Florida, LLC (Formerly Virgin Trains USA Florida, LLC) to provide high-speed rail service between the Aventura Mall and the company's downtown train station. The County approved \$76.7 million toward the recently completed project, which runs high-speed trains every half hour during the morning and afternoon rush hours utilizing the Florida East Coast (FEC) rail corridor. The County owns the land for the new Aventura Station, while Brightline is responsible for all operation and maintenance costs. The Aventura Station project includes an 860-foot platform located inside the Florida East Coast Railway/Brightline right-of-way and the construction of a new pedestrian bridge over the railroad right-of-way and Biscayne Boulevard. The station also includes a Park-and-Ride facility with 240 parking spaces, a bus drop-off/pick-up for Miami-Dade Transit passengers, and newly landscaped and hardscape areas. The project also features a platform design that can accommodate Tri-Rail or other commuter trains in the future. Construction of the Aventura Station was completed December 2022.

DPTW – PUBLIC TRANSPORTATION IMPROVEMENTS

 Passenger Rail	 Completed December 2022	

TAMIAMI PARK-AND-RIDE

The Tamiami Station Park and Ride/Bus Terminal project is part of the East-West Corridor, one of the rapid transit corridors of the SMART Program. This facility was developed prior to the adoption of the SMART Program as part of an incremental approach to implement rapid transit service on the East-West Corridor of the PTP. The recently completed facility accommodates approximately 450 parking spaces and will serve as the western most station for the new premium bus service in the corridor. The facility provides service for the new 837 Express bus route, which will run from the station to Downtown Miami via SR 836/Dolphin Expressway.

DPTW – PUBLIC TRANSPORTATION IMPROVEMENTS

METRORAIL & METROMOVER

DTPW is actively working to upgrade the Metromover, a free elevated people mover system that operates seven (7) days a week in the downtown Miami, Omni, and Brickell areas as well as the Metrorail, a 25-mile dual track system that provides service to Miami International Airport (MIA) and runs from Kendall through South Miami, Coral Gables, and downtown Miami; to the Civic Center/Jackson Memorial Hospital area; and to Brownsville, Liberty City, Hialeah, and Medley in northwest Miami-Dade.

METRORAIL ACOUSTICAL BARRIER REPLACEMENT

The Metrorail Acoustical Barrier Replacement Program consists of the installation of acoustical barriers with associated hardware along the Metrorail system where Type “B” concrete barriers have been removed. The new barriers are intended to abate sound/noise produced by passing trains, ultimately, avoiding its propagation to adjacent properties. In 2019, DTPW launched a three-phase acoustical barrier replacement program. Currently, Phases One (1) and Two (2) have been completed. The first two (2) phases of the program involved the removal of Type B barrier. On January 4, 2021, DTPW entered Phase Three (3) of the program which entails the replacement of the acoustical barriers in the areas where the Type “B” panels were removed. Currently, the program is well underway – two (2) contracts have been procured, awarded and NTP has been issued for Phase Three (3) construction. DTPW is working on both contracts concurrently doing bracket removal, surveying, and installation of Type “B” metal posts. Phase Three (3) is currently at 78% completion, and it is estimated to be completed in 2024.

 Rapid Transit Improvement	 Construction Phase			

DPTW – PUBLIC TRANSPORTATION IMPROVEMENTS

METROMOVER WAYSIDE SYSTEM OVERHAUL

Metromover is an automated people mover system that was designed and installed by Bombardier Transportation (formerly Westinghouse, most recently Alstom) and began passenger service in April 1986. The Metromover system is comprised of 21 stations, 4.4 miles of dual lane guideway, 25 guideway switches, 29 vehicles and a central control facility located at Government Center. Throughout the Metromover’s 32-year history, the system has expanded, and vehicle fleet has been replaced, however, many major subsystems that makeup the system have not been replaced or refurbished and have now reached the end of their design life. These subsystems include the Automatic Train Control (ATC) System, Data Transmission System (DTS) with Supervisory Control and Data Acquisition (SCADA), several Power Distribution System (PDS) elements (e.g., low voltage breakers, protective relays, ground switches, etc.), guideway switch equipment and the central control equipment. To maintain good equipment reliability and an overall high Metromover system service availability, these major subsystems need to be replaced or refurbished. The comprehensive wayside overhaul will include the design, supply manufacture, installation, testing and commissioning of the system into a fully functional, safe, and reliable Metromover system. Project anticipated completion is May 2025.

 Improvements Across Most of Metrorail System		 STRATEGIC TARGETS
 Rapid Transit Improvement	 Construction Phase	

TRANSIT MAINTENANCE AND MODERNIZATION

Regular maintenance and upgrades to the transit infrastructure not only improve the passenger experience, but also help to reduce delays and breakdowns, which can have a significant impact on the overall efficiency of the system. Additionally, modernization efforts, such as the introduction of new technologies and the use of cleaner and more sustainable energy sources, can help to improve the environmental impact of transit. For example, DTPW modernization efforts include:

- Electric signage at Metrorail and Metromover stations
- Parking space counters at Metrorail parking garages

DPTW – PUBLIC TRANSPORTATION IMPROVEMENTS

SOUTH DADE BUS MAINTENANCE FACILITY

With the implementation of the SMART Program, the County inventoried the availability of garages located within the south Miami-Dade area of the County for bus maintenance facilities and determined that the closest maintenance facility to the South Miami-Dade area is the Coral Way facility, which has reached its capacity and is approximately 30-miles away from the southern county line of Miami-Dade. A new facility in this area is necessary. This new maintenance facility will improve Transit’s operational efficiency by decreasing the turnaround time for placing buses back in revenue service. A county owned site with good access was identified at the NW Quadrant of Biscayne Drive and SW 127th Avenue.

 Northwest Quadrant of Biscayne Drive and SW 127th Avenue		 STRATEGIC TARGETS   
 Transit Modernization	 NEPA & Design Phase	

ADDITIONAL ELEVATORS AT DADELAND NORTH METRORAIL STATION PARKING GARAGE

Since its completion in 1984, the Dadeland North Metrorail Station’s use has increased dramatically through the years. Because of increasing ridership at the Dadeland North Metrorail Station, the existing bank of elevators (four (4) elevators) does not provide an acceptable level of service during peak hours. Peak passenger flows create congestion and long waiting periods for Metrorail passengers waiting for the elevators, generating complaints from existing customers. DTPW is adding two (2) elevators to the existing parking facility. The two (2) proposed (new) elevators will be built at the Northern end of the existing Parking Garage. DTPW is currently in the Design-Builder selection process for design-build services. As of February 2023, the Final Acceptance is scheduled for April 2026.

 Proposed eleven-story building to house two proposed elevators at the North end of the existing Dadeland North Metrorail Station Parking Garage		 STRATEGIC TARGETS   
 Station Modernization	 Procurement Phase to Select Design-Build Firm	

DPTW – PUBLIC TRANSPORTATION IMPROVEMENTS

BUS NEW VEHICLE REPLACEMENT

DTPW continues to implement its bus replacement program. Funding for this program is provided through various sources including the PTP, FDOT and Federal funding sources. The DTPW bus fleet is continuously aging; therefore, an aggressive bus replacement plan is in place to ensure compliance with FTA’s bus retirement criteria. After examining various alternative fuels, DTPW decided to migrate its bus fleet to clean-burning, compressed natural gas (CNG). The purchase of alternative fuel buses for replacements and enhancements is not only an improvement to transit, but also promotes the county’s long-term initiative towards a state of good repair, economic competitiveness, livability, sustainability, safety, job creation, and economic stimulus.

In addition to CNG, currently under procurement are 75 Proterra pilot 40-foot electric powered, zero-emission buses. A total of 64 Proterra 40’ Electric Buses have been delivered to date; 55 buses have been conditionally accepted and assigned for service. The remaining Proterra electric buses will be delivered by March 2023. These vehicles are the first of their kind in Miami-Dade County’s Metrobus Fleet and complement the ongoing modernization of the fleet. DTPW is also purchasing 100 articulated 60-foot Battery Electric zero-emission buses and furnishing 50 Charging Systems for depot-based charging. Contract has been awarded to New Flyer of America, Inc. in January 2023. These articulated electric buses are currently under procurement, with a Pilot Bus delivery scheduled for October 2023, 60 Production Buses delivered between July 2024 and February 2025 the balance of buses is scheduled to be delivered by July 2025.

 Procurement Phase	 STRATEGIC TARGETS   
 Transit Modernization	

DPTW – PUBLIC TRANSPORTATION IMPROVEMENTS

PEDESTRIAN & BICYCLE

THE UNDERLINE

The Underline is a 10-mile mobility corridor that re-purposes existing underutilized industrial space under the existing Miami-Dade County Metrorail which is the most widely used regional transit heavy rail system. The project increases connectivity to eight Metrorail Stations and bus terminals, allowing for increased ridership and increased safety. As a multi-modal corridor, The Underline will serve as the first and last mile connections to 24 schools, one university, two hospitals, three urgent care facilities, four major malls and over 250,000 residents within ¼ mile. The project includes transportation and non-transportation components.

