# PART 2: 5-YEAR PROJECT LISTINGS FLORIDA'S TURNPIKE ENTERPRISE

## TIP • FISCAL YEARS 2024/2025 TO 2028/2029

## PART 2: 5-YEAR PROJECT LISTING FLORIDA'S TURNPIKE ENTERPRISE

Florida's Turnpike

Florida's Turnpike Enterprise is an agency of the Florida Department of Transportation and currently owns and operates over 515 miles of toll facilities and 148 interchanges in the State of Florida. The Turnpike System includes the 47-mile Turnpike Mainline / SR 821 located in Miami-Dade and Broward counties. It also includes the Turnpike Mainline / SR 91, which extends from North Miami to a junction with Interstate 75 in north central Florida, through Miami-Dade, Broward, Palm Beach, Martin, St. Lucie, Indian River, Okeechobee, Osceola, Orange, Lake, and Sumter counties. The remainder of the Turnpike System comprises several other facilities located throughout the State of Florida.

The Turnpike is a user-financed system that uses toll revenues, service plaza sales revenue, and bonds, to pay for new construction and maintenance of the entire system. It does not receive traditional gas tax revenue.

### MIAMI-DADE COUNTY TURNPIKE PLANNED MAJOR PROJECTS

### **WIDENING PROJECTS:**

| # | PROJECT NAME  | FPID     | LIMITS  |
|---|---|----------|---|
| 1 | Turnpike Mainline / SR 91 Widening (widen from 6 to 8 lanes)  | 423373-5 | MP 0.4X (Golden Glades Plaza) to<br>MP 3.3X (Miami-Dade / Broward County Line) Includes interchange improvements at<br>MP 2X (NW 199 Street)  |
| 2 | Turnpike Mainline / SR 821 Widening (widen from 4 to 6 lanes) | 444111-1 | MP 3 (North of SW 312th Street / Campbell Drive) to MP 7 (North of SW 137th Avenue) Includes interchange improvements at MP 5 (SW 288th Street / Biscayne Drive) and MP 6 (SW 137th Avenue) |

## **PART 2: 5-YEAR PROJECT LISTING**

## **INTERCHANGE PROJECTS:**

| # | PROJECT NAME   | FPID                     | LIMITS  |
|---|--|--------------------------|---|
| 1 | Turnpike Mainline / SR 91 Interchange Improvements (Partnership Project)   | 437053-1,-2,<br>-3,-4,-5 | MP 0X (I-95 / US 441 / SR 826 – Golden Glades)                            |
| 2 | Turnpike Mainline / SR 821 Transportation<br>Systems Management & Operations<br>(TSM&O) Interchange Improvements | 452112-1                 | MP 0 (US 1)   |
| } | Turnpike Mainline / SR 821 Interchange Improvements  | 437211-1                 | MP 11 (SW 216th Street) and MP 12 (SW 211th Street / Caribbean Boulevard) |

## **OTHER PROJECTS:**

| # | PROJECT NAME  | FPID     | LIMITS   |
|---|---|----------|--|
| 1 | Service Plaza Improvements along<br>Turnpike Mainline /<br>SR 821 | 442620-1 | MP 19 (Snapper Creek Service Plaza General Improvements) |

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

# PART 2: 5-YEAR PROJECT LISTINGS MOVING MIAMI-DADE

TIP • FISCAL YEARS 2024/2025 TO 2028/2029

PART 2: 5-YEAR PROJECT LISTING **MOVING MIAMI-DADE** 

**GREATER MIAMI EXPRESSWAY AGENCY (GMX)** 

This section of the TIP focuses on the major mobility improvement projects programmed by the Greater Miami Expressway Agency (GMX) for the next five years. GMX was created under the 2023 Florida Statute which granted ownership, and control of the roads that constitute the expressway system in Miami-Dade County and portions of northeast Monroe County.

### THE EXPRESSWAY AUTHORITY SYSTEM

The GMX System includes five (5) of the busiest and most important State Roads in Miami-Dade County: Airport Expressway (SR 112); Dolphin Expressway (SR 836); Don Shula Expressway (SR 874); Snapper Creek Expressway (SR 878); and Gratigny Parkway (SR 924). It also includes NW 138th Street from US-27 to just east of NW 97th Avenue, the LeJeune Frontage Roads from SR 836 to Central Boulevard as well as portions of northeast Monroe County.

### **PROJECT FUNDING**

GMX's primary source of revenue is the tolls collected on its five expressways. GMX does not receive any gas tax, property tax, sales tax, or any other source of revenue.

### FY 2025-2029 TIP

Major projects included in the GMX FY 2025 - 2029 TIP are highlighted within the following pages. The projects have been organized by the following categories: Existing System Improvements and System Expansion.

### **MOVING MIAMI-DADE**

### **EXISTING SYSTEM IMPROVEMENT PROJECTS**

The following projects are categorized as Existing System Improvements in the current Five-Year TIP and include widening or reconstruction within an existing roadway segment:

### PROJECT 83611 - SR 836 / I-95 INTERCHANGE IMPROVEMENTS

GMX has partnered with FDOT to acquire right-of-way, design and build the SR 836 improvements from NW 17th Avenue to I-95 in conjunction with the FDOT's I-95/I-395 project. Improvements to SR 836 include both eastbound and westbound widening for operational optimization between NW 17th Avenue to I-95. Additionally, a new viaduct consisting of an elevated 4 lane structure to bypass traffic on the lower level of SR 836 will be provided to improve mobility to and from Downtown Miami and Miami Beach.

Furthermore, the project will improve access to the Health District by providing better connections to the area from I-95 and SR 836. The design-build contract was executed in July 2018 and completion is anticipated by FY 2027. The total cost for the GMX project is estimated at \$275.8 million.

### PROJECT 83634 – SR 836 NEW HOMESTEAD EXTENSION OF FLORIDA'S TURNPIKE (HEFT) RAMP CONNECTIONS

This project consists of new ramps from eastbound SR 836 to northbound HEFT and from southbound HEFT to westbound SR 836. Additionally, SR 836 ramp connections are being provided to access the Dolphin Station Park-and-Ride site. Construction of this project is underway with an estimated completion date in early FY 2025. The total cost is estimated at \$56.9 million.

### **MOVING MIAMI-DADE**

### SYSTEM EXPANSION PROJECTS

The following projects are categorized as System Expansions in the current Five-Year TIP and include all construction of new roadway segments on new alignments adjacent to the existing system that will increase the total centerline miles of the system:

### PROJECT 83618 - SR 836 SOUTHWEST EXTENSION/ KENDALL PARKWAY

This 14-mile multimodal corridor will extend SR 836 from NW 137th Avenue to SW 136th Street and provide the residents in the southwestern portion of Miami-Dade County another transportation option. The project is envisioned to include: Express bus service and park & ride facilities in the vicinity of SW 88th Street and SW 136th Street; a multi-use recreational trail for non-motorized transportation including walking and biking; a minimum of 1,000 acres of land for wetland preservation and creation that will be held in perpetuity; widening of SR 836 Eastbound and Westbound from 107th Avenue to 97th Avenue; as well as improvements to 137th Avenue, 157th Avenue, SW 88th Street and SW 104th Street to facilitate access. The improvements to local streets and portions of ramp connections will be contributions to Miami-Dade County. GMX is continuing to work on the environmental permitting, right-of-way acquisition and transfer of government parcels for the mainline and trail alignment. Additionally, GMX is advancing the final design and construction of various components of the Kendall Parkway project such as the widening of SW 137th Avenue from SW 8th Street to SW 26th Street at an estimated total cost of \$12.6 million; and the SR 836 Eastbound and Westbound mainline widening from 107th Avenue to 97th Avenue at a total cost of \$35.4 million. The final design for the 137th Avenue widening has begun; and the final design of the SR 836 widening is scheduled to begin in late FY 2024.

The start date for final design and construction for the mainline extension, multi-use recreational trail and transit stations is to be determined pending funding availability. Total cost is estimated for all projects within the Kendall Parkway program is estimated at over \$1 billion.

# PART 2: 5-YEAR PROJECT LISTINGS THREE-CENT LOCAL OPTION FUEL TAX

TIP • FISCAL YEARS 2024/2025 TO 2028/2029

PART 2: 5-YEAR PROJECT LISTING

THREE-CENT LOCAL OPTION FUEL TAX

Miami-Dade County

### **INTRODUCTION**

The Capital Improvement Local Option Fuel Gas Tax, authorized by Section 336.025 (1) (B), Florida Statutes became effective January 1, 1994. It was reduced from five cents to three cents on September 1, 1996. In accordance with state statute, proceeds of this tax have been programmed for transportation expenditures needed to meet the requirements of the capital improvement element of the adopted comprehensive plan.

### FY 2023-24 PROJECTED MUNICIPAL DISTRIBUTION

The actual distribution to the municipalities for FY 2023-24 will be based on a weighted formula which accounts for percentage of population (statistics from the Bureau of Economic and Business Research, at the University of Florida) and the centerline mileage of municipal roadway for each incorporated area from the "2017 City/County Mileage Report" – Florida Department of Transportation prepared in the Spring of each year with data reported as of September 30, 2017. The figures contained herein were calculated using these same reports. This estimate for FY 2023-24 will be sent to the municipalities at the time the County files its official estimate with the Florida Department of Revenue in April 2024.

In FY 2023-24, the estimated net revenue for the Capital Improvement Local Option Gas Tax projected as of February 2024 is \$21.524 million at 95 percent with \$7.184 million to be distributed to the municipalities and \$14.34 million to be distributed to the County (26 percent to the municipalities and 74 percent to the County according to the current interlocal agreements). The State of Florida is allowed to impose a 7.3 percent administrative fee. The FY 2023-24 estimates, reflects a minor increase from the current year in fuel tax revenues.

### **COUNTY LOCAL OPTION FUEL TAX TRANSPORTATION PROJECTS**

The County reviews the Capital Improvement Local Option Fuel Tax distribution for the Department of Transportation and Public Works on an annual basis for the most effective use of this limited funding subject to legislative actions taken by the Board of County Commissioners and state statute (\$20.45 million).

### PART 2: 5-YEAR PROJECT LISTING AVIATION ON-SITE IMPROVEMENTS

Miami-Dade County Aviation Department

Miami International Airport (MIA)

The Miami-Dade County Transportation Improvement Program includes Capital Improvements for the Miami-Dade Aviation Department for the continued development of Miami International Airport (MIA) and the General Aviation Airports (GAA) – Miami-Opa Locka Executive Airport (OPF), Miami Executive Airport (TMB), Miami Homestead General Aviation Airport (X51) & Dade-Collier Training and Transition Airport (TNT). The funding for this program is primarily from revenue generated by the Aviation Department and from Federal and State grants.

On January 18, 2024, Miami-Dade County Mayor Daniella Levine Cava addressed the County's unprecedented investment of \$7 billion in capital improvements and \$1.7 billion in maintenance upgrades at Miami International Airport (MIA). Mayor Levine Cava also provided an update on MIA's Concourse D Skytrain people mover system, which is scheduled for a nearly full return to service in March after it was shut down for safety repairs last September.

### **AVIATION ON-SITE IMPROVEMENTS**

In addition to having another record-breaking year in passenger and cargo growth, MIA has also received a historic investment of maintenance and capital improvement funding that will transform our airport for years to come. My administration is focused on making MIA future-ready and to provide our passengers with the world-class airport experience they deserve.

Miami-Dade County Mayor Daniella Levine Cava

Under Mayor Levine Cava's leadership, last year Miami-Dade County's Aviation Department put in motion a Modernization in Action (M.I.A.) Plan that identifies priority areas receiving critical investments and informs the public. Below is a detailed update on key projects and other important maintenance improvements.

### **AVIATION ON-SITE IMPROVEMENTS**

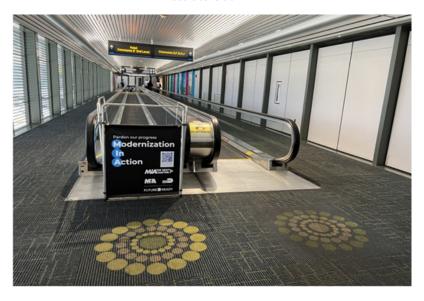

**Conveyances:** The M.I.A. Plan to upgrade elevators, escalators, and moving walkways received a boost in December when the Board of County Commissioners (BCC) approved more than \$99 million in contracts that will modernize 64 of the aged units. Combined with a \$582 million contract the BCC approved last July, the Plan is now fully funded to replace or renovate conveyance units at MIA in need of an upgrade. Of all the 616 units at the airport, currently, there are 53 out of service for repair or modernization, which represents 9% of all units. Under the Plan, at least 30 conveyance units are scheduled to be upgraded or replaced annually over the next five to seven years.

Escalators at MIA

MIA Plan Signage

**Passenger Loading Bridges:** The first step a passenger takes from an airplane to the airport is onto a passenger loading bridge. MIA is improving that first impression by replacing or refurbishing all of its 126 passenger loading bridges. Installation of the first 32 has already been completed, with 10 bridges scheduled for completion every year through 2028. All future loading bridges will be glass, which provides cooler temperatures than metal and an improved visual aesthetic.

### **AVIATION ON-SITE IMPROVEMENTS**

**Restrooms:** Thanks to an investment of \$101 million and a new design contract approved by the BCC in December, MIA's 207 public restrooms are being renovated. A total of 33 bathrooms have already been modernized in concourses D, H, and J, and 32 more in MIA's other concourses are on schedule for renovation in 2024. The remaining 141 bathrooms pre- and post-security on all three levels are scheduled for completion during the third and final phase of the airport's restroom renovation program between 2025 and 2030.

Woman's Restroom

**Electrical Infrastructure:** To increase sustainability, a <u>contract with Florida Power & Light Services</u>, approved in December 2023, will bring to MIA \$547 million in electrical infrastructure upgrades such as zero-emissions equipment and net-zero backup power generators. The airport is also moving forward with a \$130-million project that will renovate the entire terminal roof and add solar-power-generating panels.

**Skytrain:** The Skytrain, built 25 years ago, was taken out of service on September 15, 2023, after a bi-annual regulatory inspection determined that cracks to three of the system's 100 concrete pier caps near its Station 1 had gone from minor to substantial since the last inspection in 2021. In an overabundance of caution for public safety, the entire system was taken out of service for additional inspection. Repairs to the area near Station 2 are currently undergoing, this will allow the system to safely return to service between Stations 2, 3 and 4 (gates D25 to D46), with only Station 1 (near D16) remaining out of service by the end of March 2024. Completion dates for repairs to the damaged area near Station 1 and the minor cracks in

### **AVIATION ON-SITE IMPROVEMENTS**

other areas are yet to be determined. The estimated cost of all repairs is \$4.2 million. Until the Skytrain returns to service, a <u>courtesy trolley service</u> and <u>airside shuttle bus</u> are available. Passengers who require wheelchair assistance should first contact <u>American Airlines</u> in advance before their flight.

In December 21, 2023 press release, Miami International Airport (MIA) has proudly achieved a remarkable milestone in its history, setting a new record for passenger volume this past weekend. This surge is in anticipation of the peak holiday travel period, which spans from December 21 through January 6.

