FISCAL YEARS 2025-2029

# A FULL GUIDE TO THE TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

TIP • FISCAL YEARS 2024/ 2025 - 2028 / 2029

2025-2029 TIP

Transportation Planning Organization (TPO) for the Miami Urbanized Areas

This document was prepared by the Transportation Planning Organization for the Miami Urbanized Area in collaboration with the Florida Department of Transportation; Expressway Authority; Florida's Turnpike Enterprise; South Florida Regional Transportation Authority; Miami-Dade County Office of Strategic Business Management; Miami-Dade Department of Transportation and Public Works, Miami-Dade County Aviation Department; Miami-Dade Seaport Department; Miami-Dade League of Cities; Miami-Dade County Department of Regulatory and Economic Resources; and the Miami-Dade County Developmental Impact Committee.

The Miami-Dade TPO complies with the provisions of Title VI of the Civil Rights Act of 1964, which states: No person in the United States shall, on grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving federal financial assistance. It is also the policy of the Miami-Dade TPO to comply with all the requirements of the Americans with Disabilities Act. For materials in accessible format please call (305) 375-4507.

The preparation of this report has been financed in part from the U.S. Department of Transportation (USDOT) through the Federal Highway Administration (FHWA) and/or the Federal Transit Administration (FTA), the State Planning and Research Program (Section 505 of Title 23, U.S. Code) and Miami-Dade County, Florida. The contents of this report do not necessarily reflect the official views or policy of the U.S. Department of Transportation.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

## **EXECUTIVE SUMMARY**

### TIP • FISCAL YEARS 2024/2025 TO 2028/2029

## **EXECUTIVE SUMMARY**

The Transportation Improvement Program (TIP), a major federally required document of the Transportation Planning Organization (TPO) for the Miami Urbanized Area, specifies proposed transportation improvements to be implemented in Miami-Dade County over the coming five years. The primary emphasis of the TIP is on the first three years of the program. As required by federal regulations, projects receiving federal funds during the October 1, 2024 to September 30, 2029 time period are to be drawn from those listed in this document. In addition, projects not using federal funds, but which are part of the area's program of improvements, are shown in the TIP. Projects shown for FY 2026 and beyond, regardless of their funding source, are included as proposed. While it is anticipated that most of these projects will be implemented as programmed, they will be periodically evaluated by the TPO as the TIP is updated or amended as necessary. The projects in the TIP are also shown for a five-year time period. While the emphasis is on the first three years, presenting a five-year span allows for a more systematic forecast of funding needs during a five-year planning cycle and provides a more comprehensive view of the program for public information purposes. Included in the TIP are Intermodal, Highway, Transit, Aviation, Seaport and Non-Motorized improvements costing \$12.563 million.

Included are the following categories:

#### Funding Summary - Fiscal Years 2025 - 2029: (\$s in millions rounded)

| Highways - State Roads: | LULJ LU     | <u> </u> |         | iioiis rounc  | <u>icu</u> |       |              |           |
|-------------------------|-------------|----------|---------|---------------|------------|-------|--------------|-----------|
| Primary (FDOT)          | ¢           | 5,054    |         | 40.2%         |            |       |              |           |
| Turnpike                |             | 471      |         | 3.7%          |            |       |              |           |
| GMX                     |             | 313      |         | 2.5%          |            |       |              |           |
| GIVIA                   | э<br>\$     | 5,837    |         | 46.5%         |            |       |              |           |

The South Florida Regional Transportation Authority (SFRTA) 5-year funding for rail projects is allocated through FDOT District 4 (rail projects which are geographically located in Miami-Dade County are also included in this funding allocation).

The Secondary, Mobility Impact Fee, and the People's Transportation Plan (PTP) Programs contain a number of key projects in the County Highway / Transit System costing \$649 million. Aviation improvements involve Miami International, Opa-Locka and Tamiami airports. Transit improvements involve a broad range of public transportation services and facilities. Seaport improvements consist of numerous new port facilities and major renovations and improvements to existing facilities. Funding for the implementation of several intermodal projects is also shown, as well as projects in the "non-motorized" category which includes improvements associated with pedestrian and bicycle facilities.

On June 27, 2024, the TPO Governing Board approved the Fiscal Years 2025-2029 TIP by Resolution #23-2024. The TPO concurrently produced the annual List of Priority Projects (LOPP) for TPO Governing Board approval in June 2024. The LOPP is compiled and submitted to FDOT early in order to maximize review and approval of funding in the tentative Work Program and inclusion in the future years' TIP. The TPO, will continue to assess critical transportation needs and prioritize essential projects for the mobility of people and goods in Miami-Dade County. Projects included in the 2025-2029 Transportation Improvement Program are selected in a cooperative manner with transportation partners as per requirements of C.F.R. 450.332(b).

On December 4, 2015, President Obama signed into law the Fixing America's Surface Transportation Act, or "FAST Act". Overall, the FAST Act largely maintains MAP-21 program structures and funding shares between highways and transit. The FAST Act builds upon the performance requirements enacted under MAP-21 by establishing timelines for State Departments of Transportation (DOTs) and MPOs to comply with the performance requirements. In compliance, the Miami-Dade TPO developed the Performance Management Report (Pages: PM-1 – PM-88), as a stand-alone document. This report is also summarized in this FY 2025-2029 TIP Executive Summary (Pages E-4 – E-8).

The projects and priorities in this TIP are consistent with those in the adopted 2045 Transportation Plan. Because the 2045 Plan was found to conform to federal regulations and the Florida State Transportation Improvement Plan (STIP), the TPO has found this TIP to also conform to all relevant laws, regulations and plans. Selected projects are from the prioritized projects found in the 2045 Miami-Dade Long Range Transportation (LRTP). The LRTP recommends phasing for surface transportation improvements classified into four categories:

**Priority Period I** - - Priority improvements to be constructed and opened to traffic by the year 2025. Funds for most of these improvements are already programmed in this Transportation Improvement Program.

Priority Period II - - Improvements where project development and funding efforts would take place between 2026 and 2030.

**Priority Period III** - -Improvements to be made between the year 2031 and 2035. In many cases, project development activities would need to commence in the 2026 and 2030 period, due to the amount of lead-time required to plan and implement a project.

Priority Period IV - -Improvements to be made in the latter part of the 25-year plan period (2036 to 2045). Includes projects responding to long-range mobility needs and roadway improvements constructed through the county and the Sub-division process, which may be earlier than the 25-year period of the 2045 LRTP Plan.

Note: All \$ values represented in this document are in Year of Expenditure (YOE) dollars, as required by 23 CFR 450.324(h). "Project costs reported in the TIP are in Year of Expenditure (YOE) dollars, which takes into account the inflation rate over the five years covered by the TIP."

#### **PUBLIC INVOLVEMENT**

Public involvement for the development of the TIP is received through regularly scheduled meetings of the TPO Governing Board and its advisory committees. A typical TIP Development cycle, in Miami-Dade County, follows the following timeline:

- The TIP process begins at the start of each federal fiscal year on October 1st. FDOT District 6 and Florida's Turnpike Enterprise presents to advisory committees a very Tentative Five-Year Work Program document.
- During the month of November, the Citizen's Transportation Advisory Committee (CTAC) and the TIP Development Committee endorse the Tentative Five Year Work Program. November public hearings are also scheduled for review and input to the FDOT District 6 Tentative Work Program in Miami-Dade and Monroe Counties.
- In December, the Transportation Planning Council (TPC) and the TPO Governing Board endorse the Tentative Five-Year Work Program.
- By mid- December, the Interactive TIP web tool opens to county transportation stakeholder agencies.
- During the months of January through March of each year, the TIP Development Committee meets weekly to advance, review and approve a Draft TIP. These meetings are open to the public.
- By Mid-March to early April of each year, a printed Draft TIP Program document is available for Public review and input at the TPO Office. The Draft TIP is posted prominently on the TPO website at: <a href="http://www.interactip.com/">http://www.interactip.com/</a> under TIP 2024 Documentation.
- By the end of April, a Citizen's TIP document is sent to CTAC and the TPC and a Draft TIP is posted to the TPO website for review and comment by the public. The Citizens' TIP is a citizen user-friendly color booklet that condenses the big picture projects of that year's TIP, provide pictures, renderings and maps and educates user as to what is the TIP and what projects are underway and which ones have been completed from the previous year's TIP. The current 2024 Citizen's TIP is prominently posted on the TPO website at: 2024 TIP Citizen's Version.
- Parallel to these efforts, the TPO has regularly scheduled meetings with the community where the Draft TIP is distributed. Favorable verbal comments have been received and citizens have expressed their excitement in having a Citizens' Version of the program.
- The Draft TIP is typically included as an information item on or around the May meeting agendas of the CTAC. This meeting is open to public for comments and input.
- CTAC initial review of the Draft FY 2025-2029 TIP took place this year at their April 3, 2024 meeting. TPC initially reviewed at their April 8, 2024 Meeting.
- The TIP is advertised for public hearing.
- The Final Draft TIP is presented for approval on the May agendas of the CTAC and TPC committees, respectively. These meetings are open to the public.
- TPC approved the FY 2025-2029 TIP at their June 17, 2024 meeting
- CTAC approved the FY 2025-2029 TIP at their June 20, 2024 meeting

- The TIP is regularly approved by the TPO Governing Board at either their May or June meeting. In Miami-Dade County, the TPO Governing Board approves the Program Priorities concurrently with the TIP. This early approval allows FDOT for an early review of TPO Program Priorities in the development of their Tentative Work Program cycle.
- TPO Governing Board approved the FY 2025-2029 TIP at their June 27, 2024 meeting.
- The Miami-Dade TIP was sent in June to funding agencies for their review and input.

#### PERFORMANCE MANAGEMENT

Performance management is a strategic approach to connect investment and policy decisions to help achieve performance goals. Performance measures are quantitative criteria used to evaluate progress. Performance measure targets are the benchmarks against which collected data is gauged. The Moving Ahead for Progress in the 21st Century Act (MAP-21) requires State DOTs and MPOs to conduct performance-based planning by choosing critical performance measures, setting quantitative targets, and programming projects to help achieve those targets. Performance-based planning ensures the most efficient investment of federal transportation funds by increasing accountability, transparency, and providing for better investment decisions that focus on seven areas: Safety, Pavement Condition, Bridge Condition, Highway Performance, Freight Movement, Traffic Congestion, and On-road Mobile Sources. The Traffic Congestion and On-road Mobile Sources measures do not apply to Florida. The Fixing America's Surface Transportation (FAST) Act supplemented the MAP-21 legislation by establishing timelines for State DOTs and MPOs to comply with the requirements of MAP-21. State DOTs establish statewide targets and MPOs have the option to support the statewide targets or adopt their own.

#### SAFETY PERFORMANCE MEASURES

The Highway Safety Improvement Program and Safety Performance Management Measures Rule (Safety PM Rule) was published in the Federal Register on March 15, 2016.

The rule requires that states establish targets for the following performance measures:

- Number of Fatalities;
- Number of Serious Injuries;
- Number of Nonmotorized Fatalities and Serious Injuries;
- Rate of Fatalities per 100M Vehicle Miles Traveled (VMT); and
- Rate of Serious Injuries per 100M VMT.

FDOT has adopted the "Vision Zero" target of zero for all the safety performance measures. The TPO approved Resolution #08-19 establishing the FDOT "Vision Zero" targets for calendar year 2020 on January 30, 2020.

The 2024 TIP has been developed to help move towards the safety target in the following ways:

- **1.** The 2024 TIP is a subset of the 2045 Long Range Transportation Plan and is guided by the LRTP goals and objectives. LRTP Goal #2 is to "Increase the Safety of the Transportation System for All Users" and is supported by the following objectives:
  - Improve the safety of the transportation system,
  - · Promote projects in high crash locations, and
  - Improve safety of the transportation system of the elderly and disabled, and
  - Provide educational opportunities to older adults to learn about TNCs.
- 2. The TPO's 2024 TIP Development Committee included representatives from the major transportation agencies and coordinated the preparation of the document. During the development cycle presentations were made to educate the committee members about performance management, the new federal requirements and the TPO's approach to incorporating performance management into the transportation planning process. The transportation agencies were asked to highlight the safety efforts that are included in their 2024-2028 programs.

In total, the 2024 TIP includes \$95M programmed within FY 2024-2028 on 82 projects that improve safety and to support the achievement of the established safety targets. A list of the projects is included in the TPO's "Transportation Performance Management System Performance Report."

#### PAVEMENT CONDITION AND BRIDGE CONDITION

The final rule for the pavement condition and bridge condition performance measures was published on January 18, 2017. By Resolution #44-18 (approved Oct. 25, 2018) the TPO took action to support FDOT's pavement and bridge condition performance measure targets:

| PAVEMENT CONDITION PERFORMANCE MEASURES          | TARGET |        |
|--|--------|--------|
|  | 2 YEAR | 4 YEAR |
| Percent of Interstate Pavement in Good Condition | n/a    | ≥ 60%  |
| Percent of Interstate Pavement in Poor Condition | n/a    | ≤ 5%   |
| % Non-Interstate NHS Pavement in Good Condition  | ≥ 40%  | ≥ 40%  |
| % Non-Interstate NHS Pavement in Poor Condition  | ≤ 5%   | ≤ 5%   |

| BRIDGE CONDITION PERFORMANCE MEASURES  | TARGET |        |
|--|--------|--------|
|  | 2 YEAR | 4 YEAR |
| Percent in Good Condition by Deck Area | ≥ 50%  | ≥ 50%  |
| Percent in Poor Condition by Deck Area | ≤ 10%  | ≤ 10%  |

The 2024 TIP includes \$375M programmed within FY 2024-2028 on 31 bridge improvement projects and \$286M on 116 pavement improvement projects to support the achievement of the established targets. A list of the projects is included in the TPO's "Transportation Performance Management System Performance Report."

#### SYSTEM PERFORMANCE AND FREIGHT MOVEMENT PERFORMANCE MEASURES

The final rule for the National Highway System and Freight Movement performance measures was published on January 18, 2017. By Resolution #44-18 (approved Oct. 25, 2018) the TPO established these FDOT system performance and freight mobility performance measure targets:

| NHS AND FREIGHT MOBILITY PERFORMANCE MANAGEMENT MEASURES               | TARGET |        |
|--|--------|--------|
|  | 2 YEAR | 4 YEAR |
| Percent of person-miles traveled on the Interstate that are reliable   | ≥ 75%  | ≥ 70%  |
| % of person-miles traveled on the non-Interstate NHS that are reliable | n/a    | ≥ 50%  |
| Truck travel time reliability ratio (TTR) on the Interstate            | ≤ 1.75 | ≤ 2.00 |

The 2024 TIP includes \$1.9B programmed within FY 2024-2028 on 128 projects that will improve mobility on the system to support the achievement of the established targets for mobility improvement performance. Included in the list of NHS performance projects is \$193M programmed within FY 2024-2028 for 27 projects to improve mobility on the Interstate System.

The TPO's "Transportation Performance Management System Performance Report" includes the list of all projects.

#### COORDINATION WITH STATE AND FEDERAL DOCUMENTS

As part of the continuing coordination process to implement the new performance management requirements, the following documents are referenced in the development of the 2023 TIP:

#### NATIONAL PARK SERVICE FUNDING FOR EVERGLADES NATIONAL PARK IMPROVEMENTS

The following information is hereby included in this Fiscal Year 2024-2028 Transportation Improvement Program, in accordance with 23 CFR 450.324(e).

These projects are located in federally owned lands in the Eastern United States and are funded with federal funds, outside of the Federal Highway Trust Fund, and the funding will not pass through the Florida Department of Transportation. There is no fiscal impact to the 2023-2027 TIP. These projects are included here for informational purposes. These projects are funded outside of the Federal Highway Trust Fund and the funding will not pass through the Florida Department of Transportation.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

## **RESOLUTION APPROVING FINAL TIP**

#### TPO RESOLUTION #23-2024

#### **RESOLUTION APPROVING THE FINAL DRAFT FISCAL YEARS 2025-2029** TRANSPORTATION IMPROVEMENT PROGRAM

WHEREAS, the Interlocal Agreement creating and establishing the Metropolitan Planning Organization (MPO) for the Miami Urbanized Area requires that the Miami-Dade Transportation Planning Organization (TPO), in its role as the MPO, provides a structure to evaluate the adequacy of the transportation planning and programming process; and

WHEREAS, the Transportation Planning Council (TPC) has been established as the technical advisory council to the TPO Governing Board; and

WHEREAS, the Transportation Improvement Program is a federally required document which is to be updated annually and amended, as needed; and

WHEREAS, the TPC has reviewed the Final Draft Fiscal Years 2025-2029 Transportation Improvement Program (TIP), made a part hereof, and finds it consistent with the goals and objectives of the Transportation Plan for the Miami Urbanized Area,

NOW, THEREFORE, BE IT RESOLVED BY THE GOVERNING BOARD OF THE TRANSPORTATION PLANNING ORGANIZATION IN ITS ROLE AS THE MPO FOR THE MIAMI URBANIZED AREA, that the attached Final Draft Fiscal Years 2025-2029 Transportation Improvement Program, is hereby approved.

The adoption of the foregoing resolution was moved by Board Member Kevin Marino Cabrera. The motion was seconded by Board Member Alix Desulme, and upon being put to a vote, the vote was as follows:

> **Chairman** Esteban Bovo, Jr. Vice Chairman Oliver G. Gilbert III - Aye

| Board Member Roberto J. Alonso      | - Absent | Board Member Keon Hardemon      | - Aye    |
|-------------------------------------|----------|---------------------------------|----------|
| Board Member Marleine Bastien       | - Absent | Board Member Rodney Harris      | - Absent |
| Board Member Juan Carlos Bermudez   | - Absent | Board Member Eileen Higgins     | - Absent |
| Board Member Kevin Marino Cabrera   | - Aye    | Board Member Steven D. Losner   | - Aye    |
| Board Member Danielle Cohen Higgins | - Absent | Board Member Kionne L. McGhee   | - Absent |
| Board Member Alix Desulme           | - Aye    | Board Member Raquel A. Regalado | - Aye    |
| Board Member Eric Diaz-Padron       | - Aye    | Board Member Anthony Rodriguez  | - Absent |
| Board Member Christi Fraga          | - Aye    | Board Member Micky Steinberg    | - Aye    |
| Board Member René Garcia            | - Absent | Board Member David Suarez       | - Aye    |
| Board Member Roberto Gonzalez       | - Absent | Board Member Francis Suarez     | - Aye    |

The Chairperson thereupon declared the resolution duly passed and approved this 27<sup>th</sup> day of June 2024.

TRANSPORTATION PLANNING ORGANIZATION

The Final Draft TIP document can be accessed at the following link: <a href="https://www.interactip.com/wp-content/uploads/2024/03/TIP">https://www.interactip.com/wp-content/uploads/2024/03/TIP</a> 2025-29 Draft.pdf#view=Fit%20to%20width

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

## **INTRODUCTION**

## TIP • FISCAL YEARS 2024/2025 TO 2028/2029 INTRODUCTION

#### **PURPOSE**

This document is prepared every year to fulfill Federal statutory requirements which provide that, as a condition to receive Federal funding, each urbanized area will have a continuing planning process that results in plans and programs consistent with the comprehensive development plan of the urbanized area. The purpose of this document is to provide a prioritization of projects covering a five-year period that is consistent with the LRTP, contains all transportation projects MPA funded with FHWA and FTA funds and regionally significant projects regardless of funding source. The priorities established by this document express the policy decision of the Transportation Planning Organization (TPO) as to the order in which transportation improvements will be advanced during the program period. This document also fulfills Federal requirements in that the included projects are derived from the area's 2045 Long-Range Transportation Plan (LRTP) for inclusion in the program and addresses program requirements relating to the federal transportation law passed in July, 2012 titled "Moving Ahead for Progress in the 21st Century Act (MAP-21)". On December 4, 2015, President Obama signed into law the Fixing America's Surface Transportation Act, or "FAST Act". Overall, the FAST Act largely maintained MAP-21 program structures and funding shares between highways and transit. It is a down-payment for building a 21st century transportation system. On November 15, 2021 President Biden signed the Infrastructure Investment and Jobs Act (IIJA) into law, creating a historic transportation investment that will be implemented during this 5-year TIP window. Access to a majority of the legacy infrastructure funding in place was authorized via Continuing Resolution for 2022.

The joint annual FDOT/TPO certification was completed in April 2023. The TIP and TIP process are also reviewed during the FHWA/FTA TPO quadrennial certification. The Miami-Dade TPO's quadrennial certification took place in April 2023. The next quadrennial certification is anticipated to take place in 2027. In addition to this TIP document, the TPO produces the TIP Citizens' Version, a user-friendly summary of projects in the TIP. The Citizens' Guide is available at: DRAFT Citizen's 2024 TIP. Transportation Performance Management is fully integrated into the TPO planning process. As the Performance Management process advances, the effectiveness of progress towards achieving the targets will be evaluated. The 2023 federal obligations for FDOT District Six projects are found listed in FDOT's Office of Work Program Annual Obligations Report at: FDOT - OFFICE OF WORK PROGRAM - ANNUAL OBLIGATIONS REPORT

#### **INTRODUCTION**

#### TRANSPORTATION PLAN

The Transportation Planning Organization Board adopted under TPO Resolution #48-19, on September 26, 2019, the 2045 Miami-Dade LRTP. Projects from the area's adopted TPO 2045 LRTP have been included for advancement during this program period. The next major update of the LRTP to the year 2050 is underway and scheduled for adoption by September 2024. Major activities included are: support facilities for Metrorail, express bus service, interstate highway projects, congestion management and non-motorized projects; express transit on managed lanes; arterial street improvements, aviation and seaport facilities, and additional bus transit and paratransit improvements, the construction of major intermodal facilities and the deployment of Intelligent Transportation System applications. The recommended improvement priorities of the adopted Long Range Transportation Plan provide the basis for preparing this document. The Plan presents the logical and systematically phased development of the area's transportation network and services to the year 2045. Transportation System Management (TSM) projects are proposed to be continued or expanded during Fiscal Years 2024/2025 through 2028/2029. The Miami-Dade Secondary Road Program and Road Impact Fee Program contain projects that are supportive of the areawide TSM effort. These included traffic flow improvements, provisions for preferential treatments of high occupancy vehicles where appropriate, improvements to intersection geometrics, lighting safety projects, and other related projects which provide for greater safety and better management of traffic flow and are supportive of on-going transportation demand management activities. TSM projects are consistently included in the preparation of project-adopted proposals in keeping with the TPO's commitment to fully develop TSM as a policy and investment strategy to continually enhance the mobility of the urban population. The Year 2045 Transportation Plan stresses the achievement of long-standing and fundamental planning objectives. In addition to land-use considerations, the Plan addresses related issues involving the quality of the environment and the conservation of limited natural resources. These concerns are particularly important as revisions to the Adopted Components of the Comprehensive Development Master Plan (CDMP) for Miami-Dade County are periodically considered. An extensive public participation process is conducted during all major stages of Plan preparation and adoption and during periods when Plan revisions are formally considered.

Citizens review activities are coordinated by the Citizens Transportation Advisory Committee (CTAC), a body appointed by the TPO Board to provide formal input in all pertinent transportation issues.

#### **COMPREHENSIVE DEVELOPMENT MASTER PLAN**

The Transportation Improvement Program (TIP), as set forth in this document, is generally consistent with the Adopted Components of the Comprehensive Development Master Plan (CDMP) for Miami-Dade County, Florida, as amended through November 16, 2023. The CDMP contains twelve Plan elements. The Transportation Element specifically provides for an integrated multimodal transportation system for the circulation of motorized and non-motorized traffic in Miami-Dade County. The goal of the Transportation Element is to develop and maintain an integrated multimodal transportation system to move people of all ages and abilities and goods in a manner consistent with overall Countywide land use and environmental protection goals, and integration of climate change considerations in the fiscal decision-making process, objectives and policies, and to provide a comprehensive approach to the transportation system needs of the County by addressing all modes of transportation — pedestrian and

#### **INTRODUCTION**

bicycles facilities, traffic circulation, mass transit, aviation and ports. The Transportation Element is divided into five subelements: Traffic Circulation, Mass Transit, Aviation, Port of Miami River, and PortMiami Sub elements. The Traffic Circulation Subelement addresses the needs of automobile traffic, bicyclists and pedestrians; the Mass Transit Subelement addresses the need to promote and expand the public mass transit system and to increase its role as a major component in the County's overall transportation system; the Aviation Subelement addresses the need for the expansion, development and redevelopment of the County's aviation facilities; and the Port of Miami River and PortMiami Subelements promote maritime business and traditional maritime related shoreline uses along the Miami River and PortMiami and their expansion needs. A key feature of the Traffic Circulation and Mass Transit Subelements is the establishment of level-of-service standards to ensure that adequate capacity will be available in all modes to service new development and redevelopment in Miami-Dade County. The ability to maintain the level-of-service standards has become a primary determinant for addressing relative priority among the various transportation improvement needs.

The County is striving to provide roadway, transit, sidewalks, and bicycle lane improvements along congested corridors in order to develop a multimodal transportation network designed to include bus turnout bays, bus shelters, managed lanes, pedestrian and bicycles facilities, and mass transit services.

One of the most significant and far reaching provisions of Florida's "Community Planning Act (2011)" is the requirement that all local comprehensive plans contain a Capital Improvement Element (CIE). The intent of this requirement is to make the comprehensive plan fiscally feasible and to provide a schedule of capital improvements which includes any publicly funded federal, state, or local government projects, and may also include privately funded projects for which the local government has no fiscal responsibility. Projects which are necessary to ensure that any adopted level-of-service standards are achieved and maintained (sec. 163.3180(1)(b), F.S.) for the 5-year period must be identified as either funded or unfunded and given a level of priority for funding (sec. 163.3177(3)(a), F.S.). For this reason, the highway capacity-type of improvements on the County highway system, and the transit, aviation and seaport projects, which are programmed in the TIP, are also included in the County's CDMP Capital Improvements Element's (CIE) 6-year capital improvements schedule. Additionally, CDMP Policy TE-1H requires transportation plans to take into consideration climate change adaptation and mitigation strategies through project review, design, and funding for all transportation projects.

Every seven years, the Comprehensive Development Master Plan (CDMP) is reviewed and updated as required per Chapter 163 of the Florida Statutes, a process known as an Evaluation and Appraisal Report (EAR). The EAR includes an evaluation of the progress the County has made in implementing the goals, objectives, policies, maps and text of the CDMP and also recommends changes. The Department of Regulatory and Economic Resources (RER), Planning Division completed the EAR process in 2018 after an extensive public participation plan involving social media, advertising, a survey, and over six workshops held in June 2017. RER received over 420 public comments and over 1,100 survey responses. Information about the EAR process, presentations made, and public comments received, are posted on the Department's website at: <a href="https://www.miamidade.gov/planning/ear-2018.asp">https://www.miamidade.gov/planning/ear-2018.asp</a>. Based on the EAR review recommendations, multiple CDMP amendments have already been processed and adopted in the CDMP.

#### **PUBLIC INVOLVEMENT/PUBLIC HEARING**

Reasonable opportunity for public comment was provided in accordance with the requirements of 450.316(b)(1) and, in maintenance TMAs, an opportunity for at least one formal public meeting during the TIP development process. This public meeting may be combined with the public meeting required under 450.322 (c). The TIP process begins at the start of each fiscal year. Correspondence is sent to all municipalities, involved agencies and private parties informing them that the process is to begin, providing them with the tentative scheduling and soliciting their input. The Citizens Transportation Advisory Committee (CTAC) provides a forum for citizens to evaluate the recommendations developed through the TPO's transportation planning and programming process. One of the main responsibilities of the CTAC is to ensure that proposed transportation projects are responsive to the community's perceived needs and goals. The TPO provides adequate public notices for public hearings so as to allow community citizens the opportunity to approve documents such as the TIP. The proposed TIP is published and made readily available for review and comment. Similarly, the approved TIP is published and made readily available for information purposes. The functional responsibilities of participating agencies are needed to insure the continuing development and operation of urban transportation system facilities. The 45-day public review period began on March 18, 2024, and concluded on May 2, 2024. All comments received during this period were collected, archived, and included in the final adoption agenda materials for the TPO Governing Board's review prior to approval.

#### **PROGRAM FUNDING**

The TIP categorizes all transportation improvements and identifies priorities, which establish multi-year fiscal programming. The biennial elements represent the list of projects, which are proposed for implementation during the first program phase and are viewed as the "Capital Improvements" budget for transportation facilities. This TIP document identifies all sources of funding which are known or are anticipated to be available during the program period. Program costs are consistent with current estimates of available revenue. Priorities in the program are identified by relative staging of projects for implementation during a particular year, consistent with funding availability and production constraints. Most Highway funding comes from gasoline taxes, motor vehicle fees, and other automobile-related "user fees". Major sources of existing and potential highway funding sources include: Federal Gas Tax, State Motor Fuel Tax, Local Option Gas Tax, Voter Gas Tax, Motor Vehicle Fees, Impact Fees and Tolls. Transit funding is derived from a host of Federal, State and local programs, including the ½ cent sales tax increase approved by voters in November 2002. For rail and bus projects, funding is mostly sought through Federal and State grants. Transit operating costs are supported largely through local revenue sources.