The Underline is building separate bicycle and pedestrians’ paths as well as improving 34 intersections along US1. DTPW and FDOT are working together in the coordination of intersection improvements. It encourages active transportation and healthier lifestyle by promoting mass transit, walking and biking, and reducing US1 traffic by five percent (5%). It will serve as the spine for a future network of 180 miles of county and city trails and as the spine for 22-mile Miami Loop.

The Project was originally planned with nine segments for development, and it is getting built in three phases. As of February 2023, the estimated completion date is Summer 2026.

 From the southern bank of the Miami River to the northern curb of Dadeland Blvd		 STRATEGIC TARGETS   
 Multimodal Urban Trail	 Phase II Under Construction	

DPTW – PUBLIC TRANSPORTATION IMPROVEMENTS

The Underline Phase I – Brickell Backyard Project — The Brickell Backyard is 0.5 miles long and the most complex of all the phases. It extends from the southern edge of the Miami River to SW 13th Street (Coral Way). This phase is within the limits of the City of Miami.

Commenced Construction in December 2018; Completed 2021

The Underline Phase II – Hammock Trail — The Hammock Trail extends from SW 13th Street (Coral Way) to SW 19th Avenue. This segment is approximately 2.14 miles long. Phase Two (2) is within the city of Miami.

Currently Under Construction; Completion Expected July 2023

The Underline Phase III — This segment is the longest of all the Underline Phases. It extends 7.36 miles extending from SW 19th Avenue to Dadeland South Kiss-and-Ride Facility. The phase will traverse through the Cities of Miami, Coral Gables, and South Miami and end at Unincorporated Miami-Dade County.

Construction Completion Expected Toward 4th quarter of 2025

DPTW – PUBLIC TRANSPORTATION IMPROVEMENTS

SOUTH BAYSHORE DRIVE

The South Bayshore Drive project will provide continuous pedestrian and bicycle facilities to improve the connections to Parks, Trails and Transit facilities. This project includes a 10-foot wide shared-use path north of Aviation Avenue that forms part of the Commodore Trail – an essential trail that connects the Old Cutler Trail to the Rickenbacker Causeway. Improvements include resurfacing of roadway pavement and upgrading signing and pavement markings. This project will remove pinch points and deficiencies in the trail network, improve existing trail crossings and increase safe access to the trail. The project completion is anticipated by the end of 2027.

 Multimodal Corridor	 Design Phase	

SAFETY & VISION ZERO

Vision Zero is a countywide safety initiative with a goal to eliminate all traffic fatalities and severe injuries by 2040, while increasing the safety, mobility, and health of all county residents. DTPW’s Vision Zero program is focused on system-level changes at how we plan, design, and build our transportation network. The program kicked off in late 2021 with the development of the Vision Zero Framework Plan which identified over 2,000 locations where fatalities or serious injuries have taken place across the county and established actions the county must take to achieve zero.

 <p>Countywide</p>		 <p>STRATEGIC TARGETS</p>   
 <p>Safety Initiative</p>	 <p>In 2022, DTPW began the planning and design of 24 projects. Currently in engineering design and will be headed into construction summer 2023.</p>	

On average, more than 300 vehicle crash fatalities take place in Miami-Dade County per year. Of these fatal crashes, more than 100 involve vulnerable road users, including pedestrians and bicyclists. Miami-Dade County continues to be identified as one of the most dangerous counties for vulnerable road users (Smart Growth America: Dangerous by Design 2010 to 2022). While the County continues to thrive economically and grow in population and travel demand, it is DTPW’s imperative to ensure a safe transportation network. Miami-Dade County’s is committed to eliminating traffic deaths and serious injuries within our transportation network by 2040. The 2021 Vision Zero Framework Plan formally established the Vision Zero Program and identified over 1,000 high injury crash locations across the County, prioritizing locations near transit facilities and equity neighborhoods.

Making a commitment to zero traffic deaths means addressing all aspects of safety through five (5) overarching program focus areas. DTPW’s focus areas are based on the Safe System approach that, together, creates a comprehensive approach with layers of protection for all road users.

Our focus areas are:

- Promote a Culture of Safety
- Enhance Process and Collaboration
- Build Safe Streets for Everyone
- Create Safe Speeds
- Make Data-Driven Decisions

DPTW – PUBLIC TRANSPORTATION IMPROVEMENTS

MAJOR HIGHWAY AND BRIDGE IMPROVEMENT PROJECTS

Major road and bridge projects under construction or scheduled to begin construction include, but are not limited to:

- NW 37 Avenue from North River Drive to NW 79 Street
- SW 137 Avenue from US-1 to SW 200 Street
- SW 216 Street from SW 127 Avenue to HEFT

NW 25 STREET CORRIDOR ROAD WIDENING

NW 25 Street is a County-maintained section line road within the City of Doral and Sweetwater. A feasibility study was completed in 2015. Recommendations from the study include the widening of NW 25 street from four (4) to six (6) lanes. The scope of work for this project includes, but is not limited to, widening of the road to provide three (3) lanes in each direction, a raised median, a 6-foot sidewalk on the south side and a 10-foot shared-use path on the north side, a new drainage system, a new signalized intersection at 99 Avenue, and the addition of turning lanes at major intersections to increase capacity. Design was completed during Fall 2021, construction started Fall 2022 and is on-going. The project is estimated to be completed by Fall 2025.

 NW 25 Street from West of NW 117 Avenue to NW 87 Avenue		 STRATEGIC TARGETS
 Infrastructure Improvement	 Construction Phase	

DPTW – PUBLIC TRANSPORTATION IMPROVEMENTS

NW 12 STREET IMPROVEMENTS

The project consists of widening and resurfacing of NW 12 Street from the Dolphin Park and Ride Facility to NW 114 Avenue. The project will increase capacity for existing left turn and right turn lanes as well as provide new left turn and right turn lanes along NW 12 Street. Exit ramps from the Florida Turnpike, and the right turn lane exit from the Dolphin Mall at NW 114 Avenue will be improved. The project will also add new Bus Only lanes to service the new Dolphin park-and-ride facility. The project will include new storm drainage system, pavement markings and signage, intersection and signalization improvements, roadway lighting, permitting, culvert extension, and construction administration services. The project length is approximately 0.65 miles. The project is currently in the design phase (90% Plan). The 90% Plan phase will be completed in May 2023.

 NW 12 Street from the Dolphin Park and Ride Facility to NW 114 Avenue		 STRATEGIC TARGETS   
 Infrastructure Improvement	 Design Phase	

VENETIAN CAUSEWAY

The historic Venetian Causeway is a 2.5-mile-long facility that provides a major link between the City of Miami on the west and City of Miami Beach on the east. The Venetian Causeway is comprised of ten fixed bridges and two bascule bridges separated by five spoil islands, and six residential islands.

Following the PD&E study, it was determined that eleven of the twelve bridges will require replacement. Miami Dade County has started the final design phase for the replacement of 11 bridges along the Venetian Causeway, following completion of the PD&E Study, performed by FDOT.

The final design will provide new wider bridges which will enhance safety and connectivity for all modes of transportation, including pedestrians, bicyclists, navigable traffic, and vehicular traffic. The replacement bridges will adhere to the existing causeway historic aesthetic and ensure minimal environmental impact. Additionally, resiliency measures are being study to ensure the new bridges are not affected by sea-level rise effects, and that they can provide continued connectivity for emergency services, construction, and commerce vehicles. The final design phase has begun and is expected to conclude Summer 2025, with Construction advertisement to immediately follow.

 Infrastructure Improvement	 Final Design Phase	

RICKENBACKER CAUSEWAY – BEAR CUT BRIDGE PD&E STUDY

Miami-Dade County will be performing the planning study, also known as a PD&E Study, to analyze the options for replacement or major rehabilitation of the Bear Cut Bridge from Virginia Key to Key Biscayne. A portion of the bridge was constructed in 1944 and will require replacement of part, all or major rehabilitation to continue to serve as the only connection between mainland Miami and the Village of Key Biscayne. The study will include public outreach and input, stakeholder coordination, design alternative development, cost benefit analysis, long range cost estimating, and analysis of the environmental, archaeological and socioeconomic impact of the design alternatives. The Notice for Professional Service for the PD&E was advertised in January 2023 and the selection and study is expected to take three and a half years. Design or Design Build is set to begin in Spring or Summer 2025 with Construction to Begin in 2027.

DPTW – PUBLIC TRANSPORTATION IMPROVEMENTS

NW 17TH AVENUE BRIDGE OVER MIAMI RIVER PD&E STUDY

Miami Dade County will be performing a PD&E Study, to analyze alternatives for the replacement or major rehabilitation of the NW 17th Avenue movable Bridge from NW 7th Street to NW 14th Street within the City of Miami and Miami-Dade County. The study will aim to address Operational reliability, structural and functional deficiencies, as well as address future transportation demands and multimodal safety opportunities for pedestrians and bicyclists. Constructed in 1928, this bridge provides access to many major points of interest and emergency services in Miami and provides interchange access to the Dolphin Expressway/SR 836.