MIA welcomed an impressive 171,371 passengers, marking the highest single-day passenger count in the airport's history. This unprecedented volume of travelers is a testament to MIA's commitment to providing exceptional service and a seamless travel experience, even during the busiest times of the year.

Major projects at Miami-Dade County's airports include phases of the following:

| PROJECT NAME  | DOLLARS IN MILLIONS<br>(FUNDED) |
|---|---------------------------------|
| MIA - Perimeter Road Widening Realignment & Bridge Replacement                  | \$27.54                         |
| MIA - Terminal Wide Re-Roofing, Drains and Scuppers                             | \$119.70                        |
| MIA - Central Terminal Phase 1 (E Thru F Connector and Cc F Infill)             | \$54.29                         |
| MIA - South Terminal Apron & Utilities Modification/Expansion & GSE Facility    | \$746.36                        |
| MIA - Employee Parking Garage   | \$102.95                        |
| MIA - New Fuel Storage Facility Expansion Phase 1                               | \$39.23                         |
| MIA – Concourse D West Extension – D60 Bldg. Expansion -Design                  | \$91.40                         |
| MIA – Concourse D West Extension – D60 Apron & Utilities - Design               | \$25.81                         |
| MIA - Central Base Apron and Utilities Modification and Expansion (Phase 1 & 2) | \$108.48                        |
| MIA - Airport Operations Center (AOC)   | \$24.49                         |
| MIA - NTD Baggage Handling System Modifications to the Inline CBIS              | \$18.22                         |
| MIA- North and Central Terminal Passenger Boarding Bridges - Phase 1            | \$81.06                         |
| MIA- Central Base AOA Gate  | \$12.38                         |

#### **AVIATION ON-SITE IMPROVEMENTS**

| PROJECT NAME  | DOLLARS IN MILLIONS<br>(FUNDED) |
|---|---------------------------------|
| MIA - North Terminal Gate Optimization Phase 1 & 2                      | \$29.94                         |
| MIA- Concourse H Glazing, Curtain Wall Assessment and Corrective Action | \$36.47                         |

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

# PART 2: 5-YEAR PROJECT LISTINGS PORTMIAMI – MULTIMODAL SEAPORT DEVELOPMENT

### PORT//I/A//II

TIP • FISCAL YEARS 2024/2025 TO 2028/2029

PART 2: 5-YEAR PROJECT LISTING

### **MULTIMODAL SEAPORT DEVELOPMENT**

The Dante B. Fascell Port of Miami-Dade (PORTMIAMI)

#### TRANSPORTATION IMPROVEMENT PROGRAM STRATEGY

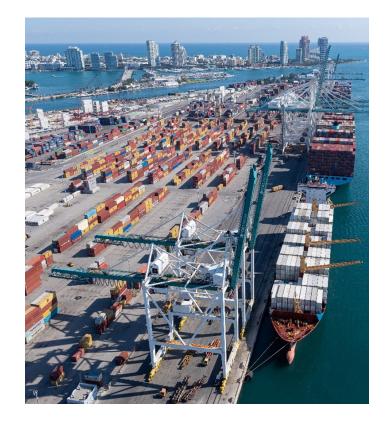

PortMiami, one of the nation's busiest ports, contributes approximately \$43 billion and more than 334,000 direct and indirect jobs annually to Florida's economy. Its sustained performance propels Miami to be recognized as the Cruise Capital of the World and Cargo Gateway of the Americas.

#### **CRUISE**

Despite the challenges posed by the Covid-19 pandemic, cruise activity at PortMiami, known as the Cruise Capital of the World, exceeded historical levels in FY 2023, setting a new world record with approximately 7.3 million passengers. In 2022-2023, the port transitioned back to cruising with over 4 million cruise passengers and continues to grow the cruise operations as demand increases.

#### **CARGO**

As Florida's busiest international port, PortMiami has handled more than one million twenty- foot equivalent units (TEU's) annually for the past nine years. The total value of inbound and outbound cargo merchandise moving via PortMiami in fiscal year 2023 was \$48 billion dollars.

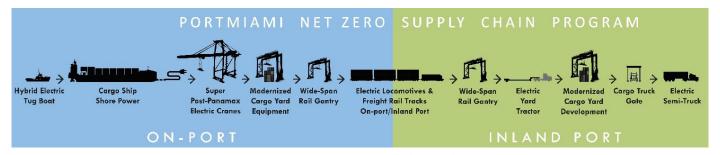

#### **RESILIENCE AND NET ZERO**

All PortMiami's projects are inherently committed to improving its robust climate adaptation, carbon mitigation, and resilience. PortMiami has adopted proactive policies that enhance its sustainability and ensure environmentally friendly port operations.

With this in mind, PortMiami has embarked on a visionary and transformational Net Zero program. This will be the nation's first end-to-end net zero carbon emission supply chain in line with the County's goal of a 25% reduction in emissions by 2030 for PortMiami, in accordance with the 2021 Miami-Dade Climate Action Strategy. The program addresses supply chain disruptions and congestion and is a significant step forward for the County's economic development goals.

The program began with electrification of key elements of the supply chain, including certain electric cargo handling equipment and all ship-to-shore gantry cranes, one stae of the art cargo security gate. In addition, PortMiami is working with our cargo partners to plan the next series of projects, which include expansion of rail infrastructure and operations, eliminating fossil fuel-burning trucks from the road, modernizing the cargo gates to minimize truck idling, stormwater, and paving improvements for cargo yard efficiencies, etc.

The Net Zero Cargo Emission Supply Chain Plan (NetZero Plan) seeks to optimize the current supply-chain system and reduce greenhouse gas emissions, all while improving operational efficiencies. A continuation of the Port's drive to sustainability, the plan follows the implementation of shore power at five cruise berths, previous conversions of diesel equipment to electric, and infrastructure investments that address sea-level rise. This plan includes an inland port that includes electric infrastructure in off-port areas that will create new jobs and have a positive economic impact within Miami-Dade County (County). The NetZero Plan contemplates additional programs to support the plan, including the development of a workforce training program with Miami Dade College to develop and train workers. The training program will focus on new technologies, additional resiliency elements such as a solar farm at the inland port, electric vehicle charging, and infrastructure improvements to key roadways and rail. infrastructure improvements to key roadways.

Infrastructure improvements to key roadways.

#### **TRANSPORTATION**

The Port's Transportation Improvement Program (TIP) is comprised of a total of approximately \$2 billion in funded and unfunded projects over the next five years; and reflects the Port's aggressive strategy for optimizing land use and enhancing throughput capacity to meet the demands of the cargo and cruise industries.

As part of the Capital Development Program, the Port is dedicated to meet and exceed industry demands by supporting the following Capital Improvement Projects:

- Construction of Cruise Terminals and Parking Garages
- Roadway projects for new Cruise Terminals and efficient cargo movements
- Modernization of Cargo Yard Terminals
- Electric Ship-to-Shore Gantry Cranes
- Bulkhead Improvements
- Fumigation and Cold Chain Processing Facility
- Inland Ports
- FPL Substation Expansion and new duct-banks to service different projects
- Projects promoting Technological Improvements to reduce delays, emissions, and improve safety and efficiencies
- Projects promoting Sustainability and Resiliency
- Intermodal Railway Expansion
- State-of-the-Art Gates
- Yard Densification with both hybrid electrically powered rubber-tired gantries (eRTGs)
- Shorepower program

The Port continues to assertively seek grant funding from local, state, and federal sources. The TIP reflects participation from the Florida Department of Transportation (FDOT) with \$32.7 million in support of roadways, cargo improvements and other infrastructure projects. This agency and the Port's partners continue to be part of the established goals to support the program and accommodate growth.

#### **PORTMIAMI ACCOMPLISHMENTS**

#### **CRUISE**

#### **CRUISE TERMINAL V**

PortMiami opened Cruise Terminal V on February 11, 2022, to support Virgin Voyage's growing operations. The project received LEED Gold Certification.

#### **CRUISE TERMINAL F EXPANSION (Phase 2)**

PortMiami completed Cruise Terminal F in 2022 to support Carnival Cruise Line's expanding operations. The project has achieved LEED Silver Certification.

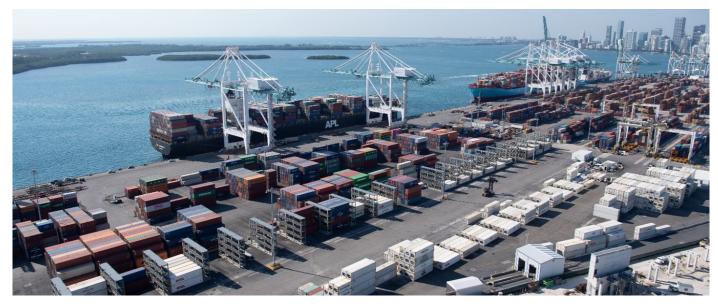

#### **CARGO**

#### INFRASTRUCTURE IMPROVEMENTS - SOUTH FLORIDA CONTAINER TERMINAL (SFCT) - ERTG PHASE 1

Improved the infrastructure within South Florida Container Terminal's cargo yard to transition from diesel power cargo handlers to eRTGs. Each eRTG replaces approximately two diesel top loaders, and this first phase reduces carbon dioxide emissions by 20%.

#### **GANTRY CRANES**

PortMiami has been transitioning its 13-diesel dependent super post-panamax gantry cranes to electric for the last twenty years and is pursuing up to eight more super post-panamax gantry cranes. As part of the Port's NetZero program, the acquisition of up to 8 electric ship-to-shore gantry cranes will allow the port to handle more than 1.5M Twenty-foot equivalent unit (TEU) of containerized cargo, a 20% increase over what the port processes today, which is a key step to grow the economy and produce additional blue resilient jobs.

#### **INFRASTRUCTURE (ELECTRIC)**

#### **FPL SUBSTATION EXPANSION**

FPL has completed the relocation of its utilities in preparation the next phase –expanding its substation. The FPL substation expansion was completed in May of 2023.

#### **PORTMIAMI CURRENT PROJECTS**

#### **CRUISE**

#### **CRUISE TERMINAL G**

PortMiami is expanding Cruise Terminal G to support cruise line's expanding operations. The project will achieve a minimum of LEED Silver Certification, and include solar panels, a multimodal parking garage, and roadway improvements.

#### BERTH 10

PortMiami is developing an additional berth to supply berthing space for Cruise

Terminal AA (Shared Terminal) and introduces a resilient bulkhead system capable of addressing future sea level rise.

#### **CRUISE TERMINALS A & AA ROADWAYS**

PortMiami completed a roadway flyover and flyover associated roadway and stormwater improvements. The Port is currently improving additional roadways, storm, and sewer programs to continue addressing the areas and to optimize Cruise Terminal access and circulation, and minimize traffic congestion and reduce delays.

#### **CRUISE TERMINALS AA (SHARED TERMINAL)**

PortMiami has partnered with MSC Cruise Line with the design and construction of two new cruise berths, a shared "state of the art" multi-vessel Cruise Terminal, and Parking Garage Complex. The LEED Silver Certified terminal will be equipped with shore power.

#### **SHORE POWER**

As part of PortMiami's Net Zero goals the port will provide shore power to cruise terminals which will allow ships to turn off their primary engines while docked, resulting in reduced air emissions.

Phase 1 will be launched in the spring of 2024 and provides shore power capability at five terminals, with enough power for three vessels to utilize shore power at the same time.

#### **CARGO**

#### **NETZERO CARGO PROGRAM**

PortMiami is embarking on a visionary and transformational program to develop the nation's first end-to-end net zero carbon emission supply chain in line with Miami-Dade County's goal of reducing 25% of its emissions by 2030. Transformational endeavors include, but are not limited to, electric tugboats, shore power for cargo vessels, electric gantry cranes, rail expansion, improved cargo gates, cargo yard's operational efficiencies, infrastructure improvements to support both electric and hybrid electric cargo yard equipment.

As part of the program, PortMiami will construct additional rail capacity and increase the cargo gate optimization to reduce traffic congestion at the Port and lower carbon emissions.

#### **ELECTRIC CARGO GANTRY CRANES**

As PortMiami receives deeper draft vessels, the Port continues to add up to eight electric super post-panamax gantry cranes. The gantry cranes will improve productivity and support expanding operations, reduce energy costs by significantly reducing maintenance and repair.

#### **INSPECTION & FUMIGATION FACILITY**

The new facility will be a state-of-the-art cold chain processing and fumigation center that will provide a more efficient inspection, cold chain processing, and phytosanitary services for the Port's perishable goods. The facility will become the port's central location to serve various markets and reduce truck travel times and traffic accidents.

#### **CARGO YARD TERMINAL EQUIPMENT & RTGs**

As part of the NetZero Program, upgrade of cargo yard equipment, including hybrid RTG, to lower emissions

#### **INFRASTRUCTURE**

#### INFRASTRUCTURE IMPROVEMENTS - CRUISE CAMPUS

Infrastructure improvements including, but not limited to, road work, stormwater, landscape, and other emission-reduction projects, electric vehicle (EV) charging stations, solar panels, and relocations for future buildings.

#### INFRASTRUCTURE IMPROVEMENTS - PASSENGER BOARDING BRIDGES (PBBS)

PortMiami is purchasing passenger boarding bridges for various terminals in response to new cruise terminal construction, increased demand, and north bulkhead rehabilitation project.

#### INFRASTRUCTURE IMPROVEMENTS - CONTAINER YARD (SEABOARD)

Provide drainage improvements and various other resiliency improvements in Seaboard's container yard area. The projects will increase capacity, modernize the cargo gate, improve cargo yard pavement to handle hybrid electric cargo handling equipment, LED high mast lighting retrofits, and electric reefer racks for refrigerated cargo.

#### **INFRASTRUCTURE IMPROVEMENTS - CONTAINER YARD (POMTOC)**

Provide drainage improvements and various other improvements in the container yard area to increase capacity, and improve stormwater management, modernize cargo yard operations, security gates, charging stations, and similar NetZero projects.

#### INFRASTRUCTURE IMPROVMENTS - SOUTH FLORIDA CONTAINER TERMINAL (SFCT) - PHASE 2

PortMiami and SFCT have partnered to continue to improve the drainage in the SFCT's cargo yard, construct infrastructure improvements to support electric Rubber Tired Gantry Cranes (eRTGs) and construct a parking garage which in turn increases capacity with the cargo yard. This continued effort addresses sea level rise and meets the port's Net Zero goals by replacing diesel toploaders with 12 eRTGs that has reduced emissions in 2023.

#### INFRASTRUCTURE IMPROVEMENTS – PORTWIDE SECURITY ENHANCEMENTS

Purchase marine vessels for the Harbor patrol Unit of the Miami-Dade Police Department to provide Security Zone enforcement for cruise ships, new Command, Control, and Communications (C3) facility, and other security enhancements.

#### INFRASTRUCTURE IMPROVEMENTS - NORTH BULKHEAD REHABILITATION

PortMiami will rehabilitate six bulkheads along cruise berths over six years to add at least 75 years of life to the Port, improve resiliency, and raise the bulkhead in preparation for sea level rise. Other projects include shore power, water upgrades, fenders, and mooring improvements. This infrastructure project is seeking Envision Certification.