#### **SUMMARY OF TIP PROJECTS**

The projects in the FY 2025-2029 TIP have been grouped into major categories, with order of priority established within each category insofar as possible or applicable. The groupings are established primarily by virtue of funding source and implementing responsibility. The thrust of Miami-Dade County's effort to enhance the mobility of the urban population, achieve a balanced transportation system, to meet resiliency goals, to improve air quality, as well as to preserve or enhance the physical and social environment of the community, is evident when it is noted that around 19.5% of the

#### **INTRODUCTION**

FY 2025-2029 program budget is devoted to public transit projects. It should be noted that Primary, Interstate and Turnpike categories combined constitute about 50% of the approximate \$11.65B in the FY 2025-2029 program budget.

#### **PLAN PERIODS**

The 2045 Miami-Dade Transportation Plan - Long Range Element, recommended phasing for highway capacity improvements is classified into four Plan Periods:

#### Plan Period I

Priority improvements to be constructed and opened to traffic by the year 2025. Includes those projects needed to respond to existing traffic problems. Funds for most of these improvements are already programmed in this Transportation Improvement Program.

#### Plan Period II

Improvements where project development and funding efforts would take place between 2026 and 2030.

#### **Plan Period III**

Improvements to be made between the year 2031 and 2035. In many cases, project development activities would need to commence in the 2031 and 2025 period, due to the amount of lead-time required to plan and implement a project.

#### **Plan Period IV**

Improvements to be made in the latter part of the 25-year plan period (2036 to 2045). Includes projects responding to long-range mobility needs and roadway improvements constructed through the county and the Sub-division process, which may be earlier than the 25-year period of the 2045 LRTP Plan.

Because of the uncertainties of funding availability and the time required to develop a detailed project, the specific time periods and dates indicated in the above priority listing should be considered only as guidelines for project implementation.

The LRTP Update to the Year 2045 was approved by TPO Governing Board at its September 26, 2019, meeting.

#### **AMENDMENTS**

The TIP may be amended at any time during the program year through the same procedures required for developing and adopting this original program. The amendment(s) may be for the purpose of deleting projects, adding projects, revising the funding of a project, or modifying the scope or

#### **INTRODUCTION**

limits of a project. Detailed information of the amendment process is available from the Citizen's TIP, on pages 17 and 18 of the TPO Prospectus prospectus-for-transportation-improvements-2022.pdf (miamidadetpo.org) or from the TPO upon request.

#### WHAT IS A TIP AMENDMENT

An amendment is a revision to a TIP or STIP that involves a major change to a project in a TIP or STIP, including addition or deletion of a project, a major change in project cost, project phase initiation dates, or a major change in design concept or design scope (i.e., changing project termini or the number of through traffic lanes). [23 C.F.R. 450.104] An amendment requires public review and comment, demonstration of financial constraint, or a conformity determination, if applicable. Additionally, amendments to the TIP are available for public review at least fourteen (14) days prior to the scheduled public hearing. This information is also available to the public in the TPO Prospectus for Transportation Improvements at: prospectus-for-transportation-improvements-2022.pdf (miamidadetpo.org)

#### WHAT IS A TIP ADMINISTRATIVE MODIFICATION

An administrative modification is a minor revision to a TIP or STIP that includes minor changes to project/project phase costs, minor changes to funding sources of previously included projects, and minor changes to project/project phase initiation dates. An administrative modification does not require public review and comment, re-demonstration of fiscal constraint, or a conformity determination, if applicable. [23 C.F.R. 450.104]

#### ADMINISTRATIVE TIP AMENDMENT BETWEEN THE START OF THE STATE AND FEDERAL FISCAL YEARS

An administrative TIP Amendment is an amendment that does not have to go to the full TPO Board for approval. FHWA and FTA will allow an administrative TIP Amendment during the three-month gap between the start of the new State fiscal year and the end of the old Federal fiscal year (July 1 to September 30) for new projects that were added during the Tentative Work Program development cycle.

In these instances, the TIP must be amended to include the project, but FHWA and FTA have agreed to allow the TPO Executive Director to process an Administrative TIP Amendment for these types of projects rather than having to go before the full Board. FHWA and FTA will allow this only under the following conditions:

- The amendment takes place between July 1 and September 30;
- The project must appear in the amendment exactly as it appears in the newly adopted TIP; and
- The TPO Executive Director has been authorized by the Board to approve administrative TIP Amendments.

## **BICYCLE ACCOMMODATIONS LEGEND**

# TIP • FISCAL YEARS 2024/2025 TO 2028/2029 BICYCLE ACCOMMODATIONS LEGEND

| CODE                                   | NAME  |
|--|---|
| Bike Lane                              | A bike lane is a portion of a roadway that is designated by signs and markings for preferential use by bicyclists.  |
| Paved Shoulder                         | A paved shoulder is a portion of a roadway that has been delineated by edge line striping and may include bicycle lane pavement markings or signing.  |
| Wide Curb Lane                         | A wide curb lane is a through lane that provides a minimum of 14 feet in width which allows most motor vehicles to pass cyclists safely within the travel lane.   |
| Other Shared Use Path/<br>Paved Trails | A paved path that is physically separated from the road and is designed to accommodate two-way bicycle and pedestrian traffic. Sidewalks do not meet the width and operational criteria for multi-use paths.                  |
| Sharrow                                | An optional pavement marking used to indicate a shared environment for bicycles and motor vehicles. Sharrows are used where it is not practical to provide a bicycle facility. Note that a sharrow is not a bicycle facility. |

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

# TRANSPORTATION PERFORMANCE MANAGEMENT SYSTEM PERFORMANCE REPORT

# TIP • FISCAL YEARS 2023/2024 TO 2027/2028 TRANSPORTATION PERFORMANCE MANAGEMENT SYSTEM PERFORMANCE REPORT

This report documents the Miami-Dade TPO efforts to address federal and state requirements for Highway and Transit Performance Measurement and Concurrence with FAST Act.

## INTRODUCTION

The Miami-Dade Transportation Planning Organization (TPO), formerly called the Metropolitan Planning Organization for the Miami Urbanized Area, guides the transportation planning process in Miami-Dade County. The TPO was created on March 2, 1977 as required under Section 163.01, Florida Statutes, and is established by an Interlocal Agreement between Miami-Dade County and the Florida Department of Transportation (FDOT).

A major role of the TPO is to ensure conformance with federal regulations requiring that highways, mass transit, and other transportation facilities and services are properly developed and deployed in relation to the overall plan of urban development and to approve plans for regional and state transportation network accessibility. In addition, federal guidelines require that the use of Federal Aid for transportation projects be consistent with TPO adopted plans and programs. Federal, state and local transportation planning funds are utilized on an ongoing basis to ensure the effectiveness of the TPO planning process.

The TPO's Long Range Transportation Plan (LRTP) is the plan for implementing transportation system improvements within Miami-Dade County.

The LRTP is focused on providing safe mobility options, and is guided by a comprehensive vision to:

"Provide mobility options for Miami-Dade County residents and visitors and promote economic competitiveness by investing in the County's transportation infrastructure while protecting the environment and maximizing the efficiency of the existing transportation system."

#### WHAT IS PERFORMANCE MANAGEMENT?

Transportation Performance Management is a strategic approach that uses system information to make investment and policy decisions to achieve performance goals at the national, state, and local levels. In short, Transportation Performance Management:

- Is systematically applied on an ongoing basis;
- Provides key information to help decision makers understand the consequences of investment decisions across transportation assets or modes;
- Improves communication between decision makers, stakeholders, and the traveling public; and
- Ensures measures and targets are developed in a cooperative fashion and are based on objective data.

# WHY IS PERFORMANCE MANAGEMENT REQUIRED?

The "Moving Ahead for Progress in the 21st Century" Act (MAP-21), signed into law on July 6, 2012 (Pub. L. No. 112-141) established requirements for States and MPOs to conduct performance-based planning by tracking performance measures and setting data-driven targets to measure performance. Performance-based planning ensures the most efficient investment of transportation funds by increasing accountability, transparency, and providing for better investment decisions that focus on key outcomes related to the seven Federal Highway Program performance goals (National Goals) established under MAP-21:

- Safety To achieve a significant reduction in traffic fatalities and serious injuries on all public roads;
- Infrastructure Condition To maintain the highway infrastructure asset system in a state of good repair;
- Congestion Reduction To achieve a significant reduction in congestion on the National Highway System;
- System Reliability To improve the efficiency of the surface transportation system;
- **Freight Movement and Economic Vitality** To improve the national freight network, strengthen the ability of rural communities to access national and international trade markets, and support regional economic development;
- Environmental Sustainability To enhance the performance of the transportation system while protecting and enhancing the natural environment; and
- Reduced Project Delivery Delays To reduce project costs, promote jobs and the economy, and expedite the movement of people and goods by accelerating project completion through eliminating delays in the project development and delivery process, including reducing regulatory burdens and improving agencies' work practices.
- [23 USC 150(b)]

Performance Management has been integrated into the transportation planning framework of the Federal Planning Factors, MAP-21 National Goals, and Federal Planning Emphasis Areas (see Figure 1: Federal and State Planning Requirements and Expectations). The "Fixing America's Surface

Transportation" Act (FAST Act), signed December 4, 2015 (Pub. L. No. 114-94) builds upon the performance requirements enacted under MAP-21 by establishing timelines for State Departments of Transportation (DOTs) and MPOs to comply with the performance requirements.

# WHAT ARE THE NATIONAL PERFORMANCE MANAGEMENT MEASURES?

Performance measures are indicators of progress toward attaining a goal, objective, or target (a desired level of future performance). A series of Federal rulemakings have been issued by FHWA and FTA to establish National Performance Management Measures to address the performance requirements established in MAP-21 and the FAST Act. The National Performance Management Measures are:

- · Highway Safety Improvement Program,
- Assessing Pavement Condition for the National Highway Performance Program and Bridge Condition for the National Highway Performance Program, and
- Assessing Performance of the National Highway System, Freight Movement on the Interstate System, and Congestion Mitigation and Air Quality Improvement Program.

For each category above, there are specific National Performance Management Measures that will be used to assess progress. Progress will be judged by how States and MPOs perform based on self-imposed targets, relative to baseline conditions. Performance measure targets are the benchmarks against which collected data is gauged. State DOTs will establish targets for the state, while MPOs will adopt targets that are appropriate for their urbanized areas. MPOs may adopt the state's targets or establish their own.

# **HOW ARE PERFORMANCE MEASURES USED?**

Because Florida's transportation system improvement needs exceed available funding, resources are invested in the most strategic, effective and efficient ways possible. Performance measures provide useful "feedback" and are integrated into FDOT's business practices on three levels:

#### AT THE STRATEGIC LEVEL

Performance measures help to establish and inform goals, objectives, and strategies as well as to monitor FDOT Mission attainment. Performance measures also communicate progress toward achieving goals in transportation plans and programs such as the Florida Transportation Plan, the Strategic Highway Safety Plan, and the Freight Mobility and Trade Plan.

#### AT THE DECISION-MAKING LEVEL

Performance measures are used to inform and assess the financial policies for allocating funds among programs such as highway preservation, system expansion, and public transportation. These programs are defined in the Program and Resource Plan. Decision makers also consider various trends impacting transportation system performance.

#### AT THE PROJECT DELIVERY LEVEL

After projects are selected, performance measures help to monitor the efficiency and effectiveness of projects and services in the Five-Year Work Program and in relation to FDOT's Transportation Asset Management Plan. The measures also support organizational and operational improvements.

As shown in the **Performance-Based Planning and Programming Process** graphic below, performance management is at the heart of FDOT's planning and programming process.

# WHY DO WE USE THEM?

FDOT uses performance measures to:

- Assess how well Florida's multimodal transportation system is functioning—including feedback from and collaboration with key stakeholder organizations
- Provide information to support and inform decision-making
- · Assess how effectively and efficiently transportation programs, projects and services are being delivered
- Determine customer satisfaction levels
- Demonstrate transparency and accountability to Florida's citizens and to foster collaboration with FDOT's transportation system stakeholders

#### WHAT IS MEASURED?

Each performance report is listed below along with some of the associated performance measures:

#### **SAFETY**

Fatal and serious injuries related to impaired driving, speeding and aggressive driving, distracted driving, at-risk drivers, vulnerable road users

#### **PRESERVATION**

Percent of pavement and bridges meeting condition standards, percent of maintenance activities that meet department standards, roadway clearance times due to incidents and crashes

#### **MOBILITY**

Vehicle miles traveled, transit ridership, freight tonnage, freight and port access, hours of delay, travel time reliability, travel that is heavily congested

#### **ECONOMY**

Return On Investment of FDOT programs, capacity funds for the SIS, Florida share of U.S. trade, Florida value of freight, construction projects completed on-time and within budget

#### **ENVIRONMENT**

Air quality, water quality, impacts to the physical, natural and cultural environment, vibrant and healthy communities, and customer satisfaction.

# HOW IS TRANSPORTATION PERFORMANCE MANAGEMENT BEING IMPLEMENTED?

The Moving Ahead for Progress in the 21st Century Act (MAP-21) included several provisions that collectively are transforming the Federal surface transportation program to be focused on the achievement of performance outcomes.

The performance outcomes provisions, administered by different agencies within the U.S. Department of Transportation (USDOT), were implemented by rulemakings, including several under FHWA's purview. The provisions are organized by six performance management elements.

The Fixing America's Surface Transportation (FAST) Act, signed in 2015, built on the MAP-21 changes and provided long-term funding certainty for surface transportation infrastructure planning and investment.

TPM performance management outcomes are grouped into six elements to more effectively communicate the efforts under way to implement the statutory requirements.

- 1. National Goals: Congressionally established goals or program purpose to focus the Federal-aid highway program into specific areas of performance.
- 2. Measures: FHWA-established measures to assess performance/condition in carrying out performance-based Federal-aid highway programs.
- 3. Targets: Targets established by Federal-aid highway funding recipients for the measures to document future performance expectations
- **4. Plans:** Development of strategic and/or tactical plans by Federal funding recipients to identify strategies and investments that address performance needs.
- **5. Reports:** Development of reports by Federal funding recipients that document progress toward target achievement, including the effectiveness of Federal-aid highway investments.
- **6. Accountability and Transparency:** FHWA-developed requirements for Federal funding recipients to use to achieve or make significant progress toward targets.

# WHAT ARE THE FEDERAL PLANNING REQUIREMENTS?

**Per 23 CFR §450.306** Scopes of the metropolitan transportation planning process, the metropolitan transportation planning process shall be continuous, cooperative, and comprehensive; consider the Federal Planning Factors (See Figure 1: Federal Planning Requirements and Expectations), and provide a performance-based approach to decision making. Performance-based planning requires MPOs to establish performance targets that address the performance measures or standards of the National Performance Management Measures, Public Transportation Safety Program, and Transit Asset Management.

**Per 23 CFR §450.324 Development and content of the metropolitan transportation plan**, the MPO Long Range Transportation Plan (LRTP) shall include the following for the National Performance Management Measures:

- A description of the National Performance Management Measures and established performance targets used in assessing the performance of the transportation system
- A System Performance Report evaluating the condition and performance of the transportation system, including progress achieved by the MPO in meeting performance targets.
- MPOs that voluntarily elect to conduct scenario planning shall describe how the preferred scenario has "improved" performance of the transportation system. 23 CFR §450.324

Additionally, per 23 CFR §450.326 Development and content of the transportation improvement program (TIP), the Transportation Improvement Program (TIP) shall make progress toward achieving performance targets and include a description of the anticipated effect of the TIP toward achieving the performance targets identified by the MPO in the LRTP, linking investment priorities in the TIP to those performance targets.

Figure 1: Federal Planning Requirements and Expectations

#### **United States Code**

#### MAP-21/FAST Act

#### Federal Planning Factors

Support the economic vitality of the metropolitan area, especially by enabling global competitiveness, productivity, and efficiency;

Increase the safety of the transportation system for motorized and nonmotorized users;

Increase the security of the transportation system for motorized and nonmotorized users;

Increase the accessibility and mobility of people and for freight;

Protect and enhance the environment, promote energy conservation, improve the quality of life, and promote consistency between transportation improvements and State and local planned growth and economic development patterns;

Enhance the integration and connectivity of the transportation system, across and between modes, for people and freight;

Promote efficient system management and operation;

Emphasize the preservation of the existing transportation system;

Improve the resiliency and reliability of the transportation system and reduce or mitigate stormwater impacts of surface transportation; and

Enhance travel and tourism. \*\*

\*\* New Planning Factors established under the FAST Act. [23 USC 134(h)(1)]

#### MAP-21 National Goals

Safety - To achieve a significant reduction in traffic fatalities and serious injuries on all public roads.

Infrastructure Condition - To maintain the highway infrastructure asset system in a state of good repair

Congestion Reduction - To achieve a significant reduction in congestion on the National Highway System

System Reliability - To improve the efficiency of the surface transportation system

Freight Movement and Economic Vitality - To improve the national freight network, strengthen the ability of rural communities to access national and international trade markets, and support regional economic development

Environmental Sustainability - To enhance the performance of the transportation system while protecting and enhancing the natural environment.

Reduced Project Delivery Delays - To reduce project costs, promote jobs and the economy, and expedite the movement of people and goods by accelerating project completion through eliminating delays in the project development and delivery process, including reducing regulatory burdens and improving agencies' work practices

[23 USC 150(b)]

#### Code of Federal Regulations

#### USDOT

National Performance Management Measures

#### Safety Performance Measures

- 1. No. of Fatalities
- 2. Fatality Rate per 100 million VMT
- 3. No. of Serious Injuries
- 4. Serious Injury Rate per 100 million VMT
- 5. No. of Combined Non-Motorized Fatalities and Serious Injuries

#### Infrastructure Performance Measures

- 1. % of Interstate System Pavement in Good Condition
- 2. % of Interstate System Pavement in Poor Condition
- 3. % of Non-Interstate NHS Pavement in Good Condition
- 4. % of Non-Interstate NHS Pavement in Poor Condition
- 5. % of NHS Bridge Deck Area in Good Condition
- 6. % of NHS Bridge Deck Area in Poor Condition

#### System Performance Measures

- 1. % Person-Miles Traveled on the Interstate that are Reliable
- % Person-Miles Traveled on the Non-Interstate NHS that are Reliable
- % Change in Tailpipe CO<sub>2</sub> (greenhouse gas) Emissions on the NHS Compared to the Calendar Year 2017 Level \*\*\*
- 4. Truck Travel Time Reliability (TTTR) Index
- 5. Annual Hours of Peak Hour Excessive Delay Per Capita
- 6. % Non-SOV Travel
- 7. Total Emissions Reduction
- \*\*\* The GHG measure was repealed on May 31, 2018, effective July 2, 2018 [23 CFR §924, 23 CFR § 490]

- Transportation Performance Measures
- ACES (Automated/Connected/ Electric/Shared-use) Vehicles

On January 19, 2024, the FDOT Office of Policy Planning issued a simplified Transportation Performance Measures timeline with the key dates for the Calendar Years 2024 and 2025, which are illustrated below:

Figure 2: FDOT 2024-2025 Transportation Performance Measures Timeline

# Office of Policy Planning

Florida Department of Transportation 605 Suwannee St, Tallahassee, FL

## 2024 TPM Deadlines - PM1, PM2, PM3, Transit Asset Management, Transit Safety/PTASP

| 2024 Date    | PM Area         | Item  |
|--------------|-----------------|---|
| February 27  | PM1             | MPOs establish CY2024 PM1 targets, not later than 180 days after FDOT established and reported CY2024 PM1 targets in the HSIP annual report on August 31, 2023.                                       |
| March 15     | PM2             | FDOT reports 2023 National Bridge Inventory (NBI) condition data to FHWA.   |
| ~March       | PM1             | FHWA will notify FDOT whether the State met or made significant progress toward its 2022 safety targets.  |
| April 15     | PM2             | FDOT reports 2023 Interstate pavement condition data to HPMS.   |
| June 15      | PM2             | FDOT reports 2023 non-Interstate NHS pavement condition data to HPMS.   |
| June 15      | PM3             | FDOT reports metric data to HPMS for travel-time measures (Travel Time reliability and Freight reliability).  |
| July 1       | NHSTA<br>Safety | Florida reports 12 NHTSA highway safety targets for CY2025 to NHTSA.  |
| August 31    | PM1             | FDOT reports PM1 safety targets for CY2025 in the HSIP annual report.   |
| September 30 | PM2             | <b>FHWA</b> will notify FDOT of its annual determination of minimum Interstate pavement condition level. The percentage of lane-miles of the Interstate System in poor condition must not exceed 5%.  |
| October 1    | PM2             | FHWA will notify FDOT of its annual determination of minimum NHS bridge condition level. The percentage of the deck area of NHS bridges classified as structurally deficient must not exceed 10%.     |
| October 1    | PM3             | <b>FDOT</b> must submit a request to FHWA if it intends to use an alternative travel time data set than the NPMRDS for the following calendar year.   |
| October 1    | PM2 & PM3       | <b>FDOT</b> reports current performance and progress toward 2023 targets in its Mid Performance Period Report to FHWA for the current performance period (January 1, 2022 through December 31, 2025). |
| October 1    | FIVIZ & FIVIS   | <b>FDOT</b> has the option of adjusting any of its 2025 targets. If FDOT adjust any targets, MPOs must take action on the adjusted targets within 180 days (by March 30, 2025).                       |

| 2024 Date   | PM Area                      | Item   |
|---|------------------------------|--|
| Annual activity;<br>Date will vary for<br>each provider | Transit<br>Safety<br>(PTASP) | Transit providers subject to the Public Transportation Agency Safety Plan (PTASP) requirements must update and certify their PTASP and establish 2025 transit safety targets.  MPOs set new targets as part of their LRTP updates. MPOs should reference the most recent transit provider targets with each annual TIP update. |
| Annual activity;<br>Date will vary for<br>each provider | Transit<br>Assets<br>(TAM)   | Transit providers (and FDOT for the Group TAM Plan) report transit asset data to FTA and establish 2025 transit asset targets.  MPOs set new targets with every LRTP update. MPOs should reflect MPO targets and public transportation provider current TAM targets in each annual TIP update.                                 |

| 2025 Date   | PM Area                      | Item   |
|---|------------------------------|--|
| February 27   | PM1                          | MPOs establish CY2025 PM1 targets, not later than 180 days after FDOT established and reported CY2025 PM1 targets in the HSIP annual report on August 31, 2024.  |
| March 15  | PM2                          | FDOT reports 2024 National Bridge Inventory (NBI) condition data to FHWA.  |
| ~March  | PM1                          | FHWA will notify FDOT whether the State met or made significant progress toward its 2023 safety targets.   |
| March 30  | PM2 & PM3                    | If FDOT adjusted any 2025 targets on October 1, 2024, MPOs must take action on adjusted targets.   |
| April 15  | PM2                          | FDOT reports 2024 Interstate pavement condition data to HPMS.  |
| June 15   | PM2                          | FDOT reports 2024 non-Interstate NHS pavement condition data to HPMS.  |
| June 15   | PM3                          | FDOT reports metric data to HPMS for travel-time measures (Travel Time reliability and Freight reliability).   |
| July 1  | NHSTA<br>Safety              | Florida reports 12 NHTSA highway safety targets for CY2026 to NHTSA.   |
| August 31   | PM1                          | FDOT reports PM1 safety targets for CY2026 in the HSIP annual report.  |
| September 30  | PM2                          | <b>FHWA</b> will notify FDOT of its annual determination of minimum Interstate pavement condition level. The percentage of lane-miles of the Interstate System in poor condition must not exceed 5%.   |
| October 1   | PM2                          | <b>FHWA</b> will notify FDOT of its annual determination of minimum NHS bridge condition level. The percentage of the deck area of NHS bridges classified as structurally deficient must not exceed 10%.   |
| October 1   | PM3                          | <b>FDOT</b> must submit a request to FHWA if it intends to use an alternative travel time data set than the NPMRDS the following calendar year   |
| Annual activity;<br>Pate will vary for<br>each provider | Transit<br>Safety<br>(PTASP) | Transit providers subject to the Public Transportation Agency Safety Plan (PTASP) requirements must update a certify their PTASP and establish 2026 transit safety targets.  MPOs set new targets as part of their LRTP updates. MPOs should reference the most recent transit provider targets with each annual TIP update. |
| Annual activity;<br>late will vary for<br>each provider | Transit<br>Assets<br>(TAM)   | Transit providers (and FDOT for the Group TAM Plan) report transit asset data to FTA and establish 2026 transasset targets.  MPOs set new targets with every LRTP update. MPOs should reflect MPO targets and public transportation provider current TAM targets in each annual TIP update.                                  |

# LONG RANGE TRANSPORTATION PLAN (LRTP) AND TRANSPORTATION IMPROVEMENT PROGRAM (TIP) COMPLIANCE

The FDOT Highway Safety Plan, Highway Safety Improvement Program, Freight Mobility Plan, and Asset Management Plan have been incorporated, by reference, into the 2045 LRTP and 2020 TIP as part of LRTP and TIP amendments through Resolution #33-19 (June 20, 2019).

The Miami-Dade 2045 Long Range Transportation Plan was adopted on September 26, 2019 and the Miami-Dade 2024/2025 – 2028/2029 TIP was adopted on June 27, 2024. Per the Planning Rule, the System Performance Report for the Miami-Dade TPO is included for the required Highway Safety (PM1), Bridge and Pavement (PM2), System Performance (PM3), Transit Asset Management (TAM) and Public Transit Agency Safety Plan (PTASP).

# TRANSPORTATION PERFORMANCE MEASURES CONSENSUS PLANNING DOCUMENT

The TPM Consensus Document has been cooperatively developed by the FDOT and Florida's 27 Metropolitan Planning Organizations through the Florida Metropolitan Planning Organization Advisory Council (MPOAC), and, by representation on the MPO and TPO boards and committees, and the providers of public transportation in the MPO and TPO planning areas. The purpose of the document is to outline the minimum roles of FDOT, the MPO/TPOs, and the providers of public transportation in the MPO/TPO planning area to ensure consistency to the maximum extent practicable in satisfying the transportation performance management requirements promulgated by the United States Department of Transportation.

The current Federal legislation requires state DOTs, MPO/TPOs, and transit agencies to conduct performance-based planning by setting data-driven performance targets for several transportation performance measures, and programming transportation investments that are expected to result in achievement of defined targets. The document describes the general processes through with FDOT, the MPO/TPOs, and the providers of public transportation in MPO/TPO planning areas will cooperatively develop and share information related to transportation performance management.

Based on a recent directive of the Federal Highway Administration and FDOT Office of Policy Planning, it was suggested to all TPO/MPO's in Florida to separately adopt this document to avoid the need to include it with each TIP on an annual basis. Once adopted as a stand-alone resource, the TPO does not need to continuously include the Consensus Planning Document in the TIP.

By Resolution 12-2022 on March 3, 2022 (illustrated on the below in **Figure 3: TPO Resolution – Consensus Planning Document**), the TPO Governing Board adopted the Transportation Performance Measures Consensus Planning Document.

Figure 3: TPO Resolution – Consensus Planning Document

Agenda Item 6.A.7

#### TPO RESOLUTION #12-2022

# RESOLUTION ADOPTING THE TRANSPORTATION PERFORMANCE MEASURES CONSENSUS PLANNING DOCUMENT

WHEREAS, the Interlocal Agreement creating and establishing the Metropolitan Planning Organization (MPO) for the Miami Urbanized Area requires that the Miami-Dade Transportation Planning Organization (TPO), in its role as the MPO, provide a structure to evaluate the adequacy of the transportation planning and programming process; and

WHEREAS, the TPO Governing Board is charged with making transportation planning decisions in the Miami Urbanized Area; and

WHEREAS, the Transportation Planning Council (TPC) has been established and charged with the responsibility and duty of fulfilling the aforementioned functions; and

WHEREAS, the Transportation Performance Measures Consensus Planning Document has been cooperatively developed by the Florida Department of Transportation (FDOT) and Florida's twenty-seven (27) Metropolitan Planning Organizations (MPOs) through the Florida Metropolitan Planning Organization Advisory Council; and

WHEREAS, this document describes the general processes through which FDOT, the MPOs, and the providers of public transportation in MPO planning areas will cooperatively develop and share information related to transportation performance management; and

WHEREAS, based on a recent directive from the Federal Highway Administration and the FDOT Office of Policy Planning, it was requested that all MPOs in Florida separately adopt this document to reduce redundancy with the annual publication of said document in the Transportation Improvement Program (TIP); and

WHEREAS, the TPC has reviewed the Transportation Performance Measures Consensus Planning Document, made a part hereof, and finds it consistent with the goals and objectives of the Transportation Plan for the Miami Urbanized Area.