The PD&E study will include public outreach and input, stakeholder coordination, design alternative development, cost benefit analysis, long range cost estimating, and analysis of the environmental, archaeological and socioeconomic impact of the design alternatives. The PD&E study is expected to take approximately four years to conclude, which will then be followed by Final Design. The Final design phase is tentatively expected to take approximately two years to complete.

NEIGHBORHOOD IMPROVEMENT PROJECTS

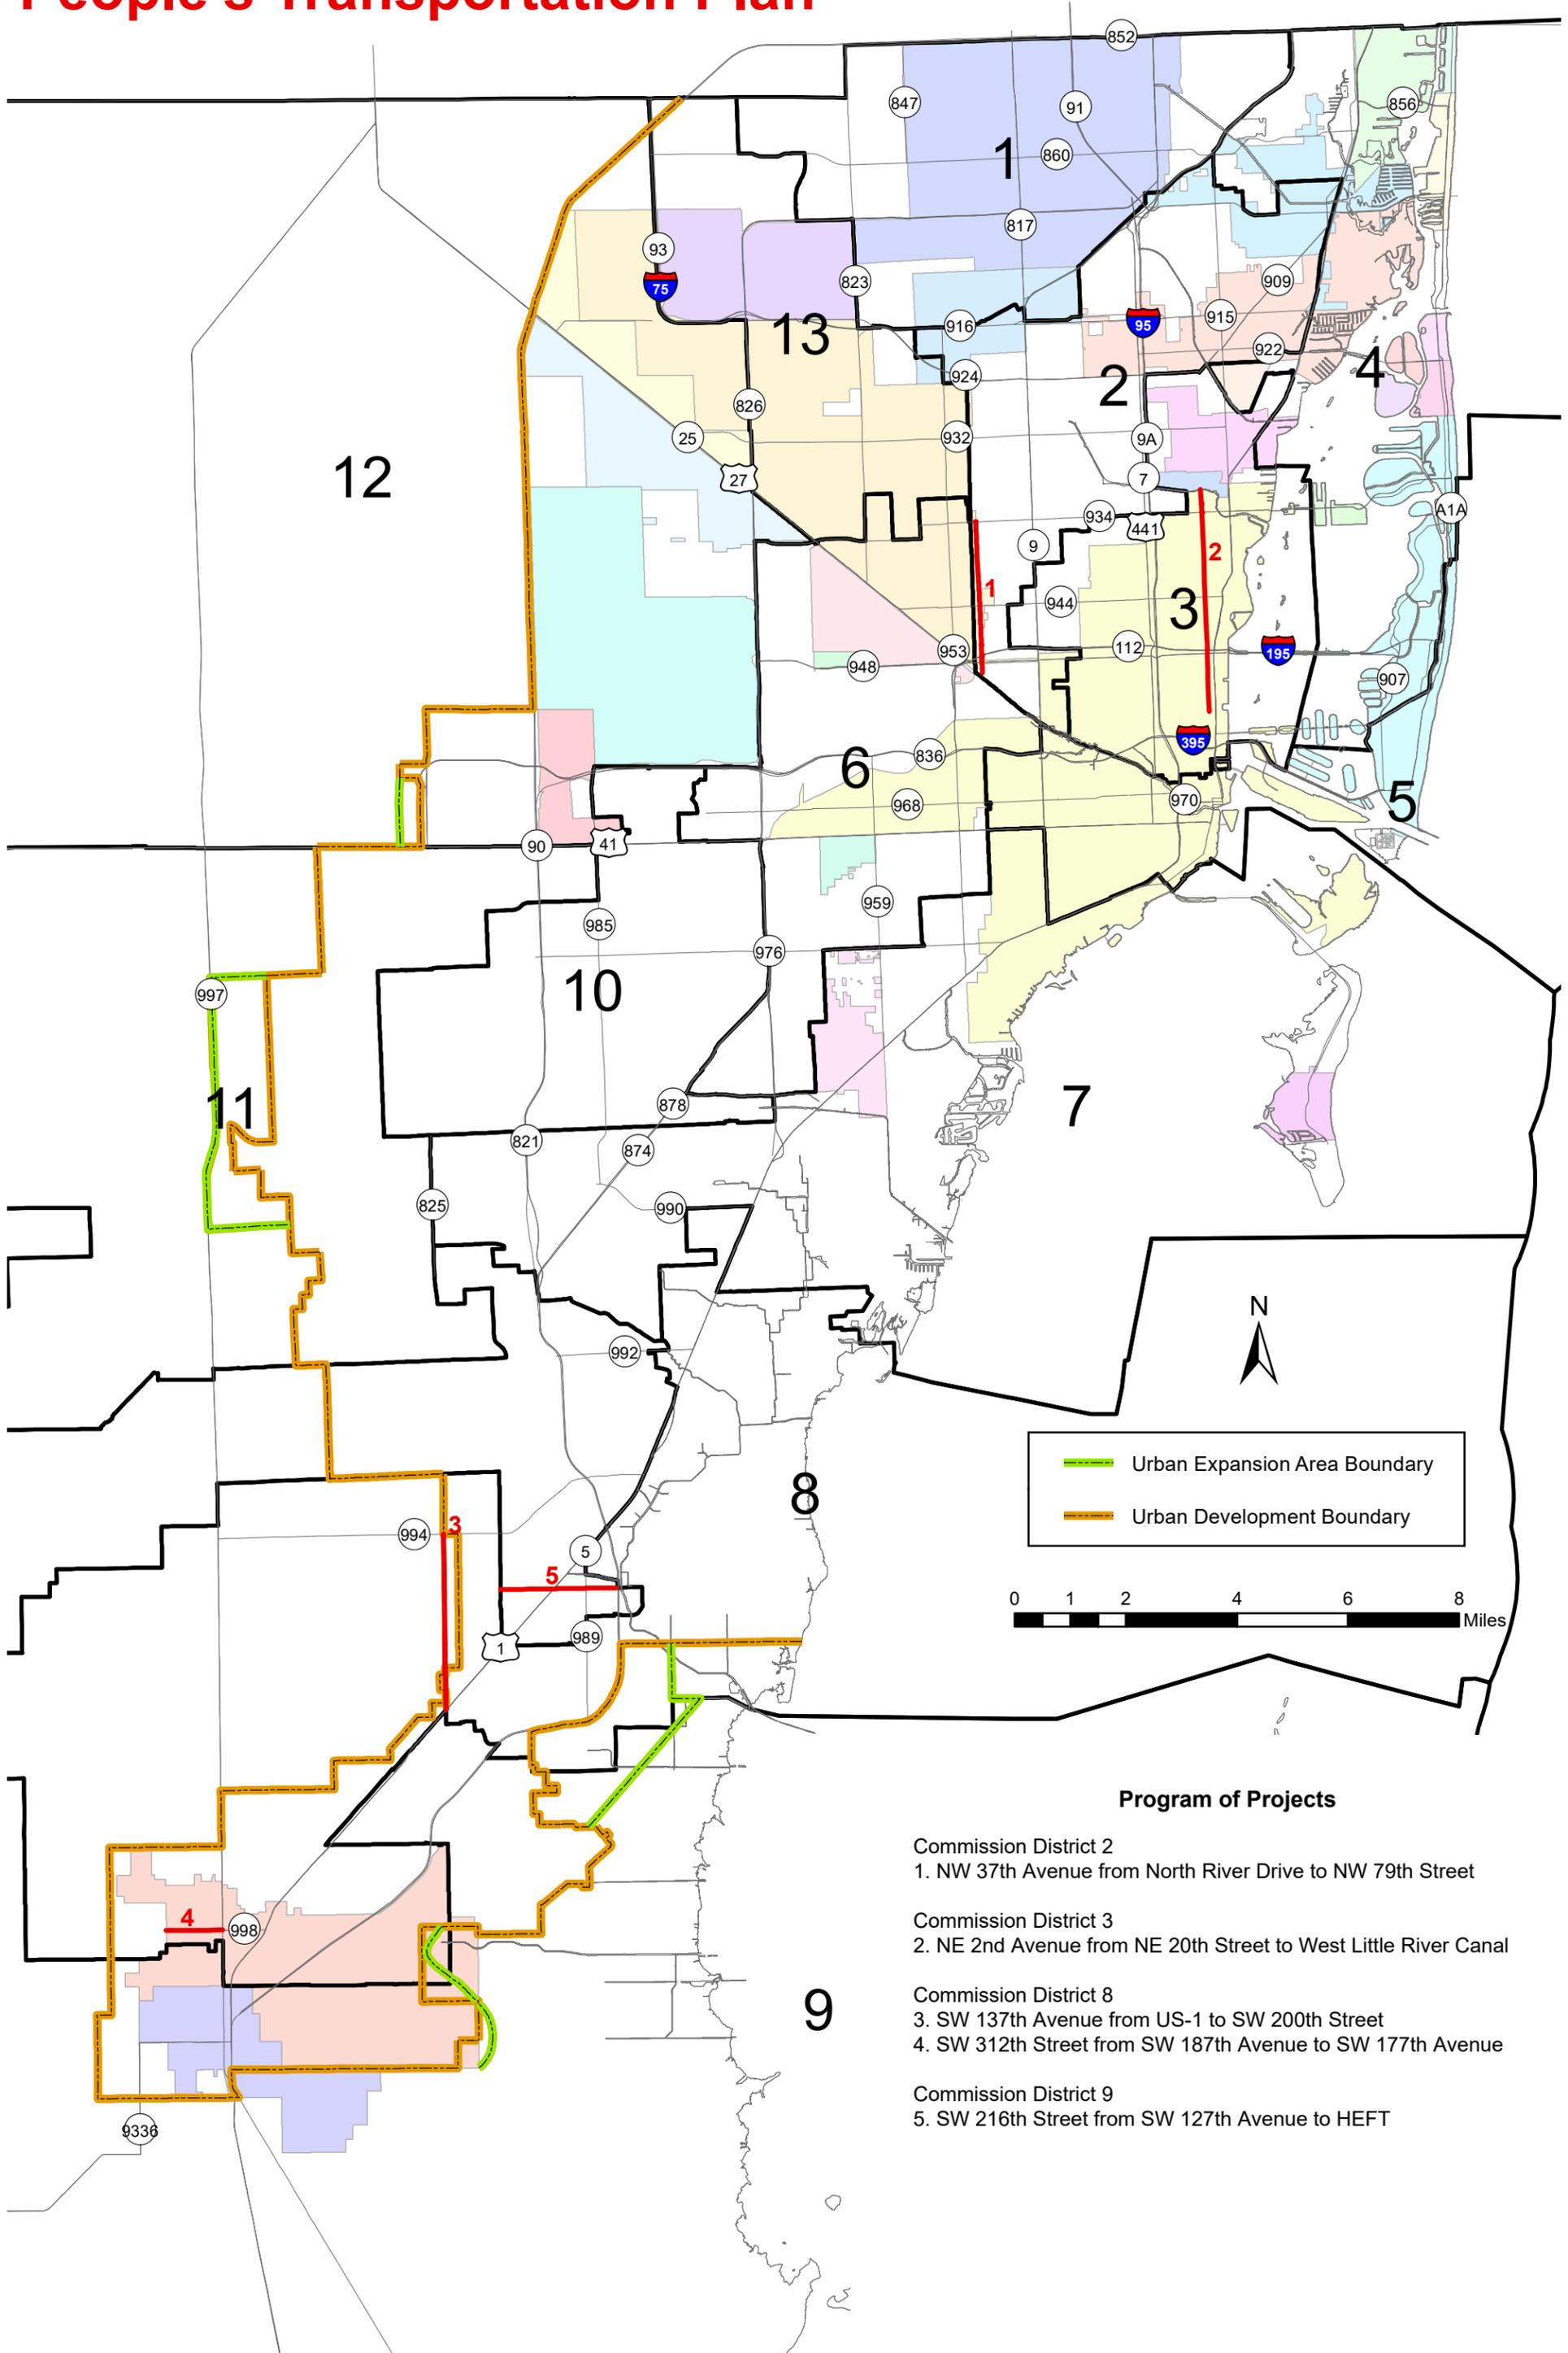

DPTW, as part of the PTP, has been tasked with coordinating and constructing various categories of Neighborhood Improvement Projects.

To address the various non-site-specific categories discussed in the PTP Ordinance, the Department created “The Neighborhood Improvement Projects Formula” to allocate funds. The formula considers population in the Unincorporated Municipal Service Area for each commission district, the needs as reported to the Department, and the percentage of maintained arterial and collector lane miles. A portion is then evenly distributed to each district. PTP Neighborhood Improvements include modifications of intersections, resurfacing of local and arterial roads, installation / repairs of guardrails, installation of school flashing signals, enhancement of greenways and bikeways, A.D.A. curb cuts / repairs, pavement markings, roadway lighting, traffic calming, traffic signals, and traffic sign replacement / repair. Such improvements also include replacement / repair of sidewalks, repair / installation of drainage and landscape beautification (including community image enhancements) related to the development, construction, operation, or maintenance of roads and bridges in the County or to the expansion, operation, or maintenance of bus and fixed guideway system.