#### INFRASTRUCTURE IMPROVEMENTS – SOUTH BULKHEAD REHABILITATION

PortMiami is providing repairs and improvements to the Port's south bulkhead.

#### INFRASTRUCTURE IMPROVEMENTS - FEDERAL INSPECTION FACILITY (FIF)

PortMiami is planning to build a new facility for US Custom Border Patrol (CBP). As a national port of entry, PortMiami is required to fund the federal facilities that house the inspections, including contraband, of pulled imported cargo to ensure safe and secure cargo delivery to the community and nation, all while minimizing disruptions to the supply chain. This investment directly supports the local and national economies and helps ensure the safety and security for the residents of Miami Dade County.

#### **INFRASTRUCTURE IMPROVEMENTS - WATER & SEWER UPGRADES**

Upgrade the Port's water and sewer system for new services that improve the seaport's resiliency. To maintain or resume operations following a storm event it is critical that all Port asset types maintain their functional services. This Project will provide necessary road and stormwater improvements to reinforce the resiliency of a critical at-risk coastal infrastructure so that operations can continue considering climate change and sea level rise.

#### **INFRASTRUCTURE IMPROVEMENTS - PORTWIDE**

PortMiami is undergoing infrastructure improvements in various areas of the port. Portwide infrastructure improvements include beautification, drainage, dredging, road improvements, photovoltaics, generators, batteries, electric connectivity & charging stations, BMS upgrades, wayfinding, landscape, lighting, HVAC, sidewalks, etc. Additionally, the Port is partnering with the United States Army Corp of Engineers (US ACE) on the Miami Harbor Channel Improvement Feasibility Study. The upgrades promote innovative technology that increases safety and operational efficiencies, improves energy efficiency, cost savings, and resiliency.

#### INFRASTRUCTURE IMPROVEMENTS – VARIOUS FACILITY MOVES

PortMiami is overseeing the movement of customer warehouses and/or other facilities, as determined.

#### INFRASTRUCTURE IMPROVEMENTS - CTJ SEAWALL

PortMiami is continuing to replace bulkheads, expected to add at least 30 years of life to the Port, to address upkeep, address sea level rise, and improve resiliency.

#### INFRASTRUCTURE IMPROVEMENTS – BERTH REDEVELOPMENT (BAYS 165-177 AND 148-150)

PortMiami is improving the bulkheads along part of Seaboard Marine's cargo yards to address sea level rise and improve PortMiami's resiliency. The Port's infrastructure will be strengthened, and the berthing capacities increased by fixing the grade elevation, providing stormwater improvements, strengthening the wharf, and removing two existing roll-/roll-off ramps, which increase the overall linear length of the berth to allow multiple ships.

#### INFRASTRUCTURE IMPROVEMENTS – CHANNEL MODIFICATIONS

PortMiami is undergoing a safety and navigation improvements program with the US Army Corps of Engineers.

#### INFRASTRUCTURE IMPROVEMENTS – INLAND PORT LOGISTICS SUPPORT YARD

PortMiami is undergoing an Inland Port development of the container storage and transfer staging areas, including truck parking, workforce training center, solar farm, security gates, sustainable infrastructure for eRTGs, charging stations, reefer racks, etc.

#### INFRASTRUCTURE IMPROVEMENTS – NORTH CRUISE BOULEVARD EXTENSION

Extend and improve North Cruise Boulevard and ancillary roadways for added operations, including stormwater improvements.

#### PORTWIDE TRANSPORTATION MASTER PLAN

PortMiami is overseeing a near- and long-term traffic impact study and conceptual roadway plans to meet the current and future transportation demands

#### INFRASTRUCTURE IMPROVEMENTS – CARGO GATE MODIFICATIONS

Purchase and install security systems for new gateway, as required

#### INFRASTRUCTURE IMPROVEMENTS – ROADWAY REALIGNMENT

Implementation of projects based on the PortMiami Transportation Master Plan to improve connectivity and congestion for cargo and cruise operations.

#### INFRASTRUCTURE COMPLIANCE

Rehabilitation, upgrades, and various infrastructure improvements, and berths and shoreline improvements throughout the seaport

#### OFF-DOCK LOGISTICS YARD RAIL EXTENSION – AIRPORT WEST

Expand railroad track along US27 to connect to the Inland Port and Logistics Center. The Rail Extension project will provide rail connection from the existing rail line in west Miami-Dade County to the future inland port and waste to energy facility at Airport West. The shift to rail will reduce truck traffic and emissions throughout the County.

#### **NEW PARKING GARAGES**

Parking garages for both cargo and cruise operations

#### PORT OPERATIONS AND ADMINISTRATION

New PortMiami Administrations and Operations Facility; includes police, safety, and security headquarters

#### PORTMIAMI FUTURE PROJECTS

#### INLAND PORT DEVELOPMENT

As part of the Net Zero program, an inland port will increase Port Miami's cargo capacity and volume, leading to new business opportunities and access to the burgeoning Orlando and Tampa markets. Preliminary estimates indicate that a new inland port could provide approximately 50% increase in container volume annually, increasing Miami Dade County's economic competitiveness at various scales. The program will include a variety of projects, including a solar farm over the CBP Inspection Facility truck parking, export consolidation, electric trucking, eRTGs, rail shuttles, etc.

#### FEDBRIGHTLINE TRAIN STATION

Build a train station for passengers and employees at a location that reduces congestion and emissions by optimizing access to terminals and employment destinations.

#### **CRUISE TERMINAL K**

Design and construct a new cruise terminal to support expanding operations.

#### WALKABILITY PLAN - SIDEWALKS & TREE CANOPY INSTALLATION

The Port's Walkability Plan project focuses on enhancing infrastructure and promoting pedestrian-friendly environments that provide safe, covered, and efficient mobility options for the millions of cruise passengers that visit the Cruise Capital of the World annually. The project involves comprehensive

urban planning, sidewalk enhancements, tree canopies, crosswalk installations, and traffic calming measures that will also help address the dangers of extreme heat. These improvements will provide enhancements to the passenger experience and provide a competitive advantage.

#### PORTWIDE UTILITIES MASTER PLANNING & IMPLEMENTATION

Stormwater master Plan, and Decarbonization and Electrification Master Plan; Implement projects to reduce emissions through electrification and stormwater management projects throughout all seaport operations for a more resilient PortMiami.

#### **HYBRID TUGBOATS**

As part of the NetZero Program introduce hybrid harbor tugboats to the seaport's end-to-end services.

#### SHORE POWER

#### Phase 2

Further investments in the Port's shorepower infrastructure will provide an immediate reduction in greenhouse gas emmisions at the Port. GOB funding will support the purchase of 2 additional electrical feeders for dedicated shore power to five terminals, instead of sharing 3 electrical feeders amongst the 5 terminals. The implementation of a battery storage system will help address peak electrical demand needs and help support the Seaport's NetZero initiative by storing excess energy during non-demand periods when shore power is not in use at any of the five terminals and relaying it during peak hours for the various needs across the cruise, cargo, and administrative programs. The backup power can also act as a reliable source of backup power during grid outages.

#### Phase 3

The Shore Power Phase 3 project will provide electrical power to additional cruise berths and introduce shore power to certain cargo berths, further reducing greenhouse gas emissions County-wide. The project will also fund the required new transmission lines and a substation in coordination with FPI

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

# PART 2: 5-YEAR PROJECT LISTINGS COUNTY TRANSPORTATION SYSTEM AND MAJOR PROJECTS

### TIP • FISCAL YEARS 2024/2025 TO 2028/2029

### PART 2: 5-YEAR PROJECT LISTING

### **COUNTY TRANSPORTATION SYSTEM AND MAJOR PROJECTS**

Miami-Dade County Department of Transportation and Public Works (DTPW)

This section of the TIP focuses on Major Projects from Miami-Dade's Department of Transportation and Public Works (DTPW). The DTPW's goal is to enhance the quality of life of Miami-Dade County residents, businesses, and visitors by providing high-quality, safe, clean, efficient, and connected public transportation infrastructure services.

SHIFT305 is an initiative to revitalize Miami-Dade's Transportation System by 2025 which encompasses four objectives:

**SAFE** 

**CONNECTED** 

The projects listed are the tactical execution of the SHIFT 305 strategy and include improvements to highways, transit, and bicycle/pedestrian modes over the next five fiscal years.

The DTPW section provides an overview of the following topics:

- Funding Overview
- Smart Program
- Better Bus Network
- Terminals & Park-and-Rides
- Metrorail & Metromover

- Transit Maintenance and Modernization
- Pedestrian & Bicycle
- Safety & Vision Zero
- Major Highway and Bridge Improvement Projects
- Neighborhood Improvement Projects

### **FUNDING OVERVIEW**

DTPW uses a mix of funding sources to plan for, construct and maintain transportation projects, including but not limited to:

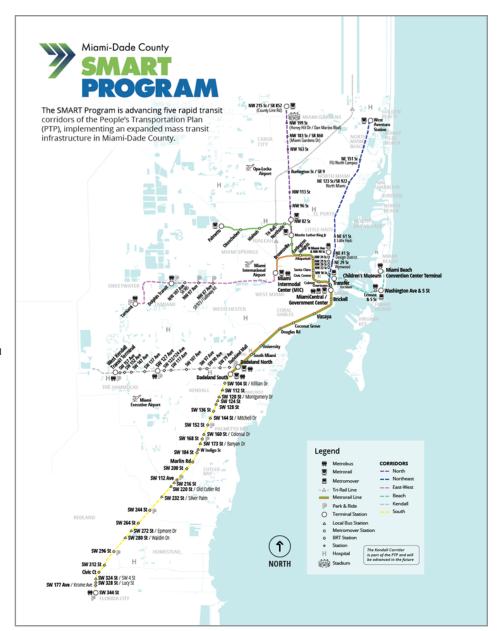

- Local General Funds
- Secondary Gas Tax (SGT)
- Roadway Impact Fees (RIF)/Mobility Fee (MF)
- People's Transportation Plan (PTP)

- Federal and State Grants
- Private Sector
- Municipal Partners

#### **SMART PROGRAM**

The SMART Program is an infrastructure investment program of projects developed to improve transportation mobility and create a transit system that will support economic growth and competitiveness in the global arena. The program advances six rapid transit corridors of the PTP to create an expanded mass transit network in Miami-Dade County. It is the implementation of a vision for our region that is both strategic and far-reaching, creating a system of multiple transportation options by leveraging existing infrastructure and integrating technology at the highest levels. The implementation of the SMART Program increases opportunities for transit-oriented development projects along corridors, expands a network of premium transit to connect to more key destinations, improves reliability and on-time performance, creates more job opportunities in the transit industry, and increase the availability of real-time arrival and departure information at transit stations. The program is comprehensive, proactive and supports the future population and employment growth anticipated in our region with the implementation of the following corridors.

- Beach Corridor: Highest tourist demand in the region with major employment centers.
- East-West Corridor: Heaviest commuter travel for international, state, and local businesses.
- Kendall Corridor: One of the most congested arterial roadways with the highest demand.
- North Corridor: Key regional mobility linkage for access to jobs, the stadium, and educational facilities.
- Northeast Corridor: High transit demand and part of a critical regional corridor stretching to Palm Beach County.
- South Corridor: Experiencing the fastest population growth in Miami-Dade County.

#### **BEACH CORRIDOR**

The Beach Corridor project will serve the cities of Miami and Miami Beach along a 9.7-mile corridor, crossing Biscayne Bay to link Downtown Miami to Miami Beach. The Beach Corridor area is an epicenter for population and economic growth and a major employment center and tourist destination in the region and

connects the Miami Design District to the Miami Beach Convention Center. As a result, the roadways between Miami and Miami Beach are typically heavily congested. This high bus transit ridership corridor has been identified as a candidate for consideration for premium transit over the past two decades as part of a strategy to address east-west directional travel demands. The envisioned project entails extensions of the Metromover system and dedicated bus lanes on Washington Avenue in Miami Beach.

In May 2017, DTPW initiated a Project Development & Environment (PD&E) Study to evaluate proposed transportation solutions between Downtown Miami and the City of Miami Beach via I-395 and I-195. In January 2020, the Miami-Dade TPO selected elevated automated rail transit for the Trunk Line, automated people mover for the Midtown/Design District and Bus/Trolley in dedicated lanes on Miami Beach as the locally preferred alternative (LPA), as recommended by the PD&E. The project received an Environmental Assessment (EA) as the National Environmental Policy Act (NEPA) Class of Action (COA) for the Beach Corridor Trunkline from the United States Coast Guard (USCG) and published the Draft EA document for public review and comment in Summer 2022.

Negotiations to develop and maintain a monorail system for the Beach Corridor Trunk Line ended in November of 2022 without an agreement due to significant increases in the project cost during the negotiating period. DTPW is working to advertise, evaluate, and negotiate a new solution for the Trunk Line project with the County's preference being a seamless extension of the existing Metromover system.

Along a 9.7-mile corridor, crossing Biscayne Bay linking Downtown Miami to Miami Beach

Various premium transit modes

Project Development, NEPA for Trunk Line

#### **EAST-WEST CORRIDOR**

The East-West Corridor project will run approximately 14 miles from the Miami Intermodal Center (MIC) at Miami International Airport (MIA), west along the SR-836/ Dolphin Expressway, to the Tamiami Terminal Station and Park and Ride facility at SW 8 Street and SW 147 Avenue. It provides multimodal solutions for severe traffic congestion along SR-836, the only east-west expressway in central Miami-Dade County. The intention is to connect southwestern residential areas with major activity centers including MIA, MIC, and Downtown Miami and major employment areas (Sweetwater, Doral, Health District, Central Business District, Brickell, etc.).

In April 2017, DTPW initiated a PD&E study to evaluate proposed transportation solutions along the SR836/Dolphin Expressway corridor. On October 22, 2020, the TPO Governing Board selected the LPA as BRT. The LPA includes BRT routes operating within dedicated transit-only lanes, including reversible transit-only lanes along SW 8th Street from the Tamiami Terminal to SW 137th Avenue and along SW 137th Avenue to the SR 836 Extension. Further east, the BRT routes would use dedicated lanes on the inside shoulders of SR 836 on route to the MIC and Downtown Miami. The East-West BRT routes would be in addition to and complement the SR836 Express Services which already began operating in the Corridor in early 2020. In August 2021, the County submitted a letter to the FTA requesting entry into the Project Development (PD) phase under the FTA Capital Investment Grants Small Starts program for the East-West Corridor Rapid Transit Phase One Project was granted entry into the program by FTA on October 26, 2021. DTPW is working closely with the FTA on the BRT LPA for the corridor while considering alternative modes and alignments as directed by the TPO board.