NOW, THEREFORE, BE IT RESOLVED BY THE GOVERNING BOARD OF THE TRANSPORTATION PLANNING ORGANIZATION IN ITS ROLE AS THE MPO FOR THE MIAMI URBANIZED AREA, that this Board hereby adopts the attached Transportation Performance Measures Consensus Planning Document.

The adoption of the foregoing resolution was moved by Board Member Rebeca Sosa. The motion was seconded by Board Member Eileen Higgins, and upon being put to a vote, the vote was as follows:

#### Chairman Oliver G. Gilbert III - Aye Vice Chairman Juan Carlos Bermudez - Absent

| Board Member Philippe Bien-Aime     | -Aye    | Board Member Steven D. Losner   | -Aye    |
|-------------------------------------|---------|---------------------------------|---------|
| Board Member Esteban Bovo, Jr.      | -Aye    | Board Member Roberto Martell    | -Aye    |
| Board Member Danielle Cohen Higgins | -Aye    | Board Member Joe A. Martinez    | -Absent |
| Board Member Jose "Pepe" Diaz       | -Absent | Board Member Kionne L. McGhee   | -Aye    |
| Board Member Rene Garcia            | -Absent | Board Member Jean Monestime     | -Aye    |
| Board Member Perla T. Hantman       | -Absent | Board Member Raquel A. Regalado | -Aye    |
| Board Member Keon Hardemon          | -Absent | Board Member David Richardson   | -Aye    |
| Board Member Rodney Harris          | -Absent | Board Member Rebeca Sosa        | -Aye    |
| Board Member Sally A. Heyman        | -Aye    | Board Member Javier D. Souto    | -Absent |
| Board Member Eileen Higgins         | -Aye    | Board Member Francis Suarez     | -Absent |
| Board Member Vince Lago             | -Absent |                                 |         |

The Chairperson thereupon declared the resolution duly passed and approved this day of 3rd day of March 2022.

TRANSPORTATION PLANNING ORGANIZATION

Tawana Parker, Clerk Miami-Dade TPO

DADE MED TPO NO

#### Transportation Performance Measures Consensus Planning Document

#### Purpose and Authority

This document has been cooperatively developed by the Florida Department of Transportation (FDOT) and Florida's 27 Metropolitan Planning Organizations (MPOs) through the Florida Metropolitan Planning Organization Advisory Council (MPOAC), and, by representation on the MPO boards and committees, the providers of public transportation in the MPO planning areas.

The purpose of the document is to outline the minimum roles of FDOT, the MPOs, and the providers of public transportation in the MPO planning areas to ensure consistency to the maximum extent practicable in satisfying the transportation performance management requirements promulgated by the United States Department of Transportation in Title 23 Parts 450, 490, 625, and 673 of the Code of Federal Regulations (23 CFR), Specifically:

- 23 CFR 450.314(h)(1) requires that "The MPO(s), State(s), and providers of public transportation shall jointly agree upon and develop specific written procedures for cooperatively developing and sharing information related to transportation performance data, the selection of performance targets, the reporting of performance targets, the reporting of performance to be used in tracking progress toward achievement of critical outcomes for the region of the MPO, and the collection of data for the State asset management plan for the National Highway System (NHS)."
- 23 CFR 450.314(h)(2) allows for these provisions to be "Documented in some other means outside the metropolitan planning agreements as determined cooperatively by the MPO(s), State(s), and providers of public transportation."

Section 339.175(11), Florida Statutes creates the MPOAC to "Assist MPOs in carrying out the urbanized area transportation planning process by serving as the principal forum for collective policy discussion pursuant to law" and to "Serve as a clearinghouse for review and comment by MPOs on the Florida Transportation Plan and on other issues required to comply with federal or state law in carrying out the urbanized transportation planning processes." The MPOAC Governing Board membership includes one representative of each MPO in Florida.

This document was developed, adopted, and subsequently updated by joint agreement of the FDOT Secretary and the MPOAC Governing Board. Each MPO will adopt this document by incorporation in its annual Transportation Improvement Program (TIP) or by separate board action as documented in a resolution or meeting minutes, which will serve as documentation of agreement by the MPO and the provider(s) of public transportation in the MPO planning area to carry out their roles and responsibilities as described in this general document.

Page 1 of 6

#### Roles and Responsibilities

This document describes the general processes through which FDOT, the MPOs, and the providers of public transportation in MPO planning areas will cooperatively develop and share information related to transportation performance management.

Email communications will be considered written notice for all portions of this document. Communication with FDOT related to transportation performance management generally will occur through the Administrator for Metropolitan Planning in the Office of Policy Planning. Communications with the MPOAC related to transportation performance management generally will occur through the Executive Director of the MPOAC.

#### 1. Transportation performance data:

- a) FDOT will collect and maintain data, perform calculations of performance metrics and measures, and provide to each MPO the results of the calculations used to develop statewide targets for all applicable federally required performance measures. FDOT also will provide to each MPO the results of calculations for each applicable performance measure for the MPO planning area, and the county or counties included in the MPO planning area. PDOT and the MPOAC agree to use the National Performance Management Research Data Set as the source of travel time data and the defined reporting segments of the Interstate System and non-Interstate National Highway System for the purposes of calculating the travel time-based measures specified in 23 CFR 490.507, 490.607, and 490.707, as applicable.
- b) Each MPO will share with FDOT any locally generated data that pertains to the federally required performance measures, if applicable, such as any supplemental data the MPO uses to develop its own targets for any measure.
- c) Each provider of public transportation is responsible for collecting performance data in the MPO planning area for the transit asset management measures as specified in 49 CFR 625.43 and the public transportation safety measures as specified in the National Public Transportation Safety Plan. The providers of public transportation will provide to FDOT and the appropriate MPO(s) the transit performance data used to support these measures.

#### 2. Selection of performance targets:

FDOT, the MPOs, and providers of public transportation will select their respective performance targets in coordination with one another. Selecting targets generally refers to the processes used to identify, evaluate, and make decisions about potential targets prior to action to formally establish the targets. Coordination will include as many of the following opportunities as deemed appropriate for each measure: in-person meetings, webinars, conferences calls, and email/written communication. Coordination will include timely

Page 2 of 6

<sup>&</sup>lt;sup>1</sup> When an MPO planning area covers portions of more than one state, as in the case of the Florida-Alabama TPO, FDOT will collect and provide data for the Florida portion of the planning area.

<sup>2</sup> If any Florida urbanized area becomes nonattainment for the National Ambient Air Quality Standards, FDOT also will provide appropriate data at the urbanized area level for the specific urbanized area that is designated.

sharing of information on proposed targets and opportunities to provide comment prior to establishing final comments for each measure,

The primary forum for coordination between FDOT and the MPOs on selecting performance targets and related policy issues is the regular meetings of the MPOAC. The primary forum for coordination between MPOs and providers of public transportation on selecting transit performance targets is the TIP development process.

Once targets are selected, each agency will take action to formally establish the targets in its area of responsibility.

- a) FDOT will select and establish a statewide target for each applicable federally required performance measure.
  - i. To the maximum extent practicable, FDOT will share proposed statewide targets at the MPOAC meeting scheduled in the calendar quarter prior to the dates required for establishing the target under federal rule. FDOT will work through the MPOAC to provide email communication on the proposed targets to the MPOs not in attendance at this meeting. The MPOAC as a whole, and individual MPOs as appropriate, will provide comments to FDOT on the proposed statewide targets within sixty (60) days of the MPOAC meeting. FDOT will provide an update to the MPOAC at its subsequent meeting on the final proposed targets, how the comments received from the MPOAC and any individual MPOs were considered, and the anticipated date when FDOT will establish final targets.
  - ii. FDOT will provide written notice to the MPOAC and individual MPOs within two (2) business days of when FDOT establishes final targets. This notice will provide the relevant targets and the date FDOT established the targets, which will begin the 180-day time-period during which each MPO must establish the corresponding performance targets for its planning area.
- b) Each MPO will select and establish a target for each applicable federally required performance measure. To the extent practicable, MPOs will propose, seek comment on, and establish their targets through existing processes such as the annual TIP update. For each performance measure, an MPO will have the option of either?:
  - i. Choosing to support the statewide target established by FDOT, and providing documentation (typically in the form of meeting minutes, a letter, a resolution, or incorporation in a document such as the TIP) to FDOT that the MPO agrees to plan and program projects so that they contribute toward the accomplishments of FDOT's statewide targets for that performance measure.
  - ii. Choosing to establish its own target, using a quantifiable methodology for its MPO planning area. If the MPO chooses to establish its own target, the MPO will coordinate with FDOT and, as applicable, providers of public transportation regarding the approach used to develop the target and the proposed target prior to

Page 3 of 6

establishment of a final target. The MPO will provide FDOT and, as applicable, providers of public transportation, documentation (typically in the form of meeting minutes, a letter, a resolution, or incorporation in a document such as the TIP) that includes the final targets and the date when the targets were established.

- c) The providers of public transportation in MPO planning areas will select and establish performance targets annually to meet the federal performance management requirements for transit asset management and transit safety under 49 U.S.C. 5326(c) and 49 U.S.C. 5329(d).
  - i. The Tier I providers of public transportation will establish performance targets to meet the federal performance management requirements for transit asset management. Each Tier I provider will provide written notice to the appropriate MPO and FDOT when it establishes targets. This notice will provide the final targets and the date when the targets were established, which will begin the 180-day period within which the MPO must establish its transit-related performance targets. MPOs may choose to update their targets when the Tier I provider(s) updates theirs, or when the MPO amends its long-range transportation plan by extending the horizon year in accordance with 23 CFR 450.324(c).
  - ii. FDOT is the sponsor of a Group Transit Asset Management plan for subrecipients of Section 5311 and 5310 grant funds. The Tier II providers of public transportation may choose to participate in FDOT's group plan or to establish their own targets. FDOT will notify MPOs and those participating Tier II providers following of establishment of transit-related targets. Each Tier II provider will provide written notice to the appropriate MPO and FDOT when it establishes targets. This notice will provide the final targets and the date the final targets were established, which will begin the 180-day period within which the MPO must establish its transit-related performance targets. MPOs may choose to update their targets when the Tier II provider(s) updates theirs, or when the MPO amends its long-range transportation plan by extending the horizon year in accordance with 23 CFR 450.324(c).
  - iii. FDOT will draft and certify a Public Transportation Agency Safety Plan for any small public transportation providers (defined as those who are recipients or subrecipients of federal financial assistance under 49 U.S.C. 5307, have one hundred (100) or fewer vehicles in peak revenue service, and do not operate a rail fixed guideway public transportation system). FDOT will coordinate with small public transportation providers on selecting statewide public transportation safety performance targets, with the exception of any small operator that notifies FDOT that it will draft its own plan.
  - iv. All other public transportation service providers that receive funding under 49 U.S. Code Chapter 53 (excluding sole recipients of sections 5310 and/or 5311 funds) will provide written notice to the appropriate MPO and FDOT when they establish public transportation safety performance targets. This notice will provide the final targets and the date the final targets were established, which will begin the 180-day period within which the MPO must establish its transit safety

Page 4 of 6

<sup>&</sup>lt;sup>3</sup> When an MPO planning area covers portions of more than one state, as in the case of the Florida-Alabama TPO, that MPO will be responsible for coordinating with each state DOT in setting and reporting targets and associated data.

- performance targets. MPOs may choose to update their targets when the provider(s) updates theirs, or when the MPO amends its long-range transportation plan by extending the horizon year in accordance with 23 CFR 450.324(c).
- v. If the MPO chooses to support the asset management and safety targets established by the provider of public transportation, the MPO will provide to FDOT and the provider of public transportation documentation that the MPO agrees to plan and program MPO projects so that they contribute toward achievement of the statewide or public transportation provider targets. If the MPO chooses to establish its own targets, the MPO will develop the target in coordination with FDOT and the providers of public transportation. The MPO will provide FDOT and the providers of public transportation documentation (typically in the form of meeting minutes, a letter, a resolution, or incorporation in a document such as the TIP) that includes the final targets and the date the final targets were established. In cases where two or more providers operate in an MPO planning area and establish different targets for a given measure, the MPO has the options of coordinating with the providers to establish a single target for the MPO planning area, or establishing a set of targets for the MPO planning area.

#### 3. Reporting performance targets:

- a) Reporting targets generally refers to the process used to report targets, progress achieved in meeting targets, and the linkage between targets and decision making processes FDOT will report its final statewide performance targets to the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) as mandated by the federal requirements.
- FDOT will include in future updates or amendments of the statewide long-range transportation plan a description of all applicable performance measures and targets and a system performance report, including progress achieved in meeting the performance targets, in accordance with 23 CFR 450.216(f).
- FDOT will include in future updates or amendments of the statewide transportation improvement program a discussion of the anticipated effect of the program toward achieving the state's performance targets, linking investment priorities to those performance targets, in accordance with 23 CFR 450.218 (q).
- iii. FDOT will report targets and performance data for each applicable highway performance measure to FHWA, in accordance with the reporting timelines and requirements established by 23 CFR 490; and for each applicable public transit measure to FTA, in accordance with the reporting timelines and requirements established by 49 CFR 625 and 40 CFR 673.
- b) Each MPO will report its final performance targets as mandated by federal requirements to FDOT. To the extent practicable, MPOs will report final targets through the TIP update or other existing documents.
  - Each MPO will include in future updates or amendments of its metropolitan longrange transportation plan a description of all applicable performance measures

Page 5 of 6

- and targets and a system performance report, including progress achieved by the MPO in meeting the performance targets, in accordance with 23 CFR 450.324(f)(3-4).
- Each MPO will include in future updates or amendments of its TIP a discussion of the anticipated effect of the TIP toward achieving the applicable performance targets, linking investment priorities to those performance targets, in accordance with 23 CFR 450.326(d).
- Each MPO will report target-related status information to FDOT upon request to support FDOT's reporting requirements to FHWA.
- c) Providers of public transportation in MPO planning areas will report all established transit asset management targets to the FTA National Transit Database (NTD) consistent with FTA's deadlines based upon the provider's fiscal year and in accordance with 49 CFR Parts 625 and 630, and 49 CFR Part 673.
- Reporting performance to be used in tracking progress toward attainment of performance targets for the MPO planning area;
  - a) FDOT will report to FHWA or FTA as designated, and share with each MPO and provider of public transportation, transportation performance for the state showing the progress being made towards attainment of each target established by FDOT, in a format to be mutually agreed upon by FDOT and the MPOAC.
  - b) If an MPO establishes its own targets, the MPO will report to FDOT on an annual basis transportation performance for the MPO area showing the progress being made towards attainment of each target established by the MPO, in a format to be mutually agreed upon by FDOT and the MPOAC. To the extent practicable, MPOs will report progress through existing processes including, but not limited to, the annual TIP update.
  - c) Each provider of public transportation will report transit performance annually to the MPO(s) covering the provider's service area, showing the progress made toward attainment of each target established by the provider.
- Collection of data for the State asset management plans for the National Highway System (NHS):
  - a) FDOT will be responsible for collecting bridge and pavement condition data for the State asset management plan for the NHS. This includes NHS roads that are not on the State highway system but instead are under the ownership of local jurisdictions, if such roads exist.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

# TRANSPORTATION PERFORMANCE MANAGEMENT SYSTEM PERFORMANCE REPORT SAFETY

# SAFETY PERFORMANCE MANAGEMENT MEASURES

Safety is the first national goal identified in MAP-21 and maintained in the FAST Act. In March of 2016, the Highway Safety Improvement Program (HSIP) Final Rule and National Performance Management Measures: Highway Safety Improvement Program Final Rule (known as the Safety Performance Management Measures (Safety PM) Final Rule) were published in the Federal Register [23 CFR 924, 23 CFR 490] with an effective date of April 14, 2016. The HSIP Final Rule was established to clarify requirements under the HSIP and address MAP-21 and the FAST Act for consistency. The objective of the HSIP is to "significantly reduce fatalities and serious injuries resulting from crashes on all public roads," [23 CFR 924].

#### PERFORMANCE MANAGEMENT MEASURES

The Safety PM Final Rule was developed to support the HSIP and requires State DOTs and MPOs to set targets for the following Safety Performance Management Measures (which apply to all public roads) and to report on progress toward achieving those targets to the State DOT.

- Number of Fatalities
- Fatality Rate per 100 million Vehicle Miles Traveled (VMT)
- Number of Serious Injuries
- Serious Injury Rate per 100 million VMT
- Number of Combined Non-Motorized Fatalities and Serious Injuries

#### **PERFORMANCE TARGETS**

In 2012, Florida adopted "Driving Down Fatalities," their version of the national traffic safety vision "Toward Zero Deaths." Understanding that zero fatalities cannot be reached within the 2018 Highway Safety Plan (HSP), Florida developed data models to forecast the number of fatalities and serious injuries that are statistically expected to occur to drive down fatalities and serious injuries with an ultimate vision of zero. [Source: SHSP, HSP] (2017 Florida Highway Safety Improvement Program). FDOT firmly believes that every life counts and established a 2018 target of zero for each of the Safety Performance Management Measures in the 2017 Highway Safety Improvement Plan (HSIP).

The TPO, along with FDOT and other traffic safety partners, shares a high concern about the upward trending of traffic crashes, both statewide and nationally. As such, the Miami-Dade TPO supports FDOT's statewide 2024 safety targets. The safety initiatives within this TIP are intended to contribute toward achieving these targets.

Annually in August, FDOT establishes and reports statewide safety performance targets in the HSIP Annual Report to FHWA. By February of the following year, the TPO will adopt FDOT's targets or establish their own.

FDOT has continuously supported a target of zero for the Safety Performance Management Measures. The 2023 HSIP Annual Report continued to establish a target of zero for each of the five federal Safety Performance Management Measures for Calendar Year 2024. By adopting these targets

(per Resolution #07-2024) on January 25, 2024 as illustrated below in Figure 4: TPO Resolution - 2024 Safety Targets, the Miami-Dade TPO will support achievement of the safety performance management targets by planning and programing projects in the TIP and LRTP that once implemented, are anticipated to make progress toward achieving accomplishment of the FDOT safety target of zero. The targets for the five Safety Performance Management Measures adopted by the TPO for 2024, shown in Table 1: 2024 Safety Performance Management Measure Targets, indicates the TPO is expressly supporting the statewide targets developed by FDOT.

Figure 4: TPO Resolution – 2024 Safety Targets

Agenda Item 6.B.6

TPO RESOLUTION #07-2024

RESOLUTION ESTABLISHING THE FLORIDA DEPARTMENT OF TRANSPORTATION'S "VISION ZERO" SAFETY PERFORMANCE MEASURE TARGETS FOR TRAFFIC FATALITIES AND INJURIES FOR CALENDAR YEAR 2024

WHEREAS, the Interlocal Agreement creating and establishing the Metropolitan Planning Organization (MPO) for the Miami Urbanized Area requires that the Miami-Dade Transportation Planning Organization (TPO), in its role as the MPO, provides a structure to evaluate the adequacy of the transportation planning and programming process; and

WHEREAS, the Moving Ahead for Progress in the 21st Century Act (MAP-21) required the United States Department of Transportation (USDOT) to establish mobility performance measures for fatalities and serious injuries, both number and rate per vehicle mile traveled, on all public roads; and

WHEREAS, federal rules developed to implement MAP-21 require that state DOTs establish statewide targets each year for the traffic safety performance measures: number of fatalities, rate of fatalities, number of serious injuries, rate of serious injuries and number of non-motorized fatalities and non-motorized serious injuries;

WHEREAS, MPOs have the option to support the statewide performance measure targets or establish

WHEREAS, the 2023 Florida Highway Safety Improvement Program includes "Vision Zero" targets for federal safety performance measures for 2024; and

WHEREAS, the TPO has coordinated the establishment of "Vision Zero" performance measure targets with the Florida Department of Transportation (FDOT) through the statewide Metropolitan Planning Organization Advisory Council; and

WHEREAS, the attached FDOT's 2024 "Vision Zero" Performance Measure Targets for Traffic Fatalities and Injuries, are consistent with the goals and objectives of the Transportation Plan for the Miami Urbanized Area,

NOW, THEREFORE, BE IT RESOLVED BY THE GOVERNING BOARD OF THE TRANSPORTATION PLANNING ORGANIZATION IN ITS ROLE AS THE MPO FOR THE MIAMI URBANIZED AREA, that this Board hereby establishes the attached Florida Department of Transportation's "Vision Zero" Safety Performance Measure Targets for traffic fatalities and injuries for calendar year 2024.

The adoption of the foregoing resolution was moved by Vice Chairman Oliver G. Gilbert III. The motion was seconded by Board Member Marleine Bastien, and upon being put to a vote, the vote was as follows:

#### Chairman Esteban Bovo, Jr. Vice Chairman Oliver G. Gilbert III - Aye

Board Member Roberto J. Alonso Absent Board Member Keon Hardemon Board Member Marleine Bastien Board Member Rodney Harris - Absent - Aye Board Member Juan Carlos Bermudez - Aye Board Member Eileen Higgins Board Member Kevin Marino Cabrera - Absent Board Member Steven D. Losner Board Member Danielle Cohen Higgins - Absent Board Member Kionne L. McGhee - Absent Board Member Alix Desulme - Aye Board Member Raquel A. Regalado Board Member Anthony Rodriguez - Ave Board Member Eric Diaz-Padron - Ave Board Member Christi Fraga Board Member Micky Steinberg Board Member René Garcia - Absent Board Member Francis Suarez Board Member Roberto Gonzalez

The Chairperson thereupon declared the resolution duly passed and approved this 25th day of January 2024.

TRANSPORTATION PLANNING ORGANIZATION

Miami-Dade TPO

#### Attachment

#### SAFETY PERFORMANCE MEASURE TARGETS

FDOT's 2023 Highway Safety Improvement Program (HSIP) includes Vision Zero targets for each of the federal performance measures. The TPO has coordinated with FDOT through the MPOAC and is supporting the same targets. The five federal safety performance measures and FDOT targets for 2024

| Safety Performance Measure                              | 2024 Target |
|---|-------------|
| Number of fatalities                                    | 0           |
| Rate of fatalities (per 100 million VMT)                | 0           |
| Number of serious injuries                              | 0           |
| Rate of serious injuries (per 100 million VMT)          | 0           |
| Number of non-motorized fatalities and serious injuries | 0           |

The safety performance measures are evaluated with a rolling five-year average of traffic crash data and daily vehicle miles travelled. The most recent safety statistics (2018-2022) for Florida and Milami-Dade County are:

| Performance Measure  | Florida | Miami-Dade |
|--|---------|------------|
| Fatalities (annual average)                                | 3,387   | 317        |
| Fatality Rate per 100M VMT                                 | 1.54    | 1.60       |
| Serious Injuries (annual average)                          | 17,146  | 1,377      |
| Serious Injury Rate per 100M VMT                           | 7.79    | 6.90       |
| Ped/Bike Fatalities & Serious Injuries<br>(annual average) | 3,154   | 391        |

DATA SOURCES: Current year (2022) and current 5-year average (2018-22) fatality and serious injury counts from Signal Four Analytics (S4) database as of November 15, 2023: any figures that include the 2023 data are preliminary at this time and may change with future updates; Prior year and prior 5-year average fatality and serious injury counts from Florida Dept. of Transportation (FDOT) State Safety Office's historic Crash Analysis Reporting (CAR) database; Traffic volumes as published by the FDOT office of Transportation Data and Analytics

On August 31, 2023, FDOT established statewide performance targets for the safety measures for calendar year 2024. On January 25, 2024, the Miami-Dade TPO agreed to support FDOT's statewide safety performance targets, thus agreeing to plan and program projects in the TIP that once implemented, are anticipated to make progress toward achieving the statewide targets:

TABLE 1: 2024 Safety Performance Management Measure Targets

| SAFETY PERFORMANCE MEASURE                                      | MIAMI-DADE TPO SAFETY TARGETS | 2024 FDOT STATEWIDE SAFETY TARGETS |
|---|-------------------------------|------------------------------------|
| Number of Fatalities  | 0                             | 0                                  |
| Fatality Rate per 100 Million Vehicle Miles Traveled (VMT)      | 0                             | 0                                  |
| Number of Serious Injuries                                      | 0                             | 0                                  |
| Serious Injury Rate per 100M VMT                                | 0                             | 0                                  |
| Number of Combined Non-Motorized Fatalities and Serious Injurie | <b>s</b> 0                    | 0                                  |

#### **BASELINE CONDITIONS**

Safety Performance Management Measures are evaluated using a 5-year rolling average of traffic crash data and vehicle miles traveled. Baseline safety performance conditions are established based on the 5-year rolling average ending in the calendar year prior to the establishment of the State's target. FDOT established its target for Safety Performance Management Measures for 2024 in 2023. Therefore, the baseline year for Florida MPOs for Calendar Year 2024 is the rolling 5-year average for 2018-2022. The baseline performance for Florida and Miami-Dade County for CY 2023 is shown in **Table 2: Baseline Safety Performance Management Measures.** 

TABLE 2: FDOT Baseline Safety Performance Measures (Data from 5-Year Rolling Average from 2018-2022)

| PERFORMANCE MEASURE                         | FLORIDA | MIAMI-DADE |
|---|---------|------------|
| Number of Fatalities (Annual Average)       | 3,387   | 317.0      |
| Fatality Rate per 100M VMT                  | 1.54    | 1.60       |
| Number of Serious Injuries (Annual Average) | 17,146  | 1,377      |

| PERFORMANCE MEASURE   | FLORIDA | MIAMI-DADE |
|---|---------|------------|
| Serious Injury Rate per 100M VMT  | 7.79    | 6.90       |
| Number of Combined Non-Motorized Fatalities and Serious Injuries (Annual Average) | 3,154   | 391.0      |

Single-county MPO/TPOs that encompass the entire limits of the county are calculated using the total county fatalities, serious injuries and traffic volumes as published. Multiple-county MPO/TPOs that encompass the entire limits of each of their included counties are calculated using the fatalities, serious injuries and traffic volumes summed for all of the included counties and are combined totals and rates calculated based on combined totals and combined traffic volumes. MPO/TPOs that do not encompass whole counties are not calculated at the MPO/TPO level but the county calculations for each included county are presented in the lower table.

DATA SOURCES: Fatality and serious injury counts from Florida Dept. of Transportation (FDOT) State Safety Office's Crash Analysis Reporting (CAR) database as of November 15, 2023: any figures that include 2023 data are preliminary at this time and may change with future updates; traffic volumes as published by the FDOT office of Transportation Data and Analytics at <a href="https://www.fdot.gov/statistics/mileage-rpts">https://www.fdot.gov/statistics/mileage-rpts</a>.

#### TRENDS FOR MIAMI-DADE – STATISTICS

The TIP development process, consistent with the process used to develop the MPO's Long-Range Transportation Plan, includes analysis of safety data trends, including the location and factors associated with crashes with emphasis on fatalities and serious injuries. These data are used to help identify regional safety issues and potential safety strategies for the LRTP and TIP.

The TPO uses crash data tracking fatalities and serious injuries in Miami-Dade County to analyze past trends and identify regional safety issues. Tracking these measures will help to estimate the effectiveness of future TPO transportation investment, as reflected in the TIP. The changes in Safety Performance Measures for the Miami-Dade TPO from 2017 through 2021 are shown in **Table 3: Miami-Dade Safety Performance Management**Measure Data. The measures shown in Table 3 were calculated by following the same methodology as that used to calculate the baseline conditions.

TABLE 3: Miami-Dade County Safety Performance Management Measure Data (FDOT Rolling 5-Year Average)

| PERFORMANCE MEASURE                         | 2014-2018 | 2015-2019 | 2016-2020 | 2017-2021 | 2018-2022 |
|---|-----------|-----------|-----------|-----------|-----------|
| Number of Fatalities (Annual Average)       | 298.8     | 302.6     | 298.4     | 310.4     | 317.4     |
| Fatality Rate per 100M VMT                  | 1.502     | 1.507     | 1.507     | 1.570     | 1.597     |
| Number of Serious Injuries (Annual Average) | 1,747.6   | 1,664.4   | 1,518.0   | 1,442.6   | 1,377.0   |
| Serious Injury Rate per 100 Million VMT     | 8.793     | 8.291     | 7.617     | 7.250     | 6.895     |
|   |           |           |           |           |           |

| PERFORMANCE MEASURE  | 2014-2018 | 2015-2019 | 2016-2020 | 2017-2021 | 2018-2022 |
|--|-----------|-----------|-----------|-----------|-----------|
| Number of Combined Non-Motorized Fatalities and Serious Injuries | 435.6     | 426.8     | 398.4     | 393.0     | 391.0     |
| VMT (100M VMT)   | 203.007   | 203.915   | 183.185   | 198.382   | 207.751   |

DATA SOURCES: Fatality and serious injury counts from Florida Dept. of Transportation (FDOT) State Safety Office's Crash Analysis Reporting (CAR) database as of November 15, 2023; traffic volumes as published by the FDOT office of Transportation Data and Analytics at <a href="https://www.fdot.gov/statistics/mileage-rpts">https://www.fdot.gov/statistics/mileage-rpts</a>.