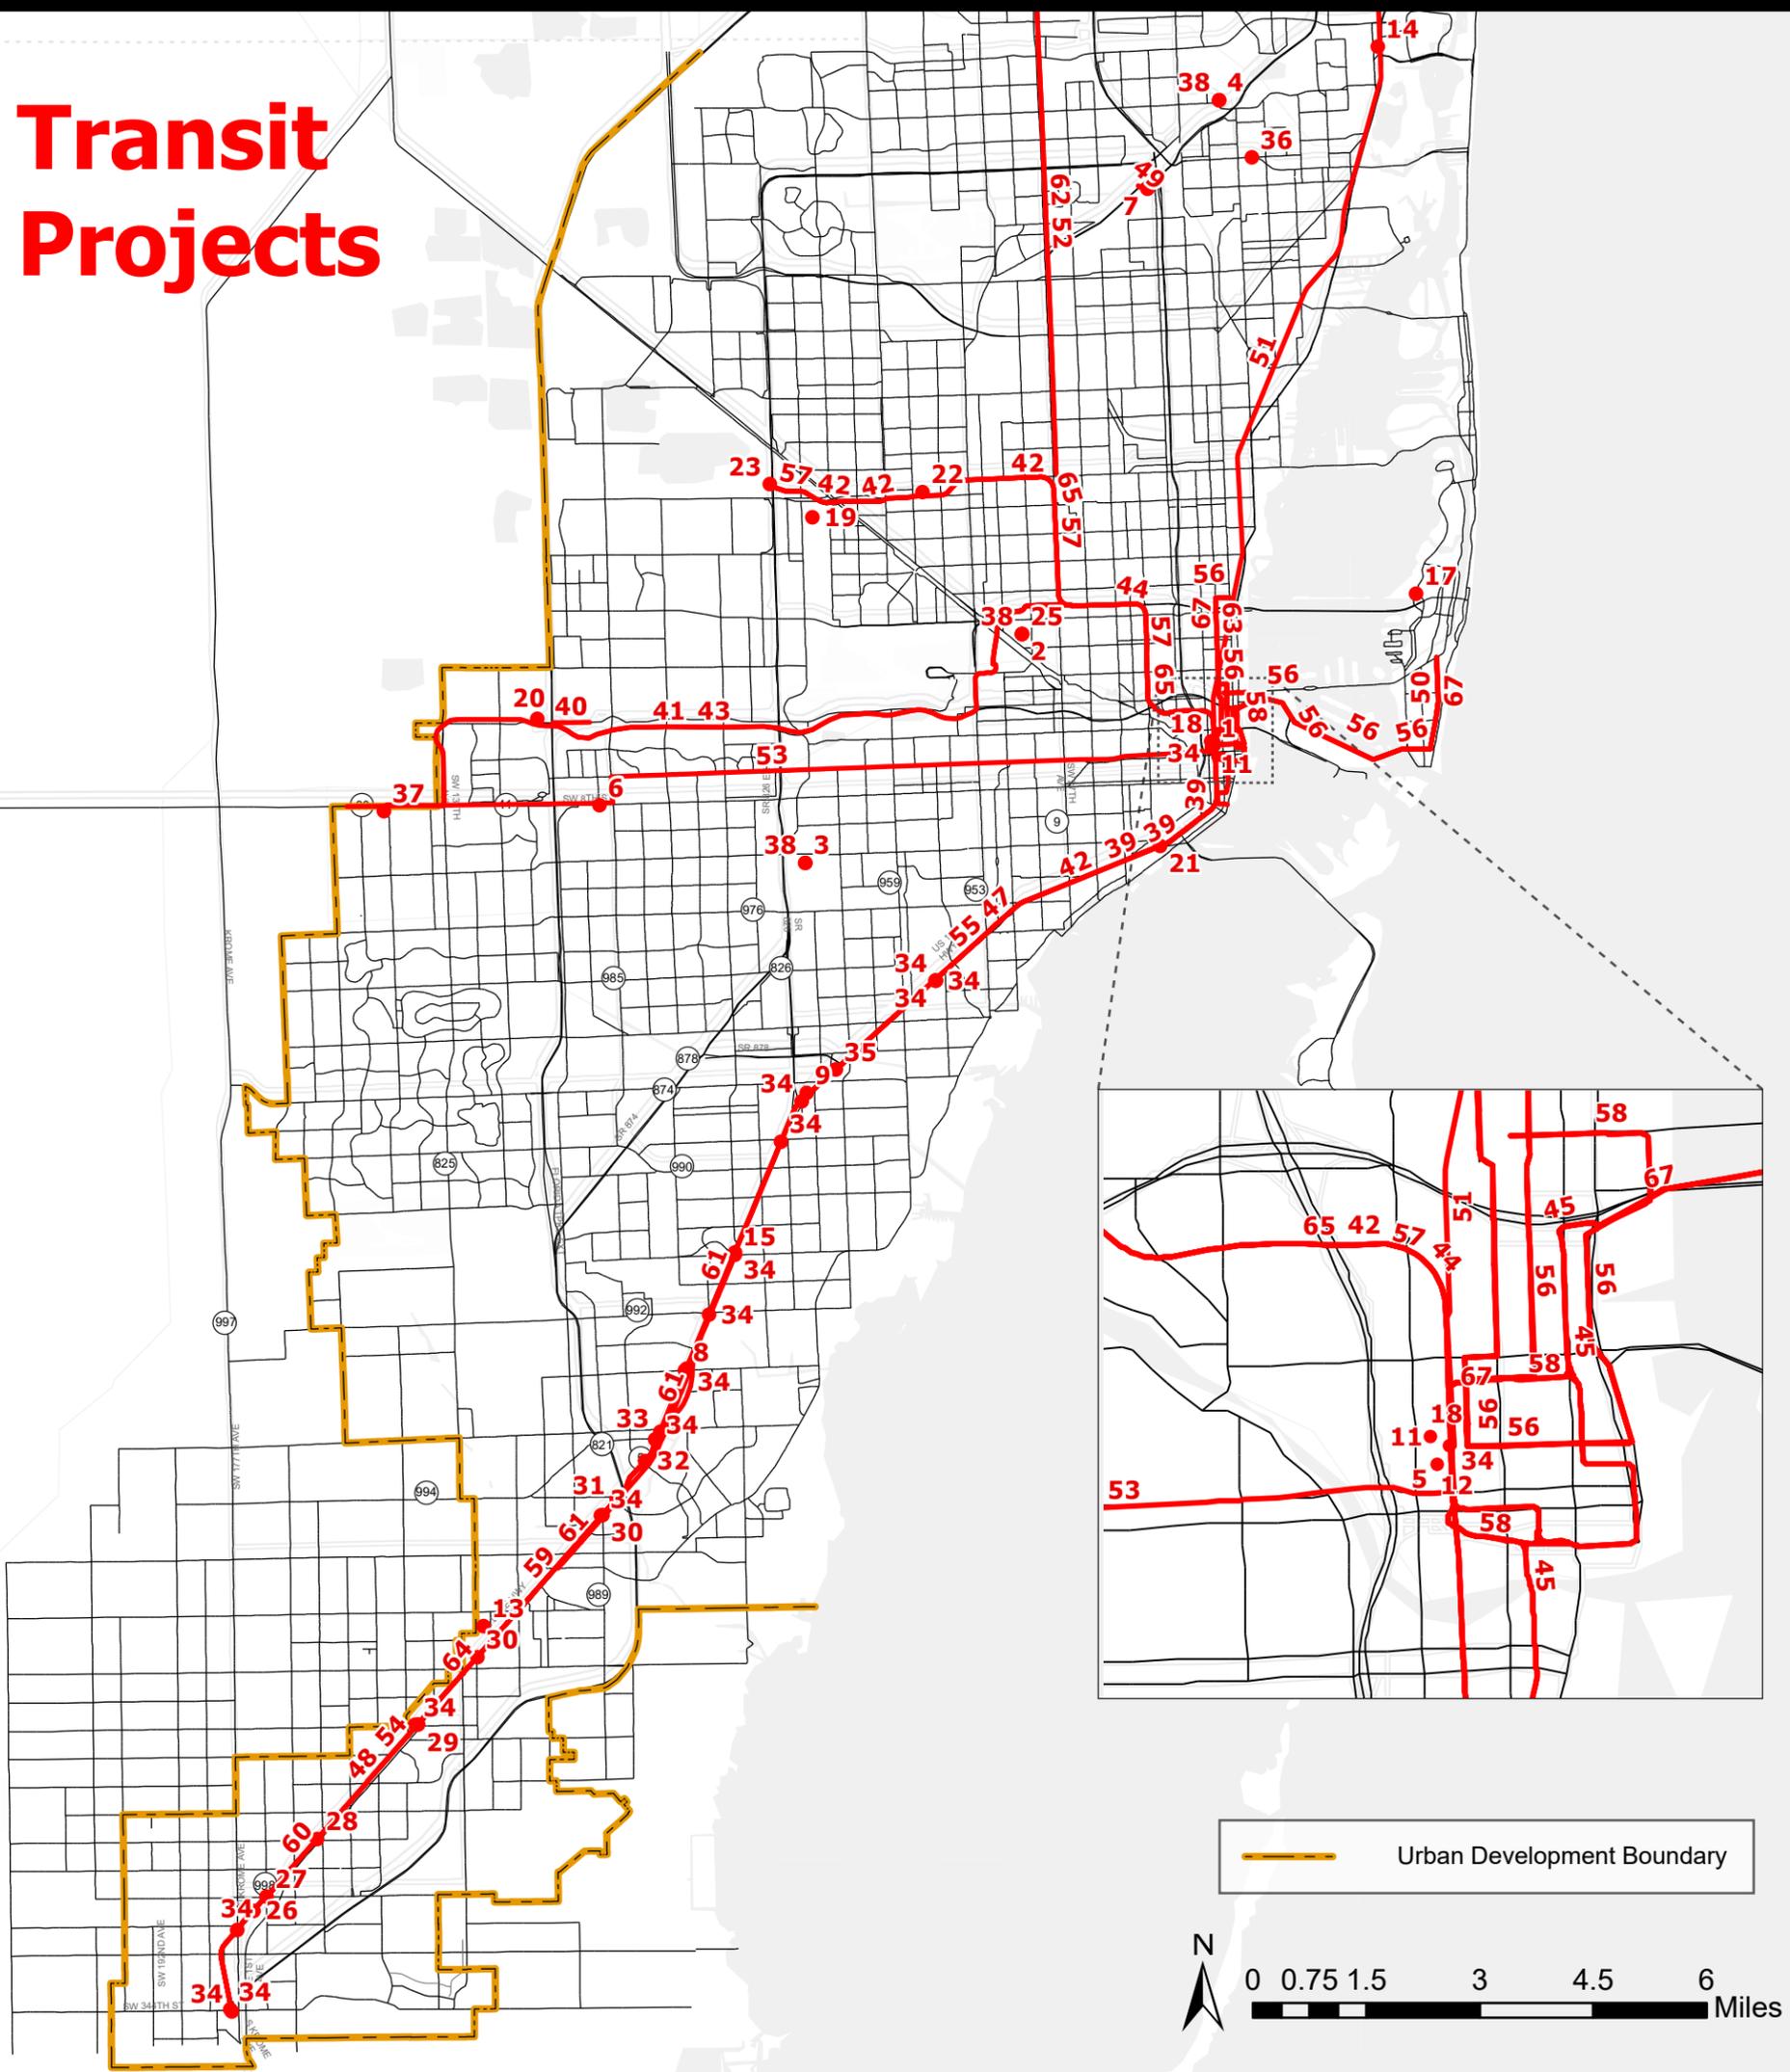

The Neighborhood Improvement Projects include:

- Site Specific Neighborhood Improvement Sites
- Non-Site-Specific Neighborhood Improvement Sites
- Countywide Neighborhood Improvements
- School Flashing Signals Program

NOTE 1: PTP NEIGHBORHOOD IMPROVEMENTS Provided each Commission District with funds for Neighborhood Improvements in the categories listed below and according to an allocation formula based on population, reported needs and County-maintained road lane miles. DTPW continues to coordinate the Neighborhood Improvement Projects with County Commissioners' Offices based on their remaining allocation. Improvement categories include: modifications of intersections; resurfacing of local and arterial roads; installation / repairs of guardrails; installation of school flashing signals, enhancement of greenways and bikeways, A.D.A. curb cuts / repairs, pavement markings, roadway lighting, traffic calming, traffic signals, and traffic sign replacement / repair. Such improvements also include replacement / repair of sidewalks, repair / installation of drainage and landscape beautification (including community image enhancements) related to the development, construction, operation or maintenance of roads and bridges in the County.

NOTE 1: *PTP NEIGHBORHOOD IMPROVEMENTS* Provided each Commission District with funds for Neighborhood Improvements in the categories listed below and according to an allocation formula based on population, reported needs and County-maintained road lane miles. DTPW continues to coordinate the Neighborhood Improvement Projects with County Commissioners' Offices based on their remaining