BRT or Commuter Rail

Project Development

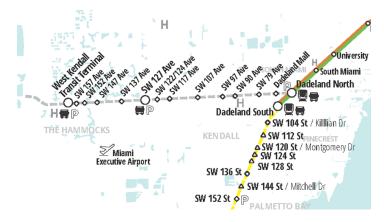

#### **KENDALL CORRIDOR**

The Kendall Corridor consists of implementing a premium transit service along SR 94/Kendall Drive/SW 88 Street. The project also considers a connection with another segment running along SR 874 and SR 878 from Kendall Drive to the Dadeland North Metrorail Station, and potentially north along the HEFT from Kendall Drive to FIU (at the proposed Panther Station) and/or to the proposed Dolphin Station (at SR 836). In November 2019, Curbside Business Access Transit (BAT) Lane was identified as the recommended alternative for the Kendall Corridor. In March 2022, a joint-agency recommendation by the FDOT and DTPW to place the Kendall PD&E study on hold was approved by the TPO Governing Board. The Kendall Corridor PD&E study will remain on hold until the outcome of the Flagler Demonstration Project is assessed. The data collected from the Flagler Demonstration Project will inform the study team on an effective multi-modal transportation solution to improve transit along the Kendall Corridor.

10-mile Corridor along SR 997/Krome Avenue/SW 177 Avenue to the Dadeland North Metrorail Station (at US 1/SR 5) along SR 94/Kendall Drive/SW 88 Street

BRT Curbside

FDOT PD&E on Hold

STRATEGIC TARGETS

#### **NORTH CORRIDOR**

The North Corridor is part of the Southeast Florida Region which includes Palm Beach and Broward Counties. The North Corridor is a 10-mile-long corridor along NW 27th Avenue, from NW 62nd Street/Dr. Martin Luther Kind, Jr. Metrorail Station to NW 215th Avenue. The Project consists of implementing a premium transit service Heavy Rail Transit (Metrorail) along NW 27 Avenue. The envisioned transit corridor will include public on-street transit stations located along a dedicated running way. These stations can include public or private facilities located adjacent to the corridor where potential park-and-ride or transit terminals will be considered. In October 2019, the Miami-Dade TPO selected elevated heavy rail transit as the locally preferred alternative for the North Corridor. On November 15, 2022, the Board of County Commissioners (BCC) passed a motion to terminate the development of the DTPW's RFP and to accelerate the implementation of the North Corridor as an elevated fixed guideway. In May 2023, FDOT and DTPW collaborated to conduct a Value Engineering (VE) Workshop to identify the best and most cost-effective methods of implementing the project. Results of the VE Workshop were formalized in a final VE Report which was completed October 2023. Currently FDOT is in the process of restarting the North Corridor PD&E with a notice to proceed (NTP) scheduled in early 2024.

10-mile Corridor along NW 215 Street (Countyline Road) to NW 38 Street and from the MIC (at MIA) to NW 27 Avenue via SR 112 Expressway

Heavy Rail (Metrorail)

FDOT PD&E Restart

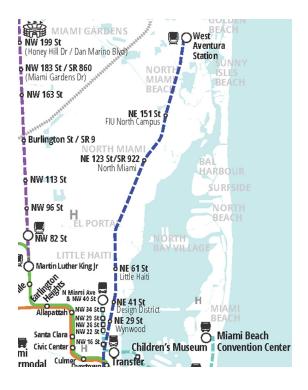

#### NORTHEAST CORRIDOR

The Northeast Corridor is roughly defined as U.S. Route 1 from the Downtown Miami area to the Aventura Mall near the Miami-Dade/Broward County line and is one of the busiest transit corridors in the region. It extends approximately 13.5 miles through the historic core of the County developed along the FEC railroad with five stops along the corridor, linking Aventura, North Miami Beach, North Miami, Little Haiti, Design District and Wynwood with the County's Central Business District located in Downtown Miami. Regional passenger rail service to the West Aventura Station, which began in December 2022, is considered the first phase of the Northeast Corridor. The project will implement a commuter rail service running within the existing Florida East Coast railway.

In June 2020, the County began its effort in advancing the implementation of the Northeast Corridor. In March 2021, the TPO Governing Board adopted commuter/passenger rail as the LPA for the Northeast Corridor. In August 2021, the County requested entry into the Project Development (PD) phase under the FTA Capital Investment Grants New Starts program. The project was accepted into the PD phase by FTA on October 26, 2021. The project received approval of the Categorical Exclusion (CE) in November 2023, completing the necessary steps under the National Environmental Policy Act (NEPA) for the planning and environmental phase of the project. The commuter rail service plan is 30-minute peak headway and 60-minute off-peak headway for both directions during weekdays and 60-minute headway during weekends. DTPW is currently working on advancing into the Engineering phase of the New Starts program.

#### **SOUTH CORRIDOR**

The project will run along the existing South Dade Transitway (formerly known as Busway), from the Dadeland South Metrorail station to the SW 344th Street Park-and Ride/Transit Terminal Facility. It will connect Florida City, City of Homestead, Town of Cutler Bay, Village of Palmetto Bay, and Village of Pinecrest, which represent the fastest population growth in Miami-Dade County. This project facilitates the highest demand movement of passengers to and from southern Miami-Dade to Downtown Miami, improving travel times and safety, while enhancing station platforms and increasing accessibility.

DTPW initiated a PD&E study to evaluate premium transit solutions in this corridor in April 2017. The TPO Governing Board selected the LPA on August 30, 2018, as BRT. The project was advertised on June 7, 2019, and Notice to Proceed (NTP) to the Design-Build Firm was issued on February 2, 2021. The estimated total project capital cost is \$300 million. Miami Dade County and FDOT have both committed \$100 million each to fund design and construction, while the project team successfully secured \$100 million from the FTA Small Starts Grant program. The project is currently under construction.

Once completed, BRT will provide rail-like travel time, iconic stations, level boarding through all doors, and pre-paid fares for speedy access. BRT will also provide enhanced safety features and other upgrades along dedicated lanes with multilayered service lines on the Transitway Station along the existing Transitway (formerly known as Busway) to the SW 344th Street Park-and-Ride/Transit Terminal Facility. It will connect Florida City, City of Homestead, Town of Cutler Bay, Village of Palmetto Bay, and Village of Pinecrest, which represent the fastest population growth in Miami-Dade County. This project facilitates the highest demand movement of passengers to and from southern Miami-Dade to Downtown Miami. Project Completion is anticipated by Summer 2024.

20-mile Corridor running from Florida City to Dadeland South Metrorail, along the South Dade Transitway

Construction

#### **FLAGLER CORRIDOR**

The Flagler Corridor consists of implementing a rapid transit service along SR 968/Flagler Street. This includes multimodal street improvements to accommodate rapid transit service along Flagler Street. On January 28, 2021, the Miami-Dade TPO selected Curbside Bus Access Transit (BAT) Lanes as the recommended alternative with the exception that the PD&E study shall not consider the reduction of vehicular traffic lanes for any portion of Flagler Street west of NW 24 Avenue. On March 3, 2022, the TPO adopted a resolution to place the Flagler PD&E study on hold to implement a Flagler Street SMART Demonstration Project. On April 2023, the TPO adopted a resolution to remove the exception that said study shall not consider the reduction of vehicular traffic lanes for any portion of Flagler Street west of West 24th Avenue to allow FDOT to continue with the study of the recommended alternative. On November 28, 2023, the project restarted, however on January 25, 2024, the TPO unanimously passed a resolution requesting FDOT to pause the study and evaluate an elevated rail option from Downtown Miami to Florida International University.

Business Access & Transit (BAT) Lanes

K 7

SR 968/Flagler Street and SW 1st Street from SR 985/NW 107th Avenue to SR 5/US 1/Biscayne Boulevard with branches extending to Tamiami Station and Dolphin Station

Bus Access Lanes (BAT)

FDOT PD&E on Hold

STRATEGIC TARGETS

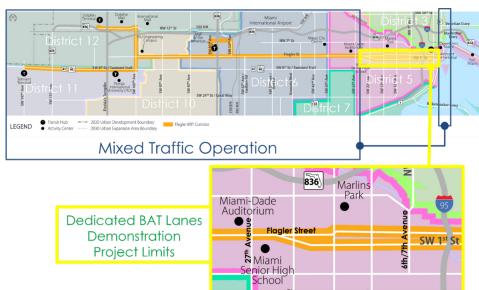

#### FLAGLER DEMONSTRATION PROJECT

The Flagler Demonstration Project will implement Business Access Transit (BAT) Lanes along a portion of the Flagler Corridor. The project consists of implementing BAT lanes by repurposing an existing travel lane along SR 968 Flagler Street (westbound) and SW 1 Street (eastbound) between SW 27 Avenue and SW 6 Avenue. As part of the Flagler Demonstration Project, traffic analysis, monitoring plan and design plans for implementation of dedicated transit lane will be developed. FDOT will conduct before and after studies to evaluate the performance of the implementation of the curbside of the BAT lanes. The data collected will allow FDOT, the TPO and DTPW to jointly evaluate and determine the feasibility of a dedicated curbside rapid transit lane concept throughout the corridor.

SR 968/Flagler Street and SW 1st Street from SW 27th Avenue to SW 6th Avenue

Bus Access Lanes (BAT)

Design Phase

#### **METROBUS SYSTEM**

The Better Bus Network (BBN) launched in 2023 creating a new foundation of a high-frequent bus network connecting more people to more places more quickly. Phase I was deployed in July 2023, bringing upgrades to three high-frequency corridors, and the final Phase II was deployed in November 2023, adding the additional improvements recommended in the plan approved in 2021. The redesigned bus network for Miami-Dade County was based on community input and a vetted through a data-driven process. The new network is designed to be more useful for more people by increasing frequent service, creating easier connections, and improving evening and weekend bus service. For example, the new network improved the number of highfrequency routes in the County that arrive every 15 minutes or less throughout the day from five to nineteen, allowing people to reach more places more quickly.

Since implementation, staff have reviewed public feedback and performance metrics to make further improvements to the network. These changes will be reflected in the April service change and staff will continue to monitor and make adjustments at every opportunity.

Additionally, staff continue to engage with those communities most impacted by the network changes and work with municipal staff to adjust their trolley service to better complement the new network. DTPW enhanced mobility even further through an uber voucher program intended to bridge the mobility gap for those along discontinued routes and will continue to review and consider all types of mobility solutions that are appropriate to the demand in different areas

Countywide

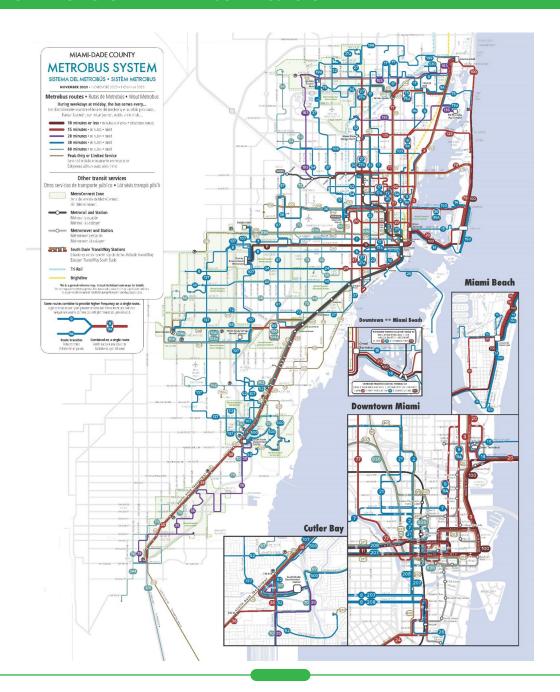

Commuter Service

#### **BUS PASSENGER AMENITIES PROGRAM**

The Bus Passenger Amenities Program is part of the department's strategic vision to operate and grow a safer, cleaner, quicker, and more connected transit system. The program consists of the installation of new bus passenger amenities, new trash containers, new bicycle racks, improved pedestrian accessibility to and from bus passenger amenities, and a complete renovation of the existing bus passenger amenities inventory installed within Miami-Dade County's Metrobus service area. The program will ensure that all bus passenger amenities, either new or existing ones, trash containers and bicycle racks are well maintained, safe, clean, well illuminated, and have an attractive appearance. As of February 2024, 354 bus shelters, 354 trash containers, 330 new bus shelter illuminations systems and 740 bicycle racks have been installed. These new transit amenities and accessibility improvements will be completed by summer of 2024.

### **Shelter Types**

### Cantilever shelter

Installation will be on sidewalks with 5 or 6 feet sidewalks with 8 feet of of right of way

Slim shelter

Installation will be on right of way

Shelter with an advertising panel

Installation will be on sidewalks with 11 feet of right of way

### Shelter without an advertising panel

Installation will be on sidewalks with 11 feet of right of way

Countywide

STRATEGIC TARGETS

Fixed Route Bus

Ongoing

#### **TERMINALS & HUBS AND TERMINALS**

#### **AVENTURA STATION**

In an effort to advance the implementation of the SMART Program Northeast Corridor, Miami-Dade County Commissioners approved an agreement with Brightline Trains Florida, LLC to provide highspeed rail service between the Aventura Mall and the company's downtown train station. The County approved \$76.7 million toward the recently completed project, which runs high-speed trains utilizing the Florida East Coast (FEC) rail corridor. The County owns the land for the new Aventura Station, while Brightline is responsible for all operation and maintenance costs. The Aventura Station project includes an 860-foot platform located inside the FEC Railway/Brightline right-of-way and the construction of a new pedestrian bridge over the railroad right-of-way and Biscayne Boulevard. The station also includes a Park-and-Ride facility with 240 parking spaces, a bus drop-off/pick-up for Miami-Dade Transit passengers, and newly landscaped and hardscape areas. The project also features a platform design that can accommodate Tri-Rail or other commuter trains in the future. Construction of the Aventura Station was completed December 2022. Completion of the pedestrian bridge over Biscayne Boulevard which will connect the

station circulation to the Aventura mall bus depot and amenities is underway with expected completion by December 2024.

Along the Northeast SMART Corridor on West Dixie Highway

Passenger Rail

Completed December 2022

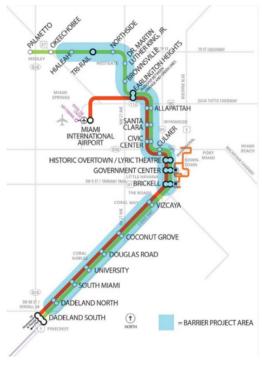

#### **METRORAIL & METROMOVER**

DTPW is actively working to upgrade the Metrorail, a 25-mile dual track system that provides service to Miami International Airport (MIA) and runs from Kendall through South Miami, Coral Gables, and Downtown Miami; to the Civic Center/Jackson Memorial Hospital area; and to Brownsville, Liberty City, Hialeah, and Medley in northwest Miami-Dade, as well as upgrade the Metromover, a free elevated people mover system that operates seven days a week in the Downtown Miami, Omni, and Brickell areas.

#### METRORAIL ACOUSTICAL BARRIER REPLACEMENT

The Metrorail Acoustical Barrier Replacement Program consists of the installation of acoustical barriers with associated hardware along the Metrorail system where Type "B" concrete barriers have been removed. The new barriers are intended to abate sound/noise produced by passing trains avoiding its propagation to adjacent properties. In 2019, DTPW launched a three-phase acoustical barrier replacement program. Currently, Phases One and Two have been completed. The first two phases of the program involved the removal of Type B barrier. On January 4, 2021, DTPW entered Phase Three of the program which entails the replacement of the acoustical barriers in the areas where the Type "B" panels were removed. Currently, the program is well underway, at about 98% of the installation completed. It is estimated to be completed in August 2025.