#### ASSESSMENT OF SIGNIFICANT STATE PROGRESS

Florida's performance on meeting the Safety Performance Management Measures will be assessed by FHWA by determining if the state's target has been met or if significant progress toward meeting the target was made. "A State DOT is determined to have met or made significant progress toward meeting its targets when the targets for at least 4 out of the 5 safety performance targets are met or the outcome for a performance measure is better than its baseline." (<a href="http://safety.fhwa.dot.gov">http://safety.fhwa.dot.gov</a>; Let's Talk Performance Webinar FAQs, Safety Performance Management Measures; page 5).

The first assessment of significant progress was conducted by FHWA in December 2019 to see if Florida met its 2014-2018 HSIP targets.. Subsequent assessments will be conducted in December of each year for the next rolling 5-year period for targets and baseline data (i.e.: the assessment in December 2021 will determine if the targets for 2016-2020 will be met or if significant progress is made toward the 2013-2017 baseline conditions).

# **COORDINATION WITH STATEWIDE SAFETY PLANS AND PROCESSES**

The TPO recognizes the importance of linking goals, objectives, and investment priorities to established performance objectives, and that this link is critical to the achievement of national transportation goals and statewide and regional performance targets. As such, the Miami-Dade 2045 LRTP reflects the goals, objectives, performance measures, and targets as they are available and described in other state and public transportation plans and processes; specifically, the Florida Strategic Highway Safety Plan (SHSP), the Florida Highway Safety Improvement Program (HSIP), and the Florida Transportation Plan (FTP).

• The 2021-2025 Florida Strategic Highway Safety Plan (SHSP), issued in March 2021, is the statewide plan focusing on how to accomplish the vision of eliminating fatalities and reducing serious injuries on all public roads. The SHSP was developed in coordination with Florida's 27 metropolitan planning organizations (MPOs) through Florida's Metropolitan Planning Organization Advisory Council (MPOAC). The SHSP guides FDOT, MPOs, and other safety partners in addressing safety and defines a framework for implementation activities to be carried out throughout the State.

- The FDOT HSIP process provides for a continuous and systematic process that identifies and reviews traffic safety issues around the state to identify locations with potential for improvement. The ultimate goal of the HSIP process is to reduce the number of crashes, injuries and fatalities by eliminating certain predominant types of crashes through the implementation of engineering solutions.
- Transportation projects are identified and prioritized with the MPOs and non-metropolitan local governments. Data are analyzed for each potential project, using traffic safety data and traffic demand modeling, among other data. The FDOT Project Development and Environment Manual requires the consideration of safety when preparing a proposed project's purpose and need, and defines several factors related to safety, including crash modification factor and safety performance factor, as part of the analysis of alternatives. MPOs and local governments consider safety data analysis when determining project priorities.

#### CONTRIBUTIONS TO ACHIEVING SAFETY PERFORMANCE TARGETS

The TPO and the Florida Department of Transportation (FDOT) are committed to making roadways safer in Miami-Dade County as a means to improve Florida's overall level of safety. The TPO has many programs, initiatives, and projects identified in the TIP and the LRTP to make transportation safer in Miami-Dade County. FDOT's key plan is its Work Program. The TPO and FDOT coordinate their plans and programs in order to improve the safety of the Miami-Dade transportation system, according to C.F.R. 450.332(b).

The TIP includes specific investment priorities that support all of the TPO's goals including safety, using a prioritization and project selection process established in the LRTP. The TPO has developed a TIP project selection process that identifies and prioritizes projects aimed at improving transportation safety. The ranking criteria are updated annually and are included in the appendices of the TIP. The current ranking criteria give the most point value to projects with the greatest anticipated fatality reduction. Going forward, the project evaluation and prioritization processes used in the LRTP and the TIP will continue to use a data-driven strategy that considers stakeholder input to evaluate projects that have an anticipated effect of reducing both fatal and injury crashes.

The program of projects identified through this process are anticipated to contribute toward achievement of the safety targets. The safety infrastructure investments are targeted at specific opportunities to improve safety. In addition to the specific safety programs included in the TIP, other programs also consider safety as a key factor. Safety impacts are considered in the evaluation of proposed preservation, capacity, and operations projects, including projects on Florida's Strategic Intermodal System as well as regionally significant facilities identified in the LRTP. All projects in this TIP inherently support progress towards achieving the safety performance targets, through their adherence to the TPOs policies, programs, and standards related to safety.

#### **MIAMI-DADE TPO**

**TRANSPORTATION IMPROVEMENT PLAN** — In total, the 2025-2029 TIP includes \$108M programmed on 102 projects that improve safety and to support the achievement of the established safety targets. The 2025-2029 TIP is located on the internet at: <a href="http://www.interactip.com/">http://www.interactip.com/</a>.

This includes Safe Routes to School projects, pedestrian safety projects, intersection safety projects and safety pushbutton projects. The Safety Performance Management Measures are incorporated into the 2025-2029 TIP to continue to advance transportation safety and link our investments to achieve our safety targets.

# **Safety Projects**

#### LONG RANGE TRANSPORTATION PLAN

The Miami-Dade 2045 LRTP increases the safety of the transportation system for motorized and non-motorized users as required. The LRTP aligns with the Florida SHSP and the FDOT HSIP with specific strategies to improve safety performance focused on prioritized safety projects, pedestrian and/or bicycle safety enhancements, and traffic operation improvements to address the goal to reduce fatalities and serious injuries. The TPO's commitment to safety is emphasized through the 2045 LRTP Goal to Increase the Safety of the Transportation System for All Users, which includes the following objectives:

- Improve the safety of the transportation system,
- Promote projects in high crash locations, and
- Improve safety of the transportation system of the elderly and disabled.

There are over 100 projects listed in the 2045 LRTP that will help improve safety of the Miami-Dade transportation system, including: capacity and operational improvements, redesigns of roadway segments, transportation systems management and operation (TSM&O), roadway and access improvements, adding truck lanes, and reconstruction projects. For a complete list of projects, please see Chapter 7 of the Miami-Dade 2045 LRTP; <a href="https://miamidade2045lrtp.com/">https://miamidade2045lrtp.com/</a>.

The 2045 Miami-Dade Bicycle Pedestrian Master Plan serves as the non-motorized transportation element of the 2045 LRTP. The vision of the 2045 Miami-Dade Bicycle Pedestrian Master Plan is to enhance the accessibility, safety, public health, social equity, environment, and overall quality of life within Miami-Dade County by creating interconnected bicycle and pedestrian friendly communities throughout the county—with safety being a key component of the plan. A snapshot of the number of projects by Priority, improvement type, and funding allocation by priority and phase from the 2045 LRTP are summarized in **Figure 5: Bicycle/Pedestrian Projects by Improvement Type and Priority** and **Figure 6: Allocation of Bicycle/Pedestrian Funding by Priority and Phase (Thousands YOE \$)** on the next page. The 2045 Bicycle Pedestrian Master Plan can be located at: <a href="http://miamidadetpo.org/library/plans/miami-dade-2045-bicycle-pedestrian-master-plan-2019-09.pdf">http://miamidadetpo.org/library/plans/miami-dade-2045-bicycle-pedestrian-master-plan-2019-09.pdf</a>.

For additional information on the Miami-Dade 2045 LRTP, please see the Miami-Dade 2045 Long Range Transportation Section of this report starting on page PM-71.

Figure 6: Allocation of Bicycle/Pedestrian Funding by Priority Period and Phase (Thousands YOE \$)

# **UNIFIED PLANNING WORK PROGRAM (UPWP)**

The Miami-Dade TPO Unified Planning Work Program (UPWP) for Transportation Planning Activities, Fiscal Years 2024/2025, outlines the planning projects the TPO will undertake to improve Miami-Dade County's multimodal transportation system. The UPWP identifies the planning projects budgets and activities that support the comprehensive and multimodal transportation improvement program approved for the metropolitan area in the 2045 LRTP. The planning efforts in the UPWP must implement the transportation priorities in the County Comprehensive Plan, which are based on the goals from the 2045 LRTP—inclusive of improving the safety of the transportation system for all users. Safety is addressed specifically in the Aging Road Users Strategic Safety Plan, Municipal Grant Program - South Miami Pedestrian Safety and Mobility Infrastructure Improvement Plan, and several Safe Routes to School tasks. Safety is also woven into many tasks that address safety improvements for trucking and goods movement and improving bicycle and pedestrian safety.

## SMART MOVES PROGRAM: CONNECTING SMART IDEAS

The SMART Moves Program will be used by the TPO to prioritize and program planning studies in Miami-Dade that will support the delivery of projects including complete streets, first/last mile connections, connected and autonomous vehicles, and other priority projects that enhance connectivity, accessibility, and integration of the entire transportation system.

The SMART Moves Program can potentially utilize federal funding that is the responsibility of the TPO (such as Metropolitan Planning Funds (PL), Federal Transit Administration Section 5305(d) Funds, Congestion Mitigation for Air Quality (CMAQ), Surface Transportation Block Grant Program, etc.). This process will involve a once-a-year call for all local roadway, transit, freight, bicycle and pedestrian projects, and will result in an annual portfolio of projects in the UPWP.

The SMART Moves Program has two components:

- 1. Call for SMART Ideas: Connecting SMART Ideas to collect the public's input.
- 2. Application from Municipalities, which provides a mechanism to partner with local agencies for the implementation of projects.

#### **PROGRAM OBJECTIVES**

- Provide a mechanism for the TPO to partner with local agencies in the implementation of projects that will support complete streets, first/last mile connections, connected and autonomous vehicles and the SMART Plan.
- Develop a holistic approach for identifying and prioritizing highly effective transportation projects.
- Assist local agencies with delivery of multimodal projects that support transportation priorities in Miami-Dade County.
- Create a tracking system to monitor project status and expenditure of programmed funds.

#### **VISION ZERO**

The TPO's Vision Zero Plan was completed in June 2018 and is currently being implemented by DTPW. Vision Zero is a systematic approach to implementing safety countermeasures and policies to reduce, and ultimately eliminate fatalities and serious injuries related to mobility in Miami-Dade County. This Plan is based on a significant Data Collection effort to determine high-crash locations. Among the data collected are: Miami-Dade crashes; traffic fatality data from the Florida Department of Health (DOH); and current vehicular volumes, bicycle and pedestrian counts, and transit ridership data. Crash data provide details on: location, crash type and contributing causes; vehicle information, such as mode, vehicle type and speed; and occupant information, such as numbers of fatalities and injuries, ages and impairment. Based on the data analyses, safety countermeasures were identified. The recommendations include short- and long-term, location-specific actions that address both crash prevention and injury reduction. A subset of priority projects has been identified for rapid implementation. Links to Vision Zero documents can be found here:

Miami-Dade TPO 2018 Vision Zero Report: http://www.miamidadetpo.org/library/studies/miami-dade-county-vision-zero-plan-2018-06.pdf

#### **FDOT**

# **BICYCLE/PEDESTRIAN CORRIDOR IMPROVEMENTS**

The bicycle/pedestrian network is a component of the overall transportation system. FDOT evaluates bicycle and pedestrian improvements in conjunction with capacity and resurfacing projects. Bicycle and pedestrian projects are also implemented by local agencies, who oversee construction and management. In addition, some projects are funded through the federally funded Transportation Alternatives Program (TAP) or the state funded Shared Use Non-motorized (SUN) Trail Program. FDOT is also in the process of developing a Bicycle Network Connectivity Assessment that is aimed to assess and inventory the Existing and Planned Bicycle Network and incorporate new potential corridors within a plan to improve the connectivity, accessibility, and safety of cyclists within Miami-Dade County. This assessment is placing a significant focus on the greenways and trails which will act as the centerpiece for which all other connections (existing, upcoming, previously planned, and new proposed projects determined through this process) will be viewed. The result of this assessment will be a detailed action plan containing proposed projects that will improve the safety and comfort of cycling throughout the County.

#### SAFE ROUTES TO SCHOOL

Florida's Safe Routes to School (SRTS) program is designed to help communities address school transportation safety needs and to encourage students to walk or ride their bicycle to school. The program encourages children to walk and bike to school by making walking and biking safe and appealing. The SRTS program integrates safety, traffic relief, health, environmental

awareness and physical activity and fitness within a single program that is aimed at increasing walking and bicycling to school safely. The TPO annually works with Miami-Dade County Public Schools, Miami-Dade County Department of Transportation and Public Works and other agencies to submit applications to FDOT to obtain SRTS funding in future years. From 2005 to the 2022/23 cycle, the TPO and its partners have submitted applications for 153 schools with \$19.9 million in funding been awarded for infrastructure improvements. FDOT's commits \$7 million statewide annually to the SRTS program. FDOT has currently placed a pause on the SRTS program for the 2023/24 cycle.

#### **COMPLETE STREETS PROJECTS**

FDOT's Complete Streets Policy, adopted in September 2014, promotes safety, quality of life, and economic development. FDOT developed the Complete Streets Implementation Plan in partnership with the national not-for-profit organization Smart Growth America to guide FDOT's efforts to implement its Complete Streets Policy. The Plan recommended a five-part implementation framework for integrating a Complete Streets approach into FDOT's practices to ensure that future transportation decisions and investments address the needs of all users of the transportation system and is responsive to community goals and context. The Plan also proposed a two-year schedule for Complete Streets Implementation, including: (1) revising guidance, standards, manuals, policies, and other documents; (2) updating decision-making processes; (3) modifying approaches for measuring performance; (4) managing internal and external communication and collaboration during implementation; and (5) providing ongoing education and training.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

# SYSTEM PERFORMANCE REPORT INFRASTRUCTURE: PAVEMENT AND BRIDGE

# **INFRASTRUCTURE (PAVEMENT & BRIDGE) PERFORMANCE MANAGEMENT MEASURES**

Infrastructure Condition is the second national goal identified in MAP-21 and maintained in the FAST Act. In January 2017, the Federal Highway Administration published a Final Rule in the Federal Register entitled "National Performance Management Measures: Assessing Pavement Condition for the National Highway Performance Program and Bridge Condition for the National Highway Performance Program," that included National Performance Management Measures to evaluate the pavement and bridge conditions on the National Highway System (NHS) [23 CFR § 490]. The Infrastructure Rule became effective on February 17, 2017.

#### PERFORMANCE MANAGEMENT MEASURES

The Infrastructure Rule requires State DOTs and MPOs to set targets for the following Infrastructure Performance Management Measures for the Interstate System and Non-Interstate NHS, and to report on progress toward achieving those targets. State DOTs report progress to FHWA, while MPOs report progress to their State DOT. FDOT's 2017 Initial Transportation Asset Management Plan (TAMP) was released on April 30, 2018 and is the basis for setting the Transportation Performance Measure targets for pavement and bridge condition required by the performance management regulations in 23 CFR 490. The TAMP was later updated on June 28, 2019. <a href="https://fdotwww.blob.core.windows.net/sitefinity/docs/default-source/planning/performance/fdot-transportation-asset-management-plan (june-28-2019).pdf?sfvrsn=36c94a6b\_2</a>

In determining its approach to establishing performance targets for the federal pavement and bridge condition performance measures, FDOT considered many factors. To begin with, FDOT is mandated by Florida Statute 334.046 to preserve the state's pavement and bridges to specific standards. To adhere to the statutory guidelines, FDOT prioritizes funding allocations to ensure the current transportation system is adequately preserved and maintained before funding is allocated for capacity improvements. These statutory guidelines envelope the statewide federal targets that have been established for pavements and bridges.

In addition, MAP-21 requires FDOT to develop a Transportation Asset Management Plan (TAMP) for all NHS pavements and bridges within the state. The TAMP must include investment strategies leading to a program of projects that would make progress toward achievement of the state DOT targets for asset condition and performance of the NHS. FDOT's TAMP was updated to reflect MAP-21 requirements in 2018.

Further, the federal pavement condition measures require a new methodology that is a departure from the methods currently used by FDOT and uses different ratings and pavement segment lengths. For bridge condition, the performance is measured in deck area under the federal measure, while the FDOT programs its bridge repair or replacement work on a bridge by bridge basis. As such, the federal measures are not directly comparable to the methods that are most familiar to FDOT.

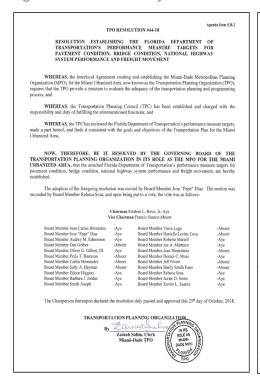

In consideration of these differences, as well as other unknowns and unfamiliarity associated with the new required processes, FDOT took a conservative approach when establishing its initial pavement and bridge condition targets. It is the intent of FDOT to meet or exceed the established performance targets.

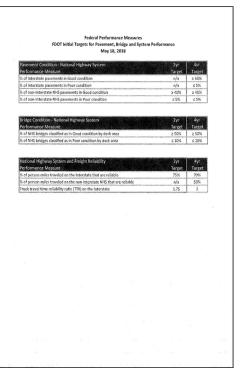

For the First Performance Period (January 1, 2018 to December 31, 2021) FDOT established the 2-year (end of calendar year 2019) and 4-year (end of calendar year 2021) performance targets for bridge and, pavement conditions on May 18, 2018.

#### PERFORMANCE TARGETS

By Resolution 44-18 on October 25, 2018 (illustrated in **Figure 7 – TPO Resolution System Performance Measures Targets**), the TPO Governing Board agreed to support FDOT's statewide pavement and bridge performance targets. By adopting these targets, the TPO will support achievement of the pavement and bridge targets by planning and programing projects in the TIP and LRTP that once implemented, are anticipated to make progress toward achieving the statewide targets.

Figure 7: TPO Resolution System Performance Measures Targets

For the Second Performance Period (January 1, 2022 to December 31, 2025) FDOT established 2023 and 2025 targets for NHS bridge and pavement on December 16, 2022 (FHWA changed the due date from October 1, 2022 due to a technical issue with the reporting system). These targets are identical to those set for 2019 and 2021 respectively. Florida's performance through 2021 exceeds the targets.

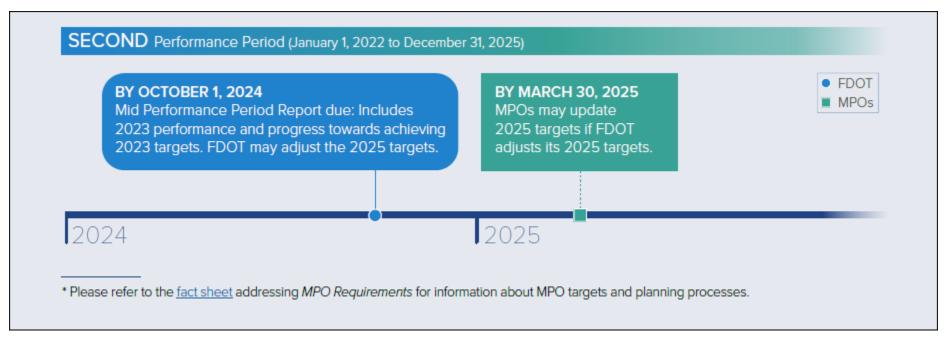

# National Performance Management Measures to Assess Pavement Condition (23 CFR 490.307)

| PERFORMANCE MEASURE                                 | 2023 TARGET | 2025 TARGET |
|---|-------------|-------------|
| % of Interstate Pavements in Good Condition         | ≥ 60%       | ≥ 60%       |
| % of Interstate Pavements in Poor Condition         | ≤ 5%        | ≤ 5%        |
| % of Non-Interstate NHS Pavements in Good Condition | ≥ 40%       | ≥ 40%       |
| % of Non-Interstate NHS Pavements in Poor Condition | ≥ 5%        | ≥ 5%        |

# National Performance Management Measures to Assess Bridge Condition (23 CFR 490.407)

| PERFORMANCE MEASURE   | 2023 TARGET | 2025 TARGET |  |
|---|-------------|-------------|--|
| % of NHS Bridges Classified As in Good Condition by Deck Area | ≥ 50%       | ≥ 50%       |  |
| % of NHS Bridges Classified As in Poor Condition by Deck Area | ≤ 10%       | ≤ 10%       |  |

The timeline for the Second Performance Period is illustrated below (source FDOT):

MPOs were to set 2025 targets by June 14, 2023 (within 180 days after FDOT set the statewide targets) and have the option of supporting the statewide targets or establishing their own targets for the MPO planning area.

The TIP must include the most recent reported performance and targets as well as a description of how the investments contribute to achieving the targets. The LRTP must include a System Performance Report that discusses performance and the progress achieved in meeting targets.

### **PERFORMANCE TARGETS**

By Resolution #20-2023 on April 20, 2023 (**illustrated in Figure 8: TPO Resolution – System Performance Measures Targets**), the TPO Governing Board agreed to continue to support FDOT's statewide pavement and bridge performance targets. By adopting these targets, the TPO will support achievement of the pavement and bridge targets by planning and programing projects in the TIP and LRTP that once implemented, are anticipated to make progress toward achieving the statewide targets.

Figure 8: TPO Resolution – System Performance Measures Targets

Agenda Item 5.B.6

### TPO RESOLUTION #20-2023

### RESOLUTION ESTABLISHING OF THE FLORIDA DEPARTMENT OF TRANSPORTATION'S 2023 AND 2025 BRIDGE/PAVEMENT AND SYSTEM PERFORMANCE MEASURES TARGETS

WHEREAS, the Interlocal Agreement creating and establishing the Metropolitan Planning Organization (MPO) for the Miami Urbanized Area requires that the Miami-Dade Transportation Planning Organization (TPO), in its role as the MPO, provides a structure to evaluate the adequacy of the transportation planning and programming process; and

WHEREAS, the Transportation Planning Council (TPC) has been established and charged with the responsibility and duty of fulfilling the aforementioned functions; and

WHEREAS, the TPC has reviewed the Florida Department of Transportation's performance measure targets, made a part hereof, and finds it consistent with the goals and objectives of the Transportation Plan for the Miami Urbanized Area.

NOW, THEREFORE, BE IT RESOLVED BY THE GOVERNING BOARD OF THE TRANSPORTATION PLANNING ORGANIZATION (TPO) IN ITS ROLE AS THE MPO FOR THE MIAMI URBANIZED AREA, that this Board hereby establishes the attached Florida Department of Transportation's 2023 and 2025 bridge/pavement and system performance measures targets.

The adoption of the foregoing resolution was moved by Vice Chairman Oliver G. Gilbert III. The motion was seconded by Board Member Marleine Bastien, and upon being put to a vote, the vote was as follows:

| Chairman Esteban Bovo, Jr.          | - Aye |
|-------------------------------------|-------|
| Vice Chairman Oliver G. Gilbert III | - Aye |

| Board Member Marleine Bastien      | - Ave                      | Board Member Eileen Higgins - Aye     |
|------------------------------------|----------------------------|---------------------------------------|
|                                    |                            |                                       |
| Board Member Juan Carlos Bermudez  | - Aye                      | Board Member Steven D. Losner - Aye   |
| Board Member Kevin M. Cabrera      | - Aye                      | Board Member Roberto Martell - Aye    |
| Board Member Danielle Cohen Higgin | is - Aye                   | Board Member Kionne L. McGhee - Aye   |
| Board Member Alix Desulme          | <ul> <li>Absent</li> </ul> | Board Member Raquel A. Regalado - Aye |
| Board Member Christi Fraga         | <ul> <li>Absent</li> </ul> | Board Member David Richardson - Aye   |
| Board Member Rene Garcia           | <ul> <li>Absent</li> </ul> | Board Member Anthony Rodriguez - Aye  |
| Board Member Roberto Gonzalez      | - Aye                      | Board Member Shelly Smith Fano - Aye  |
| Board Member Keon Hardemon         | <ul> <li>Absent</li> </ul> | Board Member Micky Steinberg - Absent |
| Board Member Rodney Harris         | - Aye                      | Board Member Francis Suarez - Absent  |

The Chairperson thereupon declared the resolution duly passed and approved this 20th day of April 2023.

### Federal Performance Measures FDOT Statewide Performance Management Targets

### Bridge and Pavement (PM2)

| Performance<br>Measure                                 | 2023<br>Target | 2025<br>Target |
|--|----------------|----------------|
| Bridge   |                |                |
| % of NHS bridges (by deck area)<br>in GOOD condition   | 50.0%          | 50.0%          |
| % of NHS bridges (by deck area)<br>in POOR condition   | 10.0%          | 10.0%          |
| Pavement   |                |                |
| % of Interstate pavements in<br>GOOD condition         | 60.0%          | 60.0%          |
| % of Interstate pavements in<br>POOR condition         | 5.0%           | 5.0%           |
| % of non-Interstate NHS<br>pavements in GOOD condition | 40.0%          | 40.0%          |
| % of non-Interstate NHS<br>pavements in POOR condition | 5.0%           | 5.0%           |

### System Performance (PM3)

|                                | 2023   | 2025   |
|--------------------------------|--------|--------|
| PERFORMANCE MEASURE            | TARGET | TARGET |
| INTERSTATE RELIABILITY         | 75.0%  | 70.0%  |
| NON-INTERSTATE NHS RELIABILITY | 50.0%  | 50.0%  |
| TRUCK RELIABILITY              | 1.75   | 2.00   |
|                                |        |        |

### ASSESSING PAVEMENT CONDITION FOR THE NATIONAL HIGHWAY PERFORMANCE PROGRAM

State DOTs are required to collect performance measure data on the Interstate and Non-Interstate NHS and report it to the Highway Performance Monitoring System (HPMS). The Final Rule required State DOTs to submit a Data Quality Management Program plan to FHWA for approval by May 20, 2018. The Data Quality Management Program plan must include the State's methods for identifying (i) how data collection equipment is calibrated and certified; (ii) how persons performing the data collection are certified; (iii) how quality control measures are implemented before, during and after the data is collected; (iv) how sampling, review and checking of the data is conducted; and (v) what procedures are used to resolve errors, along with criteria used to accept data [23 CFR § 490.319]. Once the State's Data Quality Management Program has been approved by FHWA, State DOTs shall use the program to collect and report performance measure data to assess the State's overall pavement condition.

For each pavement metric, a threshold is used to establish good, fair, or poor condition. Pavement condition is assessed for each 0.1-mile section of the through travel lanes of mainline highways on the Interstate or the non-Interstate NHS using these metrics and thresholds. A pavement section is rated as good if all three metric ratings are good, and poor if two or more metric ratings are poor. Sections that are not good or poor are considered fair.

The good/poor measures are expressed as a percentage and are determined by summing the total lane-miles of good or poor highway segments and dividing by the total lane-miles of all highway segments on the applicable system. Pavement in good condition suggests that no major investment is needed and should be considered for preservation treatment. Pavement in poor condition suggests major reconstruction investment is needed due to either ride quality or a structural deficiency.

The Pavement Condition Metrics used for the evaluation include:

Figure 9: Pavement Condition Metric Thresholds

| Rating                  | Good  | Fair   | Poor              |
|-------------------------|-------|--|-------------------|
| IRI<br>(inches/mile)    | <95   | 95-170                                       | >170              |
| PSR*<br>(0.0-5.0 value) | ≥4.0  | 2.0-4.0                                      | ≤2.0              |
| Cracking Percent        | <5    | CRCP: 5-10<br>Jointed: 5-15<br>Asphalt: 5-20 | >10<br>>15<br>>20 |
| Rutting (inches)        | <0.20 | 0.20-0.40                                    | >0.40             |
| Faulting (inches)       | <0.10 | 0.10-0.15                                    | >0.15             |

\*PSR may be used only on routes with posted speed limit < 40mph

Source: FHWA

- International Roughness Index (IRI) an indicator of roughness; applicable to all asphalt and concrete pavements;
- Cracking percent percentage of the pavement surface exhibiting cracking; applicable to all asphalt and concrete pavements;
- Rutting extent of surface depressions; applicable to asphalt pavements;
- Faulting vertical misalignment of pavement joints; applicable to certain types of concrete pavements; and
- Present Serviceability Rating (PSR) a quality rating applicable only to certain lower speed roads (may be use on roadways with a posted speed limit of less than 40 Miles per Hour (MPH).