allocation. Improvement categories include: modifications of intersections; resurfacing of local and arterial roads; installation / repairs of guardrails; installation of school flashing signals, enhancement of greenways and bikeways, A.D.A. curb cuts / repairs, pavement markings, roadway lighting, traffic calming, traffic signals, and traffic sign replacement / repair. Such improvements also include replacement / repair of sidewalks, repair / installation of drainage and landscape beautification (including community image enhancements) related to the development, construction, operation or maintenance of roads and bridges in the County.

PART 2: 5-YEAR PROJECT LISTINGS

**Public Transportation
 Improvements**

TIP • FISCAL YEARS 2023/2024 TO 2027/2028

PART 2: 5-YEAR PROJECT LISTING

Public Transportation Improvements

South Florida Regional Transportation Authority (SFRTA)

The mission of the South Florida Regional Transportation Authority (SFRTA) is to coordinate, develop and implement, in cooperation with all appropriate levels of government, private enterprise and citizens at-large in the community, a viable regional transportation system in South Florida that endeavors to meet the desires and needs for the movement of people, goods and services. SFRTA is an agency of the State of Florida, created in 2003 by Chapter 343, Florida Statute, and is authorized to own, operate, maintain, and manage a transit system in the tri-county area of Miami-Dade, Broward, and Palm Beach Counties. SFRTA operates the Tri-Rail Commuter Rail System. The following projects are included in SFRTA's Capital Budget and or Five-Year Plan in Fiscal Year 2024 thru 2028.