Improvements Across Most of Metrorail System

Rapid Transit Improvement

Construction Phase

#### METROMOVER WAYSIDE SYSTEM OVERHAUL

Metromover is an automated people mover system that was designed and installed by Bombardier Transportation and began passenger service in April 1986. The Metromover system is comprised of 21 stations, 4.4 miles of dual lane guideway, 25 guideway switches, 29 vehicles and a central control facility located at the Government Center. Throughout Metromover's 32-year history, the system has expanded, and vehicle fleet has been replaced, however, many major subsystems that make up the system have not been replaced or refurbished and have now reached the end of their design life. These subsystems include the Automatic Train Control (ATC) System, Data Transmission System (DTS) with Supervisory Control and Data Acquisition (SCADA), several Power Distribution System (PDS) elements (e.g., low voltage breakers, protective relays, ground switches, etc.), guideway switch equipment and the central control equipment. To maintain good equipment

reliability and an overall high Metromover system service availability, these major subsystems need to be replaced or refurbished. The comprehensive wayside overhaul will include the design, supply manufacture, installation, testing and commissioning of the system into a fully functional, safe, and reliable Metromover system. Project anticipated completion is May 2025. The design is 99% complete and construction has begun.

Improvements Across Most of Metrorail System

Rapid Transit Improvement

Construction Phase

#### TRANSIT MAINTENANCE AND MODERNIZATION

Regular maintenance and upgrades to the transit infrastructure not only improve the passenger experience, but also help to reduce delays and breakdowns, which can have a significant impact on the overall efficiency of the system. Additionally, modernization efforts, such as the introduction of new technologies and the use of cleaner and more sustainable energy sources, can help to improve the environmental impact of transit. These improvements have become more critical with the implementation of the BBN as the need for transfers has increased. Key transfer locations within the County have been identified so enhanced facilities can be implemented to east these transfers. For example, DTPW modernization efforts include:

- Electric signage at Metrorail and Metromover stations
- Parking space counters at Metrorail parking garages

#### SOUTH DADE BUS MAINTENANCE FACILITY

With the implementation of the SMART Program, the County inventoried the availability of garages located within the south Miami-Dade area of the County for bus maintenance facilities and determined that the closest maintenance facility to the South Miami-Dade area is the Coral Way facility, which has reached its capacity and is approximately 30-miles away from the southern county line of Miami-Dade. A new facility in this area is necessary. This new maintenance facility will improve Transit's operational efficiency by decreasing the turnaround time for placing buses back in revenue service. A county owned site with good access was identified at the NW Quadrant of Biscayne Drive and SW 127th Avenue. The Project was advertised on September 28, 2023, to procure a Contractor for the construction of the Facility.

The Bid Opening took place on December 20, 2023. The Project continues to be in the Cone of Silence. Award of the Contract is scheduled for April 2, 2024. Notice to Proceed to the Contractor will follow once all the contractual documents are finalized.

Northwest Quadrant of Biscayne Drive and SW 127th Avenue

Transit Modernization

NEPA & Design Phase

#### ADDITIONAL ELEVATORS AT DADELAND NORTH METRORAIL STATION PARKING GARAGE

Since its completion in 1984, the Dadeland North Metrorail Station's use has increased dramatically through the years. Because of increasing ridership at the Dadeland North Metrorail Station, the existing bank of elevators (four elevators) does not provide an acceptable level of service during peak hours. Peak passenger flows create congestion and long waiting periods for Metrorail passengers waiting for the elevators, generating complaints from existing customers. DTPW is adding two elevators to the existing parking facility. The two proposed (new) elevators will be built at the Northern end of the existing Parking Garage. DTPW is currently in the Design-Builder selection process for design-build services. As of February 2023, the Final Acceptance is scheduled for April 2026.

Proposed 11-story building to house two proposed elevators at the North end of the existing Dadeland North

Metrorail Station Parking Garage

Station Modernization

Procurement Phase to Select Design-Build Firm

#### **BUS NEW VEHICLE REPLACEMENT**

DTPW continues to implement its bus replacement program. Funding for this program is provided through various sources including PTP, FDOT and Federal funding sources. The DTPW bus fleet is continuously aging; therefore, an aggressive bus replacement plan is in place to ensure compliance with FTA's bus retirement criteria. After examining various alternative fuels, DTPW decided to migrate its bus fleet to clean-burning, compressed natural gas (CNG). The purchase of alternative fuel buses for replacements and enhancements is not only an improvement to transit, but also promotes the county's long-term initiative towards a state of good repair, economic competitiveness, livability, sustainability, safety, job creation, and economic stimulus.

In addition to CNG, a total of 69 Proterra 40' Electric Buses have been delivered and assigned for services to date. These vehicles are the first of their kind in Miami-Dade County's Metrobus Fleet and complement the ongoing

Procurement Phase

Transit Modernization

#### **PEDESTRIAN & BICYCLE**

#### THE UNDERLINE

The Underline is a 10-mile mobility corridor from Brickell to the Dadeland South Metrorail station that repurposes existing underutilized industrial space under the existing Miami-Dade County Metrorail, which is the most widely used regional transit heavy rail system. The project increases connectivity to eight Metrorail stations and bus terminals, allowing for increased ridership and increased safety. As a multi-modal corridor, this project will help to connect individual streets and neighborhoods. The Underline will serve as the first and last mile connections to 24 schools, one (1) university, two (2) hospitals, three (3) urgent care facilities, four (4) major malls and over 250,000 residents within ½ mile. The project includes transportation and non-transportation components. The Underline is building separate bicycle and pedestrian paths as well as improving 34 intersections along US-1. DTPW and FDOT are working together in the coordination of intersection improvements. It encourages active transportation and a healthier lifestyle by promoting mass transit, walking, and biking, and reducing US-1 traffic by five percent. It will serve as the spine for a future network of 180 miles of county and city trails and as the spine for the 22-mile Miami Loop. The project was originally planned with nine segments for development, and it is getting built in three phases. As of February 2024, the estimated completion date for Phase 2 is Spring 2024, and Phase 3 is Summer 2026.

Multimodal Urban Trail

Phase II Under Construction

**The Underline Phase I – Brickell Backyard Project** — The Brickell Backyard is 0.5 miles long and the most complex of all the phases. It extends from the southern edge of the Miami River to SW 13th Street (Coral Way). This phase is within the limits of the City of Miami. This phase of The Underline features urban biking and walking paths, flex basketball and soccer courts, outdoor gym, nature, and butterfly gardens gathering spaces to eat, play, discover and relax.

Commenced Construction in December 2018; Completed 2021

**The Underline Phase II – Hammock Trail** — The Hammock Trail extends from SW 13th Street (Coral Way) to SW 19th Avenue. This segment is approximately 2.14 miles long. Phase Two is within the City of Miami

Currently Under Construction; Completion Expected Spring 2024

**The Underline Phase III** — This segment is the longest of all the Underline Phases. It extends 7.36 miles, from SW 19th Avenue to the Dadeland South Kiss-and-Ride Facility. The phase will traverse through the Cities of Miami, Coral Gables, and South Miami and end in Unincorporated Miami-Dade County. Similar to Phase 2, this phase is also designed on three key drivers, highlighting safe multi-modal transportation, nature, and community.

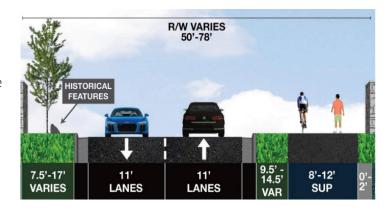

Construction Completion Expected in 2026

#### **SOUTH BAYSHORE DRIVE**

The South Bayshore Drive project will provide continuous pedestrian and bicycle facilities to improve the connections to parks, trails, and transit facilities. This project includes a 10-feet wide shared-use path north of Aviation Avenue that forms part of the Commodore Trail – an essential trail that connects the Old Cutler Trail to the Rickenbacker Causeway. Improvements include resurfacing of roadway pavement and upgrading signing and pavement markings. This project will remove pinch points and deficiencies in the trail network, improve existing trail crossings and increase safe access to the trail. The project completion is anticipated by the end of 2027. The Commodore Trail Master Plan has now been completed and the project will incorporate as feasible recommendations from the Master Plan.

From Darwin Street to Mercy Way

Multimodal Corridor

Design Phase

#### **SAFETY & VISION ZERO**

Vision Zero is a countywide safety initiative with a goal to eliminate all traffic fatalities and severe injuries by 2040, while increasing the safety, mobility, and health of all county residents. DTPW's Vision Zero program is focused on system-level changes in how we plan, design, and build our transportation network. The program kicked off in late 2021 with the development of the Vision Zero Framework Plan which identified over 2,000 locations where fatalities or serious injuries have taken place across the county and established actions the county must take to achieve zero.

On average, more than 300 vehicle crash fatalities take place in Miami-Dade County per year. Of these fatal crashes, more than 100 involve vulnerable road users, including pedestrians and bicyclists. Miami-Dade County continues to be identified as one of the most dangerous counties for vulnerable road users (Smart Growth America: Dangerous by Design 2010 to 2022). While the County continues to thrive economically and grow in population and travel demand, it is DTPW's imperative to ensure a safe transportation network. Miami-Dade County is committed to eliminating traffic deaths and serious injuries within our transportation network by 2040. Building from the results of the 2021 Vision Zero Framework Plan Miami-Dade County formally established the Vision Zero Program and identified the top 100 high injury crash

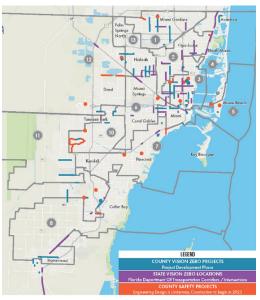

locations where to implement safety countermeasures across the County, prioritizing locations near transit facilities and equity neighborhoods.

Making a commitment to zero traffic deaths means addressing all aspects of safety through five overarching program focus areas. DTPW's focus areas are based on the Safe System Approach that, together, creates a comprehensive approach with layers of protection for all road users.

#### Our focus areas are:

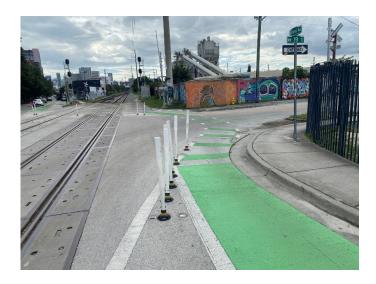

- Promote a Culture of Safety
- Enhance Process and Collaboration
- Build Safe Streets for Everyone
- Create Safe Speeds
- Make Data-Driven Decisions

In 2023, DTPW was awarded a \$16.2 million Implementation Grant under the Safe Streets and Roads for All (SS4A) program, administered by the United States Department of Transportation. The awarded funds will focus on infrastructure improvements at 24 critical locations within the County's high-injury network, helping to enhance safety for all road users, particularly in areas of the County where pedestrians and cyclists have been disproportionately impacted by road crashes. DTPW has completed the construction and operational improvements of ten safety projects throughout Miami-Dade County and has nine more projects under construction. DTPW is anticipating completing 22 safety projects by 2024.

DTPW is currently in the construction phase for nine projects, with 10 of 24 projects completed. DTPW anticipates the completion of the remaining projects by the end of 2024.

Countywide

Safety Initiative

#### MAJOR HIGHWAY AND BRIDGE IMPROVEMENT PROJECTS

Major road and bridge projects under construction or scheduled to begin construction include, but are not limited to:

- NW 37 Avenue from North River Drive to NW 79 Street
- SW 137 Avenue from US-1 to SW 200 Street
- SW 216 Street from SW 127 Avenue to HEFT

#### NW 25 STREET CORRIDOR ROAD WIDENING

NW 25 Street is a County-maintained section line road within the City of Doral and Sweetwater. A feasibility study was completed in 2015. Recommendations from the study include the widening of NW 25 Street from four to six lanes. The scope of work for this project includes, but is not limited to, widening of the road to provide three lanes in each direction, a raised median, a 6-foot sidewalk on the south side and a 10-foot shared use path on the north side, a new drainage system, a new signalized intersection at 99 Avenue, and the addition of turning lanes at major intersections to increase capacity. Design was completed in Fall 2022; construction is partially funded.

NW 25 Street from West of NW 117 Avenue to NW 87 Avenue

Infrastructure Improvement

Construction Phase

#### **NW 12 STREET IMPROVEMENTS**

The project consists of widening and resurfacing NW 12 Street from the Dolphin Park and Ride Facility to NW 114 Avenue. The project will increase capacity for existing left turn and right turn lanes as well as provide new left turn and right turn lanes along NW 12 Street. Exit

ramps from the Florida Turnpike, and the right turn lane exit from the Dolphin Mall at NW 114 Avenue will be improved. The project will also add new Bus Only lanes to service the new Dolphin park-and-ride facility.

The project will include a new storm drainage system, pavement markings and signage, intersection and signalization improvements, roadway lighting, permitting, culvert extension, and construction administration services. The project length is approximately 0.65 miles. The project is currently in the design phase (90% Plan). The 100% Plan phase will be completed in May 2024.

NW 12 Street from the Dolphin Park and Ride Facility to NW 114 Avenue

\_

Design Phase

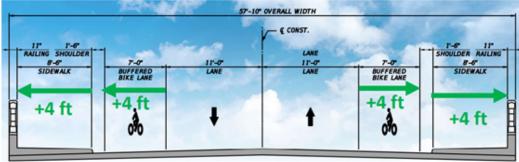

#### **VENETIAN CAUSEWAY**

The historic Venetian Causeway is a 2.5-mile-long facility that provides a major link between the City of Miami on the west and City of Miami Beach on the east. The Venetian Causeway is comprised of ten fixed bridges and two bascule bridges separated by five spoil islands, and six residential islands. Following the PD&E study, it was determined that eleven of the twelve bridges will require replacement. Miami Dade County has started the final design phase for the replacement of 11 bridges along the Venetian Causeway, following completion of the PD&E study, performed by FDOT.

The final design will provide new wider bridges which will enhance safety and connectivity for all modes of transportation, including pedestrians, bicyclists, navigable traffic, and vehicular traffic. The replacement bridges will adhere to the existing

Proposed

causeway historic aesthetic and ensure minimal environmental impact. Additionally, resiliency measures are being studied to ensure the new bridges are not affected by sea-level rise effects, and that they can provide continued connectivity for emergency services, construction, and commerce vehicles. The final design phase has begun and is expected last 18 to 24 months, concluding in Summer 2025, with Construction advertisement to immediately follow.

11 bridges along the Venetian Causeway, a 2.5-mile-long roadway spanning 11 man-made islands

Final Design Phase

#### RICKENBACKER CAUSEWAY

The Rickenbacker Causeway is a multimodal corridor that provides the only ingress and egress connection to the Village of Key Biscayne, including access to several unique cultural sites and water sports opportunities, and serves as one of the busiest bicycling and running routes in Miami-Dade County.