"These metrics collectively provide a way to quantify pavement condition in terms of roughness and cracking for all pavement types, rutting for asphalt pavement surfaces, and faulting (misalignment between concrete slabs) for jointed concrete pavement surfaces," [23 CFR § 490]. The Pavement Condition Metric Thresholds can be seen in **Figure 9: Pavement Condition Metric Thresholds.** 

Pavement condition is assessed for each 0.1-mile section of the through travel lanes of mainline highways on the Interstate or the non-Interstate NHS using these metrics and thresholds. A pavement section is rated as good if all three metric ratings are good, and poor if two or more metric ratings are poor. Sections that are not good or poor are considered fair.

The good/poor measures are expressed as a percentage and are determined by summing the total lane-miles of good or poor highway segments and dividing by the total lane-miles of all highway segments on the applicable system. Pavement in good condition suggests that no major investment is needed and should be considered for preservation treatment. Pavement in poor condition suggests major reconstruction investment is needed due to either ride quality or a structural deficiency.

### ASSESSING BRIDGE CONDITION FOR THE NATIONAL HIGHWAY PERFORMANCE PROGRAM

State DOTs, Federal agencies, and Tribal Governments are required to annually submit bridge inventory data to FHWA using the National Bridge Inspection Standards (NBIS). The data is reported in the National Bridge Inventory (NBI) Database, and includes data on bridge Deck, Superstructure, Substructure, and Culverts. State DOTs are required to submit their most recent NBI data by March 15th of each year. Under the Infrastructure National Performance Management Measures Final Rule, these metrics will be used to assess overall bridge condition. The Final Rule applies to all bridges on the NHS, including bridge on-ramps and off-ramps that are connected to the NHS. The condition metric thresholds used to evaluate bridges can be seen in **Figure 10: Bridge Condition Metric Thresholds**.

If any of the metrics are less than or equal to 4 on the NBI rating scale, the bridge is considered structurally deficient. A bridge in good condition suggest that no major investment is needed. A bridge in poor condition is safe to drive on however, it is nearing a point where substantial reconstruction or replacement is needed. "FHWA shall calculate a ratio of the total deck area of all bridges classified as Structurally Deficient to the total deck area of all applicable bridges for each state," [23 CFR § 490]. If 10 percent or less of the total deck area of bridges in the state are classified as structurally deficient, then the state has met the minimum condition level. If the state does not meet the minimum condition level for a period of 3 consecutive years, they must dedicate NHPP funds to eligible NHS bridge projects.

**BASELINE CONDITIONS** — For the First Performance Period (January 1, 2018, to December 31, 2021) FDOT established the 2-year (end of calendar year 2019) and 4-year (end of calendar year 2021) performance targets for bridge and, pavement conditions on May 18, 2018.

For the Second Performance Period (January 1, 2022, to December 31, 2025) FDOT established 2023 and 2025 targets for NHS bridge and pavement on December 16, 2022 (FHWA changed the due date from October 1, 2022, due to a technical issue with the reporting system). These targets are identical to those set for 2019 and 2021 respectively. Florida's performance through 2021 exceeds the targets.

The baseline conditions for pavement condition for Florida and for Miami-Dade County are shown in **Table 4 Baseline Pavement Condition Performance Management Measures 2017 (Baseline), and 2020 thru 2022.** The baseline conditions for bridge condition are shown in **Table 5: Baseline Bridge Condition Performance Management Measures 2018, and 2020 thru 2022.** 

Figure 10: Bridge Condition Metric Thresholds

| NBI Rating Scale<br>(from 0 – 9) | 9 8 7<br>Good | 6 5<br>Fair | 4 3 2 1 0<br>Poor |
|----------------------------------|---------------|-------------|-------------------|
| Deck<br>(Item 58)                | ≥7            | 5 or 6      | ≤4                |
| Superstructure (Item 59)         | ≥ 7           | 5 or 6      | ≤ 4               |
| Substructure (Item 60)           | ≥ 7           | 5 or 6      | ≤ 4               |
| Culvert                          | ≥ 7           | 5 or 6      | ≤ 4               |

|   |         |            |  |         |                  |  |         |            |         |            |
| % of Pavements on the Interstate System in GOOD condition     | 67.5%   | 68.6%      |  | 68.8%   | 74.6%            |  | 70.5%   | 77.7%      | 73.4%   | 74.5%      |
| % of Pavements on the Interstate System in POOR condition     | 0.0%    | 0.0%       |  | 0.6%    | 0.2%             |  | 0.3%    | 0.0%       | 0.2%    | 0.0%       |
| % of Pavements on the non-interstate System in GOOD condition | 44.0%   | 45.7%      |  | n/a     | n/a              |  | 47.5%   | 48.9%      | 48.8%   | 53.3%      |
| % of Pavements on the non-interstate System in POOR condition | 0.5%    | 0.6%       |  | n/a     | n/a              |  | 0.6%    | 0.3%       | 0.6%    | 46.4%      |
|   |         |            |  |         |                  |  |         |            |         |            |

\* From FDOT: Non-Interstate data contract was delayed so valid data not collected in 2020, the entire non-Interstate data set was collected in 2021 to meet the biannual reporting requirment.

Table 5: Baseline Bridge Condition Performance Management Measures 2018, and 2020 thru 2022

| BRIDGE CONDITIONS  |         |            |         |            |         |            |         |            |
|--|---------|------------|---------|------------|---------|------------|---------|------------|
|  | 2018 (  | Baseline)  |         | 2020       | 2       | 021        | 2       | 2022       |
| BRIDGE CONDITION   | Florida | Miami-Dade | Florida | Miami-Dade | Florida | Miami-Dade | Florida | Miami-Dade |
| % of NHS Bridges (by deck area) classified in GOOD condition | 66.6%   | 84.0%      | 74.2%   | 83.9%      | 72.7%   | 81.6%      | 71.0%   | 80.3%      |
| % of NHS Bridges (by deck area) classified in POOR condition | 1.2%    | 0.4%       | 0.5%    | 0.2%       | 0.7%    | 0.1%       | 0.9%    | 0.1%       |
| Source: FDOT   |         |            |         |            |         |            |         |            |

For the First Performance Period (January 1, 2018, to December 31, 2021) FDOT established the 2-year (end of calendar year 2019) and 4-year (end of calendar year 2021) performance targets for bridge and, pavement conditions on May 18, 2018.

For the Second Performance Period (January 1, 2022, to December 31, 2025) FDOT established 2023 and 2025 targets for NHS bridge and pavement on December 16, 2022 (FHWA changed the due date from October 1, 2022 due to a technical issue with the reporting system). These targets are identical to those set for 2019 and 2021 respectively. Florida's performance through 2021 exceeds the targets.

**ASSESSMENT OF SIGNIFICANT STATE PROGRESS** — FHWA will determine if FDOT has made significant progress toward the achievement of each 2-year or 4-year statewide target if either:

- The actual condition/performance level is better than the baseline performance; or
- The actual performance level is equal to or better than the established target.

FHWA's determination of significant progress toward the 2021 bridge and pavement targets is anticipated in March 2023. FHWA will not assess MPO target achievement. However, FHWA and FTA will review MPO adherence to performance management requirements as part of periodic transportation planning process reviews.

**MINIMUM CONDITIONS** — Every year, FHWA will assess if FDOT is meeting federal minimum condition standards for NHS bridges and Interstate pavements. If it is not, FDOT must obligate a specified percentage of available funds for maintenance of these facilities.

FDOT is on track to meet Minimum Condition Standards

- Bridge: No more than 10 percent of total deck area of NHS bridges classified as Structurally Deficient (Poor condition) for three consecutive years.
- Pavement: No more than 5 percent of the Interstate System in Poor condition for most recent year.

### **COORDINATION WITH STATEWIDE PLANS AND PROCESSES**

The TPO recognizes the importance of linking goals, objectives, and investment priorities to established performance objectives, and that this link is critical to the achievement of national transportation goals and statewide and regional performance targets. As such, the Miami-Dade 2045 LRTP reflects the goals, objectives, performance measures, and targets as they are described in other state and public transportation plans and processes, including the Florida Transportation Plan (FTP) and the Florida Transportation Asset Management Plan.

- The FTP is the single overarching statewide plan guiding Florida's transportation future. It defines the state's long-range transportation vision, goals, and objectives and establishes the policy framework for the expenditure of state and federal funds flowing through FDOT's work program. One of the seven goals defined in the FTP is Agile, Resilient, and Quality infrastructure.
- The Florida Transportation Asset Management Plan (TAMP) explains the processes and policies affecting pavement and bridge condition and performance in the state. It presents a strategic and systematic process of operating, maintaining, and improving these assets effectively throughout their life cycle.

### CONTRIBUTIONS TO ACHIEVING PAVEMENT & BRIDGE PERFORMANCE TARGETS

The TPO and FDOT are committed to ensuring the pavement and bridge condition in Miami-Dade County achieves the identified targets. The TPO has many programs, initiatives, and projects identified in the TIP and the LRTP to address pavement and bridge condition in Miami-Dade County. FDOT's key plan is its Work Program. The TPO and FDOT coordinate their plans and programs to maintain an acceptable pavement and bridge condition of the Miami-Dade transportation system.

"The TIP shall reflect the investment priorities established in the current metropolitan transportation plan . . ." (23 CFR 450.326). The transportation plan (LRTP) "shall include both long-range strategies/actions that provide for the development of an integrated multimodal system..." (23 CFR 450.24). The TIP considers potential projects that fall into specific investment priorities established by the TPO in the LRTP including the goal to Improve and Preserve the Existing Transportation System. This process evaluates projects that have an anticipated effect on improving pavement and bridge conditions.

### **MIAMI-DADE TPO**

**TRANSPORTATION IMPROVEMENT PLAN** — A preliminary review of the FY 2024/2025 to FY 2028/2029 TIP includes 29 projects totaling\$110M in Pavement and 24 projects totaling \$169M in Bridge Improvement Projects. The FY 2024/2025 to FY 2028/2029 TIP is located on the internet at: <a href="http://www.interactip.com/">http://www.interactip.com/</a>

This includes Safe Routes to School projects, pedestrian safety projects, intersection safety projects and safety pushbutton projects. The Pavement and Bridge Performance Management Measures are incorporated into the 2024/2025 to 2028/2029 TIP to continue to assess and preserve infrastructure investments to achieve our pavement and bridge targets. The projects identified as contributing to the achievement of Miami-Dade County's pavement and bridge performance targets are listed in the table below:

### **NHS Pavement Projects**

| Non-Interstate NHS Projects |  |   |                    |               |                |  |
|-----------------------------|--|---|--------------------|---------------|----------------|--|

**LONG RANGE TRANSPORTATION PLAN** — The Miami-Dade 2045 LRTP seeks to address system preservation, identifies infrastructure needs within the metropolitan planning area, and provides funding for targeted improvements. The TPOs commitment to Pavement and Bridge Performance is emphasized through the 2045 LRTP Goal to Improve and Preserve the Existing Transportation System, which includes the following objectives:

- Improve the resiliency/reliability of the transportation system,
- Reduce the vulnerability and increase the resilience of critical infrastructure to the impacts and events.
- Preserve infrastructure (sustainability and resilience), and
- Site and design new transportation infrastructure to minimize exposure to sea level rise within the infrastructure life span, based on the Southeast

Florida Regional Climate Change Compact's 2015 Unified Seal Level Rise Projection.

Projects listed in the 2045 LRTP that contribute to pavement and bridge improvements are incorporated with capacity improvement projects. For a complete list of projects, please see Chapter 7 of the Miami-Dade 2045 LRTP; <a href="https://miamidade2045lrtp.com/">https://miamidade2045lrtp.com/</a>.

For additional information on the Miami-Dade 2045 LRTP, please see the Miami-Dade 2045 Long Range Transportation Section of this report starting on page G-71.

### **ENDNOTES:**

i National Performance Management Measures: Pavement and Bridge Condition to Assess the National Highway Performance Program.US Department of Transportation, Federal Highway Administration. May 31, 2017. <a href="https://www.fhwa.dot.gov/tpm/rule/170531pm2.pdf">https://www.fhwa.dot.gov/tpm/rule/170531pm2.pdf</a>

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

# TRANSPORTATION PERFORMANCE MANAGEMENT SYSTEM PERFORMANCE REPORT SYSTEM & FREIGHT

### SYSTEM & FREIGHT PERFORMANCE MANAGEMENT MEASURES

Congestion Reduction, System Reliability, and Freight Movement and Economic Vitality are three of the seven national goals identified in MAP-21 and maintained in the FAST Act. In January 2017, FHWA issued a Final Rule for system performance/freight/Congestion Mitigation Air Quality (CMAQ), entitled "National Performance Management Measures; Assessing Performance of the National Highway System, Freight Movement on the Interstate System, and Congestion Mitigation and Air Quality Improvement Program," [23 CFR § 490]. The Rule went into effect on May 20, 2017, except for certain components of the greenhouse gas (GHG) measure, which went into effect as of September 28, 2017. Subsequently, FHWA repealed this performance management measure that assessed the percent change in tailpipe carbon dioxide (CO2) (Greenhouse Gas) emissions on the NHS Compared to the Calendar Year 2017, effective July 2, 2018.

### PERFORMANCE MANAGEMENT MEASURES

The Final Rule addresses the three areas as its name implies: performance, freight movement, and congestion/air quality. The Performance Management Measures under this rule will "assess the performance of the Interstate and non-Interstate National Highway System (NHS) for the purpose of carrying out the National Highway Performance Program (NHPP);" "freight movement on the Interstate System;" and "traffic congestion and on-road mobile source emissions for the purpose of carrying out the Congestion Mitigation and Air Quality (CMAQ) Program [23 CFR § 490]. State DOTs and MPOs are required to set targets for the Interstate System and Non-Interstate NHS, and to report on progress toward achieving those targets. State DOTs report progress to FHWA, while MPOs report progress to their State DOT. The CMAQ measures are limited to urbanized areas that are a part of a nonattainment or maintenance area for ozone, carbon monoxide, or particulate matter. Since Miami-Dade County and all of Florida is attainment for these three pollutants, the CMAQ Performance Management Measures do not apply.

For the First Performance Period (January 1, 2018, to December 31, 2021) FDOT established the 2-year (end of calendar year 2019) and 4-year (end of calendar year 2021) performance targets for, National Highway System performance and freight mobility on May 18, 2018.

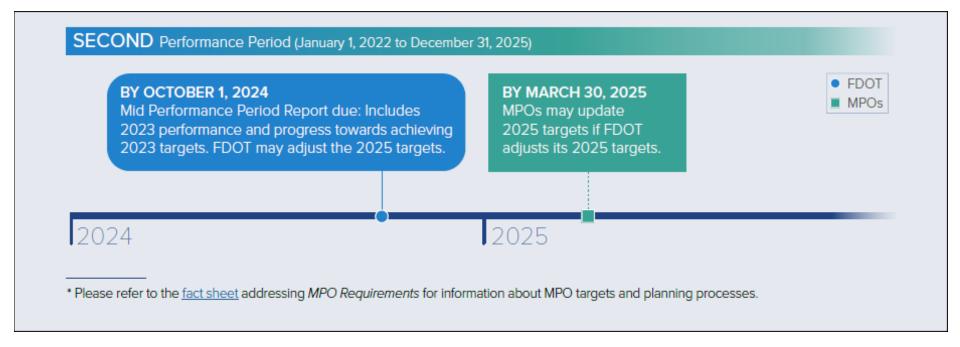

For the Second Performance Period (January 1, 2022, to December 31, 2025) FDOT established 2023 and 2025 targets for NHS bridge and pavement on December 16, 2022 (FHWA changed the due date from October 1, 2022, due to a technical issue with the reporting system). These targets are identical to those set for 2019 and 2021 respectively. Florida's performance through 2021 exceeds the targets.

National Performance Management Measures to Assess Performance of the NHS and Freight (23 CFR 490.507 and 490.607)

| PERFORMANCE MEASURE  | 2023 TARGET | 2025 TARGET |
|--|-------------|-------------|
| % of Person-Miles Traveled on the Interstate That Are Reliable | 75%         | 70%         |

| PERFORMANCE MEASURE  | 2023 TARGET | 2025 TARGET |
|--|-------------|-------------|
| % of Person-Miles Traveled on the Non-Interstate That Are Reliable | n/a         | 50%         |
| Truck Travel Time Reliability Ratio (TTR) on the Interstate        | 1.75        | 2.0         |

The timeline for the Second Performance Period is illustrated below (source FDOT):

MPOs were to set 2025 targets by June 14, 2023 (within 180 days after FDOT set the statewide targets) and have the option of supporting the statewide targets or establishing their own targets for the MPO planning area.

The TIP must include the most recent reported performance and targets as well as a description of how the investments contribute to achieving the targets. The LRTP must include a System Performance Report that discusses performance and the progress achieved in meeting targets.

### PERFORMANCE TARGETS

By Resolution #20-2023 on April 20, 2023 (illustrated in Figure 11: TPO Resolution – System Performance Measures Targets), the TPO Governing Board agreed to continue to support FDOT's statewide pavement and bridge performance targets. By adopting these targets, the TPO will support achievement of the pavement and bridge targets by planning and programing projects in the TIP and LRTP that once implemented, are anticipated to make progress toward achieving the statewide targets.

### ASSESSING PERFORMANCE OF THE NATIONAL HIGHWAY SYSTEM

Travel Time Reliability is used to report the percent of person-miles traveled that are reliable on the Interstate and Non-Interstate NHS. "Data to reflect the users can include bus, auto, and truck occupancy levels." ii The Level of Travel Time Reliability (LOTTR) is defined as:

$$\frac{\text{Longer Travel Time (80th)}}{\text{Normal Travel Time (50th)}} = \frac{\text{\# seconds}}{\text{\# seconds}} = \text{Level of Travel Time Reliability Ratio}$$

Data for the LOTT metric is collected in 15-minute increments during four time periods for each reporting segment:

- Monday Friday
  - -6:00 AM 10:00 AM
  - 10:00 AM 4:00 PM
  - -4.00 PM 8.00 PM
- 6:00 AM Saturday 8:00 PM Sunday

States and MPOs in coordination will define the reporting segments, and they must be continuous on the mainline highway. Starting in 2018, State DOTs are required to report the "LOTTR metrics and the corresponding 80th and 50th percentile times for each time period and directional AADT for each reporting segment by June 15th of each year, for the previous year's measures," "to the Highway Performance Monitoring System (HPMS). The LOTTR ratio for each segment must be below a 1.50 during all four time periods, otherwise the segment is not considered reliable."

The Interstate Travel Time Reliability and Non-Interstate NHS Travel Time Reliability are reported to the nearest tenth of a percent. The formula for calculating Travel Time Reliability is:

$$100 \times \frac{\sum_{i=1}^{R} SL_{i} \times AV_{i} \times OF_{j}}{\sum_{i=1}^{T} SL_{i} \times AV_{i} \times OF_{j}}$$

### Where:

R = total number of Interstate (Non-Interstate NHS) System reporting segments that are exhibiting an LOTTR below 1.50 during all of the time periods identified in § 490.511(b)(1)(i) through (iv);

I = Interstate (Non-Interstate NHS) System reporting segment "i";

SLi = length, to the nearest thousandth of a mile, of Interstate (Non-Interstate NHS) System reporting segment "i"; AVi = total annual traffic volume to the nearest single vehicle, of the Interstate (Non-Interstate) System reporting segment "i";

J = geographic area in which the reporting segment "i" is located where a unique occupancy factor has been determined; OFi = occupancy factor for vehicles on the NHS within a specified geographic area within the State/Metropolitan planning area; and

T = total number of Interstate (Non-Interstate NHS) System reporting segments.

### ASSESSING FREIGHT MOVEMENT ON THE INTERSTATE SYSTEM

Freight movement on the Interstate is assessed using the Truck Travel Time Reliability (TTTR) Index also known as the Freight Reliability Measure. The TTTR Index metric is defined as:

$$\frac{\text{Longer Truck Travel Time (95th)}}{\text{Normal Truck Travel Time (50th)}} = \frac{\text{\# seconds}}{\text{\# seconds}} = \text{Truck Travel Time Reliability (TTTR) Ratio}$$

Data for the Truck Travel Time Reliability (TTTR) metric is collected during five time periods for each reporting section:

- Monday Friday
- Morning peak (6:00 AM -10:00 AM)

Æ Midday (10:00 AM – 4:00 PM)

- Afternoon peak (4:00 PM 8:00 PM)
- Weekends (6:00 AM 8:00 PM)
- Overnights for all days (8:00 PM 6:00 AM)

Starting in 2018, State DOTs are required to report the "TTTR metrics and the corresponding 95th and 50th percentile times for each time period and each reporting segment by June 15th of each year, for the previous year's measures," iii to the HPMS. The Truck Travel Time Reliability is reported to the nearest hundredth. The formula for calculating Truck Travel Time Reliability is:

$$\frac{\sum_{i=1}^{T} (SL_i \times \max TTTR_i)}{\sum_{i=1}^{T} (SL_i)}$$

Where:

i = An Interstate System reporting segment;

maxTTTRi = The maximum TTTR of the five time periods in paragraphs (a)(1)(i) through (v) of § 490.611, to the nearest hundredth, of Interstate System reporting segment "i"; SLi = Segment length, to the nearest thousandth of a mile, of Interstate System reporting segment "i"; and

T= A total number of Interstate System reporting segments.

### **BASELINE CONDITIONS**

On January 1, 2018, the first 4-year performance period for the System & Freight National Performance Management Measures began.

For the Second Performance Period (January 1, 2022 to December 31, 2025) FDOT established the 2023 and 2025 targets on December 16, 2022. These targets are identical to those set for 2019 and 2021, respectively. Florida's performance through 2021 exceeds the targets.

MPOs were to set 2025 targets by June 14, 2023 (within 180 days after FDOT set the statewide targets) and have the option of supporting the statewide targets or establishing their own targets for the MPO planning area. The TIP must include the most recent reported performance and targets as well as a description of how the investments contribute to achieving the targets. The LRTP must include a System Performance Report that discusses performance and the progress achieved in meeting targets.

The baseline conditions for NHS and freight mobility for Florida and Miami-Dade County are shown in Table 6: Baseline NHS and Freight Mobility Performance Management Measures 2017and 2020 thru 2022.

Table 6: Baseline NHS and Freight Mobility Performance Management Measures 2017 and 2020 thru 2022

| NHS AND I  | REIGHT MOB | LITY PERFORM | AN | Œ MANAGI | EMENT MEASU | RES     |            |         |            |
|--|------------|--------------|----|----------|-------------|---------|------------|---------|------------|
|  |            |              |    |          |             |         |            |         |            |
|  | 2017 (E    | Baseline)    |    | 20       | 020         | 2       | 2021       | 2       | 2022       |

|  |            |              |    |          |             |         |            |         |            |
| Source: FDOT   |            |              |    |          |             |         |            |         |            |

### ASSESSMENT OF SIGNIFICANT STATE PROGRESS

FHWA will determine if FDOT has made significant progress toward the achievement of each 2-year or 4-year statewide target if either:

- The actual condition/performance level is better than the baseline performance; or
- The actual performance level is equal to or better than the established target.

FHWA's determination of significant progress toward the 2021 interstate reliability and truck reliability targets is anticipated in March 2023. If FDOT does not make significant progress toward achieving a reliability target, it must document the actions it will take to achieve the target. For the truck reliability measure, it must provide additional freight congestion analysis and documentation.

FHWA will not assess MPO target achievement. However, FHWA and FTA will review MPO adherence to performance management requirements as part of periodic transportation planning process reviews.

### **COORDINATION WITH STATEWIDE PLANS AND PROCESSES**

The TPO recognizes the importance of linking goals, objectives, and investment priorities to established performance objectives, and that this link is critical to the achievement of national transportation goals and statewide and regional performance targets. As such, the Miami-Dade 2045 LRTP reflects the goals, objectives, performance measures, and targets as they are described in other state and public transportation plans and processes, including the Florida Transportation Plan (FTP) and the Florida Freight Mobility and Trade Plan.

- The FTP is the single overarching statewide plan guiding Florida's transportation future. It defines the state's long-range transportation vision, goals, and objectives and establishes the policy framework for the expenditure of state and federal funds flowing through FDOT's work program. One of the seven goals of the FTP is Efficient and Reliable Mobility for People and Freight.
- The Florida Freight Mobility and Trade Plan presents a comprehensive overview of the conditions of the freight system in the state, identifies key challenges and goals, provides project needs, and identifies funding sources. Truck reliability is specifically called forth in this plan, both as a need as well as a goal.

### CONTRIBUTIONS TO ACHIEVING SYSTEM & FREIGHT PERFORMANCE TARGETS

The TPO and FDOT are committed to ensuring the System and Freight performance in Miami-Dade County achieves the identified targets. The TPO has many programs, initiatives, and projects identified in the TIP and the LRTP to address system and freight performance in Miami-Dade County. FDOT's key plan is its Work Program. The TPO and FDOT coordinate their plans and programs to improve the reliability of the Miami-Dade transportation system, according to C.F.R. 450.332(b).

"The TIP shall reflect the investment priorities established in the current metropolitan transportation plan . . ." (23 CFR 450.326). The transportation plan (LRTP) "shall include both long-range strategies/actions that provide for the development of an integrated multimodal system..." (23 CFR 450.24). The TIP considers potential projects that fall into specific investment priorities established by the TPO in the LRTP. The TIP includes specific investment priorities that support the TPOs goals including improving system and travel, using a prioritization and project selection process established in the LRTP. This process evaluates projects that have an anticipated effect on improving the reliability of the NHS, Non-Interstate NHS, and truck travel time in Miami-Dade County.

### **MIAMI-DADE TPO**

**TRANSPORTATION IMPROVEMENT PLAN** — A preliminary review of the FY 2023/2024 to FY 2027/2028 TIP includes 25 projects totaling \$488M in projects that improve travel reliability. The FY 2023/2024 to FY 2027/2028 TIP is located on the internet at: <a href="http://www.interactip.com/">http://www.interactip.com/</a>. This includes capacity improvement and operational projects. The Pavement and Bridge Performance Management Measures are incorporated into the 2023/2024 to 2027/2028 TIP to continue to assess and preserve infrastructure investments to achieve our pavement and bridge targets. The projects identified as contributing to the achievement of Miami-Dade County's system and freight performance targets are listed in the table below:

**LONG RANGE TRANSPORTATION PLAN** — The Miami-Dade 2045 LRTP seeks to address system reliability and congestion mitigation through various means, including capacity expansion and operational improvements. The TPO's commitment to System and Freight Performance is emphasized through the 2045 LRTP Goal to Maximize Mobility Choices Systemwide, which includes the following objectives:

- Provide a comprehensive transportation network for dependable and reliable transportation options,
- Reduce congestion,
- Promote system reliability, and
- Increase mobility choices throughout the county.

There are over 60 projects listed in the 2045 LRTP that will help improve the system reliability of the Miami-Dade transportation system, including: implementation of the SMART Plan, other transit projects, and roadway capacity projects (widening and extensions) projects. For a complete list of projects, please see Chapter 7 of the Miami-Dade 2045 LRTP; <a href="https://miamidade2045lrtp.com/">https://miamidade2045lrtp.com/</a>.

For additional information on the Miami-Dade 2045 LRTP, please see the Miami-Dade 2045 Long Range Transportation Section of this report starting on page G-71.

# TRANSPORTATION PERFORMANCE MANAGEMENT SYSTEM PERFORMANCE REPORT TRANSIT ASSET MANAGEMENT

### TRANSIT ASSET MANAGEMENT

In July of 2016, FTA published the "Transit Asset Management; National Transit Database" Final Rule. The Transit Asset Management (TAM) Final Rule requires grant recipients of FTA funds to develop asset management plans to inventory their public transportation assets. These assets include equipment, rolling stock, infrastructure, and facilities. The Final Rule also establishes performance measures and annual reporting requirements, and defines "state of good repair" (SGR).i The Rule went into effect as of October 1, 2016. [49 CFR § 625, 630].

### SGR PERFORMANCE MEASURES

The TAM Final Rule required "transit providers and group TAM plan sponsors" to set initial SGR performance targets of the following measures by January 1, 2017. The transit providers and group TAM plan sponsors must coordinate with the State DOTs and MPOs to establish regional TAM performance targets. The transit providers and group TAM plan sponsors were required to provide the TAM targets to the MPO by June 30, 2017.

| ASSETS (ONLY THOSE FOR WHICH THE AGENCY HAS CAPITAL RESPONSIBILITY)  | SGR PERFORMANCE MEASURE  |
|--|--|
| Equipment: Non-revenue support -service and maintenance vehicles   | Percentage of non-revenue vehicles met or exceeded Useful Life Benchmark |
| Rolling Stock: Revenue vehicles by mode  | Percentage of revenue vehicles met or exceeded<br>Useful Life Benchmark  |
| Infrastructure: Only rail fixed-guideway, track, signals, and systems  | Percentage of track segments with performance restrictions               |
| Facilities: Maintenance and administrative facilities; and passenger stations (buildings) and parking facilities | Percentage of assets with condition rating below 3.0 on FTA TERM Scale   |

For equipment and rolling stock classes, useful life benchmark (ULB) is defined as the expected lifecycle of a capital asset, or the acceptable period of use in service, for a particular transit provider's operating environment. ULB considers a provider's unique operating environment such as geography and service frequency and is not the same as an asset's useful life.