THE TRI-RAIL DOWNTOWN MIAMI LINK (TRDML)

SFRTA, in coordination with multiple partners, is extending the Tri-Rail commuter rail service to provide a new service from Tri-Rail's northern most station at Mangonia Park in Palm Beach County to its southern most station at the "MiamiCentral Station" in Downtown Miami. The 9.05-mile extension, known as Tri-Rail Downtown Miami Link (TRDML), will provide connecting service from the South Florida Rail Corridor (SFRC) at the Tri-Rail Metrorail Transfer Station, to the Florida East Coast (FEC) railway corridor, into Downtown Miami. TRDML service is expected to begin in late 2023. The MiamiCentral Station will serve as Downtown Miami's multimodal hub, providing connections to Brightline, Tri-Rail, the existing Miami Dade county bus system, Metrorail, and Metromover.

TRDML will provide a cost-effective and strategic transit solution for Miami-Dade County. The new service will leverage Brightline express train service and station investment, together with the recent SFRC connections to the FEC railway corridor; quiet zone funds provided by the Miami-Dade Transportation Planning Organization (TPO); and the region's previous investment in the Tri-Rail system.

The key to this leveraging is a local investment by public partners of \$70 million for incremental construction costs for the MiamiCentral Station, to accommodate Tri-Rail trains and new rail infrastructure to support the extension into Downtown Miami.

SFRTA – PUBLIC TRANSPORTATION IMPROVEMENTS

ROLLING STOCK

Procurement of new Tri-Rail Rolling stock will enable SFRTA to both maintain and provide additional passenger service operations on the existing South Florida Rail Corridor (SFRC). New rolling stock will also allow for increased ridership capacity, operational and train scheduling flexibility and for future service expansion onto the Florida East Coast Railway (FEC).

TRI-RAIL PASSENGER INFORMATION SYSTEM (PIS)

Tri-Rail PIS will provide train locations and predicted arrival times at each station via the internet, smartphone app, telephone, text message, and LCD display location on the station platforms. The system will include onboard signage and an audio system on train cars to display and announce next station arrival and destination information. The train-tracking component is expected to be available via internet and smartphone app.

SAFETY AND SECURITY CAMERAS, PHASE 2

The purpose of the proposed project is to fund installation of surveillance camera hardware and monitoring technology at all Tri-Rail Stations. Cameras will be installed in parking lots, stairwells, pedestrian walkways and bridges, and locations within stations that require safety monitoring. The Phase 1 project was recently completed and focused on installing surveillance cameras on Tri-Rail station platforms.

These surveillance cameras and monitoring technology allows SFRTA's Public Safety Coordination Center (PSCC) to monitor/detect suspicious and/or unlawful activities in real time for quick detection and response. Activities are recorded for reference, training, system improvement, and/or as video evidence when further law enforcement is needed.

MIAMI RIVER-MIAMI INTERMODAL CENTER CAPACITY IMPROVEMENT

The MR-MICCI Project will provide an additional mainline track within the South Florida Rail Corridor from just north of the Tri-Rail Hialeah Market Station to the Tri-Rail Miami Airport Station located at the Miami Intermodal Center. The project will increase capacity and improved track connections across the Miami River, including bridge, track, and signal upgrades. SFRTA has finalized the Project Development and Environment (PD&E) Study and completed 30% design for this project. The final design and construction will be completed by the Florida Department of Transportation, District Four.

PLANNING AND CAPITAL DEVELOPMENT

The Planning and Capital Department performs short- and long-term planning activities and facilitates the performance of planning studies and efforts such as the update of the Transit Development Plan (TDP), Transit-Oriented Development (TOD) station area plans, Bicycle and Pedestrian Studies and Passenger Surveys, along with other regionally significant projects.

SFRTA – PUBLIC TRANSPORTATION IMPROVEMENTS

PROGRAM OF PROJECTS

SFRTA receives annual Federal Appropriations Sections 5307 and 5337 funding from the Federal Transit Administration (FTA). This funding is programmed in SFRTA's Capital Budget to include preventive maintenance expenditures such as rolling stock maintenance and station maintenance; along with other capital projects and initiatives that the Agency plans to undertake, which are allowable expenditures of funds under FTA guidelines.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

PART 2: 5-YEAR PROJECT LISTINGS

Non-Motorized Component

PORTMIAMI

TIP • FISCAL YEARS 2023/2024 TO 2027/2028

PART 2: 5-YEAR PROJECT LISTING Non-Motorized Component

The development of safe facilities for people who walk or use a bicycle is guided by the Comprehensive Development Master Plan (CDMP) and the 2045 Long Range Transportation Plan (LRTP).

CDMP Transportation Element Objective TE-2 states: “In furtherance of pedestrianism and other non-motorized modes of transportation in the planned urban area, Miami-Dade County shall enhance its transportation plans, programs and development regulations as necessary to accommodate the safe and convenient movement of pedestrians, non-motorized vehicles and motorized vehicles.”

The 2045 LRTP lists the following goals and objectives, related to non-motorized projects/programs:

LRTP GOAL 1: MAXIMIZE MOBILITY CHOICES SYSTEMWIDE

- Objective: Provide a comprehensive transportation network for dependable and reliable transportation options.
- Objective: Increase mobility choices throughout the county

LRTP GOAL 2: INCREASE THE SAFETY OF THE TRANSPORTATION SYSTEM FOR ALL USERS

- Objective: Improve the safety of the transportation system
- Objective: Promote projects in high crash locations – (locations with the highest number of crashes)
- Objective: Improve safety of the transportation system for the elderly and disabled

MIAMI-DADE TPO – NON-MOTORIZED COMPONENT

Bicycle and pedestrian projects in the 2023/2024 to 2027/2028 Transportation Improvement Program are taken from the non-motorized section of the 2045 LRTP, the Transportation Alternatives Program application cycle and through agency coordination for other transportation projects. Projects are presented to the Miami-Dade Bicycle Pedestrian Advisory Committee (BPAC) for public information and comment.

The Miami-Dade 2045 Bicycle Pedestrian Master Plan assesses opportunities amongst the SMART Plan transit hubs and stations to expand the reach of bicycle and pedestrian trip distances to the entire county, with the help of transit connections. This plan's primary focus is on the daily commuter trip and aims to incentivize projects that safely connect the largest number of people, that need it the most, to the most places, on a daily basis. This plan also looks at other pedestrian and bicycle trip destinations such as educational facilities, major medical centers, high employment areas, and outdoor recreational locations. Realizing these opportunities will help manage the ever-present issue of traffic any metropolitan area deals with and further encourages healthy and sustainable communities within the County. This plan serves as the Bicycle and Pedestrian element of the 2045 Long Range Transportation Plan (LRTP).

More information on the TPO's Bicycle Pedestrian Program is available from the TPO website at: <http://miamidadetpo.org/bicycle-pedestrian-program.asp>.

**Intelligent Transportation
 Systems (ITS)**

PORTMIAMI

TIP • FISCAL YEARS 2023/2024 TO 2027/2028

PART 2: 5-YEAR PROJECT LISTING Intelligent Transportation Systems (ITS)

An Intelligent Transportation Systems (ITS) is a combination of leading-edge applications and communication technologies used to improve transportation safety, efficiency, and sustainability of surface transportation system. ITS technologies enable the users to be better informed and make smarter use of the network in our region. ITS encompasses a broad range of advanced and traditional communications-based information and electronic technologies to:

- Improve safety by increasing information to the driver and augmenting driver control of the vehicle. Features include warning systems that activate when cars get too close to another vehicle or the edge of the road and enhanced traffic control systems that decrease stops and speed variations, reducing the number of crashes.
- Reduce congestion and improve accessibility through rapid detection and clearing of incidents that cause delays; enhanced public transit systems can reduce highway traffic; and real-time traffic control systems can adapt automatically to changing conditions and improve the flow of traffic.
- Improve energy efficiency and environmental quality by providing travelers with information to support decisions that can reduce highway demand and travel time and vehicle emissions by providing mobility options to use high occupancy vehicles or public transit or on demand services to mitigate congestion.
- Enhance economic productivity by improving the transportation system efficiency through better routing of vehicles, automated toll collection, safety enhancements and streamlining commercial vehicle regulatory enforcement and compliance.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

PART 2: 5-YEAR PROJECT LISTINGS

Transportation Disadvantaged Section (ADA)

TIP • FISCAL YEARS 2023/2024 TO 2027/2028

PART 2: 5-YEAR PROJECT LISTING **Transportation Disadvantaged Section (ADA)**

Section 427.015, Florida Statutes, requires that the Metropolitan Planning Organization, as part of its Transportation Improvement Program “shall... identify transportation improvements that will be advanced with [transportation disabled] funds during the program period.” This requirement is reiterated in section 3(f)2.g of the Florida Department of Transportation directive 525-010-012-c (“Transportation Improvement Program Development and Review”). The purpose of this section is to meet these requirements, and to reference, in a user-friendly format, transportation improvements to assist the safe and efficient transport of those citizens who need special services and facilities to obtain access to life-sustaining activities.