The Rickenbacker Causeway is approximately 3.6 miles in overall length with 1.2 miles of bridge structures and 2.4 miles of roadway with the toll facility near its western terminus at Brickell Avenue on the mainland. The eastern terminus occurs at the end of the Bear Cut Bridge where the roadway becomes Crandon Boulevard.

#### **MASTER PLAN**

DTPW is developing a Master Plan that will provide for a holistic planning framework for the Causeway. The scope of the Master Plan includes coordination with partner agencies and stakeholders, the identification of short-term projects aimed at funding within the Capital Improvement Program (CIP), and long-term projects for future funding opportunities.

The Master Plan will provide the opportunity to solidify recommendations into a coordinated plan that will solidify traffic flow while creating a multimodal safety environment and include continued coordination with the Village of Key Biscayne, MDPD, Miami-Dade Parks, Recreation and Open Spaces Department (MDPROS), and other stakeholders. The study is scheduled to be completed in early 2024.

SW/SE 26TH Road and the Rickenbacker Causeway from the I-95 to the Key Biscayne Village boundary

Infrastructure Improvement

Master Plan

#### PHASE I SAFETY ENHANCEMENTS

In late spring 2022, Miami-Dade County allocated resources to implement immediate safety enhancements within the Rickenbacker Causeway. These enhancements protect bicyclists

and pedestrians who utilize the Causeway and minimize conflict zones with motorists.

The improvements were developed with input from various stakeholders and in response to existing conflicts along the Rickenbacker Causeway, specifically located along the existing U-Turn at the William Powell Bridge.

Rickenbacker Causeway at the U-Turn at the William Powell Bridge

Infrastructure Improvement

Completed July 2022

#### PHASE II SAFETY ENHANCEMENTS

The second phase of safety enhancements along the Rickenbacker Causeway will involve the relocation of the entrance driveway to Hobie Beach Park immediately east of the William Powell Bridge. The entrance will be relocated approximately 350 feet east of its existing location. The relocation will serve to improve two conflict points: a) It will improve the conflict between vehicular traffic entering the park and cyclists crossing the entrance point; and b) It will provide a larger distance which increases advanced warning time for vehicles entering the park. Other enhancements with Phase II are the consolidation of driveways east of the William Powell Bridge and west of the Bear Cut Bridge. The plan is to reduce the number of driveways, which will help minimize conflict points within those limits.

Rickenbacker Causeway at the U-Turn at the William Powell Bridge

Infrastructure Improvement

Completed July 2023

#### **SPEED LIMIT UPDATE**

In 2022, DTPW conducted a technical analysis of speed limits on the Rickenbacker Causeway. The analysis, which utilized traffic field data collected during the period of June through July of 2022, indicates that speeds should be adjusted to 40 miles per hour in the segment of the Rickenbacker from the Toll Plaza to Calusa Circle. Throughout the summer of 2022, DTPW piloted modified speed limits across the Rickenbacker, yielding valuable information that's being used to implement safety enhancements such as the establishment of a constant speed limit along the entirety of the Causeway. This change is anticipated to promote safety while facilitating enforcement and setting of driver expectations. The cumulative impact of these updated speed limits, short-term improvements, and long-term planning for the corridor in coordination with stakeholders will lead to a safer Rickenbacker Causeway for all users.

#### **BEAR CUT BRIDGE PD&E STUDY**

Miami-Dade County is performing the planning study to analyze the options for replacement or major rehabilitation of the Bear Cut Bridge from Virginia Key to Key Biscayne. A portion of the bridge was constructed in 1944 and will require replacement of part, all or major rehabilitation to continue to serve as the only connection between mainland Miami and the Village of Key Biscayne. The study will include public outreach and input, stakeholder coordination, design alternative development, cost benefit analysis, long range cost estimating, and analysis of the environmental, archaeological, and socioeconomic impact of the design alternatives. Design or Design Build is set to begin in Spring or Summer 2025 with Construction to begin in 2027.

#### HOBIE ISLAND BEACH NORTH SIDE SHORELINE STABILIZATION

The purpose of this project is to stabilize the shoreline along the north side of Hobie Island Beach through shoreline protection and stormwater treatment solutions for the north half of the open space along the Rickenbacker Causeway.

As part of this shoreline protection project, 160 invasive Australian Pine trees must be removed, in accordance with Chapter 19 of the Code of Miami-Dade County. These invasive trees will be replaced with 290 native trees, palms, and additional shrub species.

This project will improve and beautify this open space by increasing the resiliency of the shoreline and beach, and improving the parking area, while providing an improved pedestrian and bicycle underpass beneath the William Powell Bridge that connects Hobie Island Beach North to Hobie Island Beach South.

This Project covers 9.6 acres of recreational shoreline along the Rickenbacker Causeway and is currently an area that has been closed to the public due to damage caused by Hurricane Irma in 2017. The construction has been scheduled to start.

#### NW 17TH AVENUE BRIDGE OVER MIAMI RIVER PD&E STUDY

Miami Dade County will be performing a PD&E study, to analyze alternatives for the replacement or major rehabilitation of the NW 17th Avenue movable Bridge from NW 7th Street to NW 14th Street within the City of Miami and Miami-Dade County. The study will aim to address operational reliability, structural and functional deficiencies, as well as address future transportation demands and multimodal safety opportunities for pedestrians and bicyclists. Constructed in 1928, this bridge provides access to many major points of interest and emergency services in Miami and provides interchange access to the Dolphin Expressway/SR 836.

The PD&E study will include public outreach and input, stakeholder coordination, design alternative development, cost benefit analysis, long range cost estimating, and analysis of the environmental, archaeological, and socioeconomic impact of the design alternatives. The PD&E study is expected to take approximately four years to conclude, which will then be followed by Final Design. The Final Design phase is tentatively expected to take approximately two years to complete.

PD&E Study

#### **NEIGHBORHOOD IMPROVEMENT PROJECTS**

DTPW, as part of the PTP, has been tasked with coordinating and constructing various categories of Neighborhood Improvement Projects. To address the various non-site-specific categories discussed in the PTP Ordinance, the Department created "The Neighborhood Improvement Projects Formula" to allocate funds. The formula considers population in the Unincorporated Municipal Service Area for each commission district, the needs as reported to the Department, and the percentage of maintained arterial and collector lane miles. A portion is then evenly distributed to each district.

PTP neighborhood Improvements include modifications of intersections, resurfacing of local and arterial roads, installation / repairs of guardrails, installation of school flashing signals, enhancement of greenways and bikeways, A.D.A. curb cuts / repairs, pavement

markings, roadway lighting, traffic calming, traffic signals, and traffic sign replacement / repair. Such improvements also include replacement / repair of sidewalks, repair / installation of drainage and landscape beautification (including community image enhancements) related to the development, construction, operation, or maintenance of roads and bridges in the County or to the expansion, operation, or maintenance of bus and fixed guideway system.

The Neighborhood Improvement Projects include:

- Site Specific Neighborhood Improvement Sites
- Non-Site-Specific Neighborhood Improvement Sites
- Countywide Neighborhood Improvements
- School Flashing Signals Program

NOTE 1: PTP NEIGHBORHOOD IMPROVEMENTS Provided each Commission District with funds for Neighborhood Improvements in the categories listed below and according to an allocation formula based on population, reported needs and County-maintained road lane miles. DTPW continues to coordinate the Neighborhood Improvement Projects with County Commissioners' Offices based on their remaining allocation. Improvement categories include: modifications of intersections; resurfacing of local and arterial roads; installation / repairs of guardrails; installation of school flashing signals, enhancement of greenways and bikeways, A.D.A. curb cuts / repairs, pavement markings, roadway lighting, traffic calming, traffic signals, and traffic sign replacement / repair. Such improvements also include replacement / repair of sidewalks, repair / installation of drainage and landscape beautification (including community image enhancements) related to the development, construction, operation or maintenance of roads and bridges in the County.

NOTE 1: PTP NEIGHBORHOOD IMPROVEMENTS Provided each Commission District with funds for Neighborhood Improvements in the categories listed below and according to an allocation formula based on population, reported needs and County-maintained road lane miles. DTPW continues to coordinate the Neighborhood Improvement Projects with County Commissioners' Offices based on their remaining allocation.

Improvement categories include: modifications of intersections; resurfacing of local and arterial roads; installation / repairs of guardrails; installation of school flashing signals, enhancement of greenways and bikeways, A.D.A. curb cuts / repairs, pavement markings, roadway lighting, traffic calming, traffic signals, and traffic sign replacement / repair. Such improvements also include replacement / repair of sidewalks, repair / installation of drainage and landscape beautification (including community image enhancements) related to the development, construction, operation or maintenance of roads and bridges in the County.

NOTE 1: PTP NEIGHBORHOOD IMPROVEMENTS Provided each Commission District with funds for Neighborhood Improvements in the categories listed below and according to an allocation formula based on population, reported needs and County-maintained road lane miles. DTPW continues to coordinate the Neighborhood Improvement Projects with County Commissioners' Offices based on their remaining allocation.

Improvement categories include: modifications of intersections; resurfacing of local and arterial roads; installation / repairs of guardrails; installation of school flashing signals, enhancement of greenways and bikeways, A.D.A. curb cuts / repairs, pavement markings, roadway lighting, traffic calming, traffic signals, and traffic sign replacement / repair. Such improvements also include replacement / repair of sidewalks, repair / installation of drainage and landscape beautification (including community image enhancements) related to the development, construction, operation or maintenance of roads and bridges in the County.

NOTE 1: PTP NEIGHBORHOOD IMPROVEMENTS Provided each Commission District with funds for Neighborhood Improvements in the categories listed below and according to an allocation formula based on population, reported needs and County-maintained road lane miles. DTPW continues to coordinate the Neighborhood Improvement Projects with County Commissioners' Offices based on their remaining allocation.

Improvement categories include: modifications of intersections; resurfacing of local and arterial roads; installation / repairs of guardrails; installation of school flashing signals, enhancement of greenways and bikeways, A.D.A. curb cuts / repairs, pavement markings, roadway lighting, traffic calming, traffic signals, and traffic sign replacement / repair. Such improvements also include replacement / repair of sidewalks, repair / installation of drainage and landscape beautification (including community image enhancements) related to the development, construction, operation or maintenance of roads and bridges in the County.

NOTE 1: PTP NEIGHBORHOOD IMPROVEMENTS Provided each Commission District with funds for Neighborhood Improvements in the categories listed below and according to an allocation formula based on population, reported needs and County-maintained road lane miles. DTPW continues to coordinate the Neighborhood Improvement Projects with County Commissioners' Offices based on their remaining allocation.

Improvement categories include: modifications of intersections; resurfacing of local and arterial roads; installation / repairs of guardrails; installation of school flashing signals, enhancement of greenways and bikeways, A.D.A. curb cuts / repairs, pavement markings, roadway lighting, traffic calming, traffic signals, and traffic sign replacement / repair. Such improvements also include replacement / repair of sidewalks, repair / installation of drainage and landscape beautification (including community image enhancements) related to the development, construction, operation or maintenance of roads and bridges in the County.

NOTE 2: PE = Preliminary Engineering; CST = Construction; FS = Feasibility Study.

NOTE 1: PTP NEIGHBORHOOD IMPROVEMENTS Provided each Commission District with funds for Neighborhood Improvements in the categories listed below and according to an allocation formula based on population, reported needs and County-maintained road lane miles. DTPW continues to coordinate the Neighborhood Improvement Projects with County Commissioners' Offices based on their remaining allocation.

Improvement categories include: modifications of intersections; resurfacing of local and arterial roads; installation / repairs of guardrails; installation of school flashing signals, enhancement of greenways and bikeways, A.D.A. curb cuts / repairs, pavement markings, roadway lighting, traffic calming, traffic signals, and traffic sign replacement / repair. Such improvements also include replacement / repair of sidewalks, repair / installation of drainage and landscape beautification (including community image enhancements) related to the development, construction, operation or maintenance of roads and bridges in the County.

NOTE 2: PE = Preliminary Engineering; CST = Construction; FS = Feasibility Study.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

# PART 2: 5-YEAR PROJECT LISTINGS PUBLIC TRANSPORTATION IMPROVEMENTS

### TIP • FISCAL YEARS 2024/2025 TO 2028/2029

### PART 2: 5-YEAR PROJECT LISTING PUBLIC TRANSPORTATION IMPROVEMENTS

South Florida Regional Transportation Authority (SFRTA)

The mission of the South Florida Regional Transportation Authority (SFRTA) is to collaborate with partners, deliver a safe convenient, and effective service that serves as South Florida's multimodal backbone. SFRTA is an agency of the State of Florida, created in 2003 by Chapter 343, Florida Statute, and is authorized to own, operate, maintain, and manage a transit system in the tri-county area of Miami-Dade, Broward, and Palm Beach Counties. SFRTA operates the Tri-Rail Commuter Rail System. The following projects are included in SFRTA's Capital Budget and or Five-Year Plan in Fiscal Year 2025 thru 2029.

#### THE TRI-RAIL DOWNTOWN MIAMI LINK (TRDML)

SFRTA, in coordination with multiple partners, has extended the Tri-Rail commuter rail service to provide a new service from Tri-Rail's northern most station at Mangonia Park in Palm Beach County to its southern most station at the "MiamiCentral Station" in Downtown Miami. The 9.05-mile extension, known as Tri-Rail Downtown Miami Link (TRDML), provides a connecting service from the South Florida Rail Corridor (SFRC) at the Tri-Rail Metrorail Transfer Station, to the Florida East Coast (FEC) railway corridor, into Downtown Miami. TRDML service began on January 13, 2024. The MiamiCentral Station serves as Downtown Miami's multimodal hub, providing connections to Brightline, Tri-Rail, the existing Miami Dade county bus system, Metrorail, and Metromover.

TRDML is a cost-effective and strategic transit solution for Miami-Dade County. The new service will leverage Brightline express train service and station investment, together with the recent SFRC connections to the FEC railway corridor; quiet zone funds provided by the Miami-Dade Transportation Planning Organization (TPO); and the region's previous investment in the Tri-Rail system.

The project was leveraged with local investments by public partners of \$70 million for incremental construction costs for the MiamiCentral Station, to accommodate Tri-Rail trains and new rail infrastructure to support the new extension into Downtown Miami.

#### SFRTA – PUBLIC TRANSPORTATION IMPROVEMENTS

#### **ROLLING STOCK**

On May, 5, 2023, SFRTA was awarded \$71.7M in federal funds to support the purchase of new Rolling Stock to replace up to 24 rail vehicles or a third of its current fleet. Procurement of new Tri-Rail Rolling stock will enable SFRTA to both maintain and provide additional passenger service operations on the existing South Florida Rail Corridor (SFRC). New rolling stock will also allow for increased ridership capacity, operational and train scheduling flexibility.

#### TRI-RAIL PASSENGER INFORMATION SYSTEM (PIS)

Tri-Rail PIS will provide train locations and predicted arrival times at each station via the internet, smartphone app, telephone, text message, and LCD display location on the station platforms. The system will include onboard signage and an audio system on train cars to display and announce next station arrival and destination information. The train-tracking component is available via internet and smartphone app.