The TAM rule defines two tiers of public transportation providers based on size parameters. Tier I providers are those that operate rail service or more than 100 vehicles in all fixed route modes, or more than 100 vehicles or more in one non-fixed route mode. Tier II providers are those that are a subrecipient of FTA 5311 funds, or an American Indian Tribe, or have 100 or less vehicles across all fixed route modes or have 100 vehicles or less in one non-fixed route mode. A Tier I provider must establish its own transit asset management targets, as well as report performance and other data

to FTA. A Tier II provider has the option to establish its own targets or to participate in a group plan with other Tier II providers whereby targets are established by a plan sponsor, typically a state DOT, for the entire group.

There are two Tier I transit agencies that serve Miami-Dade County and include:

- Miami-Dade Department of Transportation and Public Works (DTPW) Transit
- South Florida Reginal Transportation Authority (SFRTA)

### MIAMI-DADE DEPARTMENT OF TRANSPORTATION AND PUBLIC WORKS (DTPW) - TRANSIT

### **PERFORMANCE TARGETS**

Public transportation agencies are required to establish and report transit asset management targets annually for the following fiscal year. Each public transit provider or its sponsors must share its targets, TAM, and asset condition information with each MPO in which the transit provider's projects and services are programmed in the MPO's TIP.

MPOs are required to establish initial transit asset management targets within 180 days of the date that public transportation providers establish initial targets. However, MPOs are not required to establish transit asset management targets annually each time the transit provider establishes targets. Instead, subsequent MPO targets must be established when the MPO updates the TIP or LRTP.

The Miami-Dade DTPW 2018 Transit Asset Management Plan was presented to the TPO Governing Board on July 19, 2018. The Miami-Dade TPO originally adopted the Miami-Dade Department of Transportation and Public Works SGR targets for Calendar Year 2018 per Resolution 06-18 on January 25, 2018, which established the relationship between performance, plans, and programs, and provides the basis and foundation for this performance framework. Beginning in 2022, the TPO began to adopt the DTPW SGR targets annually as part of its TIP and will no longer utilize a separate resolution.

The Miami-Dade DTPW has established the following SGR performance targets for Fiscal Year 2023/2024:

Asset Category: Revenue Service Vehicles

| ASSET<br>CATEGORY   | ASSET CLASS /<br>ASSET TYPE | FLEET<br>SIZE | FLEET<br>AGE | USEFUL<br>LIFE<br>(ULB) | FY 24*<br>TARGET |
|---------------------|-----------------------------|---------------|--------------|-------------------------|------------------|
| 71.153.01.00.00.00  | Minibus (MB)                | 3             | 11.32        | 10                      | 100%             |
|                     | Over-The-Road (BU)          | 1             | 17.43        | 14                      | 0%               |
| REVENUE<br>VEHICLES | 40 Foot Bus (BU)            | 825           | 6.46         | 14                      | 8.8%             |
|                     | Articulated Bus (BU)        | 89            | 8.55         | 14                      | 28.1%            |
|                     | Metrorail (HR)              | 186           | 13.44        | 31                      | 0%               |
|                     | Metromover (AG)             | 30            | 13.41        | 20                      | 0%               |

<sup>\*</sup>FY24 Target is the total percentage of revenue vehicles that will <u>exceed</u> the Useful Life Benchmark (ULB) by the close of the fiscal year per FTA definition.

### Forecasted Changes

- a) Minibus / Cutaway (Small Buses) No projected change in the fleet will result in the same performance metrics target and forecasted target.
- b) Large Bus Fleet The sale of many of the vehicles and anticipation receipt of fifteen (15) 60ft vehicles; the performance metrics is projected to decrease. In addition, it is important to note that there are additional commuter vehicles used for passenger service which are owned and operated by 3<sup>rd</sup> party contractors.
- Metrorail (Heavy Railcars) The anticipated sale of fifty (50) legacy vehicles; the anticipated performance target
  is expected to be zero.
- d) Metromover (Automated Guideway) Useful Life Benchmark (ULB) adjustment from 30yrs to 20yrs per vendor signed contract. One (1) legacy vehicle is pending financial maturity prior to being removed from the report.
- e) Paratransit and Contingency vehicles are not calculated in the performance targets based on SGR Reporting requirements. See TAM/NTD Crosswalk table for clarification.

Asset Category: Non-Revenue Vehicles (Equipment)

| ASSET<br>CATEGORY | ASSET CLASS /<br>ASSET TYPE            | FLEET<br>SIZE | FLEET<br>AGE | USEFUL<br>LIFE<br>(ULB) | FY 24*<br>TARGET |
|-------------------|--|---------------|--------------|-------------------------|------------------|
| Equipment         | Automobile                             | 81            | 9.13         | 8                       | 71.1%            |
|                   | Steel Wheel Vehicles                   | 11            | 27.58        | 25                      | 64.0%            |
|                   | Trucks & Other<br>Rubber Tire Vehicles | 240           | 8.31         | 14                      | 27.5%            |

<sup>\*</sup>FY24 Target is the total percentage of non-revenue equipment that will <u>exceed</u> the Useful Life Benchmark (ULB) by the close of the fiscal year per FTA definition.

### **Forecasted Changes**

- a) Automobiles The limited anticipated vehicle replacements projected for the next fiscal year will have a negative impact on the target. The target is expected to increase significantly. Note: Many vehicles are put in service after the initial model year.
- b) Steel Wheel Vehicles The projected sale of four (4) vehicles and the increase in vehicles that have exceeded useful life has resulted in a projected target increase.
- c) Trucks & Other Rubber Tire Vehicles The limited anticipated vehicle replacements are projected for the next fiscal year will have a negative impact on the target. The target is expected to increase significantly. Note: Many vehicles are put in service after the initial model year.

FY24 Target is the total percentage of structures that will fall below the 3.0 threshold on the TERM Lite Scale as recommended by the FTA.

### Performance Metric Variance / Forecasted Changes

- a) Passenger Facilities Twenty-one (21) Metromover stations and twenty (20) support structures (substations) were included within this phase and three (3) Bus Transfer Centers with one (1) facility under renovation. The projected target for 2024 will include Metrorail Passenger Stations, Metrorail Infrastructure Buildings, Overpasses, and Kiss-n-Rides. Approximately 4.4% of the Passenger Facilities are projected to fall below the 3.0 threshold. Construction is currently on-going at Metrorail stations.
- b) Parking During this phase, one (1) Parking Structure and three (3) Surface Parking Lots were assessed. It is estimated that around 11% of the parking structure will fall below the 3.0 threshold in the subsequent phase. Demolition/Renovation of current parking locations are in progress.
- c) Maintenance Facilities or compounds in which maintenance activities are performed. This could include dispatch, fueling, vehicle wash, warehouses, and other buildings. Additional maintenance compound pending construction.
- d) Administrative Executive and /or support offices where administrative functions are performed. This could include but is not limited to accounting, engineering, quality, safety and security, scheduling and planning, and other offices that are not at passenger stations.
- e) Other Eight (8) miscellaneous structures at Central Metrobus Facility and five (5) bi-directional Transitway Shelters were included in this phase. Next fiscal year, twenty-nine (29) Traction Power Substations, six (6) overpasses, and an air-conditioned shelter will be assessed.

Source: DTPW

<sup>\*\*</sup> The total number of structures have been modified to reflect all structures in Transit

<sup>\*\*\*</sup>Other multipurpose structures include Overpasses, Bus Shelters, Emergency Overpasses, Substations, and other structures

**Asset Category: Performance Restrictions** 

| ASSET<br>CATEGORY | ASSET<br>CLASS                 | SYSTEM<br>(TRACK<br>FEET) | TOTAL<br>PERFORMANCE<br>RESTRICTIONS | FY 24*<br>TARGET |
|-------------------|--------------------------------|---------------------------|--------------------------------------|------------------|
|                   | Rail Fixed<br>Guideway         | 298,957                   | 342                                  | 6.0%             |
| Infrastructure    | Mover<br>Automated<br>Guideway | 46,464                    | 0                                    | 0%               |

<sup>\*</sup>Infrastructure performance restrictions are reported at the highest level as defined by FTA/NTD guidelines.

### **Guideway Performance Restrictions Requirements**

- a) A performance restriction is defined to exist on a segment of rail fixed guideway when the maximum permissible speed of transit vehicles is set to a value that is below the guideway's full-service speed. This does not include the operationally modified design speed.
- b) The length of track miles under restrictions each month and must be calculated separately for each combination of rail fixed guideway modes and service types (Metrorail and Metromover).
- c) All restrictions are documented to the specific segment of track (except system-wide restrictions due to inclement weather, for example) are required to be included in the calculation, regardless of cause or duration, including temporary speed restrictions placed due to maintenance activity.

An annual value for the length of track miles under performance restrictions to FTA by averaging the values calculated each month over the course of the year (DTPW reports on a fiscal year October to September).

### MIAMI-DADE 2024/25 – 2028/29 TIP CONTRIBUTIONS TO ACHIEVING TAM PERFORMANCE TARGETS

Projects in the 2024/25 -2028/29 TIP that contribute to achieving the TAM performance targets include:

| TPO PROJECT NO | FACILITY/PROJECT NAME  | PROJECT DESCRIPTION  |
|----------------|--|--|
| TA000106       | MDT-Bus Purchase   | Purchase of Vehicles/Equipment   |
| TA11           | FTA Section 5337 Federal Formula Funding                     | FTA Sec 5337 State of Good Repair Metromover/Metrorail   |
| TA18           | MDT Additional Elevators @ Dadeland North                    | Construction of additional elevators at Dadeland North Metrorail Station   |
| TA0000022      | Rail Vehicle Replacement                                     | Rail vehicle replacement of 136 car fleet  |
| TA0000034      | Metrorail and Metromover Fixed Guideway                      | Capital maintenance of existing guideway   |
| TA000006       | Capitalization of Preventative Maintenance                   | Bus systems including security and emergency facilities and equipment  |
| TA7            | Bus Replacement  | Replacement of buses to maintain the bus fleet replacement plan  |
| TA0000076      | Metromover Brickell Extension Guideway Painting              | Painting and restoration of 1.1 miles of the existing rusted steel girders of the Metromover's Brickell extension  |
| TA0000078      | Metrorail Escalators Replacement and Elevators Refurbishment | Replace escalators and elevators at 22 Metrorail stations, and may also include bus garages and maintenance facilities   |
| TA0000093      | Track & Guideway Rehabilitation                              | Rehabilitate existing track and guideway equipment and fixtures  |
| TA0000097      | MDT Infrastructure Renewal Program                           | Replace and upgrade physical assets according to normal replacement cycles; program focuses on bus overhauls, rehabilitation of bus and rail facilities and system equipment |
| TAMDT290       | Metromover Escalator Replacement and                         | Replace escalators and elevators at the 21 Metromover stations, and may also include   |

### **SOUTH FLORIDA REGIONAL TRANSPORTATION AUTHORITY (SFRTA)**

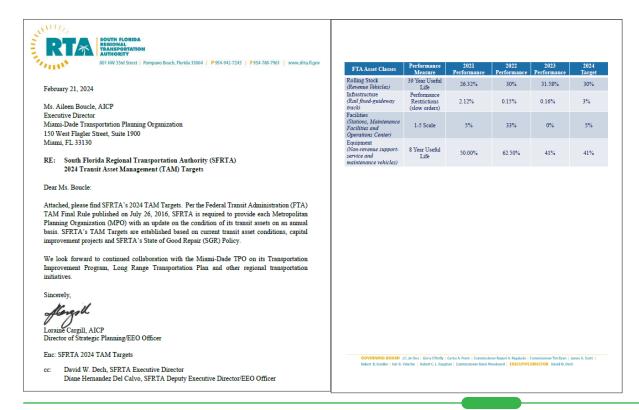

### **PERFORMANCE TARGETS**

The South Florida Regional Transportation Authority (SFRTA) 2018 Transit Asset Management Plan was submitted to the TPO on September 28, 2018, which established the relationship between performance, plans, and provides the basis and foundation for this performance framework. Beginning in 2022, the TPO began to adopt the SFRTA targets annually as part of its TIP, and will no longer utilize a separate resolution.

The South Florida Regional Transit Authority (SFRTA) has established the following SGR performance targets for Calendar Year 2024:

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

# TRANSPORTATION PERFORMANCE MANAGEMENT SYSTEM PERFORMANCE REPORT TRANSIT SAFETY PERFORMANCE

FTA published a final Public Transportation Agency Safety Plan (PTASP) rule and related performance measures as authorized by Section 20021 of the Moving Ahead for Progress in the 21st Century Act (MAP-21). The PTASP rule requires operators of public transportation systems that receive federal financial assistance under 49 U.S.C. Chapter 53 to develop and implement a PTASP based on a safety management systems approach. Development and implementation of PTASPs is anticipated to help ensure that public transportation systems are safe nationwide.

The rule applies to all operators of public transportation that are a recipient or sub-recipient of FTA Urbanized Area Formula Grant Program funds under 49 U.S.C. Section 5307, or that operate a rail transit system that is subject to FTA's State Safety Oversight Program. The rule does not apply to certain modes of transit service that are subject to the safety jurisdiction of another federal agency, including passenger ferry operations that are regulated by the United States Coast Guard, and commuter rail operations that are regulated by the Federal Railroad Administration.

The PTASP rule was published on July 19, 2018 with an effective date of July 19, 2019. Transit operators subject to the rule must have a PTASP and safety targets in place by July 20, 2020. Due to the COVID-19 pandemic, this date was extended to December 31, 2020 and later extended again to July 20, 2021. MPOs must then establish transit safety targets no later than 180 days after the transit operators establishes its targets. Transit operators are required to review, update, and certify their PTASP annually.

The transit agency sets targets for the Transit Safety Performance Measures in the PTASP based on the safety performance measures established in the National Public Transportation Safety Plan (NPTSP).

The initial Miami-Dade DTPW PTASP was presented to the TPO Governing Board on March 18, 2021 and were adopted by the Miami-Dade TPO (Per Resolution #14-2021) which establishes the relationship between performance, plans, and programs, and provides the basis and foundation for this performance framework. Beginning in 2022, the TPO has adopted the DTPW PTASP targets annually as part of its TIP, and will no longer utilize a separate resolution. With the PTASP approved by Board of County Commissioners Resolution R-61-24 on January 17, 2024 in **Figure 12**, DTPW established the 2024 Safety Performance Targets as illustrated above in **Figure 13** which remain unchanged since 2021.

Agenda Item No. 14(A)(1) Page No. 2

WHEREAS, this Board desires to accomplish the purposes outlined in the accompanying memorandum, a copy of which is incorporated herein by reference,

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD OF COUNTY COMMISSIONERS OF MIAMI-DADE COUNTY, FLORIDA, that:

Section 1. The Board hereby approves the attached PTASP.

<u>Section 2.</u> The Board hereby designates the Department Director as the Accountable Executive who shall execute and deliver the PTASP on behalf of the Department.

<u>Section 3.</u> The Board hereby authorizes the Department Director to execute and deliver the PTASP on behalf of the Department.

The foregoing resolution was offered by Commissioner Eileen Higgins

who moved its adoption. The motion was seconded by Commissioner Oliver G. Gilbert, III
and upon being put to a vote, the vote was as follows:

| Oliver G. (            | Gilbert, II | I, Chairman aye      |    |
|------------------------|-------------|----------------------|----|
| Anthony Roc            | dríguez, V  | ice Chairman aye     |    |
| Marleine Bastien       | aye         | Juan Carlos Bermudez | ay |
| Kevin Marino Cabrera   | aye         | Sen. René García     | ay |
| Roberto J. Gonzalez    | aye         | Keon Hardemon        | ay |

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

# TRANSPORTATION PERFORMANCE MANAGEMENT SYSTEM PERFORMANCE REPORT 2045 MIAMI-DADE LONG RANGE TRANSPORTATION PLAN

The Miami-Dade 2045 LRTP was adopted by the Miami-Dade TPO Governing Board on September 26, 2019. The 2045 LRTP guides citizens, businesses, and elected officials in fostering an innovative vision for the future of the transportation system over the next 26 years. The plan serves as a mechanism for the implementation of improvements to the transportation network through the identification and prioritization of transportation projects to address current and future needs.

The existing transportation system was analyzed with the projected increased population in 2045 to identify deficiencies in the transportation system for the 26-year period from 2020 to 2045. Over 300 improvement projects were identified to meet the desired mobility conditions.

These projects were reviewed and evaluated to develop the 2045 Cost Feasible Plan based on the projected available revenue of \$19.3 billion YOE dollars for new capital and new Operating and Maintenance (O&M).

- The development of the 2045 LRTP highlights the changes in transportation over the last five years, from focus areas and policy changes, to innovative and emerging technologies including: the implementation of the SMART Plan, Bus Express Rapid Transit (BERT), and rapid transit corridors; a standardized built environment classification system to help identify criteria for roadway design elements; the use of rideshare services, scooters and mobile applications to increase mobility and connectivity; and the emergence of connected, autonomous and electric vehicles.
- Miami-Dade County's population is projected to grow from 2.7 million in 2019 to 3.5 million people in 2045, representing a growth rate of 34 percent. The employment is projected to grow from 1.3 million to 1.8 million for the same time period, representing a 38 percent growth rate.

### TRANSPORTATION PERFORMANCE MANAGEMENT

The 2045 Plan was developed through a performance-driven, outcome-based approach considering all modes of transportation. The Federal Highway Administration (FHWA) issued rules establishing required performance management measures for safety, pavement, bridges, system and freight, which are illustrated in the plan. FHWA defines Transportation Performance Management as a strategic approach that uses system information to make investment and policy decisions to achieve national performance goals. Transportation Performance Management is systematically applied, provides key information to understand investment decisions, and improves communications between decision makers, stakeholders, and the traveling public.

### **SCENARIO PLANNING**

The 2045 LRTP implemented a scenario planning process to better understand the effect proposed strategies with different sets of transportation projects will have on the transportation system. Various multimodal transportation improvement and land use combinations including the SMART Plan, highway, transit, multimodal improvements, and new technologies were evaluated. Scenario Planning is an analytical framework that informs decision makers about the implications of various investments and policies on the transportation system and performance. The results of the SMART Plan land

use planning process were incorporated into the scenario planning assessment. The TPO developed a tiered approach, with six scenarios, which aligned with the three scenarios used in the regional transportation plan, include the following:

Existing + Committed Network (Base Network)

The E+C Network represents the baseline conditions which consists of all existing transportation facilities plus projects that have construction funds committed through 2024.

#### Scenario 1 – 2040 Cost Feasible Plan

Scenario 1 consists of projects in the E+C Network and highway projects in the 2040 Cost Feasible Plan.

### Scenario 2 - SMART Plan Transit

Scenario 2 consists of Scenario 1 projects plus all associated with the SMART Plan.

### Scenario 3 – Highway Projects

Scenario 3 consists of Scenario 2 projects, adds additional highway projects in transportation agency master plans (FDOT, FTE, MDX, DTPW - Roadway), plus highway projects identified by stakeholders and public input to address deficiencies.

### Scenario 4 - Beyond SMART Plan Transit Projects

Scenario 4 consists of Scenario 3, adds additional transit projects from past studies, plus transit projects beyond the SMART Plan identified by stakeholders and the public to address deficiencies.

### Scenario 5 - Alternative Land Use

Scenario 5 consists of Scenario 4 projects with an alternate Land Use of the projected 2045 population and employment, shifting population growth along the SMART Plan rapid transit corridors; and

### Scenario 6 - Technologies

Scenario 6 is the technologies scenario, which represents the implementation of future technologies identified, and their anticipated effect on the transportation system.

Projects in each scenario were listed, mapped, modeled in the travel demand model (Southeast Florida Regional Planning Model - SERPM 8). Since this is a tiered scenario approach that is additive, the scenarios were modeled in numerical order. Scenario 6 Technologies was not modeled since the effects of technologies on transportation systems are not proven at this time. SERPM 8 is also being used for the development of the Southeast Florida Regional Transportation Plan (RTP) (for Miami-Dade, Broward, and Palm Beach Counties) for adoption in June 2020. The RTP is testing three scenarios including:

2

3

### 2045 Cost Feasible Plan (Trend)

### **Regional Transit**

**Regional Land Use** 

The scenarios analyzed for the Miami-Dade LRTP were tested corresponding to the regional scenarios as identified below:

| MIAMI-DADE SCENARIOS    | 1 | 2 | 3 | 4 | 5 |
|-------------------------|---|---|---|---|---|
| REGIONAL PLAN SCENARIOS | 1 | 2 | 2 | 2 | 3 |

**SYSTEMS PERFORMANCE** — System measures assess the performance of the County's transportation system as an integrated multimodal system. These measures were used to evaluate the scenarios. The scenarios, which represent a group of systemwide projects, were evaluated at the systems level to identify how each scenario compared to the baseline (E+C network) and to each previous scenario in the tiered approach. The criteria selected for evaluation came from the SERPM 8 and included:

- Transit Route Miles
- Vehicle Hours Traveled
- Vehicle Miles Traveled
- Lane Miles
- Peak Period Speed (MPH)
- Transit Boardings
- Vehicle Trips

The results of the Scenario testing are shown in the table below **Table 7**. The scenarios analyzed for the Miami-Dade 2045 LRTP were tested corresponding to the regional scenarios as identified below:

#### **Table 7 Scenario Results**

| SCENARIO                     | TRANSIT<br>ROUTE<br>MILES | VEHICLE<br>HOURS<br>TRAVELED | VEHICLE<br>MILES<br>TRAVELED | LANE<br>MILES | PEAK PERIOD SPEED (MPH) (CONGESTED) | PERCENT<br>LANE MILES<br>WITH<br>V/C > 1.0<br>(AM PEAK) | WORK TRIP<br>LENGTH<br>(MILES)<br>(FROM<br>COUNTY) | TRANSIT<br>BOARDINGS | TOTAL<br>NUMBER<br>VEHICLE<br>TRIPS |
|------------------------------|---------------------------|------------------------------|------------------------------|---------------|-------------------------------------|---|--|----------------------|-------------------------------------|
| Existing + Committed Network | 3,429.3                   | 3,229,753                    | 59,910,810                   | 6,336.5       | 18.5                                | 12.3%   | 14.5   | 528,116              | 9,327,652                           |
| 1. 2040 Cost Feasible Plan   | 3,416.4                   | 2,803,522                    | 60,089,935                   | 6,542.1       | 21.4                                | 11.0%   | 14.6   | 545,829              | 9,332,792                           |
| 2. SMART Plan Transit        | 4,043.4                   | 2,700,914                    | 58,803,508                   | 6,500.9       | 21.8                                | 10.7%   | 14.7   | 817,691              | 9,140,544                           |
| 3. Highway                   | 4,028.9                   | 2,624,261                    | 60,140,875                   | 6,983.9       | 22.9                                | 8.1%  | 14.8   | 783,792              | 9,214,728                           |
| 4. Beyond SMART Plan         | 6,207.3                   | 2,573,450                    | 59,277,677                   | 6,900.7       | 23.0                                | 7.8%  | 14.8   | 965,672              | 9,085,476                           |
| 5. Alternative Land Use      | 6,207.3                   | 2,562,543                    | 58,600,863                   | 6,900.7       | 22.9                                | 7.7%  | 14.7   | 1,005,772            | 9,026,204                           |

<sup>\*</sup> Scenario 6 was not analyzed at the same level due to unknown requirements and influences/impacts at this time.

The scenarios were also evaluated based on how each scenario contributes to meeting the targets of the National Performance Management Measures on the systemwide level. **Table 8** shows these results using a color scale to depict incremental anticipated improvements from the baseline (E+C network) by scenario and is based on:

- Transit projects provide additional mobility options, increases safety, and improves system reliability by eliminating vehicles on roadways,
- Roadway projects provide additional capacity, improve system reliability,
- Resurfacing, restoration, and rehabilitation projects improve pavement and bridge conditions, and
- Operational and intersection projects improve safety.

**Table 8: Performance Measure Scenario Results** 

| SCENARIO/PLAN                | SAFETY   | PAVEMENT/<br>BRIDGE | SYSTEMS/<br>FREIGHT |
|------------------------------|----------|---------------------|---------------------|

| Cost Feasible Plan           |          | <b>=</b>            | -                   |

Scenario provides some improvement over the baseline

Scenario provides more improvement over the baseline

Scenario provides the most improvement over the baseline

**PROJECT PRIORITIZATION** — All projects identified as part of the scenario planning effort were evaluated in developing the Cost Feasible Plan.

These projects represent a comprehensive and multimodal network of transportation projects to meet forecasted system-wide travel demands of Miami-Dade County. Scenario 5 (Alternative Land Use) is being addressed through separate initiatives that support the rapid transit corridors prioritized in this 2045 LRTP. Scenario 6 (Future Technologies) were highlighted in the 2045 LRTP, under Chapter 9, as to their potential impact on the future transportation network. Projects prioritization was based on scenario planning analysis,

TPO Governing Board resolutions, agency project priorities, and the 2045 LRTP Goals and Objectives. The combined results were used to develop the Cost Feasible Plan, which is constrained by available resources, as reflected in Chapter 7 of the Miami-Dade 2045 LRTP.

Projects in the Cost Feasible Plan contributing to meeting the TPO and FDOT targets for the National Performance Management Measures are identified in the project tables by the primary performance measure addressed:

- PM1 Safety
- PM2 Pavement/Bridge
- PM 3 System/Freight

### SYSTEMS PERFORMANCE

The TPO recognizes the importance of linking goals, objectives, and investment priorities to established performance objectives, and that the link is critical to the achievement of the national transportation goals and statewide and regional performance targets. As such, the Miami-Dade 2045 LRTP reflects the goals, objectives, performance measures, and targets as they are available and described in other state and public transportation plans and processes; specifically the Florida Strategic Highway Safety Plan (SHSP), the Florida Highway Safety Improvement Program (HSIP), the Florida Transportation Plan (FTP), the Florida Transportation Asset Management Plan, the Florida Freight Mobility and Trade Plan, and other public transportation plans and process.

#### SAFETY PERFORMANCE

The Miami-Dade 2045 LRTP increases the safety of the transportation system for motorized and non-motorized users as required. The LRTP aligns with the Florida SHSP and the FDOT HSIP with specific strategies to improve safety performance focused on prioritized safety projects, pedestrian and/or bicycle safety enhancements, and traffic operation improvements to address the goal to reduce fatalities and serious injuries.

The TPO's commitment to safety is emphasized through the 2045 LRTP Goal to Increase the Safety of the Transportation System for All Users, which includes the following objectives:

- Improve the safety of the transportation system,
- Promote projects in high crash locations, and
- Improve safety of the transportation system of the elderly and disabled.

The TPO will provide information from the FDOT HSIP annual reports to track the progress made toward the statewide safety performance targets. The TPO will document the progress on safety performance targets established by the TPO for its planning area.

The Miami-Dade 2045 LRTP identifies safety needs within the metropolitan planning area and provides funding for targeted safety improvements. There are many projects listed in the LRTP that will help improve safety of the Miami-Dade transportation system, including: capacity and operational improvements, redesigns of roadway segments, transportation systems management and operation (TSM&O), roadway and access improvements, adding truck lanes, and reconstruction projects. In addition, a financial set-aside was established for bicycle and pedestrian, congestion management,

and freight projects to ensure funding for these important projects that can improve safety of the Miami-Dade transportation system. For a complete list of projects, please see project listings (pages 07-06 to 07-141 of the Miami-Dade 2045 LRTP).

#### PERFORMANCE AND BRIDGE PERFORMANCE

The Miami-Dade 2045 LRTP seeks to address system preservation, identifies infrastructure needs within the metropolitan planning area, and provides funding for targeted improvements. The TPOs commitment to Pavement and Bridge Performance is emphasized through the 2045 LRTP Goal to Improve and Preserve the Existing Transportation System, which includes the following objectives:

- Improve the resiliency/reliability of the transportation system,
- Reduce the vulnerability and increase the resilience of critical infrastructure to the impacts and events. Preserve infrastructure (sustainability and resilience), and
- Site and design new transportation infrastructure to minimize exposure to sea level rise within the infrastructure life span, based on the Southeast Florida Regional Climate Change Compact's 2015 Unified Seal Level Rise Projection.

The cost to operate and maintain the existing and future transportation system were accounted for in the development of the Cost Feasible Plan. Operating and maintenance (O&M) cost for DTPW transit and roadways and for Districtwide SHS Existing Facilities are identified in Chapter 6. For FTE and MDX the cost to operate and maintain their existing facilities were identified in the process of developing the forecasted revenues. FTE also assumed the O&M for future projects through this process.