EXPLANATION

The projects listed in this section do show funding amounts but no construction schedules. This is because the same projects are also listed in other sections of this document grouping projects by funding category. The items listed are referenced by the page number in which they appear in other TIP sections.

In addition, this section includes pedestrian facilities and sidewalks and some transit passenger amenities which, once completed, could enhance and facilitate usage by not only disadvantaged passengers but the public in general. This section does not include relevant improvements associated with larger transportation projects. Examples would include curb cuts and tactile surface treatments added onto sidewalks as part of an intersection widening and reconstruction, or wheelchair ramps and elevators included within the design of major facilities, as required by the 1991 Americans with Disabilities Act.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

PART 2: 5-YEAR PROJECT LISTINGS

**Congestion Management
 Process**

PORTMIAMI

TIP • FISCAL YEARS 2023/2024 TO 2027/2028

PART 2: 5-YEAR PROJECT LISTING Congestion Management Process

Congestion Management is an integral part of the planning process, and the Congestion Management Process (CMP) is required to be developed and implemented pursuant to Title 23 U.S. Code 134 – Metropolitan Transportation Planning in Transportation Management Areas (TMAs). The congestion management process in Miami-Dade is being developed cooperatively with FDOT and is being implemented on a Countywide basis. The application of CMP strategies will improve transportation system performance and reliability by reducing the adverse impacts of congestion on the movement of people and goods through demand reduction and operational improvements.

The FAST Act retained the requirement for a congestion management process for MPOs that serve a Transportation Management Area (TMA), the law also allows an MPO that serves a TMA to develop a congestion management plan (distinct from the congestion management process) that will be considered in the MPO's transportation improvement program. The Miami-Dade 2045 LRTP, adopted September 2019, included such Congestion Management Plan. The plan identifies proposed projects and programs to reduce congestion and increase job access opportunities. This plan will be updated again within the Miami-Dade 2050 LRTP process to be adopted in September of 2024.

The Miami-Dade County 2019 Congestion Management Plan Update improved upon the 2014 Miami-Dade Congestion Management Process. The CMP was developed based on the 8-step process outlined in the FHWA CMP Guidebook. CMP objectives were drawn from the Miami-Dade County's 2045 Long Range Transportation Plan (LRTP) goals and objectives and serve as one of the primary points of connection between the CMP and LRTP and define the direction for development of CMP Performance Measures. Similar to the 2014 CMP update process, transit, freight, and non-motorized modes are evaluated through the 2045 LRTP update process as a separate effort, thus are not included in the CMP update process. To avoid duplication with significant transportation investments committed to by the TPO, the CMP list eliminated congested locations which coincided with the cost feasible plan (CFP) projects or with SMART Plan Corridors including the BERT network. The observed congestion at these locations were assumed to be addressed by the cost feasible plan and Smart Plan investments.

The project list which follows is based on the adopted 2045 LRTP, which incorporated the 2019 Congestion Management Process Update. The process and projects are further detailed on pages 7-126 through 7-133 of the 2045 LRTP document.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

PART 2: 5-YEAR PROJECT LISTINGS

**Freight-Related
 Transportation
 Improvements**

PORTMIAMI

TIP • FISCAL YEARS 2023/2024 TO 2027/2028

PART 2: 5-YEAR PROJECT LISTING

Freight-Related Transportation Improvements

On November 15, 2021, President Biden signed into law the \$1.2 trillion Infrastructure Investment and Jobs Act (IIJA), a bipartisan bill committed to a five-year plan over fiscal years 2022 through 2026 that will impact every aspect of the nation's transportation system. In brief, it will finance the rebuilding and rehabilitation of thousands of decaying bridges, tens of thousands of miles of roadway, improvements in railroad infrastructure in addition to increasing the capacity and resilience of the nation's airports, seaports and waterways. The IIJA funding represents an increase of \$273.9 billion over the Fixing America's Surface Transportation (FAST) Act baseline.

SIGNIFICANT FREIGHT PROVISIONS

The IIJA includes a number of provisions to improve the condition and performance of the national freight network and support investment in freight-related surface transportation projects. Specifically, the Freight Provisions over the next five years (along with the funding amounts) are as follows:

- **Office of Multimodal Freight Infrastructure and Policy:** USDOT will establish a Freight Office led by an Assistant Secretary for Multimodal Freight. The Office will oversee national and state freight planning and policy as well as implement and administer multimodal freight grant programs
- **INFRA Grant Program** – Nationally Significant Freight and Highway Projects: Freight-specific competitive grant program with broad applicant eligibility that provides funding for large highway and bridge projects, as well as port, rail, intermodal, and rail-highway at-grade crossing and grade separation projects. A maximum of 30 percent of annual INFRA funding may go toward non-highway freight projects (\$8 billion).
- **Freight Formula Program** – National Highway Freight Program: Freight-specific formula program for statewide projects. A maximum of 30 percent of annual freight formula funding may go toward non-highway freight projects (\$7.15 billion).
- **National Infrastructure Project Assistance Program:** Fully multimodal competitive grant program available to a wide variety of large transportation infrastructure projects. 50 percent of funding will go toward projects that have a total cost of at least \$500 million and 50 percent will be set aside for projects with a total cost between \$100-\$500 million (\$5 billion).
- **TIGER/BUILD/RAISE Grant Program** – Local and Regional Project Assistance: Codifies the TIGER/BUILD/RAISE grant program, previously subject to annual appropriations, into reauthorization law for the first time. The program is fully multimodal and open to a broad range of eligible transportation projects (\$7.5 billion).

MIAMI-DADE TPO – FREIGHT-RELATED TRANSPORTATION IMPROVEMENTS

- **Railroad Crossing Elimination Program:** Discretionary grant program for highway-rail or pathway-rail grade crossing improvement projects, including grade separations or closures; track relocations; installation of related protective devices, signals or signs; and related planning or environmental reviews (\$3 billion).
- **Consolidated Rail Infrastructure and Safety Improvements Program:** Discretionary grant program for passenger and freight rail safety, efficiency, and reliability improvement projects. Eligible projects include: the deployment of railroad safety technology (including positive train control); capital rail projects to address congestion and safety challenges affecting rail service; highway-rail grade crossing improvement projects; projects to improve short-line or regional railroad infrastructure; and projects to enhance multimodal connections or facilitate service integration between rail service and other modes (\$5 billion).
- **Port Infrastructure Development Program:** Multi-year direct appropriations for the PIDP grant program, which provides grants to improve facilities, operations, and intermodal connections near or within seaports, inland ports, and Great Lakes ports. This program is typically subject to annual appropriations. While it still remains separate from surface transportation reauthorizations within the IIJA, this provision ensures consistent funding for the PIDP program over the next five years (\$2.25 billion).
- **Bridge Program** – Formula: Creates a bridge replacement, rehabilitation, preservation, protection, and construction program. Funding is distributed by formula based on a state’s share of bridges in “poor” and “fair” condition (\$27.5 billion).
- **Bridge Investment Program** – Discretionary: Establishes a competitive grant program for projects to replace, rehabilitate, preserve, or protect bridges on the National Bridge Inventory (\$12.5 billion).

The Florida Strategic Intermodal System (SIS) program also has freight-emphasis. The SIS was established to ensure that transportation dollars were invested in areas that supported the local economic generators such as the seaport and the airport and the roadway facilities that connect them. The 2045 Miami-Dade Long Range Transportation Plan (LRTP) Update embraced freight movement with the inclusion of a freight element that includes projects that focus on improving freight movement along major corridors, and specifically, in to and out of Miami International Airport (MIA) and PortMiami. Miami-Dade County is committed to providing a transportation system that enhances the efficiency of freight movement. .

The Freight Transportation Advisory Committee (FTAC), that includes representatives from the freight, logistics, warehousing and intermodal industries in addition to consultants and municipalities, is the industry’s advisory panel to the TPO Governing Board on freight movement and truck traffic needs. Aside from advising the TPO, the FTAC considers the types of improvements that should be made with regard to safety and freight efficiency in the county including:

- Determining logistics for truck parking/staging
- Development of Inland Port locations for PortMiami
- Improving the turning radii for trucks
- Enhancing access to freight trucks

MIAMI-DADE TPO – FREIGHT-RELATED TRANSPORTATION IMPROVEMENTS

- Increasing capacity through select road widening projects
- Modifying access to both seaport cargo and cruise operations at PortMiami
- Promoting regular communication among freight businesses, elected officials, and appointed officials

MIAMI-DADE COUNTY FREIGHT PLAN

The county is home to a well-established and expanding freight transportation system. This system serves as the cornerstone of the region's economy, providing goods and services to Florida's largest consumption market as well as connecting the region to the global economy through major sea and air gateways, taking into account emerging and future technologies. The Freight Plan was recently updated in June 2018.