#### **SAFETY AND SECURITY CAMERAS, PHASE 2**

This project is for the installation of surveillance camera hardware and monitoring technology at all Tri-Rail Stations. Cameras will be installed in parking lots, stairwells, pedestrian walkways and bridges, and locations within stations that require safety monitoring. The Phase 1 project was recently completed and focused on installing surveillance cameras on Tri-Rail station platforms.

These surveillance cameras and monitoring technology allows SFRTA's Public Safety Coordination Center (PSCC) to monitor/detect suspicious and/or unlawful activities in real time for quick detection and response. Activities are recorded for reference, training, system improvement, and/or as video evidence when further law enforcement is needed.

#### MIAMI RIVER-MIAMI INTERMODAL CENTER CAPACITY IMPROVEMENT

The MR-MICCI Project will provide an additional mainline track within the South Florida Rail Corridor from just north of the Tri-Rail Hialeah Market Station to the Tri-Rail Miami Airport Station located at the Miami Intermodal Center. The project will increase capacity and improved track connections across the Miami River, including bridge, track, and signal upgrades. SFRTA has finalized the Project Development and Environment (PD&E) Study. The final design and construction will be completed by the Florida Department of Transportation, District Four.

#### PLANNING AND CAPITAL DEVELOPMENT

The Planning and Capital Department performs short- and long-term planning activities and facilitates the performance of planning studies and efforts such as the update of the Transit Development Plan (TDP), Transit-Oriented Development (TOD) station area plans, Bicycle and Pedestrian Studies and Passenger Surveys, along with other regionally significant projects.

#### **SFRTA - PUBLIC TRANSPORTATION IMPROVEMENTS**

#### **PROGRAM OF PROJECTS**

SFRTA receives annual Federal Appropriations Sections 5307 and 5337 funding from the Federal Transit Administration (FTA). This funding is programmed in SFRTA's Capital Budget to include preventive maintenance expenditures such as rolling stock maintenance and station maintenance; along with other capital projects and initiatives that the Agency plans to undertake, which are allowable expenditures of funds under FTA guidelines.

5 Year TIP Total

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

# PART 2: 5-YEAR PROJECT LISTINGS NON-MOTORIZED COMPONENT

### TIP • FISCAL YEARS 2024/2025 TO 2028/2029

### PART 2: 5-YEAR PROJECT LISTING NON-MOTORIZED COMPONENT

The development of safe facilities for people who walk or use a bicycle is guided by the Comprehensive Development Master Plan (CDMP) and the 2045 Long Range Transportation Plan (LRTP).

CDMP Transportation Element Objective TE-2 states: "In furtherance of pedestrianism and other non-motorized modes of transportation in the planned urban area, Miami-Dade County shall enhance its transportation plans, programs and development regulations as necessary to accommodate the safe and convenient movement of pedestrians, non-motorized vehicles and motorized vehicles."

The 2045 LRTP lists the following goals and objectives, related to non-motorized projects/programs:

#### **LRTP GOAL 1: MAXIMIZE MOBILITY CHOICES SYSTEMWIDE**

- Objective: Provide a comprehensive transportation network for dependable and reliable transportation options.
- · Objective: Increase mobility choices throughout the county

#### LRTP GOAL 2: INCREASE THE SAFETY OF THE TRANSPORTATION SYSTEM FOR ALL USERS

- Objective: Improve the safety of the transportation system
- Objective: Promote projects in high crash locations (locations with the highest number of crashes)
- Objective: Improve safety of the transportation system for the elderly and disabled

Bicycle and pedestrian projects in the 2024/2025 to 2028/2029Transportation Improvement Program are taken from the non-motorized section of the 2045 LRTP, the Transportation Alternatives Program application cycle and through agency coordination for other transportation projects, Projects are presented to the Miami-Dade Bicycle Pedestrian Advisory Committee (BPAC) for public information and comment.

#### **NON-MOTORIZED COMPONENT**

The Miami-Dade 2045 Bicycle Pedestrian Master Plan assesses opportunities amongst the SMART Plan transit hubs and stations to expand the reach of bicycle and pedestrian trip distances to the entire county, with the help of transit connections. This plan's primary focus is on the daily commuter trip and aims to incentivize projects that safely connect the largest number of people, that need it the most, to the most places, on a daily basis. This plan also looks at other pedestrian and bicycle trip destinations such as educational facilities, major medical centers, high employment areas, and outdoor recreational locations. Realizing these opportunities will help manage the ever-present issue of traffic any metropolitan area deals with and further encourages healthy and sustainable communities within the County. This plan serves as the Bicycle and Pedestrian element of the 2045 Long Range Transportation Plan (LRTP).

More information on the TPO's Bicycle Pedestrian Program is available from the TPO website at: <a href="http://miamidadetpo.org/bicycle-pedestrian-program.">http://miamidadetpo.org/bicycle-pedestrian-program.</a> asp.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

# PART 2: 5-YEAR PROJECT LISTINGS INTELLIGENT TRANSPORTATION SYSTEMS (ITS)

### TIP • FISCAL YEARS 2024/2025 TO 2028/2029

### PART 2: 5-YEAR PROJECT LISTING INTELLIGENT TRANSPORTATION SYSTEMS (ITS)

An Intelligent Transportation Systems (ITS) is a combination of leading-edge applications and communication technologies used to improve transportation safety, efficiency, and sustainability of surface transportation system. ITS technologies enable the users to be better informed and make smarter use of the network in our region. ITS encompasses a broad range of advanced and traditional communications-based information and electronic technologies to:

- Improve safety by increasing information to the driver and augmenting driver control of the vehicle. Features include warning systems that activate when cars get too close to another vehicle or the edge of the road and enhanced traffic control systems that decrease stops and speed variations, reducing the number of crashes.
- Reduce congestion and improve accessibility through rapid detection and clearing of incidents that cause delays; enhanced public transit systems can reduce highway traffic; and real-time traffic control systems can adapt automatically to changing conditions and improve the flow of traffic.
- Improve energy efficiency and environmental quality by providing travelers with information to support decisions that can reduce highway demand and travel time and vehicle emissions by providing mobility options to use high occupancy vehicles or public transit or on demand services to mitigate congestion.
- Enhance economic productivity by improving the transportation system efficiency through better routing of vehicles, automated toll collection, safety enhancements and streamlining commercial vehicle regulatory enforcement and compliance.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

# PART 2: 5-YEAR PROJECT LISTINGS TRANSPORTATION DISADVANTAGED SECTION (ADA)

## TIP • FISCAL YEARS 2024/2025 TO 2028/2029 PART 2: 5-YEAR PROJECT LISTING TRANSPORTATION DISADVANTAGED SECTION (ADA)

Section 427.015, Florida Statutes, requires that the Metropolitan Planning Organization, as part of its Transportation Improvement Program "shall... identify transportation improvements that will be advanced with [transportation disabled] funds during the program period." This requirement is reiterated in section 3(f)2.g of the Florida Department of Transportation directive 525-010-012-c ("Transportation Improvement Program Development and Review"). The purpose of this section is to meet these requirements, and to reference, in a user-friendly format, transportation improvements to assist the safe and efficient transport of those citizens who need special services and facilities to obtain access to life-sustaining activities.

#### **EXPLANATION**

The projects listed in this section do show funding amounts but no construction schedules. This is because the same projects are also listed in other sections of this document grouping projects by funding category. The items listed are referenced by the page number in which they appear in other TIP sections.

In addition, this section includes pedestrian facilities and sidewalks and some transit passenger amenities which, once completed, could enhance and facilitate usage by not only disadvantaged passengers but the public in general. This section does not include relevant improvements associated with larger transportation projects. Examples would include curb cuts and tactile surface treatments added onto sidewalks as part of an intersection widening and reconstruction, or wheelchair ramps and elevators included within the design of major facilities, as required by the 1991 Americans with Disabilities Act.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

## PART 2: 5-YEAR PROJECT LISTINGS CONGESTION MANAGEMENT PROCESS

## TIP • FISCAL YEARS 2024/2025 TO 2028/2029 PART 2: 5-YEAR PROJECT LISTING CONGESTION MANAGEMENT PROCESS

Congestion Management is an integral part of the planning process, and the Congestion Management Process (CMP) is required to be developed and implemented pursuant to Title 23 U.S. Code 134 – Metropolitan Transportation Planning in Transportation Management Areas (TMAs). The congestion management process in Miami-Dade is being developed cooperatively with FDOT and is being implemented on a Countywide basis. The application of CMP strategies will improve transportation system performance and reliability by reducing the adverse impacts of congestion on the movement of people and goods through demand reduction and operational improvements.

The FAST Act retained the requirement for a congestion management process for MPOs that serve a Transportation Management Area (TMA), the law also allows an MPO that serves a TMA to develop a congestion management plan (distinct from the congestion management process) that will be considered in the MPO's transportation improvement program. The Miami-Dade 2045 LRTP, adopted September 2019, included such Congestion Management Plan. The plan identifies proposed projects and programs to reduce congestion and increase job access opportunities. This plan will be updated again within the Miami-Dade 2050 LRTP process to be adopted in September of 2024.

The Miami-Dade County 2019 Congestion Management Plan Update improved upon the 2014 Miami-Dade Congestion Management Process. The CMP was developed based on the 8-step process outlined in the FHWA CMP Guidebook. CMP objectives were drawn from the Miami-Dade County's 2045 Long Range Transportation Plan (LRTP) goals and objectives and serve as one of the primary points of connection between the CMP and LRTP and define the direction for development of CMP Performance Measures. Similar to the 2014 CMP update process, transit, freight, and non-motorized modes are evaluated through the 2045 LRTP update process as a separate effort, thus are not included in the CMP update process. To avoid duplication with significant transportation investments committed to by the TPO, the CMP list eliminated congested locations which coincided with the cost feasible plan (CFP) projects or with SMART Plan Corridors including the BERT network. The observed congestion at these locations were assumed to be addressed by the cost feasible plan and Smart Plan investments.

The project list which follows is based on the adopted 2045 LRTP which incorporated the 2019 Congestion Management Process Update. The process and projects are further detailed on pages 7-126 through 7-133 of the 2045 LRTP document.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

# PART 2: 5-YEAR PROJECT LISTINGS FREIGHT RELATED TRANSPORTATION IMPROVEMENTS

# TIP • FISCAL YEARS 2024/2025 TO 2028/2029 PART 2: 5-YEAR PROJECT LISTING FREIGHT RELATED TRANSPORTATION IMPROVEMENTS

On November 15, 2021, President Biden signed into law the \$1.2 trillion Infrastructure Investment and Jobs Act (IIJA), a bipartisan bill committed to a five-year plan over fiscal years 2022 through 2026 that will impact every aspect of the nation's transportation system. In brief, it will finance the rebuilding and rehabilitation of thousands of decaying bridges, tens of thousands of miles of roadway, improvements in railroad infrastructure in addition to increasing the capacity and resilience of the nation's airports, seaports and waterways. The IIJA funding represents an increase of \$273.9 billion over the Fixing America's Surface Transportation (FAST) Act baseline.

#### SIGNIFICANT FREIGHT PROVISIONS

The IIJA includes a number of provisions to improve the condition and performance of the national freight network and support investment in freight-related surface transportation projects. Specifically, the Freight Provisions over the next five years (along with the funding amounts) are as follows:

- Office of Multimodal Freight Infrastructure and Policy: USDOT will establish a Freight Office led by an Assistant Secretary for Multimodal Freight.

  The Office will oversee national and state freight planning and policy as well as implement and administer multimodal freight grant programs
- INFRA Grant Program Nationally Significant Freight and Highway Projects: Freight-specific competitive grant program with broad applicant eligibility that provides funding for large highway and bridge projects, as well as port, rail, intermodal, and rail-highway at-grade crossing and grade separation projects. A maximum of 30 percent of annual INFRA funding may go toward non-highway freight projects (\$8 billion).
- Freight Formula Program National Highway Freight Program: Freight-specific formula program for statewide projects. A maximum of 30 percent of annual freight formula funding may go toward non-highway freight projects (\$7.15 billion).
- National Infrastructure Project Assistance Program: Fully multimodal competitive grant program available to a wide variety of large transportation infrastructure projects. 50 percent of funding will go toward projects that have a total cost of at least \$500 million and 50 percent will be set aside for projects with a total cost between \$100-\$500 million (\$5 billion).
- TIGER/BUILD/RAISE Grant Program Local and Regional Project Assistance: Codifies the TIGER/BUILD/RAISE grant program, previously subject to annual appropriations, into reauthorization law for the first time. The program is fully multimodal and open to a broad range of eligible transportation projects (\$7.5 billion).

#### FREIGHT RELATED TRANSPORTATION IMPROVEMENTS

- Railroad Crossing Elimination Program: Discretionary grant program for highway-rail or pathway-rail grade crossing improvement projects, including: grade separations or closures; track relocations; installation of related protective devices, signals or signs; and related planning or environmental reviews (\$3 billion).
- Consolidated Rail Infrastructure and Safety Improvements Program: Discretionary grant program for passenger and freight rail safety, efficiency, and reliability improvement projects. Eligible projects include: the deployment of railroad safety technology (including positive train control); capital rail projects to address congestion and safety challenges affecting rail service; highway-rail grade crossing improvement projects; projects to improve short-line or regional railroad infrastructure; and projects to enhance multimodal connections or facilitate service integration between rail service and other modes (\$5 billion).
- Port Infrastructure Development Program: Multi-year direct appropriations for the PIDP grant program, which provides grants to improve facilities, operations, and intermodal connections near or within seaports, inland ports, and Great Lakes ports. This program is typically subject to annual appropriations. While it still remains separate from surface transportation reauthorizations within the IIJA, this provision ensures consistent funding for the PIDP program over the next five years (\$2.25 billion).
- **Bridge Program Formula:** Creates a bridge replacement, rehabilitation, preservation, protection, and construction program. Funding is distributed by formula based on a state's share of bridges in "poor" and "fair" condition (\$27.5 billion).
- **Bridge Investment Program Discretionary:** Establishes a competitive grant program for projects to replace, rehabilitate, preserve, or protect bridges on the National Bridge Inventory (\$12.5 billion).

The Florida Strategic Intermodal System (SIS) program also has freight-emphasis. The SIS was established to ensure that transportation dollars were invested in areas that supported the local economic generators such as the seaport and the airport and the roadway facilities that connect them. The 2045 Miami-Dade Long Range Transportation Plan (LRTP) Update embraced freight movement with the inclusion of a freight element that includes projects that focus on improving freight movement along major corridors, and specifically, in to and out of Miami International Airport (MIA) and PortMiami. Miami-Dade County is committed to providing a transportation system that enhances the efficiency of freight movement.