On or before October 1, 2020, FDOT will provide FHWA and the TPO a detailed report of pavement and bridge condition performance covering the period of January 1, 2018 to December 31, 2019. FDOT and the TPO also will have the opportunity at that time to revisit the four-year targets.

Miami-Dade County currently achieves the established targets for Pavement and Bridge.

There are many projects listed in the Miami-Dade 2045 LRTP that will improve pavement and bridge conditions as a secondary benefit to widening and reconstruction projects. For a complete list of projects, please see project listings.

#### TRANSIT ASSET MANAGEMENT

A total of \$27,900 million is identified to support progress towards TAM performance targets, transit investment, and maintenance funding in the Miami-Dade 2045 LRTP. This includes \$5,195 million for new transit capital and new O&M (27% of the available funds for new capital and new O&M (\$19.318), or 12% of the total LRTP revenue (\$43,745)). Also, DTPW – Transit has \$22,705 million of reoccurring obligations which includes

\$905 million (2% of the total LRTP revenue (\$43,745 million)) for bus replacement and \$14,754 million (34% of the total LRTP revenue (\$43,745 million)) for O&M of the existing system. Improving the State of Good Repair (SGR) of capital assets is an overarching goal of this process.

### **SUMMARY**

Projects contributing to meeting the TPO and FDOT targets for the National Performance Management Measures are identified in the project listings by the primary performance measure (PM number) addressed by the project. A summary of projects contributing to the performance management targets and are summarized by agency in **Table 9**.

**Table 9: Number of Projects by Agency Contributing to PM Targets** 

| AGENCY/MODE      | PM1<br>SAFETY | PM2*<br>PAVEMENT/BRIDGE | PM3*<br>Systems/freight |
|------------------|---------------|-------------------------|-------------------------|
| Transit          | 1             | 0                       | 11                      |

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

### PART 1: 4-YEAR FEDERALLY FUNDED PROJECTS

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

# PART 1: 4-YEAR FEDERALLY FUNDED PROJECTS PURPOSE, CONTENTS AND CONCLUDING STATEMENTS

### TIP • FISCAL YEARS 2024/2025 TO 2028/2029 PART 1: 4-YEAR FEDERALLY FUNDED PROJECTS

### **PURPOSE OF THIS SECTION**

On December 4, 2015, President Obama signed into law the Fixing America's Surface Transportation Act, or "FAST Act". The FAST Act authorizes \$305 billion over fiscal years 2016 through 2020 for the Department's highway, highway and motor vehicle safety, public transportation, motor carrier safety, hazardous materials safety, rail, and research, technology and statistics programs. Overall, the FAST Act largely maintains current MAP-21 program structures and funding shares between highways and transit. It is a down-payment for building a 21st century transportation system. On September 30, 2020, the Senate passed a one-year extension of the FAST Act through Continuing Resolution. This extension also added \$13.6B to the Highway Trust Fund.

The intention of this section of Miami-Dade County's FY 2024/2025-2028/2029 TIP is to illustrate how the TPO's priorities are to be funded, by Federal funding category, and by fiscal year. Specifically, this section addresses the requirements for TIP development as cited in Title 23 USC Section 134 (subsections (h) 2 and (i) 4).

### **CONTENTS OF THIS SECTION**

This section contains the project listings by major funding category. Projects are identified by Work Program Item Numbers and show the corresponding project description, type of work and funding for each of the first four (4) years of the TIP.

#### **CONCLUDING STATEMENTS**

- This section is presented in order to fulfill federal requirements as noted in Section 134 of Title 23, United States Code (ISTEA).
- Only major categories of federal funds are highlighted in this section.
- Only the first four years of the TIP (FY 2024/2025, 2025/2026, 2026/2027 and 2027/2028) are included in this section.
- The projects shown in this section are consistent with the FDOT District VI Adopted Work Program.
- Federal funds can reasonably be expected to be made available for all projects included in this section.

All information contained in this section is consistent with the adopted TIP attached hereto.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

# PART 2: 5-YEAR PROJECT LISTINGS **STATE TRANSPORTATION SYSTEM AND MAJOR PROJECTS**

#### TIP • FISCAL YEARS 2024/2025 TO 2028/2029

## STATE TRANSPORTATION SYSTEM AND MAJOR PROJECTS

Florida Department of Transportation, District 6 (FDOT, Six)

The Florida Department of Transportation's (FDOT) Compass helps connect the work the Department is doing to what matters most to our communities. The FDOT Compass centers on Communities, with five pillars surrounding them: Safety, Resilience, Supply Chain, Technology, and Workforce Development. These pillars establish the baseline for every project, plan, and investment. This allows the Department to build transportation infrastructure that embraces the unique character of each community across the state.

This section of the TIP focuses on the State Transportation System and Major Projects located within Miami- Dade County. The projects listed include improvements to highways, transit, aviation, rail, seaport, freight, and bicycle/pedestrian modes over the next five fiscal years.

The FDOT District Six section provides an overview of the following topics:

- The FDOT Five-Year Work Program
- The Work Program Cycle
- Programs and Funding
- Strategic Intermodal System (SIS) Projects
- Resurfacing Projects
- Other Major Projects
- Transportation Systems Management & Operations (TSM&O)
- Bicycle/Pedestrian Improvements
- Modal Development

#### FDOT'S FIVE-YEAR WORK PROGRAM

The FDOT District Six Work Program is a major component of the Miami-Dade TPO's TIP. The Work Program, which is updated annually, is a project specific list of transportation activities and improvements that the FDOT will undertake during the next five-years. It is developed by the District in cooperation with the Miami-Dade TPO and is consistent with the 2045 LRTP, and TPO priorities. The projects must also meet the objectives of the Florida Transportation Plan (FTP). The first three years of the Adopted Work Program represent a commitment that local governments may rely on for planning purposes, and for the development of capital improvement elements of the local government comprehensive plans.

\*All renderings used in this report are subject to change as they continue through the project phase and may not denote the final product.

#### THE WORK PROGRAM CYCLE

In the summer of 2023, FDOT began the new cycle to develop the Tentative Work Program for Fiscal Years (FY) 2025 - 2029. The Department coordinates development of the Work Program with the TPO TIP Committee process and input is received through public hearings. The Tentative Work Program is then sent to the Governor's Office, Legislature, Florida Transportation Commission and the Department of Economic Opportunity for review and it will become effective as the Adopted Work Program on July 1, 2024.

#### **PROGRAMS AND FUNDING**

**Program Descriptions** — For budgeting purposes, the FDOT's Work Program comprises of eight budget categories. Programs are listed below:

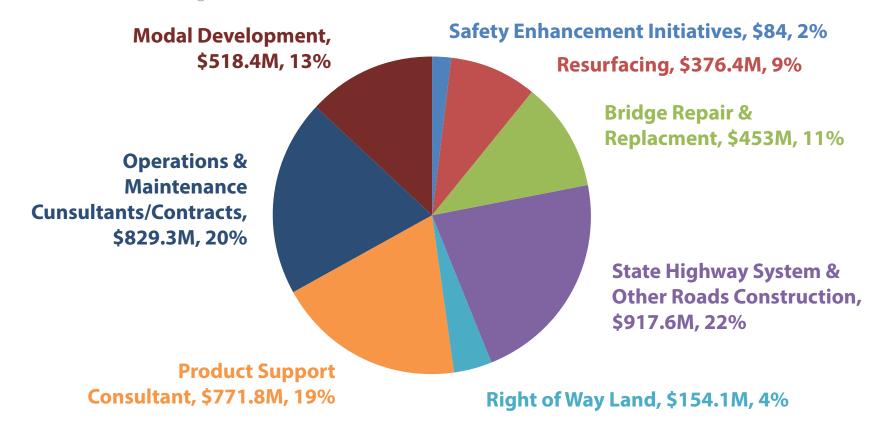

- Safety Enhancements Initiatives
- Resurfacing
- Bridge Repair & Replacement
- State Highway System & Other Roads Construction
- Right of Way Land
- Product Support Consultants
- Operations & Maintenance Consultants/Contracts
- Modal Development

**Funding Overview** — The Department's funds are allocated among seven Districts statewide and the Florida Turnpike Enterprise. In Miami-Dade, the Department in consultation with the TPO, determines the best use of Miami-Dade's share of funding. The Department's resources are primarily from federal and state dedicated sources. The State Transportation Trust Fund and the Federal Highway Trust Fund receive revenue from specific tax sources for transportation purposes. Additional funding for Work Program projects comes from local and discretionary sources. By statute, the Department must develop a program that is balanced to cash and revenue forecasts.

**FDOT District Six, Total Budget Breakdown, Tentative Five-Year Work Program - Fiscal Years 2025-2029** — As shown in the Total Budget Breakdown chart below, the majority of the Department's \$4.1 billion budget is applied to the State Highway System and Other Roads Construction Budget as of December 2023, in the amount of \$917.6 million.

#### **TOTAL 5 YEAR TENTATIVE WORK PROGRAM: \$4.1 B**

FDOT District Six Total Work Program Breakdown for FY 2025-2029

#### STRATEGIC INTERMODAL SYSTEM (SIS) PROJECTS

The Florida Legislature established the SIS to enhance Florida's transportation mobility and economic competitiveness. The SIS consists of a network of high-priority transportation facilities which includes commercial airports, spaceports, deep water seaports, freight rail terminals, passenger rail, intercity bus terminals, rail corridors, waterways, and highways. These facilities represent the state's primary means for moving people and freight between Florida's diverse regions, between states and nations. The following are major SIS improvement projects in Miami-Dade County:

#### **GOLDEN GLADES INTERCHANGE (GGI) RECONSTRUCTION**

The FDOT District Six and Florida's Turnpike Enterprise have completed the design of several roadway projects within the GGI in Miami-Dade County. Some enhancements to the GGI Interchange include several miles of roadway and ramps. The overall project will help increase the regional connectivity to this major interchange. The following benefits are included in this project:

The project area consists of the following five major facilities: State Road (SR) 9A/I- 95, SR 826/Palmetto Expressway, SR 91/Florida's Turnpike, SR 9 and SR 7/US 441/NW 7 Avenue.

The scope of the project includes the following:

- Milling and resurfacing the Palmetto Expressway between NW 17 Avenue and the GGI,
- Providing a direct connection flyover ramp from eastbound Palmetto Expressway to northbound I-95,
- Relocating NW 12 Avenue entrance ramp to I-95,
- · Rebuilding and realigning various ramps throughout the interchange to meet current standards,
- Rebuilding and widening northbound and southbound I-95 from the GGI to Miami Gardens Drive to accommodate future express lanes,
- Rebuilding Florida's Turnpike Connector at the intersection of NW 2 Avenue and NW 167 Street,
- Widening the southbound lanes of the Turnpike Connector to accommodate two lanes from Florida's Turnpike and three lanes from eastbound Palmetto Expressway to southbound I-95,
- Providing a direct express lane connection from Florida's Turnpike to the southbound I-95 Express Lanes,
- Relocating the SR 7 exit ramp from southbound I-95,
- · Rebuilding the westbound Palmetto Expressway bridge and entrance ramp to enhance access from Florida's Turnpike,
- Widening southbound I-95 from Biscayne Canal to NW 135 Street to accommodate an additional lane for the southbound Turnpike Connector,
- Rebuilding the pedestrian bridge at NW 147 Street to enhance pedestrian safety for Thomas Jefferson Middle School, Biscayne Gardens Elementary and the surrounding communities,
- Rebuilding toll gantry,
- Rebuilding and widening I-95 to provide a direct connection from northbound I- 95 Express Lanes to Florida's Turnpike,
- Rebuilding ramp connections to meet current standards.

Golden Glades Interchange Improvements

Golden Glades Direct Connection to I-95 Express

Golden Glades New Flyover Bridge

Golden Glades New Pedestrian Bridge

The construction of the GGI projects will begin in March of 2024, and the design and right-of-way phases are completed. For more information on the project, please visit: <a href="https://go-ggi.com/">https://go-ggi.com/</a>

The project video found in the link above will provide a better visualization of this complex project. <a href="https://www.fdotmiamidade.com/design-projects/expressways/golden-glades-interchange-enhancement-projects.html">https://www.fdotmiamidade.com/design-projects/expressways/golden-glades-interchange-enhancement-projects.html</a>

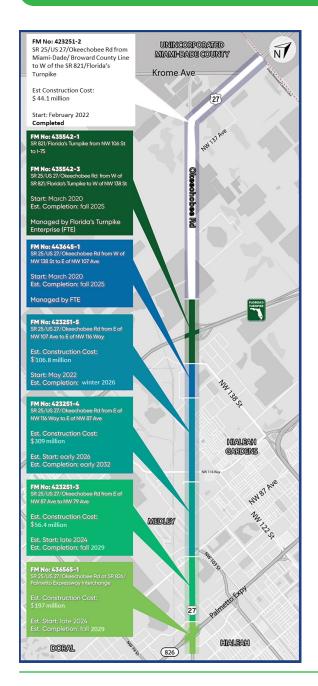

#### SR 25/US 27/OKEECHOBEE ROAD IMPROVEMENTS

SR 25/US 27/Okeechobee Road consists of seven segment projects along SR 25/US 27/ Okeechobee Road from SR826/Palmetto Expressway to the Broward County Line. The following benefits are included in this project:

The corridor improvements on SR 25/Okeechobee Road include the following:

| SEGMENT LIMITS                                       | IMPROVEMENTS  | CONSTRUCTION<br>YEAR                           |
|--|---|--|
| Broward County Line to East of the HEFT              |   |  |
| West of HEFT to West<br>of NW 138 Street             | Widening, milling and resurfacing the roadway. Including reconstruction of Frontage Road, storm sewer, Miami Canal dredging, signing and pavement marking, signalization, lighting, and intelligent transportation systems updates. Project Managed by Florida's Turnpike Enterprise.   | Construction<br>Started: March 2020            |
| West of NW 138<br>Street to East of NW<br>107 Avenue | Reconstruct and widen roadway and widen the bridge over the Miami Canal at NW 138 St and NW 107 Avenue to provide a wider turning radius for large trucks. Improve the intersection of SR 25 at NW 107 Avenue and NW 138 St by adding new turn lanes and signals. Project managed by Florida's Turnpike Enterprise.   |  |
| East of NW 107<br>Avenue to East of NW<br>116 Way    | Full reconstruction to provide concrete and rigid pavement, replacement of bridges at NW 121 Avenue and NW 116 Way over Miami (C-6) Canal, design of two braided ramps under SR 25/Okeechobee Road to connect the mainline with the Frontage Road.  | Construction Started:<br>March 2022            |
| East of NW 116 Way<br>to East of NW 87<br>Avenue     | Full reconstruction to provide rigid pavement, grade separation of bridges over 87 Avenue, design of left turn lanes flyover bridges from Southbound NW 87 Avenue to Eastbound Okeechobee Road and from Northbound NW 87 Avenue to Westbound Okeechobee Road, a construction of a new bridge at NW 106 Street over the Miami (C-6) Canal, and the realignment of NW 103 Street and the frontage road within the project limits. |  |
| East of NW 87 Avenue<br>to NW 79 Avenue              | Road reconstruction using rigid pavement, widening  Okeechobee Road, modify the intersection of NW 95 Street and Frontage Road, widen NW 79 Avenue bridge of Miami (C-6) Canal, and provide new access from Frontage Road to Westbound Okeechobee Road.   |  |
| Interchange with<br>SR 826/Palmetto<br>Expressway    | Three new flyover ramps, the addition of turn lanes at the ramp intersections, and improvements to the Okeechobee Road and W 18 Avenue intersection.  | Anticipated<br>Construction Date:<br>Late 2024 |

SR 25/US 27/Okeechobee Road Improvements

A PD&E study was completed for SR 25/US 27/Okeechobee Road from SR 997/Krome Avenue to NW 79th Avenue in 2016. The first of the segments; SR 25/US 27/Okeechobee Road from Broward County Line to west of SR 821/Florida's Turnpike Reconstruction Project, began construction in February 2022. A design project was completed for SR 25/Okeechobee Road. & SR 826/Palmetto Expressway Interchange in October 2023. Refer to the exhibits below for renderings of some of the segments along the corridor:

SR 25 Okeechobee Rd. from east of NW 107 Ave. to east of NW 117th Way

SR 25 Okeechobee Rd. from east of NW 116 Way to east of NW 87 Ave

SR 25 Okeechobee Rd. and SR 826 Palmetto Expressway Interchange

For more information visit: <a href="https://www.fdotmiamidade.com/okeechobee">https://www.fdotmiamidade.com/okeechobee</a>

#### PROJECT DEVELOPMENT AND ENVIRONMENT (PD&E) STUDIES

#### SR 826 / PALMETTO EXPRESSWAY SOUTH

The project on SR 826/Palmetto Expressway from US 1/SR 5/ Dixie Highway to SR 836/Dolphin Expressway, approximately seven miles, is proposing corridor improvements that are expected to add highway and interchange capacity with the implementation of capacity and interchange improvements to

meet future transportation demand, improve travel time reliability and provide long-term mobility options. The project is in the Project Development and Environment (PD&E) phase.

The project includes improvements to 10 interchanges and operational improvements to the Palmetto general purpose lanes. This project will also include a new drainage system, lighting system and ITS system. Signalized intersections will be upgraded to current standards.

The following benefits are included in this project:

For more information related to this project, visit: <a href="https://www.fdotmiamidade.com/826expresssouth.html">https://www.fdotmiamidade.com/826expresssouth.html</a>

For more information on these Palmetto Expressway projects visit: <a href="www.palmettoexpresslanes.com">www.palmettoexpresslanes.com</a>

#### SR 9A/I-95 FROM SOUTH OF MIAMI GARDENS DRIVE TO NORTH OF BROWARD COUNTY LINE

The PD&E study for SR 9A/I-95 from Miami Gardens Drive to the north of Broward County Line will evaluate potentially providing additional express and/or general use lanes on SR 9A/I-95 from south of SR 860/Miami Gardens Drive to the north of Broward County Line and implementing interchange improvements at SR 860/Miami Gardens Drive and CR 854/ Ives Dairy Road within Miami-Dade County. The following benefits are included in this project:

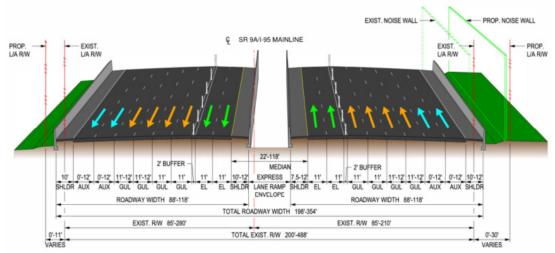

Overall, the project will offer enhanced mobility options for motorists and transit users as it will provide additional capacity along the SR 9A/I-95 corridor throughout northern Miami-Dade County. Consistent with the existing managed lanes system on SR 9A/I-95, the additional express lanes are anticipated to operate using variable toll pricing based on congestion to optimize traffic flow.

The PD&E study has the following project objectives:

- Address the deficient operational capacity and relieve existing/future congestion along the SR 9A/I-95 corridor.
- Preserve the operational integrity and regional functionality of SR 9A/I-95 (and, therefore, the regional transportation network) by complementing similar corridor improvements throughout Miami-Dade, Broward, and Palm Beach Counties.
- TeamGEnhance emergency evacuation and response times.

I-95/SR 9A I-95/SR 9A Mainline and Express Lanes Proposed Typical Section

The PD&E is estimated to be completed by December 2025.

For information related to the project, visit: <a href="https://www.fdotmiamidade.com/i95northPDE.html">https://www.fdotmiamidade.com/i95northPDE.html</a>

#### I-195/SR 112/JULIA TUTTLE CAUSEWAY PD&E STUDY

Interstate 195 The Florida Department of Transportation (FDOT), District Six is conducting a Project Development and Environment (PD&E) Study for the I-195/State Road (SR) 112/Julia Tuttle Causeway from NW 12 Avenue to SR 907/Alton Road and along the local street network surrounding the ramp terminals. The project is located within the cities of Miami and Miami Beach in Miami-Dade County, Florida.

BEGIN PROJECT

Moore Park

Moore Park

Moore Park

Miami Beach
Golf Club

I-195/SR 112/Julia Tuttle Causeway PD&E Study Project Limits

In 2020, a Corridor Planning Study (CPS) was completed which identified and developed, through a process of collaborative stakeholder coordination, conceptual improvements within the I-195 Study corridor in order to address the future mobility and safety needs. The findings of the CPS are now proceeding to a PD&E Study, which began in the summer 2022. The following benefits are included in this project:

NW 20 St

The purpose of this project is to build upon the CPS efforts and evaluate alternatives that address operational deficiencies, relieve existing/future congestion, accommodate future travel demand projected as a result of area-wide population and employment growth along the I-195 corridor. Other project needs include:

- **Provide Transit, Bicycle and Pedestrian Improvements** The project will result in improved transit, bicycle and pedestrian mobility between Miami and Miami Beach including Bus Express Rapid Transit (BERT) services, as well as a separated shared use path along the Julia Tuttle Causeway.
- Improve Connectivity I-195 is part of Florida's Strategic Intermodal System (SIS) and plays a significant role in facilitating the movement of commuter and freight traffic between the beaches and mainland and provides connections to I-95 and Miami International Airport (MIA) (both SIS facilities). The project aims to improve system linkage by evaluating a new direct connection to the I-95 express lane system as well as improving transit, bicycle and pedestrian connectivity.
- Ensure Safety The project aims to address existing safety concerns.
- **Increase Capacity** The population of Miami-Dade County as a whole is expected to increase by 67% in 2045 and countywide employment is expected to increase by 38%. The project is anticipated to meet the mobility needs of the area by alleviating current and future congestion on the corridor.

The Julia Tuttle Causeway PD&E focuses on four major areas:

I-195/SR 112/Julia Tuttle Causeway PD&E Study Improvements Focus Areas

#### **Description of Focus Areas**

#### Focus Area 1 (FA1)

Located at the beginning of the project limits. This section starts west of the I-95 interchange and continues east of the interchange. This section includes all movements associated with the I-95 interchange.

#### Focus Area 2 (FA2)

Located east of Focus Area 1. This section is comprised of I-195 west of North Miami Avenue and east of Biscayne Boulevard.

#### Focus Area 3 (FA3)

Located east of Focus Area 2. This section includes improvements to the Julia Tuttle Causeway.

#### Focus Area 4 (FA4)

This section is the final segment. It is located east of Focus Area 3 and includes the Alton Road Interchange and Mt. Sinai Medical Center Area. This PD&E Study started in June 2022 and is expected to be completed by fall 2025. After the completion of the PD&E phase, the preferred alternative will move to the final design phase.

For more information visit: <a href="https://www.fdotmiamidade.com/i195pdestudy.html">https://www.fdotmiamidade.com/i195pdestudy.html</a>

## STATE ROAD (SR) 953/NW 42 AVENUE WITH SR 948/NW 36 STREET AND SR 25/US 27/OKEECHOBEE ROAD (IRON TRIANGLE) PD&E STUDY

The Iron Triangle is an urban interchange primarily comprising the intersection of SR 953/NW 42nd Avenue, SR 948/NW 36th Street, and SR 25/US 27/Okeechobee Road. The interchange also features the Greater Miami Expressway Agency (GMX) SR 112/Airport Expressway, which is one of the principal highways providing access to and from Miami International Airport (MIA) and connects to other important transportation facilities and destinations such as Interstate 95 (I-95) and Miami Beach. In addition, the ramps of the Iron Triangle interchange cross over the Miami Canal (C-6). The project traverses the City of Miami Springs, City of Hialeah, City of Miami and Unincorporated Miami-Dade County.

The purpose of this project is to address operational deficiencies and improve capacity, relieve existing congestion and accommodate projected transportation demand within the Iron Triangle interchange area, specifically as it relates to SR 953/NW 42nd Avenue, SR 948/NW 36th Street, and SR 25/US 27/Okeechobee Road. Other goals of the project include improving safety conditions and enhancing modal interrelationships. The following benefits are included in this project:

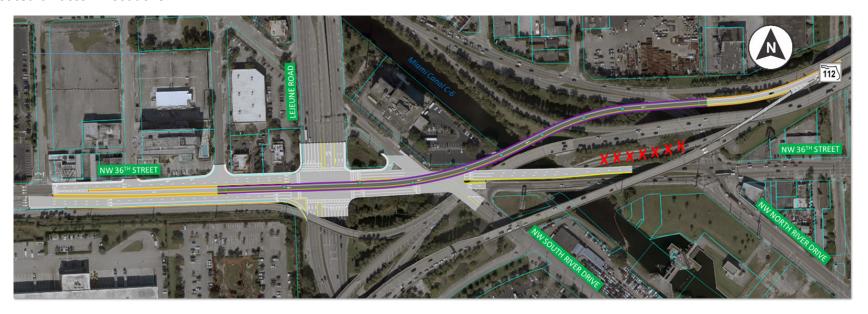

The need for this project is based on the following criteria:

- Capacity/Transportation Demand: Improve traffic operations/capacity, alleviate existing congestion, and accommodate projected transportation demand.
- Safety: Improve safety within the interchange area
- Modal Interrelationships: Enhance multimodal activity.
- Miami International Airport (MIA)
- Intercity and long-distance transit access
- Freight movement
- Pedestrian accommodations

Conceptual Planning Alternative for WB SR 112 to WB 36th Street Over LeJeune Road Extension

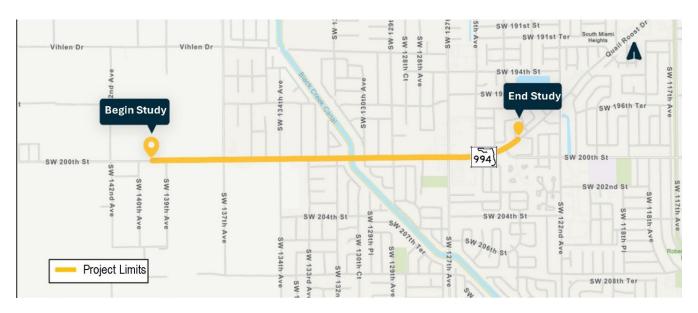

Conceptual Planning Alternative for Okeechobee Road Overpass at LeJeune Road

This PD&E Study started in June 2023 and is expected to be completed by 2025.

For more information visit: <a href="https://www.fdotmiamidade.com/SR953\_SR948\_and\_SR25.html">https://www.fdotmiamidade.com/SR953\_SR948\_and\_SR25.html</a>

#### SR 994/SW 200TH STREET/QUAIL ROOST DR FROM W. OF SW 137 AVE TO E. OF SW 127 AVE PD&E

A PD&E Study is being conducted by the Florida Department of Transportation (FDOT) to evaluate the potential impacts of widening State Road (SR) 994/SW 200th Street/Quail Roost Drive from west of SW 137th Avenue to east of SW 127th Avenue from two lanes to four lanes. The project corridor is approximately 1.67 miles in length.

SR 994/SW 200th Street/Quail Roost Drive PD&E Study Project Limits

The following benefits are included in this project:

In addition to the potential widening, the proposed roadway improvements may include operational enhancements at the existing intersections, removal and replacement of the bridge structure (#870633) over Black Creek Canal (C-1W), access management measures, and stormwater management facilities. The PD&E Study evaluates typical section alternatives based on design criteria, safety, and operational needs, and the minimization of environmental effects and right-of-way needs. The PD&E Study evaluates the provision of Americans with Disabilities Act (ADA) compliant facilities as well as new/enhanced pedestrian and bicycle infrastructure. Improvements at four intersections/cross streets are also proposed as part of this project:

- SR 994 and SW 137th Avenue
- SR 994 and SW 134th Avenue
- SR 994 and SW 132nd Avenue
- SR 994 and SW 127th Avenue

The purpose of this project is to address traffic operations and capacity constraints on SR 994 to accommodate future travel demand projected as a result of population and employment growth along the corridor. Other goals of the project are to 1) improve multimodal safety conditions along the corridor, including emergency evacuation and response times, and 2) enhance mobility options and multimodal access.

**Preferred Alternative Typical Section** 

**Bicycle and Pedestrian Facilities** 

Black Creek Trail Underpass Crossing

The PD&E Study started in June 2021 and is expected to be completed in February 2025. The estimated construction cost is \$29.5 million. After completion of the PD&E phase, the preferred alternative will move to the final design phase.

For more information, visit <a href="https://www.fdotmiamidade.com/QuailRoostPDE.html">https://www.fdotmiamidade.com/QuailRoostPDE.html</a>

#### OTHER MAJOR CORRIDOR IMPROVEMENTS / RESURFACING PROJECTS

The following are major resurfacing projects in Miami-Dade County:

## SR 953/LEJEUNE ROAD/NW 42 AVENUE/E 8 AVENUE FROM NORTH OF SR 932/NW 103 STREET/E 49 STREET TO SOUTH OF NW 135 STREET

The FDOT is currently developing the design along State Road (SR) 953/LeJeune Road/NW 42 Avenue/E 8 Avenue from north of SR 932/NW 103 Street/E 49 Street to south of NW 135 Street, in Miami-Dade County.