PLANNED FREIGHT-RELATED TRANSPORTATION IMPROVEMENTS

Taking advantage of existing freight provisions, multiple freight-related projects have been planned to prepare Miami-Dade County for the future. For starters, a network of Connected and Autonomous Vehicles (CAV) corridors is planned to modernize the county's freight infrastructure. Starting with SR 821/Homestead Extension of the Florida's Turnpike (HEFT) from SR 836/Dolphin Expressway to NW 106th Street and followed by SR 826/Palmetto Expressway to/from SR 836/Dolphin Expressway to US 27/SR 25/Okeechobee Road, CAV technology will be researched, tested, and implemented on dedicated lanes. Moreover, the county continues in the process of developing its first full-service truck travel center at the Golden Glades Interchange, known as the GGTTTC. It will be the only full-service truck parking facility in Miami-Dade County and is located approximately 14 miles south from the nearest comparable facility for truckers travelling to PortMiami. The GGTTTC will inform truckers on the highway of parking availability through an intelligent network of digital signs called Truck Parking Availability System (TPAS).

With trucks moving more than 75% of the county's annual freight tonnage, traffic operation and signal improvements are planned for SR 969/NW 72nd Avenue/Milam Dairy Road at SR 934/SW 74th Street/Hialeah Expressway and US 27/SR 25/Okeechobee Road from SR 821/HEFT to NW 74th Street. Aside from these projects, other large improvements are ongoing or have been planned such as interchange improvements at SR 826/ Palmetto Expressway at US27/SR 25/Okeechobee Road, SR 924/Gratigny Expressway west extension, new SR 821/HEFT interchanges at NW 170th Street and I-75, new direct ramps at SR 821/HEFT and NW 12th Street, new direct ramps at SR 948/NW 36th Street and US 27/SR 25/Okeechobee Road, and capacity improvements along US 27/SR 25/Okeechobee Road, I-395/SR 836/Dolphin Expressway and at the Golden Glades Interchange. The TPO, along with FDOT District 6, annually submits freight related projects to the MPOAC Freight Priorities Program in an effort to obtain and advance additional funding for locally significant freight projects.

More information on the TPO's Freight & Logistics Program is available from the TPO website at: <https://miamidadetpo.org/freight-logistics-planning-program.asp>

TIP • FISCAL YEARS 2023/2024 TO 2027/2028

PART 2: 5-YEAR PROJECT LISTING

Regionally Significant Transportation Improvements

Southeast Florida Transportation Council (SEFTC)

The Southeast Florida region comprised of Palm Beach, Broward, and Miami-Dade Counties has a 2020 population of over 6.1 million, as of April 1, 2020. Miami-Dade County's 2020 total population is 2.7 million.

Hundreds of facilities make up our region's transportation network; facilities that carry freight, auto, and transit traffic. To develop this network, the region critically looked at the intended uses and functionalities of the existing and future facilities to determine what is regional.

This assessment considered technical components as well as the Long Range Transportation Plan's goals and objectives to ensure compatibility and consistency. Ultimately, four criteria were utilized to guide the regional corridor network development: covering roadway, rail and hub. The four criteria definitions and sources are described in detail below.

PRINCIPAL ARTERIALS

Definition: Interstate, Freeway/Expressway and all other Principal Arterials

Source: Draft 2010 Functional Classification for FDOT Districts 4 and 6, May 9, 2013

PLANNED PHYSICAL EXTENSIONS OF PRINCIPAL ARTERIALS

Definition: Interstate, Freeway/Expressway and all other Principal Arterials that are in the adopted LRTP Cost Feasible Plans for future expansion

Source: 2045 LRTP Cost Feasible Plan for Broward, Miami-Dade and Palm Beach County MPOs

STRATEGIC INTERMODAL SYSTEM (SIS) NETWORK

Definition: SIS and Emerging SIS Corridors, Hubs, Connectors, Railways and Waterways

Source: FDOT Central Office SIS facilities, April 2013

PRINCIPAL ARTERIAL CONNECTIONS

Definition: (1) Minor Arterials connecting to Freeways/Expressways, and/or SIS Corridors; (2) extensions of Principal Arterials that cross the intercostal for evacuation purposes; (3) key connections of “gaps” in the network; (4) Non-principal Arterials carrying 50,000 AADT or greater; and (5) extensions of facilities carrying 50,000 AADT or greater to complete a regional network connection.

Source: Draft 2010 Functional Classification for FDOT Districts 4 and 6, May 9, 2013; FDOT Central Office SIS facilities, April 2013; and Adopted Countywide Evacuation Routes – Broward, Miami-Dade and Palm Beach County

The following project list reflects regional projects of major significance based upon:

- A. Within the regional network
- B. Capacity projects identified for construction phases
- C. Over \$5,000,000 total construction allocations

PART 2: 5-YEAR PROJECT LISTINGS

Parks, Recreation and Open Spaces

PART 2: 5-YEAR PROJECT LISTING Parks, Recreation and Open Spaces

Miami-Dade Parks, Recreation and Open Spaces (MDPROS)

1. Ludlam Trail

Miami-Dade Parks, Recreation and Open Spaces (MDPROS) is proposing to develop the Ludlam Trail, a 5.6-mile multi-use trail within a former railroad corridor. As a priority paved land trail from the Florida Greenways and Trails System (FGTS) Priority Network and Shared-Use Nonmotorized (SUN) Trail Network, the proposed publicly accessible transportation corridor will serve bicyclists, pedestrians, and users of other types of non-motorized vehicles. In addition, the proposed project is anticipated to provide a safe, dedicated, and direct means of non-motorized transportation to and from areas of residences, transit, work, schools, parks, and shopping centers.

The proposed project limits extend from SW 80th Street to 400 feet north of NW 7th Street, between 69th and 70th Avenue. The County acquired the right of way for the Ludlam Trail in December 2018, including fee simple owned areas and easements through three private development node areas. The ROW for the proposed Ludlam Trail Corridor is approximately 100 feet wide for most of its length, although it narrows to between 75 and 80 feet in some areas and down to 18 feet in easement sections designated for mixed-use development. The project study area traverses sections of the City of Miami and unincorporated Miami-Dade County (MDC). The project is adjacent to the City of South Miami and proximate to the City of West Miami.

MIAMI-DADE TPO – PARKS, RECREATION AND OPEN SPACES

The multi-use trail generally consists of a 12-foot-wide, two-way, asphalt bike path, separated by a landscaped buffer from an 8-foot-wide concrete pedestrian path with a 2-foot-wide soft natural jogging surface adjacent to it.

The proposed trail development includes 11 at-grade crossings, four grade-separated bridge crossings over roadways (at SR 976 / SW 40th Street / Bird Road; SW 24th Street / Coral Way; US 41 / SR 90 / SW 8th Street / Tamiami Trail / Calle Ocho; and SR 968 / W Flagler Street), and bridges across existing South Florida Water Management District (SFWMD) canals (C-3/ Coral Gables Canal and C-4 / Tamiami Canal).

The purpose of the proposed Ludlam Trail Corridor Project is to encourage the use of alternate modes of transportation and enhance overall connectivity and accessibility to schools, parks, transit stations, and bus stops for more than 30,500 residents present within two miles of the proposed project corridor. The need for the proposed project is based on the criteria identified below.

The proposed project supports the vision of the MDPROS Open Space Master Plan (OSMP), a primary element of which is to “provide an interconnected trail system which offers transportation alternatives and reduces traffic congestion.” The OSMP provides a 50-year unifying vision for a livable and sustainable MDC, which involves the development of a seamless system of greenways, trails, and water trails. The Ludlam Trail will be a vital component of this network as it will link open spaces and civic institutions to neighborhoods, while offering a reliable transportation alternative.

From a regional perspective, the proposed project will connect to the Metrorail Dadeland North Station via existing sidewalks along SW 70th Avenue from SW 80th Street to SW 85th Street; the proposed Strategic Miami Area Rapid Transit

(SMART) Plan Corridor #2 (East-West Corridor) near NW 7 Street to the north; and to other planned trails including The Underline/East Coast Greenway, South Dade Trail, Snapper Creek Trail, East/West Trail, and Merrick Trail.

2. Biscayne Trail

Miami-Dade Parks, Recreation and Open Spaces (MDPROS) is developing Segment D of the Biscayne Trail in two phases, which is part of the larger, 43-mile Biscayne-Everglades Greenway. As a priority paved land trail from the Florida Greenways and Trails System (FGTS) Priority Network and Shared-Use Nonmotorized (SUN) Trail Network, the trail corridor will serve bicyclists, pedestrians, and users of other types of non-motorized vehicles. The purpose of the Biscayne Trail is to encourage the use of alternate modes of transportation and enhance overall connectivity and accessibility to schools, local and national parks, and transit hubs for more than 127,000 residents present within the census tracts of the proposed corridor.

The project limits for Segment D Phase 1 begin at SW 328th St. at Biscayne National Park and Miami-Dade County’s Homestead Bayfront Park, then head north along the L31-E Canal, then west along the south bank of the Mowry Canal to SW 117th Ave. Phase 2 of the Biscayne Trail picks up at SW 117th Ave., then continues west along the Mowry Canal, south along SW 127th Ave., west along SW 320th St., then north along SW 137th Ave. and ending at the Mowry Canal, where it will connect to the segment recently completed by the City of Homestead. Together, these