The Freight Transportation Advisory Committee (FTAC), that includes representatives from the freight, logistics, warehousing and intermodal industries in addition to consultants and municipalities, is the industry's advisory panel to the TPO Governing Board on freight movement and truck traffic needs. Aside from advising the TPO, the FTAC considers the types of improvements that should be made with regard to safety and freight efficiency in the county including:

- Determining logistics for truck parking/staging
- Development of Inland Port locations for PortMiami
- Improving the turning radii for trucks
- Enhancing access to freight trucks

#### FREIGHT RELATED TRANSPORTATION IMPROVEMENTS

- Increasing capacity through select road widening projects
- Modifying access to both seaport cargo and cruise operations at PortMiami
- Promoting regular communication among freight businesses, elected officials, and appointed officials

#### MIAMI-DADE COUNTY FREIGHT PLAN

The county is home to a well-established and expanding freight transportation system. This system serves as the cornerstone of the region's economy, providing goods and services to Florida's largest consumption market as well as connecting the region to the global economy through major sea and air gateways, taking into account emerging and future technologies. The Freight Plan was recently updated in Spring 2024..

#### PLANNED FREIGHT-RELATED TRANSPORTATION IMPROVEMENTS

Taking advantage of existing freight provisions, multiple freight-related projects have been planned to prepare Miami-Dade County for the future. For starters, a network of Connected and Autonomous Vehicles (CAV) corridors is planned to modernize the county's freight infrastructure. Starting with SR 821/Homestead Extension of the Florida's Turnpike (HEFT) from SR 836/Dolphin Expressway to NW 106th Street and followed by SR 826/Palmetto Expressway to/from SR 836/Dolphin Expressway to US 27/SR 25/Okeechobee Road, CAV technology will be researched, tested, and implemented on dedicated lanes. Moreover, the county continues in the process of developing its first full-service truck travel center at the Golden Glades Interchange, known as the GGTTC, it will be the only full-service truck parking facility in Miami-Dade County and is located approximately 14miles south from the nearest comparable facility for truckers traveling to PortMiami. The GGTTC will inform truckers on the highway of parking availability through an intelligent network of digital signs called Truck Parking Availability System (TPAS). Other potential private sector full-service truck parking sites are currently being planned for future development.

With trucks moving more than 75% of the county's annual freight tonnage, traffic operation and signal improvements are planned for SR 969/NW 72nd Avenue/Milam Dairy Road at SR 934/SW 74th Street/Hialeah Expressway and US 27/SR 25/Okeechobee Road from SR 821/HEFT to NW 74th Street. Aside from these projects, other large improvements are ongoing or have been planned such as interchange improvements at SR 826/Palmetto Expressway at US27/SR 25/Okeechobee Road, SR 924/Gratigny Expressway west extension, new SR 821/HEFT interchanges at NW 170th Street and I-75, new direct ramps at SR 821/HEFT and NW 12th Street, new direct ramps at SR 948/NW 36th Street and US 27/SR 25/Okeechobee Road, and capacity improvements along US 27/SR 25/Okeechobee Road, I-395/SR 836/Dolphin Expressway and at the Golden Glades Interchange. The TPO, along with FDOT District 6, annually submits freight related projects to the MPOAC Freight Priorities Program in an effort to obtain and advance additional funding for locally significant freight projects.

More information on the TPO's Freight & Logistics Program is available from the TPO website at: https://miamidadetpo.org/freight-logistics-planning-program.asp

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

# PART 2: 5-YEAR PROJECT LISTINGS REGIONALLY SIGNIFICANT TRANSPORTATION IMPROVEMENTS

#### TIP • FISCAL YEARS 2024/2025 TO 2028/2029

## PART 2: 5-YEAR PROJECT LISTING **REGIONALLY SIGNIFICANT TRANSPORTATION IMPROVEMENTS**

The Southeast Florida region comprised of Palm Beach, Broward, and Miami-Dade Counties has a 2020 population of over 6.1 million, as of April 1, 2020. Miami-Dade County's 2020 total population is 2.7 million.

Hundreds of facilities make up our region's transportation network; facilities that carry freight, auto, and transit traffic. To develop this network, the region critically looked at the intended uses and functionalities of the existing and future facilities to determine what is regional.

This assessment considered technical components as well as the Long Range Transportation Plan's goals and objectives to ensure compatibility and consistency. Ultimately, four criteria were utilized to guide the regional corridor network development: covering roadway, rail and hub. The four criteria definitions and sources are described in detail below.

#### PRINCIPAL ARTERIALS

**Definition:** Interstate, Freeway/Expressway and all other Principal Arterials

Source: Draft 2010 Functional Classification for FDOT Districts 4 and 6, May 9, 2013

#### PLANNED PHYSICAL EXTENSIONS OF PRINCIPAL ARTERIALS

**Definition:** Interstate, Freeway/Expressway and all other Principal Arterials that are in the adopted LRTP Cost Feasible Plans for future expansion

Source: 2045 LRTP Cost Feasible Plan for Broward, Miami-Dade and Palm Beach County MPOs

#### STRATEGIC INTERMODAL SYSTEM (SIS) NETWORK

**Definition:** SIS and Emerging SIS Corridors, Hubs, Connectors, Railways and Waterways

Source: FDOT Central Office SIS facilities, April 2013

#### **REGIONALLY SIGNIFICANT TRANSPORTATION IMPROVEMENTS**

#### PRINCIPAL ARTERIAL CONNECTIONS

**Definition:** (1) Minor Arterials connecting to Freeways/Expressways, and/or SIS Corridors; (2) extensions of Principal Arterials that cross the intercostal for evacuation purposes; (3) key connections of "gaps" in the network; (4) Non-principal Arterials carrying 50,000 AADT or greater; and (5) extensions of facilities carrying 50,000 AADT or greater to complete a regional network connection.

Source: Draft 2010 Functional Classification for FDOT Districts 4 and 6, May 9, 2013; FDOT Central Office SIS facilities, April 2013; and Adopted Countywide Evacuation Routes – Broward, Miami-Dade and Palm Beach County.

The following project list reflects regional projects of major significance based upon:

- A. Within the regional network
- B. Capacity projects identified for construction phases
- C. Over \$5,000,000 total construction allocations

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

## PART 2: 5-YEAR PROJECT LISTINGS PARKS, RECREATION AND OPEN SPACES

TIP • FISCAL YEARS 2024/2025 TO 2028/2029

PART 2: 5-YEAR PROJECT LISTING
PARKS, RECREATION AND OPEN SPACES

Miami-Dade Parks, Recreation and Open Spaces (MDPROS)

#### 1. LUDLAM TRAIL

Miami-Dade Parks, Recreation and Open Spaces (MDPROS) is proposing to develop the Ludlam Trail, a 5.6-mile multi-use trail within a former railroad corridor. As a priority paved land trail from the Florida Greenways and Trails System (FGTS) Priority Network and Shared-Use Nonmotorized (SUN) Trail Network, the proposed publicly accessible corridor will serve bicyclists, pedestrians, and other types of non-motorized uses. The Ludlam Trail is intended to provide a safe, dedicated, and direct means of non-motorized transportation to and from areas of residences, transit, work, schools, parks, and shopping centers.

The project limits extend from SW 80th Street to 400 feet north of NW 7th Street, between 69th and 70th Avenue. The County acquired the right of way (ROW) for the Ludlam Trail in December 2018, including fee simple owned areas and easements through three private development node areas for a continuous trail. The ROW for the proposed Ludlam Trail Corridor is approximately 100 feet wide for most of its length, although it narrows to between 75 and 80 feet in some areas and down to 18 feet in easement sections through areas designated for mixed-use development. The Ludlam Trail traverses sections of the City of Miami and unincorporated Miami-Dade County (MDC). It is adjacent to the City of South Miami and proximate to the City of West Miami.

The multi-use trail generally consists of a 12-foot-wide, two-way, asphalt bike path, separated by a landscaped buffer from an 8-foot-wide concrete pedestrian path with a 2-foot-wide soft natural jogging surface adjacent to it.

#### PARKS, RECREATION AND OPEN SPACES

The trail development will include eleven (11) at-grade crossings, four (4) grade-separated bridge crossings over roadways (at SR 976 / SW 40th Street / Bird Road; SW 24th Street / Coral Way; US 41 / SR 90 / SW 8th Street / Tamiami Trail / Calle Ocho; and SR 968 / W Flagler Street), and two (2) bridges across existing South Florida Water Management District (SFWMD) canals (C-3 / Coral Gables Canal and C-4 / Tamiami Canal).

The purpose of the proposed Ludlam Trail Corridor Project is to encourage the use of alternate modes of transportation and enhance overall connectivity and accessibility to schools, parks, transit stations, and bus stops for more than 30,500 residents present within two (2) miles of the proposed project corridor. The need for the proposed project is based on the criteria identified below.

The project supports the vision of the MDPROS Open Space Master Plan (OSMP), a primary element of which is to "provide an interconnected trail system which offers transportation alternatives and reduces traffic congestion." The OSMP provides a 50-year unifying vision for a livable and sustainable MDC, which involves the development of a seamless system of greenways, trails, and water trails. The Ludlam Trail will be a vital component of this network as

it will link open spaces and civic institutions to neighborhoods, while offering a reliable transportation alternative.

From a regional perspective, the proposed project will connect to the Metrorail Dadeland North Station via existing sidewalks along SW 70th Avenue from SW 80th Street to SW 85th Street; the proposed Strategic Miami Area Rapid Transit

(SMART) Plan Corridor #2 (East-West Corridor) near NW 7 Street to the north; and to other planned trails including The Underline/East Coast Greenway, South Dade Trail, Snapper Creek Trail, East/West Trail, and Merrick Trail.

#### PARKS, RECREATION AND OPEN SPACES

#### 2. BISCAYNE TRAIL

Miami-Dade Parks, Recreation and Open Spaces (MDPROS) is developing Segment D of the Biscayne Trail in two phases, which is part of the larger, 43-mile Biscayne-Everglades Greenway which is the only trail in the nation that connects two National Parks, Biscayne National Park to the east and Everglades National Park to the west. As a priority paved land trail from the Florida Greenways and Trails System (FGTS) Priority Network and Shared-Use Nonmotorized (SUN) Trail Network, the trail corridor will serve bicyclists, pedestrians, and users of other types of non-motorized vehicles. The purpose of the Biscayne Trail is to encourage the use of alternate modes of transportation and enhance overall connectivity and accessibility to schools, local and national parks, and transit hubs for more than 127,000 residents present within the census tracts of the proposed corridor.

The project limits for Segment D Phase 1 begin at SW 328th St. at Biscayne National Park and Miami-Dade County's

Howestead (Air Reserve Base)

Phase 2 ----

Homestead Bayfront Park, then head north along the L31-E Canal, then west along the south bank of the Mowry Canal to SW 117th Ave. Phase 2 of the Biscayne Trail picks up at SW 117th Ave., then continues west along the Mowry Canal, south along SW 127th Ave., west along SW 320th St., then north along SW 137th Ave. and ending at the Mowry Canal, where it will connect to the segment recently completed by the City of Homestead. Together, these segments will connect users between Downtown Homestead, and Biscayne National Park to the east, with connection to convenient transit access to the rest of Miami-Dade County.

The trail will generally consist of a 10 to 12-foot-wide, two-way, asphalt multi-use path within SFWMD right-of-way, and dedicated bikes when the trail utilizes road right-of-way. The trail will include high emphasis pavement markings at intersections, regulatory and wayfinding signage, bike racks, benches, and bike repair stations.

#### PARKS, RECREATION AND OPEN SPACES

This trail project supports the vision of the MDPROS Open Space Master Plan (OSMP), a primary element of which is to "provide an interconnected trail system which offers transportation alternatives and reduces traffic congestion." The OSMP provides a 50-year unifying vision for a livable and sustainable MDC, which involves the development of a seamless system of greenways, trails, and water trails. The Biscayne Trail will be a vital component of the Biscayne-Everglades Greenway within the overall OSMP network as it will link people to Homestead and Florida City, National Parks, and transit hubs, while offering a reliable transportation alternative. From a regional perspective, the trail will connect to the SMART Plan South Corridor in Downtown Homestead, as well as the South Dade Trail.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

### **AMENDMENTS**

#### **TPO RESOLUTION #29-2024**

RESOLUTION APPROVING AN AMENDMENT TO THE FISCAL YEAR 2025 TRANSPORTATION IMPROVEMENT PROGRAM (TIP) TO INCLUDE THE FLORIDA DEPARTMENT OF TRANSPORTATION DISTRICT SIX ROLL FORWARD PROJECTS THAT WERE ORIGINALLY SCHEDULED IN THE FISCAL YEAR 2024 TIP FOR AUTHORIZATION AND WERE NOT OBLIGATED BY JUNE 30, 2024

WHEREAS, the Interlocal Agreement creating and establishing the Metropolitan Planning Organization (MPO) for the Miami Urbanized Area requires that the Miami-Dade Transportation Planning Organization (TPO), in its role as the MPO, provides a structure to evaluate the adequacy of the transportation planning and programming process; and

WHEREAS, the Transportation Planning Council (TPC) has been established and charged with the responsibility and duty of fulfilling the aforementioned functions; and

WHEREAS, the TPC has reviewed the amendment to the Fiscal Year 2025 Transportation Improvement Program (TIP), made a part hereof, and finds it consistent with the goals and objectives of the Transportation Plan for the Miami Urbanized Area,

NOW, THEREFORE, BE IT RESOLVED BY THE GOVERNING BOARD OF THE TRANSPORTATION PLANNING ORGANIZATION IN ITS ROLE AS THE MPO FOR THE MIAMI URBANIZED AREA, that the attached amendment to the Fiscal Year 2025 Transportation Improvement Program (TIP) to include the Florida Department of Transportation District Six Roll Forward Projects that were originally scheduled in the Fiscal Year 2024 TIP for authorization and were not obligated by June 30, 2024, is hereby approved.

The adoption of the foregoing resolution was moved by Board Member Raquel A. Regalado. The motion was seconded by Board Member Alix Desulme, and upon being put to a vote, the vote was as follows:

Chairman Esteban Bovo, Jr. - Aye Vice Chairman Oliver G. Gilbert III - Aye

RON DESANTIS GOVERNOR 1000 NW 111 Avenue Miami, FL 33172

JARED W. PERDUE, P.E. SECRETARY

August 16, 2024

Aileen Bouclé AICP, Executive Director Miami-Dade Transportation Planning Organization 150 W Flagler Street Suite 1900 Miami, FL 33130

SUBJECT: Roll Forward Amendment to the Miami-Dade Transportation Planning Organization's (TPO) FY 2025 Transportation Improvement Program (TIP) to Add the FY 2024 Roll Forward Projects

Dear Ms. Bouclé:

The Florida Department of Transportation (FDOT) requests an amendment to the adopted Miami-Dade TPO Fiscal Year (FY) 2025 TIP to add projects shown in the Roll Forward list to the TIP. These projects were scheduled in the FY 2024 TIP but not all the funds were able to be committed by June 30, 2024.

The funds for these projects have rolled forward into the FY 2025 FDOT Work Program and are automatically included in the new FY 2025 State Transportation Improvement Program (STIP).

This action is needed to reconcile the FY 2025 TIP with the FY 2025 STIP. No other projects will be impacted by this amendment. If you have additional questions concerning this matter, please call me at (305) 470-5464.

Sincerely,

Docusigned by:

Pariel Iglesias