The following benefits are included in this project:

This project design entails the following:

- Closing the full median openings at the following intersections: E 51 Street, E 53 Street and E 54 Street
- Repaving and restriping the roadway
- Updating curb ramps
- Removing abandoned driveways
- Adding a new sidewalk and curb ramps at NW 37 Avenue Connector
- Repairing stormwater drainage
- Relocating the crosswalk at the NW 37 Avenue Connector to make it more visible to oncoming traffic
- Adding a left turn green arrow to the traffic light at E 52 Street and E 55 Street, in the northbound direction
- Widening the eastbound approaches at E 52 Street and E 55 Street
- Adding a new crosswalk across LeJeune Road at NW 37 Avenue Connector
- Upgrading pedestrian and vehicular signage
- Replacing the bridge expansion joints and guardrail
- Removing or relocating landscape due to the median and side street widening
- Upgrading street lighting at intersections

This project is anticipated to begin construction in February 2026 and will cost approximately \$7.2 million.

For information related to the project, visit: <a href="https://www.fdotmiamidade.com/design-projects/north-miami-dade/sr-953lejeune-rdnw-42-avee-8-ave-from-sr-932nw-103-ste-49-st-to-nw-135-st.html">https://www.fdotmiamidade.com/design-projects/north-miami-dade/sr-953lejeune-rdnw-42-avee-8-ave-from-sr-932nw-103-ste-49-st-to-nw-135-st.html</a>

#### SR 9336/SW 192 AVE (SW 376 ST TO SW 344 ST) AND SR 9336/SW 344 ST/PALM DR (SW 192 AVE TO SR 5/US 1)

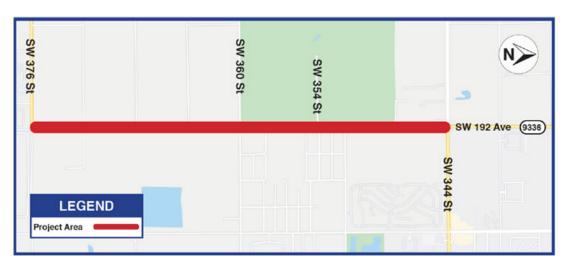

The project entails repaving and restriping the roadways of SR 9336/SW 192 Ave from SW 376 Street to SW 344 Street and SW 344 Street from SW 192 Avenue to SR 5/US 1. The design for this project is underway and divided into two segments. Specific improvements for each segment are listed below. Project construction began in Fall of 2023 and will cost approximately \$15.2 million combined.

The following benefits are included in this project:

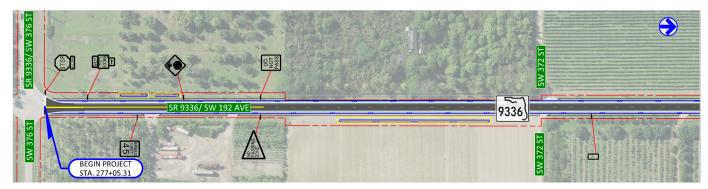

SR 9336/SW 192 Ave. from SW 376 Street to SW 344 Street Project Location Map

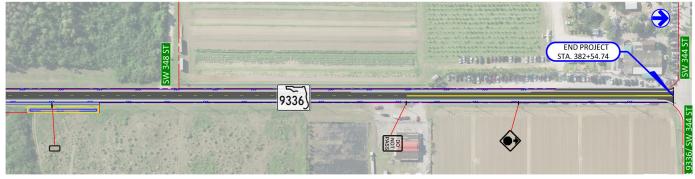

SR 9336/SW 344th Street from SW 192nd Ave to west of SR5/US-1 Project Location Map

For information about the construction schedule or related information, visit: <a href="https://www.fdotmiamidade.com/current-projects/south-miami-dade/sr-9336sw-392-st-from-everglades-national-park-to-sr-5us-2.html">https://www.fdotmiamidade.com/current-projects/south-miami-dade/sr-9336sw-392-st-from-everglades-national-park-to-sr-5us-2.html</a>

| SEGMENT LIMITS  | <ul> <li>Resurfacing to preserve and extend the service life of the roadway</li> <li>Widening the road to provide 12-foot-wide travel lanes</li> <li>Upgrading drainage</li> <li>Providing five-foot shoulders, which will function as bicycle facilities, where feasible</li> <li>Upgrading signs and pavement markings</li> <li>Installing missing regulatory and warning signs</li> <li>Installing audible and vibratory treatment to enhance safety</li> <li>Trimming trees</li> <li>Installing speed feedback signs</li> </ul>   |  |  |

SR 9336/SW 192 Avenue from SW 376 Street to SW 344 Street Construction

#### **OTHER MAJOR PROJECTS**

The following are major projects in Miami-Dade County:

#### SR 90/US 41/SW 8 ST AT SW 109 AVE PEDESTRIAN BRIDGE REPLACEMENT

This project has finalized the design phase for the installation of a pedestrian bridge over SW 8 street and the C-4 Canal west of SW 109 Avenue. The following benefits are included in this project:

The project will provide pedestrian plazas with elevators and stairs on the north-end and south-end of the pedestrian bridge. The project includes the installation of decorative LED street lighting, street signage, sidewalk, hardscaping and landscaping along SW 109 Avenue between SW 7 Terrace and SW 6 Street. It also includes upgrading pedestrian signals at SW 8 Street and SW 109 Avenue intersection. Other improvements include providing a mid-block crosswalk on the north end of SW 7 Terrace and SW 109 Avenue intersection.

SW 8th Street Pedestrian Bridge Elevation View

The project is anticipated to begin construction in Fall 2024 and will cost approximately \$38 million.

For information related to the project, visit: <a href="https://www.fdotmiamidade.com/design-projects/south-miami-dade/sr-90us-41sw-8-st-at-sw-109-ave-pedestrian-bridge-replacement.html">https://www.fdotmiamidade.com/design-projects/south-miami-dade/sr-90us-41sw-8-st-at-sw-109-ave-pedestrian-bridge-replacement.html</a>

#### WRONG WAY DRIVING INITIATIVE AT VARIOUS RAMP LOCATIONS - PHASES 1, 2, 3 & 4

While Wrong Way Driving (WWD) crashes occur randomly and less frequently than other types of crashes, they often involve more than one vehicle and can result in multiple fatalities and/or serious injuries. Supported by research, FDOT's Wrong-Way Driving Initiative explores various WWD countermeasure systems to aid in warning wrong-way drivers, sending notifications to alert other motorists and notifying law enforcement.

- 1. Detects Vehicle: Signs located on the exit ramps use system to detect vehicle traveling the wrong way.
- 2. Triggers lights: Flashing lights are turned on along sign border to alert the driver he/she is traveling in the wrong direction.
- Notifies officials: Detection system sends alert immediately to operators at an FDOT Regional Transportation Management Center (RTMC) and law enforcement officials.
- 4. Alerts other drivers: RTMC system broadcasts a wrong-way driver alert on message boards along the freeway.

The WWD Initiative supports the FDOT's commitment to achieving zero fatalities and serious injuries on the State Highway System. The following benefits are included in this project:

Prior to implementation, FDOT conducted statewide studies and various research projects to help analyze WWD trends and contributing factors, determine the effectiveness of various countermeasures and test those countermeasures. Additional research conducted by FDOT focused on addressing the factors that were considered to affect the occurrence of WWD incidents including: Impaired drivers, drivers aged 65 years and older, and tourists. Findings from this study provide guidance to proactively deploy WWD countermeasures at all the off-ramps in Florida. In Miami-Dade County, FDOT District Six has been installing various

devices to mitigate WWD occurrences on limited access facilities exit ramps including the installation of Light Emitting Diode (LED) Wrong Way Signs connected to the Department's Traffic Management Center (TMC). These improvements are being implemented in four (4) phases as described below:

- Phase 1 of this initiative proposes improvements along 11 off-ramps. Construction will be finalized in Spring 2024.
- Phase 2 proposes improvements along 24 off-ramps. Construction began in September 2023 and is scheduled to be completed by November 2025.
- Phase 3 proposes improvements along 15 off-ramps. The design-build project is ongoing, and the concept design will be advertised in August 2024 with letting in November 2024. Construction will begin in February 2025.
- Phase 4 proposes improvements along 25 off-ramps. The design-build project begins in July 2024 and is estimated to be advertised in November 2025.

In general, project improvements at each location include the installation of signage, pavement markings and Light-Emitting Diode (LED) Highlighted signs and vehicle detection systems. These improvements include:

- DO NOT ENTER signs.
- WRONG WAY sign(s).
- NO RIGHT TURN and NO LEFT TURN signs
- 2-4 dotted guideline striping for left turns between ramp entrances/exits and cross streets.
- Retroreflective yellow paint on ramp median nose where applicable.
- Straight arrow and route shield pavement marking in left-turn lanes extending from the far-side ramp intersection through the near-side ramp intersection to prevent premature left turns.
- Straight arrow and ONLY pavement message in outside lane approaching the ramp exit.
- One pair of ground-mounted Highlighted Signs with LED border lights and WWD Vehicle Detection System Assembly per ramp.
- ITS Cabinets, power service and lateral fiber drop for new Wrong Way Driving System.

Wrong Way Driving Improvements at Flagler Street (Phase 1)

For information related to this project, visit: <a href="https://www.fdotmiamidade.com/current-projects/expressways/wrong-way-driving-initiative.html">https://www.fdotmiamidade.com/current-projects/expressways/wrong-way-driving-initiative.html</a>

#### SR 860/MIAMI GARDENS DRIVE FROM EAST OF I-75 TO NW 79 PLACE

The SR860/Miami Gardens Drive from east of I-75 to NW 79th Place project is currently in the design phase. The primary purpose of this project is to improve safety and relieve congestion along Miami Gardens Drive from east of I-75 to NW 79 Place by providing access management modifications to various median openings and increasing vehicular capacity. The proposed design widens the roadway from a four-lane facility to a six-lane facility, provides for additional turn lanes at major intersections, and proposes a shared-use path on the north side of the corridor. Further improvements include milling and resurfacing of the existing pavement, replacing signal mast arms, lighting, upgrading pedestrian ramps and sidewalks to current standards, drainage improvements, and upgrades to the signing and pavement markings. Additional right-of-way acquisition is anticipated for this project. The following benefits are included in this project:

Miami Gardens Drive Proposed Typical Section

The project is anticipated to begin construction in Spring 2025 and end Spring 2027 and will cost approximately \$23 million. For information related to this project, visit: <a href="https://www.fdotmiamidade.com/design-projects/north-miami-dade/sr-860miami-gardens-drnw-186183-st-from-sr-93i-75-to-sr-823nw-57-ave.html">https://www.fdotmiamidade.com/design-projects/north-miami-dade/sr-860miami-gardens-drnw-186183-st-from-sr-93i-75-to-sr-823nw-57-ave.html</a>

#### **BICYCLE/PEDESTRIAN CORRIDOR IMPROVEMENTS**

The bicycle/pedestrian network is a component of the overall transportation system. The Department evaluates bicycle and pedestrian improvements in conjunction with all capacity and resurfacing projects.

#### Systemwide Bicycle/Pedestrian Improvements on Resurfacing Projects include the following:

- New Americans with Disabilities Act (ADA)-complaint pedestrian signal pushbuttons
- Pedestrian traffic signals at all signalized crosswalks
- Installation of missing crosswalks at signalized intersections where feasible
- Adding bicycle lanes by narrowing travel lanes where feasible
- Adding buffers/wider buffers to existing bicycle lanes where feasible

#### FDOT D6 BICYCLE/PEDESTRIAN IMPROVEMENTS:

| LOCATION  | IMPROVEMENTS   |
|---|--|
| SR A1A/Collins Ave from 41st Street to 63rd Street                            | Reconstruct, add cycle track and shared use path. Design will begin in 2029.   |
| Julia Tuttle Causeway /I- 195 From NW 12th Avenue to SR 907/Alton Rd.         | Add separated shared use path on the Julia Tuttle Causeway (PD&E in 2025, Design not funded)   |
| SR A1A/MACARTHR CWY from E. of SR 5 /Biscayne Blvd to W. of SR 907/Alton Rd . | Bike Path/Trail (Design to begin in 2025. Construction in 2028)  |
| SR 9336/Palm Drive from SW 182nd Ave to SW 192nd Ave                          | Widening from 2-4 lanes, adding a shared use path. (PD&E in 2027)  |
| SR 94/Kendall Drive from SR 997/Krome Ave to SW 167th Av                      | Bike Path/Trail (Design to begin in 2029)  |
| William Lehman Csy from SR 5/US 1 to SR A1A/Collins Ave                       | Shared Use Path (PD&E to begin in 2025)  |
| SR 9336/SW 392 Street from SW 192 Ave to Everglades National Park             | Separated Shared Use Path (PD&E in 2029)   |
| Ludlam Trail  | Construct new shared use path bridges over SR 976/Bird Road SR 90/US 41/SW 8th Street and SR 968/Flagler Street (Design is on-going. Construction in 2027) |

The following benefits are included in these projects:

Bicycle & pedestrian projects are also implemented by local agencies, who oversee construction and management. In addition, some projects are funded through the federally funded Transportation Alternatives Program (TAP), or state funded Shared Use Non-motorized (SUN) Trail Program. The Safe Routes to Schools (SRTS) program integrate safety, traffic relief, health, environmental awareness, physical activity and fitness under one program focusing on school zones.

The table below shows some of the upcoming improvements by local agencies.

#### LOCAL AGENCY BICYCLE/PEDESTRIAN IMPROVEMENTS:

| PROJECT AGENCY/<br>PROGRAM | PROJECT TYPE   | PROJECT AREA  |
|----------------------------|--|---|
| City of Miami Beach        | Bike Lane/Sidewalk   | 17 Street Bicycle Lane Project  |
| City of Miami Gardens      | Bike Path/Trail  | NW 199 St/Betty Ferguson Recreation Complex                             |
| Miami-Dade County          | Bike Path/Trail  | GGF to Industrial Park – Bike-Ped Bridge and Kiss-Ride Terminal         |
| City of Miami              | Sidewalk   | Miami River Greenway Curtis Park East                                   |
| Miami-Dade County          | Bike Path/Trail  | Bike Boulevard Demo Project – along NW 21 Ave from NW 41 St to NW 83 St |
| North Bay Village          | Bike Lane / Sidewalk                                       | Harbor Island Sidewalk Improvements                                     |
| City of Homestead          | Bike Path/Trail  | Biscayne Everglades Greenway Phase II                                   |
| City of Miami Springs      | Pedestrian Improvements including ADA DWS and landing pads | Citywide  |
| Village of Pinecrest       | Bike Path / Trail  | Kendall Drive Shared Use Path   |

| PROJECT AGENCY/<br>PROGRAM              | PROJECT TYPE                   | PROJECT AREA  |  |
|---|--------------------------------|---|--|
| City of Miami Gardens                   | Bike Path / Trail              | Shared Use Path along NW 27th Avenue with pedestrian bridge over NW 17th Avenue Canal   |  |
| Town of Cutler Bay                      | Bike Lane / Sidewalk           | Marlin Road Complete Streets  |  |
| Town of Cutler Bay                      | Bike Lane/Sidewalk             | Caribbean Boulevard   |  |
| Safe Routes to School<br>Infrastructure | Pedestrian Safety Improvements | Homestead Middle School, North Miami Beach Senior High School, Miami Jackson Senior High School, Ruben Dario Middle School, Horace Mann Middle School, Brownsville Middle School, Booker T. Washington Senior High School, Miami Southridge Senior High School, Georgia Jones-Ayers Middle, North Miami Middle School, Carol City Middle School, North Miami Senior High School |  |
| City of North Miami                     | Pedestrian Bridge              | Between NE 2nd Avenue and Griffing Boulevard  |  |
| Miami-Dade County                       | Bike Path/Trail                | Meridian Avenue Shared Use Path from Dade Boulevard to 28th Street  |  |
| City of South Miami                     | Pedestrian Bridge              | US-1 adjacent to South Miami Metrorail  |  |
| Town of Miami Lakes                     | Bike Lane/Sidewalk             | Along Montrose Road and Balgowan Road   |  |
| Village of Miami Shores                 | Bike Path/Trail                | Flagler Trail connecting residential neighborhoods with Miami Shores Recreation Complex and Community Center  |  |

The following benefits are included in these projects:

# FDOT D6 BICYCLE/PEDESTRIAN FEASIBILITY ASSESSMENTS:

| NAME   | LIMITS  | STATUS      |
|--|---|-------------|
| Little Havana Area to Brickell & Underline Route Options Assessment and Feasibility Analysis | From: SR 9/NW 27 Ave To: Underline                              | In Progress |
| SR 976 Bird Road Multimodal Gap Assessment   | From: SR 959/SW 57 St/Red Road To: SR 5/US-1/S<br>Dixie Highway | In Progress |
| SR 913/SW 26th Road Bicycle and Pedestrian Improvement Feasibility Analysis                  | From: Underline To: Rickenbacker Causeway                       | Completed   |
| SR 9336/SW 344 St Feasibility Study  | From: SW 192 Ave To: SW 182 Ave                                 | In Progress |
| SR 826 Frontage Rd Separated Bicycle Facilities  | From: NW 154th St To: NW 57th Ave/Red Road                      | Completed   |

The following benefits are included in these feasibility assessments:

# TRANSPORTATION SYSTEMS MANAGEMENT AND OPERATIONS (TSM&O)

The District Six Transportation Systems Management and Operations (TSM&O) Program Office focuses on implementing active, multi-modal traffic management strategies to optimize the safety and people-moving capacity of the regional roadway system in Miami-Dade and Monroe Counties.

The Office employs a series of innovative services and technologies to deliver transportation solutions that meet current and future traffic demand. These services include incident management, traveler information, express lanes, arterial management, and others. The combination of these strategies provides a multi-pronged approach toward reducing traffic delays and improving roadway safety to benefit all users. The following benefits are included in this project:

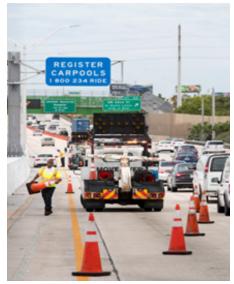

The District Six TSM&O Program is housed at the SunGuide Transportation Management Center (STMC) which serves as the main traffic hub for southeast Florida. TSM&O staff located at the STMC uses Intelligent Transportation System (ITS) devices such as closed-circuit television cameras, dynamic message signs, roadway detectors, traffic signals, and other devices to manage traffic 24 hours per day, 7 days per week. Dedicated staff monitors the roadways to provide incident clearance, publish real-time traffic information, and promote the travel-time reliability of the regional transportation network. The goal of the TSM&O staff is to optimize current operations while expanding the program to meet the future traffic needs of southeast Florida.

The TSM&O Office is committed to achieving this goal and is working to implement key projects that will achieve this mission. These projects include the installation of Wrong Way Driving Countermeasures along highway entrance ramps, installation of ITS communications on Okeechobee Road in Miami-Dade County and will be launching its first connected and automated vehicle (CAV) project in Monroe County. For more information about the program, please visit <a href="https://www.sunguide.info">www.sunguide.info</a>

## MODAL DEVELOPMENT

The FDOT Modal Development Office aims to deliver and promote a modern, sustainable and congestion free multimodal transportation system that safely and efficiently moves people and goods by rail, sea, air, aerospace, and road. This is carried out through several county initiatives and are identified below:

## STRATEGIC MIAMI AREA RAPID TRANSIT (SMART) PROGRAM

The Strategic Miami Area Rapid Transit (SMART) Program is an infrastructure investment program of projects developed to improve transportation mobility and create a transit system that will support economic growth and competitiveness in the global arena.

The SMART Program is expected to expand transit options in Miami-Dade County along six critical corridors that are linked to local, regional, national, and global economic markets as highlighted below. Another critical component of the SMART Program will be a network of Express Buses, known as Bus Express Rapid Transit (BERT), which is intended to expand South Florida's Express Lanes network with the implementation of six identified BERT express lane concepts. This innovative approach effectively expands the reach of transit in Miami-Dade County and beyond.

- Beach Corridor: Highest tourist demand in the region with major employment centers.
- East-West Corridor: Heaviest commuter travel for international, state, and local businesses.
- Kendall Corridor: One of the most congested arterial roadways with the highest demand.
- North Corridor: Key regional mobility linkage for access to jobs, the stadium, and educational facilities.
- Northeast Corridor: High transit demand and part of a critical regional corridor stretching to Palm Beach County.
- South Corridor: Experiencing the fastest population growth in Miami-Dade County.

## **North Corridor:**

FDOT is conducting the Project Development and Environmental (PD&E) study for the North Corridor. The North Corridor is a 10-mile-long corridor along NW 27th Avenue, from NW 62nd Street/Dr. Martin Luther Kind, Jr. Metrorail Station to NW 215th Avenue. The Project consists of implementing a Heavy Rail Transit (Metrorail) extension along NW 27 Avenue. The following benefits are included in this project:

The envisioned transit corridor will include public on-street transit stations located along a dedicated running way. These stations can include public or private facilities located adjacent to the corridor where potential park-and-ride or transit terminals will be considered. In October 2019, the Miami-Dade TPO selected elevated heavy rail transit as the locally preferred alternative for the North Corridor. On April 23, 2020, the TPO Governing Board accepted a report by Miami-Dade County's Department of Transportation and Public Works (DTPW) on alternative transit technologies for NW 27 Avenue and directed DTPW to issue a request for proposals to identify whether transit technologies, other than heavy rail are viable for the corridor. FDOT placed its North Corridor PD&E study on hold after the consulting with the Federal Transit Administration (FTA) until the outcome of the DTPW Request for Proposals (RFP) process is known and a final decision on the transit technology and alignment for NW 27 Avenue is made by the TPO Governing Board. On November 15, 2022, the Board of County Commissioners (BCC) passed a motion to terminate the development of the DTPW's RFP and to accelerate the implementation of the North Corridor as an elevated fixed guideway. In May 2023, FDOT and DTPW collaborated to conduct a Value Engineering (VE) Workshop to identify the best and most cost-effective methods of implementing the project. Results of the VE Workshop were formalized in a final VE Report which was completed October 2023. Currently FDOT is in the process of restarting the North Corridor PD&E with a notice to proceed (NTP) scheduled in early 2024.

For information related to this project, visit: <a href="https://www.fdotmiamidade.com/27thAvenueRapidTransit.html">https://www.fdotmiamidade.com/27thAvenueRapidTransit.html</a>

#### **FREIGHT OPERATIONS**

The FDOT Freight, Logistics and Passenger Operations (FLP); commonly known as Modal Development Office, encompasses a level of modal representation and industry engagement unlike any other state DOT organization. FLP acts as a tool to better connect, develop, and implement a freight planning process that maximizes the use of existing facilities while integrating and coordinating the various modes of transportation, including the combined utilization of both government owned and privately-owned resources.

Annually, FLP allocates funds toward transportation infrastructure improvements in all the modes. Working together collaboratively, FLP leads Florida's multimodal transportation initiatives through work with federal and local government partners in planning, coordination, financing, grant management, ridership, and regional analysis. The following benefits are included as part of this initiative:

The Modal Development Office includes Aviation, Rail, Freight, Seaports, and Transit Projects.

## **AVIATION**

MIA Central Base Pavement Rehabilitation

MIA Airport Operations and Communication Center (AOCC)

MIA Surface Management System (Aerobahn System)

MIA Terminal "E" thru "F" Connector

MIA Federal Inspection Station Refurbishment

Miami Opa Locka Executive Airport Upgrade 9L/27R Pavement Rehabilitation

Miami Opa Locka Executive Apron Rehabilitation

Miami Executive Airport Taxiway Rehabilitation

Miami Executive Airport Runway Incursion Mitigation

Dade-Collier Training and Transition Airport CCTV Camera Installation

### **RAIL**

Passenger and Freight Rail Safety Projects

Railroad Crossing Surface Rehabilitation Projects

Grade Separation on NE 203 Street

SR 826 / Palmetto Expressway (SB) Bridge Widening over the FEC

I-395 Signature Bridge over the Florida East Coast Railway (FEC)

## **SEAPORT**

Port of Miami Seaport Security Grant Program

Port of Miami Passenger Boarding Bridges

Port of Miami Cruise Terminal Improvements

Port of Miami Upland Cargo Improvements

## STATE TRANSIT BLOCK GRANT TO DTPW FOR OPERATING COSTS

This grant provides operating assistance for Miami-Dade Department of Transportation and Public Works (DTPW) Fixed Route Bus Service. The Metrobus fixed route bus service is run by Miami-Dade DTPW and operates seven days a week, 24 hours per day. A total of 73 routes – Miami-Dade DTPW directly operated regular bus service structure which are served by a total fleet of 767 buses and 30 contracted routes with 194 contractor-owned buses. Two of these Contract Routes are Express Bus Service in Monroe County with 11 buses. Metrobus includes local, feeder, circulator, limited-stop, express, and Bus Rapid Transit (BRT) Arterial Busway services. The FDOT provides 50% State Participation Rate for this program. The following benefits are included as part of this initiative:

### **FREIGHT OVERVIEW**

From agriculture and heavy equipment to daily consumables, freight movement impacts every aspect of our daily lives. It is crucial for the nation's economy to maintain a safe and reliable transportation system that moves goods efficiently. Freight transportation has been a driving force for economic productivity, global competitiveness, and job creation. Every economic sector depends on a reliable, safe, and cost-effective network to move goods and services. As a leading international hub, this statement is very relevant to the state of Florida. With goods worth approximately hundreds of billions of dollars flowing through Florida's airports and seaports, it is critical for the State to maintain and improve its extensive multimodal freight infrastructure. Today, Miami International Airport (MIA) is the leader in the Americas in international freight and the world's largest gateway to Latin America & the Caribbean. Similarly, PortMiami is the State's fifth highest port for total trade tonnage and Second highest in TEU's. It is known as a Global Cargo Gateway. These major freight hubs, along with a booming construction industry, growing population and strong local economy indicate Miami-Dade County is vital for the movement of freight throughout Florida and beyond its borders. The following benefits are included as part of this initiative:

FDOT District Six is home to many diverse communities with unique transportation freight mobility and transportation needs. These needs can be traced back to some of the State's leading freight facilities and international trade gateways such as MIA and PortMiami. The Miami-Dade County Board of County Commissioners adopted a new capital improvement program at MIA that will fund 6.8 billion in airport modernization projects over the next 5-15 years. This paves the way for future growth in passenger and cargo traffic at MIA.

PortMiami is developing the nation's first net zero carbon emission supply chain, this is in line with Miami Dade County's 2030 25% emissions reduction goal at the port. The Infrastructure investment and Jobs Act (IIJA) has awarded PortMiami two RAISE grants in support of their Cargo Mobility Optimization and Resiliency Project and the NetZero On-and-off Port Master Planning effort. PortMiami is developing the nation's first net zero carbon emission supply chain, this is in line with Miami Dade County's 2030 25% emissions reduction goal at the port. The Infrastructure investment and Jobs Act (IIJA) has awarded PortMiami two RAISE grants in support of their Cargo Mobility Optimization and Resiliency Project and the NetZero On-and-off Port Master Planning effort.

Hence, it is essential that District Six and its industrial based communities identify and invest in infrastructure improvements to position themselves for economic development and growth in cargo. Key developments and tools should be incorporated such as ITS/technologies, truck parking needs, economic impact analyses, innovative funding programs, and land use and redevelopment opportunities-helping market these industrial based communities as competitive global logistics service centers.

District Six identified the following freight-intensive sub-areas:

- Town of Medley
- City of Opa-Locka
- Port of Miami River Corridor
- City of Doral
- City of Miami Gardens
- City of Hialeah
- City of Homestead
- Monroe County.

District Six has completed all Sub-area Freight Improvement Studies. District Six plans to perform one additional Freight Study that will be countywide and look at various types of improvements we can make to our sub-areas. This will be known as the Freight Improvement Plan Study of Miami-Dade County. These studies have resulted in a comprehensive Project Bank of freight-specific and freight-oriented projects.

For information related to this project, visit: <a href="https://www.fdotmiamidade.com/district-six-freight-village-analysis-study-countywide-freight-improvement-plan.html">https://www.fdotmiamidade.com/district-six-freight-village-analysis-study-countywide-freight-improvement-plan.html</a>

## FDOT D6 SUB-AREA FREIGHT PLANNING EFFORTS:

| NAME                                    | STATUS         |
|---|----------------|
| Town of Medley Freight Improvement Plan | Completed 2017 |
| Opa-Locka Freight Improvement Plan      | Completed 2017 |
| Miami River Freight Improvement Plan    | Completed 2018 |
| Doral Freight Improvement Plan          | Completed 2018 |
